Note, It may be observed, that in the year 1718, and then only, there were coined some quarter guineas: when the weight of 110 lb. in gold was converted into such pieces, of which it consequently produced about 19,580 in tale.

As some natural necessities or disadvantages may be thought favourable to industry, so some have argued that artificial burthens may have the same effect. Sir William Temple * ascribes the industry of the Dutch entirely to the necessity, proceeding from their natural disadvantages; and illustrates his doctrine by a very striking comparison with Ireland, where (says he) by the largeness and plenty of the soil, and scarcity of people, all things necessary to life are so cheap, that an industrious man, by two days labour, may gain enough to feed him the rest of the week: which I take to be a very plain ground of the laziness attributed to the people. For men naturally prefer ease before labour, and will not take pains, if they can live idle; though when, by necessity, they have been enured to it, they cannot leave it, being grown a custom necessary to their health and to their very entertainment: nor perhaps is the change harder, from constant ease to labour, than from constant labour to ease. After which the author proceeds to confirm his doctrine, by enumerating, as above, the places where trade has most flourished, in ancient and modern times; and which are commonly observed to be in such narrow confined territories, as beget a necessity for industry.

* Account of the Netherlands, chap. 6.

It is always observed in years of scarcity, if it be not extreme, that the poor labour more, and really live better, than in years of great plenty, when they indulge themselves in idleness and riot.

This doctrine therefore, considered as has been done with regard to taxes, may be admitted in some degrees; but beware of the abuse. Taxes, like necessity, when carried too far, destroy industry, by engendering despair; and even before they reach this pitch, THEY RAISE THE WAGES OF THE LABOURER AND MANUFACTURER, AND HEIGHTEN THE PRICE OF ALL COMMODITIES. [For proof of which, see our articles LABOUR, DUTIES.] An attentive disinterested legislature will observe the point, when the EMOLUMENT CEASES, AND THE PREJUDICE BEGINS: but as the contrary character is much more common, it is to be feared, that the taxes of England are multiplied to a degree that will prove highly detrimental to art and industry: and therefore the contenders for more and more taxes, upon trade, are enemies to our commerce and navigation: were they as zealous for the reduction, or the annihilation of many of those we already have, they would shew themselves advocates for the prosperity of the nation.

REMARKS on the state of TRADE and LIBERTY since the REVOLUTION in 1688.

Upon king William's coming to the crown of these kingdoms, early application was made to him for several regulations tending to the encouragement of trade, and for establishing a great many useful manufactures among us, which had been kept under by France and others, underselling the manufactures made at home. This great prince was ever ready to hear all proposals made upon that occasion, and gave his utmost countenance to all such undertakings; but by the fondness of the nation to French commodities so much countenanced by king Charles and king James, it was no easy matter to bring the people into a due regard for those made at home. However, upon breaking out of the war with France in this reign, and prohibiting French commodities, encouragement was given for erecting several of these manufactures here, as the lustrings, alamode, and other silk manufactures for hoods

and scarves, which the king's royal consort, the excellent queen Mary, took no small pains to establish; for which articles alone, it is allowed, France drew from us above FOUR HUNDRED THOUSAND POUNDS YEARLY. For the saving of which to the nation, we were indebted to the happy era of the Revolution, which not only preserved us from the tyranny of Popery, but proved the salvation of our trade.

At the same time the manufacture of glass was established, which before we used to have from France, and also that of hats and paper. The manufacture of linen was likewise settled in several parts of the kingdom, particularly in Somersetshire, and Dorsetshire, where they made extraordinary good linen, in imitation of France; and which so increased, that in a few years it was computed, in a district of about ten miles square, they made to the value of one hundred thousand pounds worth annually. But upon the peace with France, there were so many linens run into the west, that it put that manufacture under great discouragement. At this glorious period also the manufactures of copper and brass were set on foot, which are brought to great perfection, and now in a great measure supply the nation with copper, kettles, and all sorts of copper and brass ware, which has saved the nation immense sums since that time. The making of fail-cloth, likewise, was begun and carried on to great perfection; also sword-blades, scissars, and a great many toys made of steel, which formerly we used to have from France; in the manufacturing of which, it is said, we now excel all other nations, and not only save those great sums we expended in France, but by means hereof bring in some hundred thousand pounds a year, by our Birmingham and Sheffield manufactories. The settling of salt-works, and improving of salt-springs and rock salt, hath proved very beneficial here, and saves a very great treasure yearly, which also we heretofore paid to France for salt; and a great variety of other particulars, which have proved of unpeakable benefit to the trade of this nation; and therefore, those who are true friends to our commerce, cannot be enemies to this happy revolution.

The measures we have mentioned to have been taken in the reign of king William III, in regard to the coin of the kingdom at that time, had all the happy effects that could be expected, in relation both to trade and the public credit: for thereby the greatest part of the loss by the recoinage was thrown immediately upon the king, though it was afterwards made good to him by a tax; hereby the loss was as well divided and equally spread, as could well have been contrived. When the ill condition of the money, and the necessity of recoinage it, was first taken into consideration, some were for changing the nominal values of the pieces, as if they had thought such new nominal values would really give to those pieces a different and a greater worth than that which they had before. Among these was William Lowndes, Esq; who, in an otherwise very useful book, intitled, A Report, containing an Essay for the amendment of Silver Coins, presented to the lords commissioners of his Majesty's Treasury, on the 12th day of September 1695, advanced this scheme; particularly proposing, that the piece of silver of the same goodness and weight as the undiminished crown-piece, should, for the time to come, be current for six shillings and three pennies. But this was fully answered by the judicious John Locke, Esq; in his further considerations concerning raising the value of money; in which, as well as in his former tract on the same subject, and that of the lowering of interest, he has treated of this affair, and of every thing that had relation to it, in so clear, so strong, and so masterly a manner, as to carry conviction in every page, and to leave nothing to be afterwards added, by such as should again attempt to reconsider the same matters.

And now that we have mentioned these two last pieces, we cannot but take notice also of an excellent discourse published a little before by the reverend and learned Dr William Fleetwood, afterwards lord bishop of Ely: I mean his sermon against clipping, preached before the lord mayor, &c. at Guildhall chapel, on Sunday the 16th of December, 1694, upon this text of Gen. xxiii. 16. 'And Abraham weighed to Ephron the silver which he had named, in the audience of the sons of Heth, four hundred shekels of silver, current money with the merchant.' In which he with great judgment set before his audience the nature and consequences of this pernicious practice; boldly inferred, from the vast increase of it within a few years, that the avarice of greater and richer men than such as commonly suffered for it, must have been concerned in it; and wisely foresaw the calamities that must ensue, if the most prudent and considerate steps were not taken, in the applying of a remedy to so great an evil. 'Who can tell, said he, whether every single person must not bear his own burthen, and stand to the loss of all that is wanting of due weight, of all the money he is master of? And if he must, the cry will be like that of Egypt, loud and universal; for every family will be a loser: but it will fall severest upon the poor, who from a little can spare none.'

This prince greatly increased the royal navy.

These are a few of the great things that were done in the reign of king William III, for the interest of trade and the public

public credit, and which ought never to be forgot by all true Britons.

This great prince had just views of the horrid consequences of the unrestrained progress of the power of France. With great integrity and vigour, therefore, he made it the business of his life to oppose all its mischievous motions; nor did he grow weary in the glorious toil. He had an enemy who was ever well prepared and provided, while he was often embarrassed and disappointed, and rarely attended with triumphant success: however, the preservation of Europe from absolute subjection may justly be ascribed to his arduous endeavours. He knew in what a scandalous and mercenary manner his two predecessors had surrendered themselves to the will and pleasure of the enemy, nor was he ignorant of the weak and corrupt condition of many other states. As he proved himself a friend to the liberties of Europe, and preserved its free states from being the oppressed provinces of an universal monarchy, so equally sincere was his zeal for the religious rights of mankind: he had a just detestation of Popish tyranny and usurpation on conscience. In his days, and by his means, the firm and consistent foundations were laid of what is truly valuable in civil or religious affairs. Before his time, avowing the rights of mankind was criminal and disgraceful: as they had power and opportunity, the several parties of Christians oppressed each other. To him we owe the asserting and securing our most important immunities and privileges; and to him the intellectual world is indebted for the full freedom of debating all subjects, and for avowing and defending their sentiments with decency.

His last work completed his good designs, for conveying to us the great and invaluable blessing of the Protestant succession. Had he been cut off in any of the periods of his glorious struggle for the happiness of this nation, and the welfare of all Europe, the miseries and mischiefs which must naturally have followed, would surely have equalled all the suggestions of the most melancholy imagination. But the unthinking part of the world, because wholly delivered from the greatest calamities, have not been, nor ever will, perhaps, be duly sensible.

Queen Anne's ministry, upon the treaty of Utrecht, too readily granted the French liberty to fish upon the very best fisheries on the north coast of Newfoundland, and there to build stages to dry them. They also granted them CAPE BRETON, WHICH IS SAID TO BE THE VERY BEST SPOT IN ALL THOSE SEAS FOR FISHING. Thus we see the French, by their great penetration and knowledge in the affairs of commerce, have gained from us a treasure equal to a mine of gold; and by means of the Newfoundland fishery, they have raised their naval power to the height we now experience it. See our article BRITISH AMERICA, where this matter is put in a full light. In short, notwithstanding the success of our arms in this reign, yet most of the advantages we gained in king William's time, in point of trade, were in a great measure lost, by the treaty of UTRECHT. And these advantages the French have not neglected to improve from that period of time; and the effects of their power, in consequence hereof, we have now reason to dread, unless our naval strength is so effectually exerted, as to break their measures at present, and to disable them ever after from destroying the commerce and the liberties of Great-Britain; which may now be said to be the only BARRIER that all EUROPE has left, to withstand the torrent of French and Spanish tyranny and oppression. The confused state of the nation at the accession of his late Majesty KING GEORGE to the crown of these kingdoms, is well enough known, as are the several rebellions that were raised to dethrone him, in favour of the Pretender. Notwithstanding all which, we find this our great monarch not only triumphant in his arms, but even careful in promoting the interest of our commerce, at a time when it could have been the least expected. The first remarkable particular that we meet with in relation to this important point, is

A CONVENTION made at LONDON, July 26, O. S. 1715, relating to the DUTIES laid on BRITISH WOOLLEN CLOTHS exported to the AUSTRIAN NETHERLANDS.

His Britannic Majesty's ministers having complained that the commerce of his said Britannic Majesty with the Austrian Netherlands is very much prejudiced by the high duties of importation laid upon the coarse woollen cloths sent from Great-Britain to the said Austrian Netherlands, the under-written minister and plenipotentiary of his imperial and Catholic Majesty for the treaty of barrier [see the article NETHERLANDS] at Antwerp, declares by these presents, that his Imperial Catholic Majesty will consent to the immediate reducing of the duties on the said coarse woollen cloths, according to the following specification: and that, in all other respects, the commerce of the subjects of his Britannic Majesty with the Austrian Netherlands shall remain, continue, and subsist, wholly on the same foot as it does at present, without any alteration, innovation, diminution, or augmentation to be made, under any pretext

whatsoever, 'till all the parties interested shall agree upon a treaty of commerce.

DYED WOOLLEN CLOTHS.

	Fl. Sols.
A piece of the value of above 60 florins, up to 90	3 10
A piece of the value of above 40 florins, up to 60	2 0
A piece of the value of 40 florins, and under	1 0

MIXED WOOLLEN CLOTHS.

A piece of the value of above 60 florins, up to 90	2 10
A piece of the value of above 40 florins, up to 60	1 10
A piece of the value of 40 florins, and under	1 0

WHITE WOOLLEN CLOTHS.

A piece of the value of above 60 florins, up to 90	2 10
A piece of the value of above 40 florins, up to 60	2 0
A piece of the value of 40 florins, and under	1 0
Draps de pié (cloth to lie upon floors) of all sorts, the piece	0 8

Requisition made to the council of state at Brussels, the 6th of November, 1715.

It being absolutely necessary for the service of his Imperial and Catholic Majesty to lessen immediately the duties of importation on coarse woollen cloths coming from Great-Britain and the United Provinces, on the following foot,

WOOLLEN CLOTHS DYED.

	Fl. Sols.
A piece of the value of above 60 florins, up to 90	3 10
From 40 to 60	2 0
Of 40 and under	1 0

MIXED.

A piece of the value of 60 florins, and so up to 90	2 10
From 40 to 60	1 10
Of 40 and under	1 10

WHITE.

	Fl. Sols.
A piece of the value of 60 florins, and so up to 90	2 10
From 40 to 60	2 0
Of 40 and under	1 0
Draps de pié (cloth to lie upon floors) of all sorts, the piece	0 8

And to reduce the duties of importation on brandies distilled from corn coming from Great-Britain and the United Provinces, to three florins the aum, instead of eight, which is now paid, you are required, gentlemen, to give forthwith the necessary directions in the finances, that the proper orders may be immediately issued for this purpose, and that the collectors of the duties of importation and exportation may conform themselves accordingly thereto. Done at the conference at Brussels, this 6th of November, 1715.

A copy of the resolution of the council of state, minuted in the margin of consultation of the council of the finances the 7th of November, 1715.

Having made our representation to the ministers of the conference, conformably to this consultation, and added also other reasons to enforce it, they have newly made this day another more pressing requisition to us, by which they insist absolutely that the former be put in execution, whereupon the council of the finances shall issue the orders therein specified; but it is understood that they shall not have force nor effect, unless they be approved and ratified by his Imperial and Catholic Majesty in the treaty of barrier: this last clause, however, which begins with the words, 'It is understood,' and ends with the words, 'In the treaty of barrier,' shall not be inserted in the orders to be sent to the collectors.

Order of the council of finances to the collectors of the duties.

The counsellors and commissioners of the demesnes and finances of his Imperial and Catholic Majesty. Most dear and special friends, we herewith send you, with express orders of the council of state appointed for the general government of these countries, a copy of the requisition made to them by the ministers of the conference, relating to the lessening of the duties of importation on the coarse woollen cloth coming from Great-Britain and from the United Provinces, as also for reducing the said duties on brandies distilled from corn; commanding you, by express order of the said council of state, to take care to regulate yourselves pursuant thereto, in collecting the said duties,

duties, and to give notice of it to your subalterns. Most dear and special friends, God have you in his holy keeping. Brussels, at the council of the said finances, the 12th of November, 1715.

To the collectors of the duties of importation and exportation at

Newport,	Fort St Philip,
Ostend,	Borgerhout,
Bruges,	Mechlen,
Ghent,	Turnhout,
Dendermonde,	Tirlemont.

Extract from the tariff settled the 14th of November, 1715.

N. B. A difficulty having arisen about the intention of the requisition of the 6th of November, 1715, of which mention is made in the 26th article of the treaty of barrier, it is agreed provisionally, to cause the duties of importation on all the different forts comprehended in the above tariff under the denomination of woollen cloths, to be collected according to the tenor of the said requisition of the 6th of November, 'till his Imperial and Catholic Majesty, and his Majesty the king of Great-Britain, shall agree upon it otherwise; and, in the mean while, the king's collectors and officers shall permit the said manufactures to be imported, giving notice, and taking security for the payment of the overplus duties of importation, on the foot the same shall be settled.

A letter from the Imperial envoy, count Volkra, to the lord viscount Townshend, principal secretary of state.

My Lord,

You have acquainted me that complaints are made of contraventions to the 26th article of the treaty of barrier, and I have had the honour to communicate to you what count Konigsegg has answered thereupon.

I can declare to you besides, that, for the future, there will be an exact performance of the said 26th article of the treaty of barrier, of the 15th of November, 1715, and of the convention at London, of the 26th of July, 1715, as also of the declaration in the tariff of the 14th of November, 1715, that is to say, that the duties on the petite draperie (or woollen stuffs) of England, will be collected on the foot of the coarse woollen cloths, according to the diminution expressed in the aforesaid convention at London, without any alteration, 'till it be agreed otherwise between the emperor and the king, our masters; but, in the mean time, the merchants are to give security to pay the surplus, if the matter shall be so determined between the two respective courts.

London,
August 3rd, 1716.

I am, &c.

THE COUNT VOLKRA.

REMARKS.

In order to judge the better of the merits of this COMMERCIAL CONVENTION, see our remarks on the article ROYAL EXCHANGE.

The French king having evaded the execution of the 9th article of the treaty of Utrecht, about the demolition of Dunkirk, by making a new canal at Mardyke, the next step taken by this monarch, tending to the benefit of trade and navigation, was making strong remonstrances, by that able minister, John earl of Stair, in 1715, to the court of France, for the demolition of Dunkirk and Mardyke. The effects of which were, that, in 1717, Col. Armstrong, Mr Alworth, and Mr Laffels, were appointed commissioners to inspect the demolition of the works at Mardyke, pursuant to the treaty with the late regent of France.

Another great point gained by the court of England, in the year 1715, was the signing of the BARRIER TREATY at Antwerp, by the British, Imperial, and Dutch ministers.—For the importance whereof, see our REMARKS on the articles FLANDERS, HOLLAND, and NETHERLANDS.

In 1715, we find his Majesty was able to conclude a treaty of commerce between England and Spain; and how greatly that proved to the advantage of the commerce of this kingdom, and how greatly this, and the preceding convention, contributed to supply the defects of the Utrecht treaty, see our REMARKS on the article ROYAL EXCHANGE.

In Dec. 1717, it being found by experience that guineas, and other gold coin, being too high in value, thereby diminished our quantity of silver coin, and proved very detrimental to our trade, the king issued a proclamation, declaring, That guineas should be current at no more than 21 s. and half-guineas, double-guineas, &c. proportionably; that broad-pieces of 23 s. 6 d. should be reduced to 23 s.

and those of 25 s. 6 d. to 25 s. and smaller gold pieces in proportion. See the necessity and reasonableness hereof, and how beneficial this measure proved to our commerce, under our article COIN.

November 11, 1718, at the meeting of the parliament, the king, in his speech, acquaints the Commons, That he had concluded an alliance between the two greatest princes of Europe, wherein they bound themselves to support the succession to these kingdoms in his family.—That to vindicate the faith of his former treaties, as well as to maintain those which he had lately made, and to protect and defend the TRADE of his subjects, which had in every branch been violently and unjustly oppressed by the Spaniards, it became necessary for his NAVAL FORCES to check their progress.—And that, instead of listening to his reasonable terms of accommodation, that court had lately given orders at all the ports of Spain, and of the West-Indies, to fit out privateers, and to take our ships, &c.—Accordingly the Commons approved the king's measures with regard to Spain, and raised men and money accordingly.—An order of council also is published, December the 3d, in the same year, for making general reprisals on the Spaniards, and letters of marque are granted against them.—See our articles REPRISALS, and MARQUE [LETTERS OF MARQUE].—Thus the naval power of Great-Britain being exerted to protect her commerce, Spain threatens us with the Pretender, and a squadron sails from Cadiz towards England, to carry on this design, under the conduct of the duke of Ormond; but was disabled from pursuing its course by a storm.—This was cardinal Alberoni's scheme.

December 22, N. S. A convention between the emperor, the king of Great-Britain, and the States-General, relating to the execution of certain articles of the barrier treaty, is signed at the Hague.

March 18, 1718-19. An embargo is laid on all ships outward bound: and a proclamation published, for encouraging his Majesty's ships of war and privateers to take prizes from the Spaniards, by ordering them to be distributed among the sailors.—In July 1719, the city of Messina surrenders to the Imperialists, and in the whole siege admiral Byng gave great assistance. After the surrender, he lands some English forces, who took the tower of Faro; and that opening a free passage for his ships, he came to an anchor in Paradise-road, and destroyed the Spanish men of war that lay there, which for a time ruined the naval power of Spain.—Which they have now again recruited, and if not again destroyed, are likely, in concert with their dear allies the French, to make another attempt to ruin the commerce of these kingdoms, and play their Popish tool again upon Great-Britain.—May their fate prove always as it hitherto has done!

In resentment for this treatment against our trade and liberties, his Majesty formed the project to make himself master of PERU in AMERICA, and accordingly admiral Hoffer sails towards those parts with a squadron of men of war, and was to be joined by others; but this expedition was frustrated by the winds.—A design also was formed by his Majesty to attack the CORUNNA in SPAIN, and vice-admiral Mighells sailed from St Helens with six men of war, as a convoy to 4000 land forces under the command of lord viscount Cobham, but they landed at Vigo; and at the first summons the town surrenders, as does also the citadel a few days after.—They found there above 100 pieces of cannon, above 2000 barrels of powder, and 8000 muskets designed for the descent in England, which they brought away, as also several other pieces that were at Pont à Védra.—The English troops being reimbarcked at Vigo, the fleet sails back for England with them, and arrives November 14.—In consequence of this spirit and vigour exerted by our navy, the king of Spain was compelled to dismiss his prime minister cardinal Alberoni, as a first step towards a peace with the emperor, king George and the regent of France.

In 1720, the unhappy affair of the South Sea company was broached. See our article SOUTH SEA COMPANY; which was greatly detrimental to the public credit; notwithstanding which, from the wisdom of his Majesty's councils the public credit was restored, and the national debts put into a state of redemption. See our articles CREDIT, [PUBLIC CREDIT] DEBTS, [NATIONAL DEBTS] and FUNDS.

August 4, 1721, his Majesty puts an end to the session of parliament with a speech, acquainting both houses, among other things, that he had renewed all our TREATIES of COMMERCE with Spain, upon the same foot as they were settled before the late war.—October 19, the parliament meets, and his majesty in his speech recommends to the nation, To improve the favourable opportunity, which the conclusion of a peace with Spain, and between Sweden and Muscovy at that time, gave, of extending our commerce, upon which, as his Majesty observes, THE RICHES AND GRANDEUR OF THIS NATION CHIEFLY DEPEND: and for that purpose, to make the exportation of our own manufactures, and the importation of the commodities, used in the

the manufacturing of them, as practicable and easy as may be, by taking off the duties upon these branches, &c.—And to supply ourselves with naval stores from our plantations in America.—For the importance of these points to the commerce and navigation of the kingdom, see our articles MANUFACTURES and NAVAL STORES.

The most considerable acts passed this session in regard to trade, were, 1. For taking off the duty upon salt used in the curing of red and white herrings, and laying a proportionable duty upon all red and white herrings consumed at home only.—2. An act for giving further encouragement for the importation of naval stores.—3. For encouragement of the silk manufacture of this kingdom; and for taking off several duties on merchandizes exported; and for reducing the duties upon beaver-skins, pepper, mace, cloves, and nutmegs imported; and for importation of all furs, of the product of the British plantations in this kingdom only; and that the two corporations of assurances, on any suits brought on their policies, shall be liable only to single damages and costs of suit. See our article ASSURANCE.

In May 1722, his Majesty has full information of a conspiracy formed against him; the first intelligence of which came from the duke of Orleans, regent of France.—The apprehensions of this plot did so affect the public credit, that South Sea stock fell from 90 to 77, and the timorous and disaffected began a run upon the Bank: but the funds soon rose again to their former value: which ended in the banishment of Dr Atterbury, late bishop of Rochester, and the execution of Christopher Layer, &c.

For the support of the trade of our sugar colonies, his Majesty made a grant of the islands of ST VINCENT and ST LUCIA, near BARBADOES, to John duke of Montague, and a patent passed the seals for that purpose. See the importance of these places, under our article BRITISH AMERICA.

In December 1722, the emperor of Germany granted a patent for establishing an East-India company in the Austrian Netherlands, but the courts of GREAT-BRITAIN, FRANCE, and HOLLAND, made so strong an opposition to this design, that it was afterwards laid aside. See our articles AUSTRIAN NETHERLANDS, and OSTEND EAST-INDIA COMPANY. This year the governors of New-York, Virginia, and Pennsylvania, in order to support an interest with the Indian nations at Albany, with the SACHIMS, or KINGS of the AMERICAN NATIVES, called the FIVE NATIONS, or RIVER INDIANS, in which all former leagues between these governments and the said Indians were confirmed. Likewise,

Sir William Keith, governor of Pennsylvania, entered into a treaty with the SASQUEHANA INDIANS, wherein those people agreed to remove back into the woods, and leave a tract of 100,000 acres of land for the use of the ENGLISH PLANTERS.

April 24, 1724.—His Majesty puts an end to the session of parliament by a speech. The chief acts passed in relation to trade, were, 1. For repealing certain duties therein mentioned, payable upon coffee, tea, cacao-nuts, chocolate, and cacao-paste imported, and for granting certain inland duties in lieu thereof; and for prohibiting the importation of chocolate ready made, and cacao-paste.—2. For the better viewing, searching, and examining, all drugs, medicines, &c. in all places where the same shall be exposed to sale, or kept for that purpose, within the city of London and suburbs thereof, or within seven miles circuit of the said city.—3. For encouraging the GREENLAND FISHERY.

May 16, 1724.—King George sends a circular letter to the universities of Oxford and Cambridge, declaring his intention of appointing two professors of modern history and languages, one in each university, with a stipend of 400 l. per annum a-piece.—How a knowledge in these essentials might tend to enable people of distinction who are sent as ambassadors, &c. to foreign courts, to promote the commerce and the honour of the nation, is too obvious to need animadversion.—And this I doubt not but his Majesty had chiefly in view: however that design has been neglected since.

In April 30, 1725.—A treaty of peace is concluded at Vienna, between the emperor and the king of Spain; wherein king Philip renounces all the pretensions to his dominions in Italy and the Netherlands, and they mutually engage for the reciprocal defence and guaranty of all the kingdoms and provinces which they actually possessed, and the order of succession, as settled in their respective families, &c.—They also sign a private treaty, wherein the emperor engages to concur in employing force for having Gibraltar restored to Spain; to use means for placing the Pretender upon the British throne; and that his daughter, the archduchess, should be married to the infant of Spain.—The next day they signed a treaty of commerce for settling an East-India company at Ostend, which gave great umbrage again to the English and Dutch.

The chief acts passed this session for the benefit of trade, were, 1. For encouraging the silk manufactures of this kingdom. 2. For preventing the clandestine running of goods, &c. 3. For rating such unrated goods and merchandize, as

VOL. II.

are usually imported into this kingdom, and pay duty ad valorem, upon the oath of the importer; and for ascertaining the value of all goods and merchandize not inserted in the former, or present book of rates.

January 20, 1725-6.—The parliament meets. The king acquaints both houses, that the negotiations and engagements entered into by some foreign powers, which seemed to have laid the foundation of new troubles in Europe, and to threaten his subjects with the loss of several of the most advantageous branches of their trade, had obliged him to enter into a defensive alliance with the most Christian king, and the king of Prussia, &c.

February 24, 1725-6.—The convention of the royal burghs in Scotland presents an address to his Majesty, in which they remonstrated against the malt-tax, as a burthen too heavy for their country to bear: that it rendered them incapable of carrying on the fishing trade, and such other branches of commerce and manufacture as Scotland was proper for: that their poverty, and want of coin, the great decay of their trade, and the meanness of their grain, were melancholy truths, &c.—Therefore they prayed relief.—They afterwards petitioned the commons concerning it; as did likewise the shires of Renfrew, Bamff, &c.—In consequence of which the commons order, that some clauses should be inserted in the malt-bill, for the satisfaction of the Scots, namely, That the produce of it in Scotland, after 20,000 l. paid into the Exchequer, should be applied towards the encouragement of the trade and manufactures of that kingdom, &c.—And king George sends a letter to the royal burghs of Scotland, to put them in mind of improving their fisheries and manufactures, with the money granted them for that purpose at the Union. See our articles ABERDEENSHIRE and SCOTLAND, for what has been since done, for the promotion of the trade of that part of the united kingdom.

May 24, 1726.—King George puts an end to this session of parliament with a speech. The chief acts passed this session were, 1. For giving encouragement to the Greenland fishery. 2. To prevent unlawful combinations of workmen employed in the woollen manufactures, and for the better payment of their wages.

The emperor, in consequence of the alliance before mentioned with his Catholic Majesty, prohibits the importation of the English woollen manufactures into Sicily.

August 20, 1726.—The East-India company obtain a charter for incorporating their towns of Madraspatan, Bombay, and Fort William, to be governed each of them by a mayor and aldermen, who are empowered to make bye-laws, and exercise criminal as well as civil jurisdiction, except in cases of high treason.

In the latter part of this year, great preparations were made in Spain for war, both by sea and land; and a camp of about 20,000 men was formed at St Roch, near Gibraltar, under pretence of rebuilding the castle of Old Gibraltar. Upon repeated advices of their real intention, the garrison was reinforced with three regiments, and the Spaniards afterwards invested and opened the trenches before Gibraltar; and tho' some did not scruple to propagate, that Gibraltar would be given up by the late king, yet we know it was gallantly defended.—For the great importance of this place to the trade of these kingdoms, see our article MEDITERRANEAN.

January 17, 1726 7.—The parliament meets. His Majesty opens it with a long and pathetic speech, wherein he acquaints both houses, with the secret and offensive alliances concluded between the emperor and the court of Spain: That the placing the pretender upon the throne of this kingdom, was one of the articles of the secret engagements; and the giving up the trade of this nation to one power, and Gibraltar and Portmahon to another, was made the price and reward of imposing upon this kingdom a Popish pretender, &c.—The lords and commons resolve, that the measures he had taken were honourable, just, and necessary, for preventing the execution of the dangerous engagements entered into in favour of the pretender; for preserving the dominions belonging to the crown of Great-Britain by solemn treaties, and particularly those of Gibraltar and Minorca; and for maintaining to his people their most valuable rights and privileges of commerce, and the peace and tranquillity of Europe.

March 25, 1727.—General letters of reprisals are granted against the Spaniards.—The court of Vienna seeming disposed to attack the DUTCH BARRIER in the NETHERLANDS [see our articles FLANDERS, HOLLAND, and NETHERLANDS, for the importance hereof to Great-Britain], king George orders an augmentation of 30 companies of foot, and that the 10,000 auxiliaries which England was obliged to send to the assistance of the States, should hold themselves in readiness for embarkation.

May 15, 1727.—His Majesty puts an end to this session of parliament with a speech.—The chief acts passed this session for the benefit of trade, were, 1. For the better regulation of the woollen manufacture, and for preventing disputes among the persons concerned therein; and for limiting a time for prosecuting for the forfeiture, appointed by an act of the 12th year of his Majesty's reign, in case of payment of the

workmen's wages in any other manner than in money. 2. For preventing frauds and abuses in the dyeing trade. 3. For the free importation of cochineal, during the time therein limited. 4. For the better regulation of the linen and hempen manufactures in that part of Great-Britain called Scotland. 5. For encouraging and promoting fisheries and other manufactures and improvements in Scotland.

The treaty of Hanover having broke the measures of Spain and the emperor, preliminary articles for a general pacification are agreed upon at Paris, between the ministers of the emperor, his Britannic Majesty, the Most Christian king, and the States-General.

By the first article, the Ostend company was to be suspended for the space of seven years. By the 5th all hostilities were to cease, immediately after the signing of the articles: and, by the seventh a congress was to be opened at Aix-la-Chapelle, in four months from the day of signing.

So inconsistent have men been in their judgment of this reign, that some have thought, that our naval power was not so vigorously exerted during it, as it should have been, and others that it was exerted to too great lengths, by destroying the Spanish fleet in the Mediterranean, by Sir George Byng: notwithstanding these different opinions, certain it is, that the latter destroyed, at that time, the growing naval power of Spain, and utterly disappointed the great designs of an able and enterprising minister. And the fleets of admiral Hoffer, Sir John Jennings, Sir Charles Wager, and Sir George Walton, absolutely defeated the Imperial and Spanish designs before taken notice of.

The invasion and rebellion in 1718, are less remembered than that of 1715, because not one person suffered death on that account. The rebellion likewise intended by the late king of Sweden seems to have been forgot, though it gave some uneasiness to king George's reign; for had that implacable monarch lived, his designs against Denmark would probably have succeeded, and then he would have had leisure for transporting his hardy troops into Scotland.

Had the succession of this prince [king George] taken place before the change of the ministry at the latter end of queen Anne's reign, it would have been infinitely more happy, not only for the nation, but for the lasting tranquillity of the liberties of Europe. France would then have been compelled to give up the Spanish monarchy. By advantages in trading to the dominions of Spain, in Europe and America, and by several concessions, we should have had ample means of repairing the losses sustained by a long and expensive war. The house of Bourbon had been reduced within such bounds, as not to have been able to have become the terror and scourge of their neighbours, as they seem disposed to be at present.

King George I. came to a people, who had been corrupted both in their political and religious notions, and had been taught an aversion to our NATURAL ALLIES, and to all FOREIGN PROTESTANTS, while an esteem and affection for France, and a tenderness for many doctrines of POPERY, had been infused into them with great success; and these prejudices had indisposed the nation to submit to a PROTESTANT PRINCE, while the dangers from a POPISH ONE were not attended to. The advantages likewise of a prosperous war, and many valuable branches of commerce, had been given up or neglected, and the revenue was loaded with a very heavy debt; and yet the authors of these calamities had the art and assurance to impute the consequences of them to the king and his ministers.

These points seem as necessary to be inculcated at this time of day, as ever they were.

Notwithstanding the unhappy affair of the South Sea scheme, yet the wise measures at length pursued, the reduction of interest took place, from 6 to 4 per cent. and the NATIONAL DEBTS put into a state of redemption; than which nothing could have a happier tendency to establish the public credit, after the year 1720.

GEORGE II.

The reader will observe, that consistent with the plan of this work, we have included in the account before given, called A SUMMARY OF THE SUPPLIES AND THE WAYS AND MEANS for the raising all monies from the time of the revolution in the year 1688, to the end of the reign of George II. in the year 1759, the sum total raised in each distinct year, since the said year 1688; by which the reader will easily satisfy himself of the whole sum raised in each reign, by adding the yearly sums together belonging to each reign. We shall only observe, that in the long reign of Geo. II. there was coined as follows, viz.

By WEIGHT.			By TALE.		
lb.	oz.	dwt. grs.	l.	s.	d.
249,592	7	12	21	11,662,215	19
98,180	9	6	0	304,360	8

Total value coined in the reign of Geo. II. } 11,966,576 7 3½

TEA is distinguished in name as it differs in colour, flavour, and size of the leaf. The chief of several sorts are, however, the leaves of the same tree, only differing according to the seasons at which they are gathered, and the manner of the

drying. To enumerate the several sub-distinctions were endless: the general division is into three kinds; the ordinary green tea, the finer green tea, and the bohea: to one or other of these, all the other kinds may be referred. See the article БОИЕА, where the nature and qualities of India teas are described at large.

REMARKS.

Tea being an article of very great consumption in these dominions, and the smuggling thereof proving an extraordinary detriment to the PUBLIC REVENUE, a committee of the honourable house of commons was appointed in the year 1745, to inquire into the causes of the most infamous practice of smuggling, and consider of the most effectual method to prevent the said practice, and to report their opinion therein to the house; and this committee having examined into some of the causes of the said practice, and considered of methods for prevention thereof, came to the following resolutions, in consequence of the evidence that was laid before them.

Resolved, That it is the opinion of this committee, That the high duties charged upon teas and other commodities, have been one cause of the infamous practice of smuggling.

Resolved, That it is the opinion of this committee, That the act of indemnity passed in the last session of parliament, for persons guilty of the infamous practice of smuggling, was not extensive enough for the pardon of several persons therein concerned.

Resolved, That it is the opinion of this committee, That the not effectually prosecuting owners of vessels used in carrying on the pernicious practice of smuggling, is another cause of that infamous practice.

Resolved, That it is the opinion of this committee, That the exposing to sale the boats, and other vessels taken from persons carrying on the practice of smuggling, by means of which, such boats or vessels are often bought by the same or other persons carrying on the same pernicious practice, is another cause of the continuance, and an encouragement of smuggling.

Resolved, That it is the opinion of this committee, That the easy composition of the penalties incurred by persons convicted of running, or being concerned with others in running, landings, or disposing of uncustomed goods, is another cause of the said pernicious practice.

Resolved, That it is the opinion of this committee, That the want of proper penalties and punishment to be inflicted upon officers of the excise and customs for neglect of duty, or misbehaviour in their respective offices, is another cause of the said pernicious practice.

Resolved, That it is the opinion of this committee, That lowering the duties on tea, and other commodities, would be one means to prevent the said pernicious practice.

Resolved, That it is the opinion of this committee, That a general act of indemnity to all persons guilty of any crimes against the laws for preventing the running uncustomed goods, (except such as have been guilty of murder) will be one other means to put a stop to the infamous practice of smuggling.

Resolved, That it is the opinion of this committee, That the burning the boats and other vessels belonging to, and taken from persons concerned in the infamous practice of smuggling, will be one other means to prevent the said practice.

Resolved, That it is the opinion of this committee, That the compelling seamen and seafaring men taken on board any ship or vessel employed in running uncustomed goods, or otherwise concerned in landing or disposing of the same, to serve for a certain time on board his Majesty's ships of war, would be one other means to prevent the infamous practice of smuggling.

Resolved, That it is the opinion of this committee, That the giving a reward for the discovering and apprehending all such persons who have followed the infamous practice of smuggling either by sea or land, or as riders, would be another means for putting an end to the infamous practice of smuggling.

Resolved, That it is the opinion of this committee, That the incapacitating all persons who shall hereafter be convicted of running uncustomed goods, for voting at elections for members of parliament, will be a means of preventing the infamous practice of smuggling.

Resolved, That it is the opinion of this committee, That the prosecuting such subjects of his Majesty as shall resort to the ports of France, and carry with them intelligence in time of war, as guilty of high treason, would be another means of preventing smuggling.

This committee of the house of commons, appointed at the beginning of the sessions 1745, to inquire into the state of smuggling, was brought about by the incessant application of the right honourable Stephen Theodore Janßen, Esq; late lord mayor of the city of London, and now chamberlain of the said city. In consequence of which, an act for the reduction of the tea-duty to one half of what it was before, passed; and this took place according to the plan formed by that zealous patriot for this purpose; which act took place at

TEA

Midsummer 1745, to the prodigious increase of the public revenue, as will appear by the following particulars. The act for reducing the tea-duty commenced the 24th of June, 1745. Before this period, the revenue arising from tea had been gradually sinking from 200,000l. per annum, to about 140,000l. which last sum arose from about 600,000 lb. weight only of tea, which then paid duty. The present state of the revenue, from the great effects of this act, stands thus:

	lb. of tea.	Excise.	Custom.
1746	1,900,000	1,200,000	1,28,000
1747	2,000,000	210,000	28,000
1748	2,600,000	280,000	50,000 Here com-
1749	2,700,000	280,000	50,000 menced
1750	2,700,000	280,000	50,000 the 5 per
1751	2,800,000	310,000	58,000 cent. on
1752	3,000,000	315,000	58,000 dry goods.
1753	3,200,000	345,000	58,000

l. 2,200,000 l. 380,000

l. 2,200,000 total excise.
380,000 total custom.

2,580,000

1,420,000 deduct for 8 years, at
[140,000 l. per ann.

Benefit by the act 1745, l. 1,160,000

TEA

So that the revenue has been benefited by this act, in eight years, 1,460,000l. excepting only the 5 per cent. on dry goods, which took place in 1747-8; besides which, the India company, previous to this act, sold barely the cargoes of three tea-ships annually, whereas they now sell the cargoes of seven tea-ships annually, for the least; and if the company receives no benefit from this, it must be admitted that their navigation is increased, by so much, thereby.

The above said saving to the revenue having prevented the laying on of additional taxes, manifests the important services that the late right honourable the lord mayor of London has really done, in this respect, for these kingdoms; and which, it is to be hoped, will neither be forgot by the kingdom in general, or by the government in particular: and to what this ANNUAL SAVING to the nation may amount, in a long course of years, is not easy to say.

Nor is this the only advantage which has accrued to the nation from the indefatigable endeavours of this illustrious magistrate; it is an experimental confirmation of the truth of two of the principal resolutions of the aforesaid committee, viz, 1. That it is the opinion of the committee, That the HIGH DUTIES charged upon teas and other COMMODITIES have been one cause of the infamous practice of smuggling. 2. That it is the opinion of this committee, That LOWERING THE DUTIES on teas, and other commodities, would be one means to prevent the said pernicious practice.

What other eminent services this honourable gentleman has really done, and has attempted still further to do, for the benefit of the commerce of these kingdoms, see our articles LINEN, and SMUGGLING.

Mr Alderman Janffen having, since the last edition of this work, published the Reports of the Committee of the Honourable House of Commons, concerning SMUGGLING, together with the following account of the Tea-trade, shewing in one view the whole state of the tea importation, consumption and revenue, from Midsummer 1745, (when the reduction of two shillings per pound took place) to New Christmas, 1763; we think it useful to introduce the same as it stands, viz.

TEA Imported by the EAST-INDIA Company, for Twelve Years before the Act passed for the Reduction of Excise upon TEA, commencing at Midsummer 1745.

From Christmas 1733 to Christmas	1734	-	720,900 lb.	-	-	-	-	1740	-	1464,700 lb.

Total Exportation, to Ireland and America for four years	
Making for the medium of one year's exportation	
lb. 938,193	
234,543	

OBSERVATIONS on the above.
1. THIS experimental trial upon the article of tea, was the first of the kind, of any material consequence, which was ever made to prove, That the lowering of a high duty upon an article of consumption hath considerably advanced the produce of the public revenue upon such article, by occasioning the surprising general increase of its consumption.
2. It shews, That a foreign commodity, even of a luxurious nature, may become a general article of consumption, and be rendered fashionable and habitual, amongst all ranks and degrees of people, in consequence of reducing a high duty thereon to a moderate one, and thereby augment the revenue, in proportion to the general augmentation of the consumption of such foreign commodity.
3. It indicates, the next degree to a demonstration, that duties upon commodities may be strained to so high a pitch, as to cause a general diminution in the consumption, and consequently to occasion a proportionable diminution in the public revenue, which used to arise from the high duty.

It excites the unfair trader to act in concert with the smuggler, and the latter to hazard his life to reap the advantage which so great a temptation lays before him. It induces the consumer to enter into a close connection with the smuggler, in order to come at the commodity, which fashion and pride have made necessary to him, since his pocket cannot otherwise reach it.
4. It proves, that the revenue has been increased, by lowering the former high duty; and that to a sum so considerable, as above FIVE MILLIONS AND A HALF STERLING: That the East India Company, computing their profit on teas at one shilling on the pound, has gained above TWO MILLIONS SIX HUNDRED THOUSAND POUNDS STERLING thereby; and, That the nation in general has been proportionable gainers, by the extra increase of its navigation.
5. It proves, That the price of teas has fallen so very considerably, in consequence of the government's adopting this plan. That the custom of tea-drinking has, since, become universal throughout the kingdom, amongst all degrees of people; That the smuggling of this article is greatly abated;

and, That a surprising increase in the consumption of sugars has ensued, to the great improvement of the sugar colonies, as well as the great increase of the revenue, by the duty on sugars: and all these consequences have naturally attended an increase in the consumption of teas; chiefly and principally owing to the lowering the high duty thereon.
It must be observed, however, That the total increase in the revenue arising upon tea, from Midsummer 1745 to New Christmas 1763, as above represented, is not wholly to be ascribed to the reducing the excise duty upon tea at that period; the last subsidies of 1747 and 1759, which have taken place since, contributing about SIX HUNDRED THOUSAND POUNDS to the above increase; and this sum has been gained by the revenue in the additional increase of the consumption of sugars, which has gone hand in hand with that of teas.— But to the produce of the two last subsidies, the proposer of the plan for reducing the excise upon teas in 1745 lays no sort of claim.
LONDON, March, 1763.

STEPH. THEOD. JANSSEN.

FIN

TIN is a white shining metal, containing a certain blueness; it is of so pliable a nature, that it may be bent into any form: as to hardness, it is between silver and lead, softer than the former, but considerably harder than the latter, and is the lightest of all metals: its weight to gold, by computation, is as 3 to 8; and something more.

R E M A R K S.

For the methods of assaying and smelting this metal, see the articles **ASSAY** and **SMELTING**; see also **METALLURGY**, **ORE**, **MINERALOGY**.

TOBACCO. The manner of planting and ordering tobacco in Virginia is thus: in the twelve days they begin to sow the seed in beds of fine mould, and when the plants be grown to the breadth of a shilling, they are fit to replant into the hills: for in their plantations they make small hills, about four feet distant from each other, somewhat after the manner of our hop-yards. These hills being prepared against the plants be grown to the forementioned bigness (which is about the beginning of May), they then, in moist weather, draw the plants out of their beds, and replant them in the hills, which afterwards they keep with diligent weedings. When the plant hath put out so many leaves as the ground will nourish to a substance and largeness that will render them merchantable, then they take off the top of the plant: if the ground be very rich, they let a plant put out 12 or 16 leaves before they top it; if mean, then not above 9 or 10, and so according to the strength of their soil: the top being taken off, the plant grows no bigger; but afterwards it will put out suckers between their leaves, which they pluck away once a week, 'till the plant comes to perfection, which it doth in August: then in dry weather, when there is a little breeze of wind, they cut down what is ripe, letting it lie about four hours on the ground, 'till such time as the leaves, that stood strutting out, fall down to the stalk; then they carry it on their shoulders into their tobacco-houses, where other servants taking it, drive into the stalk of each plant a peg, and, as fast as they are pegged, they hang them up by the pegs on tobacco-stalks, so high each other, that they just touch, much after the manner they hang herrings in Yarmouth. Thus they let them hang five or six weeks, 'till such time as the stem in the middle of the leaf will snap in the bending of it; then, when the air hath so moistened the leaf as that it may be handled without breaking, they strike it down, strip it off the stalk, bind it up in bundles, and pack it into hogheads for use.

Sometimes they are forced to plant their hills twice or thrice over, by reason of an earth-worm, which eats the root; and when the plant is well grown, they suffer damage by a worm that devours the leaf, called a horn-worm (an eruca, or canker-worm) which is bred upon the leaf; if these worms be not carefully taken off, they will spoil the whole crop.

In the year 1667, in August, there happened all over Virginia a gulf, or storm, of wind and rain, which continued for three days with such violence, that the like was hardly ever heard of. It began, and continued blowing, at east, with such fierceness, that above one half of their crop of tobacco, which was then standing in their fields, was blown away, and torn to pieces: the trees in the woods, all over the country, were blown up by the roots, in innumerable quantities; the waters in the bay, in some places, were drove a great way into the woods, and the greatest part of those that housed tobacco, had their tobacco-houses blown down, and their tobacco spoiled: so that there was not fully one part of three saved of what would have been made that year. The planters houses are built all along the sides of the rivers, for the conveniency of shipping: they build after the English manner, whitening the inside of their houses with mortar, made of burnt oyster-shells, instead of lime.

They have pure and wholesome water, which they fetch wholly from springs, whereof the country is so full, that there is not a house but hath one nigh the door.

The laws relating to tobacco are at the end of Letter T, on the Business of the Customs.

R E M A R K S.

By a pretty exact computation made a few years since, there is annually imported into Great-Britain, between 60 and 70,000 hogheads of tobacco: we will suppose 66,000, two-thirds of which are re-exported to France, Germany, Holland, &c. so that there remain for home consumption 22,000 hogheads; the duties whereof, reckoned at 15 l. per hoghead (at which in most cases they may be computed) will amount to 330,000 l. Now there is not much above one-half of that sum which comes annually into the Exchequer; so that there has been manifestly lost to the public revenue, about 165,000 l. by the frauds at importation, re-exportation, and by bonding the duties.

This is upon supposition that no part of the 44,000 hogheads which are exported, was run or re-landed from DUNKIRK, and the isles of GUERNSEY, JERSEY, and MAN, into ENGLAND, SCOTLAND, and IRELAND, as has evidently

appeared to have been the case. But, if to this we add only $\frac{1}{4}$ part of what is exported to be re-landed or run (as that, at least, has been shewn to be the case) there is an additional loss to the revenue of 75,000 l. more, which sums together make 240,000 l. See the articles **MAN** [Isle of MAN,] **SCOTLAND**, and **SMUGGLING**.

To prevent such disadvantages to the public revenue, which arise from this pernicious and detestable practice, the expedient which seems the most eligible is, the same that has been successfully tried in relation to tea, viz. that of **LOWERING THE DUTIES** [see the article **TEA**], for it has appeared with respect to the article of tea, that in proportion as the temptation to smuggling has abated, the less detriment has the public revenue sustained. And why the like experiment made upon tobacco may not have the same good effect, cannot be proved 'till it be effectually tried. See our article **SCOTLAND**.

Tobacco being a bulky commodity, gives great employment for our shipping, and therefore is a branch of trade that cannot be too much encouraged and protected; especially so, since our dear friends the French seem at present to be seized with a wonderful longing to ease us of the trouble and expence of supporting our tobacco colonies any longer. See our article **PLANTATIONS**, and such others as are from thence referred to.

T R A D E.

Some **MAXIMS** relating to **TRADE**, that should seem to be confirmed in the course of this work.

I. That the lasting prosperity of the landed interest depends upon foreign commerce. See our article **LANDED INTEREST**.

II. That the increase of the wealth, splendor, and power of Great-Britain and Ireland, depend upon exporting more in value of our native produce and manufactures, than we import of commodities from other nations, and bringing thereby money into the kingdom, by the means of freight by shipping. See our article **BALANCE OF TRADE**, and **REMARKS** on the article **FREIGHT**.

III. That domestic and foreign trade, as they are the means of increasing the national treasure, of breeding seamen, and of augmenting our **MERCANTILE** and **ROYAL NAVIES**, they necessarily become the means of our permanent prosperity, and of the safety and preservation of our happy constitution. See the articles **SEA DOMINION**, **NAVAL AFFAIRS**, **SEAMEN**, **SHIPPING**.

IV. That the constant security of the **PUBLIC CREDIT**, and the payment of interest and principal of the public creditors, depend upon the prosperous state of our trade and navigation, and not upon any crafty and chimerical expedients. See the articles **CREDIT** [**PUBLIC CREDIT**], **DEBTS** [**NATIONAL DEBTS**], **FUNDS**, **MONEYED INTEREST**.

V. That gold and silver is the measure of trade, and that they are a commodity, and may be exported, especially in foreign coin, or bullion, as well as any other commodity. See our articles **BULLION**, **COIN**, **MONEY**, **EAST-INDIA TRADE** in general, **EAST-INDIA COMPANY**, **PEGU**, **SIAM**, and such other articles as we have referred to from the conclusion of the article **SILVER**, as having an affinity with these political points.

VI. That the increase of trade and navigation greatly depends, not only upon the increase of husbandry and agriculture, but also on the increase of ingenious working artists of every kind, in order to improve the perfection and delicacy of our **OLD MANUFACTURES**, and to discover such **NEW TRADES** and **MANUFACTURES**, as will enable us, at least, to keep pace in wealth and power with our rival nations, if we cannot go beyond them. See our articles **AGRICULTURE**, **HUSBANDRY**, **MANURE**, **LANDED INTEREST**, **ARTIFICERS**, **MECHANICAL ARTS**, **MANUFACTURERS**, **TAPESTRY**.

VII. That the support of a constant succession of **TRADING ARTISTS** amongst us of every class, greatly depends upon due public encouragement. See the beforementioned articles, and also that of **CLOTH**.

VIII. That the support of a constant succession of ingenious trading artists, generally depends upon the improvements made from time to time in useful philosophy. See our articles **CHEMISTRY**, **PHILOSOPHY-EXPERIMENTAL**, **ROYAL SOCIETY OF LONDON**, and divers other articles.

IX. That the constant prosperity of our trade and navigation, greatly depends upon the introducing into this nation various wise and necessary establishments and practices for their regulation and encouragement, that other nations have adopted, and we seem equally to stand in need of. See our article **CHAMBER OF COMMERCE**, with our **REMARKS** thereon, **SEAMEN**, for a voluntary register of them, so to encourage this body of men, that the arbitrary and disagreeable practice of pressing these brave fellows may be laid aside, and the **ROYAL NAVY** never want hands upon any sudden emergency. See also the articles **CANDIDATE**, **ASPHALTUM**, **CONSULS**, **FACTORS**, **DANCING-MASTER**,

MASTER, DIRECTION-CHAMBER, DIRECTOR OF TRADING COMPANIES IN FRANCE, INDIA-HOUSE OF SPAIN, PAINTING, PAPER-TREE, PATENTS, PORCELAIN [REMARKS thereon], LEVANT TRADE, FRENCH AMERICA, FRENCH AFRICAN TRADE and COMPANY, FRANCE, MEDAL, NAVAL AFFAIRS, SEA DOMINION, SEA BRITISH, SHIPPING.

X. That the constant support of our trade and navigation, greatly depends upon the judgment, skill, and address, of our BRITISH MERCHANTS and TRADERS in general; and to that end, the course of their education, more especially of the former, should be no way inferior to that of any class of men in the community. See our article of MERCANTILE COLLEGE.

XI. That the constant prosperity of our trade and navigation, greatly depends upon the knowledge thereof, as founded upon national principles, which the British nobility and gentry shall obtain, in order wisely to regulate the same at all times in their legislative capacity, for the true interests of the kingdom in general. See our article PARLIAMENT [MEMBER of PARLIAMENT].

XII. That the constant prosperity of our trade and navigation, greatly depends upon the knowledge therein, that our ministers abroad as well as at home shall have, in order constantly to communicate to the court of England, such matter on commercial affairs, as may procure to their country all advantages in relation thereto, as times and occasions may happily offer. See our articles CONSUL, COUNCIL of COMMERCE, MARITIME or MARINE AFFAIRS, TREATIES of COMMERCE.

XIII. That as many, and as great estates and honours and dignities, have been acquired by the practical arts and political knowledge of commerce, as by any other means whatsoever. See our article COMMERCE.

XIV. That the constant prosperity of our trade and navigation, greatly depends on the wise regulation of our TAXES, MONEY-AFFAIRS, and the preservation of the PUBLIC CREDIT; and that such knowledge cannot be obtained, without a due knowledge of trade, as founded on national principles. See the articles REVENUE and TAXES, and such other heads as we refer to therefrom. See also the articles CREDIT [PUBLIC CREDIT], DEBTS, [NATIONAL DEBTS], FUNDS, MONEY, MONIED INTEREST.

XV. That the constant prosperity of our trade and navigation, depends upon being able to sell our native produce and manufactures as CHEAP, and as good in QUALITY, in foreign countries, as our trading competitors can afford to do; and that this depends upon the due regulation of our TAXES, and the cultivation of LAND. See our articles DUTIES, EXPORTATION, LABOUR, MANURE, and such other, as we have referred to occasionally upon this topic throughout our work.

XVI. That the constant prosperity of our trade and navigation, depends upon a well-grounded knowledge in political arithmetic; and that depends upon a right knowledge in commercial affairs, the public revenues, and the policy, especially in regard to the trade and money-affairs of foreign nations, and well-timed treaties of commerce. See our articles POLITICAL ARITHMETIC, PEOPLE, POOR, REVENUE, TAXES, TREATIES of COMMERCE.

XVII. That the prosperity of our trade and commerce may be greatly promoted, by encouraging the study thereof at our UNIVERSITIES, as has been lately done at CAMBRIDGE, by that eminent patriot the late right honourable lord viscount Townshend; and also by proper private allocations to promote the same, as has been so laudably begun of late in this kingdom. See our article ROYAL SOCIETY of LONDON, with a brief account thereof of the Society of ARTS, MANUFACTURES, and COMMERCE.

XVIII. That the constant prosperity of our trade and navigation, greatly depends upon the knowledge of our country gentlemen in natural history, and such useful philosophy as we have recommended throughout this work. See our articles SOLE, CLAY, EARTH, FARMING, HUSBANDRY, MINERALOGY, &c. and divers other heads.

XIX. That the constant prosperity of our trade and navigation, and the support of the public credit, greatly depends upon the suppression of smuggling. See our articles MAN [ISLE of MAN], SMUGGLING, TEA, TOBACCO.

XX. That the constant prosperity of our trade and navigation, greatly depends upon the suppression of the pernicious parts of the business of stock-jobbing, the discouragement of bubbles, and the upholding of no exclusive trading companies but such as tend to promote navigation, and to bring a balance of treasure into the nation. See our articles ACTIONS, BUBBLES, SOUTH-SEA COMPANY, STOCK-JOBBER; see also COMPANIES and MONOPOLY, and all the chief great foreign trading companies throughout Europe, whose histories are briefly given in this work, in order to judge the better how far it may be necessary for this kingdom to preserve, regulate, or annihilate, particular trading corporations.

XXI. That the constant prosperity of our trade and navigation, greatly depends upon increasing the trade of the nation

to the utmost, between the mother-country and her colonies and plantations in America. See AMERICA, BRITAIN [GREAT-BRITAIN], BRITISH AMERICA, NAVAL STORES, FRENCH AMERICA, SPANISH AMERICA, PORTUGUEZE AMERICA; and all our articles relating to the commerce of Africa.

XXII. That the constant prosperity of our trade and navigation, greatly depends upon restraining the anti-treaty and unjustifiable encroachments of France and Spain on our trade and colony-poseissions, as well in Europe as in America: See, besides the preceding articles, those of COLONIES, FRANCE, and PLANTATIONS; the latter of which displays the perfidy of France to all Europe for this century past; and the article FRANCE shews how steadily that nation has pursued the point of universal monarchy, and what strides they have already made thereto, which seem to be too little attended to.

XXIII. That the constant prosperity of our trade and navigation, greatly depends upon Great-Britain's preserving a constant friendship and good understanding with the United Provinces, and the preserving to them a good barrier against FRANCE. See our articles FLANDERS, FISHERIES, HOLLAND, NETHERLANDS, and UNITED PROVINCES.

XXIV. That the constant prosperity of our trade and navigation, greatly depends upon taking less of the produce and manufactures of other nations, as they decline in the importation of ours, and in the taking more of the produce of those countries which increase in their imports of our produce and manufactures. See the articles EXPORTATION, IMPORTATION, and SPAIN.

XXV. That the constant prosperity of our trade and navigation, greatly depends upon keeping up such a naval power as is able to break the measures of France and Spain, or any other potentates, when they are calculated to injure us; and the way to do that effectually, is to destroy their trade by sea, and their royal navies, as we did those of Spain in the year 1718. See the articles NAVAL AFFAIRS, SEA DOMINION, SEA BRITISH.

XXVI. That the constant prosperity of trade to our American colonies, greatly depends upon securing NOVA SCOTIA in particular, as a barrier on one side to our most northern colonies on the continent, and to maintain a dignity and alliance among the Indian nations, as also to take CAPE BRETON again out of the hands of France, and deprive them of all share in the Newfoundland fisheries; and also to secure and promote, on the other side, against both France and Spain, the colony of GEORGIA. [See our article BRITISH AMERICA.] Which has been done by the TREATY of PEACE made in 1763. See AMERICA, FLORIDA, CANADA, and NEWFOUNDLAND.

XXVII. That the constant prosperity of the trade of our sugar colonies, greatly depends on their being always in a condition to prevent a surprize from France, as was attempted in the year 1706; and is likely soon to be so again. That their preservation depends greatly on securing to ourselves the possession of the NEUTRAL ISLANDS, and annoying as much as possible the FRENCH SUGAR ISLANDS, especially MARTINIQUE and HISPANIOLA. See our articles AMERICA, BRITISH AMERICA.

XXVIII. That the constant prosperity of the trade and navigation of our sugar islands, greatly depends upon our destroying the FRENCH AFRICAN TRADE and settlements in Africa, and well fortifying our own settlements and factories in that part of the world, and extending the inland trade of Africa. See all our articles relating to the AFRICAN TRADE; and see also that of the EAST-INDIA COMPANY, wherein are suggested some measures, whereby that company might probably be made instrumental to the great increase of the African trade, and destructive of that of France, which is the grand support of all the FRENCH SUGAR ISLANDS. See our articles ENGLISH AFRICAN COMPANY, and FRENCH AFRICAN COMPANY.

XXIX. That the security and improvement of our trade to ASIA, and the injury to that of FRANCE, would greatly depend upon our discovery of the NORTH-EAST PASSAGE to China and Japan; and that, as it is currently reported this discovery is very likely to be made by a worthy subject of the king of Great-Britain, at a trifling charge, it is certainly for the interest of the nation cheerfully to encourage it, at the public expence; or the East-India company should do it, for their own interest. See our article SIBERIA.

XXX. That the constant prosperity of our trade to ITALY, TURKEY, and the LEVANT, will ever depend on the preservation of Gibraltar to the crown of Great-Britain. See our article MEDITERRANEAN.

XXXI. That the constant security of our trade to and from our sugar colonies, and the effectual prevention of the SPANISH DEPREDATIONS in AMERICA, in particular, will depend upon securing to ourselves some certain POSSESSIONS in America, which may prove of as much service to the protection of our trade in that part of the world, as Gibraltar is to our Italian and Turkey trades.—But what possessions these are, I have had the honour to lay before the * * * * *, whom I thought it my duty to apprise in time of a matter of

of such consequence to his kingdoms, as being communicated to me from intelligence not to be doubted of.

XXXII. That the constant prosperity of the trade, and the permanent preservation of the liberties, as well of the United Provinces as of Great-Britain itself, would be better secured than by any other possible means whatever, perhaps; provided that GREAT-BRITAIN and HOLLAND became ONE NATION and ONE PEOPLE, governed by ONE and the SAME SOVEREIGN, according to the constitution of England, and to possess and enjoy the same privileges of trade, navigation, and religion, as England does, and the Dutch to contribute to the support of the British crown, in a proportion suitable to their abilities.

Let it be supposed, for a moment, that this was the case, the consequence would be, that England and Holland, so happily united, might increase their strength in ASIA to what degree they pleased, and keep all other European powers, and even the natives, in subjection to them, as to oblige them to take a far greater quantity of our produce and manufactures than they do at present, &c.—This would give a new turn to the commerce over all ASIA.

These united potentates might also increase their power in AFRICA to what degree they pleased, and keep the French and Portuguese there in what subjection they thought proper. This would contribute soon and effectually to the ruin of the French sugar islands, which would of course fall into the hands of the maritime powers conjunctively.—Thus becoming masters of the sugar trade of the whole world, the wealth and power of both would so magnify, that the Protestant states might bid defiance to all the opposition of France, or any united Catholic powers whatever.

The due exertion of the united strength of these maritime potentates, would so strengthen the power and interest of both in America, as to give law there to the Spaniard, as well as the French, and ever after prevent their insults and depredations towards the trade and commerce of either.—This would tend to prevent war and bloodshed hereafter, upon these occasions. See our article VIRGINIA.

With regard to Europe, likewise, every one will at once see the weight and influence that such a powerful union must have. Great-Britain and Holland would then be in a capacity to uphold and maintain, at their OWN EXPENCE, a sufficient BARRIER for the support and protection of the United Provinces against France, and any other combined powers.—Upon this supposition, the Protestant interest would have such a formidable bulwark for its support, that the whole Popish strength joined to subvert it could never effect; and whatever conquest these Protestant maritime powers made in Popish countries, either in America, Asia, or Africa especially, NEED NEVER BE GIVEN UP, AS WE ARE NOW OBLIGED TO DO, AT THE CONCLUSION OF EVERY WAR, THAT FRANCE MIGHT NOT OVER-RUN THE UNITED PROVINCES OF THE STATES GENERAL.

This, also, would for ever after save us the eternal expence of land wars in FLANDERS and GERMANY; for when a solid and impregnable barrier was once procured to the Dutch, and the marine of England and Holland were united, and conducted by ONE and the SAME SOVEREIGN, for their mutual safety and benefit, the crest of France WOULD FOR EVER FALL, and POPERY HAVE NO LONGER A CHANCE TO EXTIRPATE PROTESTANTISM AND LIBERTY FROM THE FACE OF THE WHOLE EARTH.

By this means, the fisheries of Great-Britain and Holland in Europe and America would become common to both powers; the commerce and navigation, of both would be daily increasing, and none but such Protestant powers as should enter into their PROTESTANT CONFEDERACY, need have any share scarce in the commerce of the world: and, as empire follows trade, trade would give the PROTESTANT INTEREST the empire of the globe, and gradually tend to extirpate Popery, tyranny, and slavery, from the face of the earth. And 'till that comes to be the case, GREAT-BRITAIN and HOLLAND, and all the PROTESTANT POWERS, will be ever liable to be distracted, and their governments subverted, by the machinations of FRANCE. See the article FRANCE, and the shocking treachery of that nation, in our REMARKS upon the article PLANTATIONS.

Measures of this kind would soon give a new turn to the affairs of the United Provinces; they would then truly become the High and Mighty States, instead of the Poor and Distressed, which may one day be their fate, if something is not done to support them effectually, against being overrun by France, when a war shall break out.

And if the States-General depend upon the support only of Great-Britain, why should not their dominions be annexed to the crown of Great-Britain? They have experienced that their own republican constitution is not built upon so solid a basis as that of Great-Britain; the people do not enjoy so great a share of liberty, nor so solid security for their property now, as they would do under their united government. And as to their religion, they will enjoy the same toleration under the government of the crown of Eng-

land as they do at present. What hinders then but the wife and honest men of both states should think seriously of a matter of this high concernment to the mutual interest and happiness of both? More especially so, whilst the POPISH POWERS are not only making PROTESTANT PRINCES converts to their religion, but daily erecting NEW MONARCHIES for their POPISH PRINCES, the more effectually to enslave the world. It is, however, enough for me to start the hare; let others hunt it, whom it more nearly concerns, and are well paid for so doing. See our articles FLANDERS, HOLLAND, NETHERLANDS, UNITED PROVINCES, and WAR.

REMARKS on our article TRADE since the last war, and the Definitive treaty of peace of 1763.

Our public debts and taxes having increased by the last war to a degree of incredibility in so few years, did we not experience it; it becomes incumbent on us; it is indeed now indispensably requisite, that we should augment our trade, and thereby so enrich the nation, as to be able to disincumber ourselves of a great part of our national debts and taxes, if we shall not be able to get rid of the whole. For if we do not, the immense weight of them will so impede, clog, and stagnate our whole commerce and navigation, as to give our competitors the opportunity to engross the whole of our foreign trade out of our hands; since they underfold us at most foreign markets before the last war, and are in a capacity to do it far more so than they were then.

If our domestic policy is such, that we cannot soon lessen the tax-incumbrances upon our whole trade, France in particular will pour in, by smuggling into Great-Britain, an inundation of their cheaper commodities and manufactures; which will insensibly destroy our own domestic trade, starve our industrious manufacturers and artists, or draw them into their kingdom, to the unspeakable enrichment of France, and improvement of Great-Britain. The same likewise will be done in our continental colonies; for while they can have French wares and manufactures from 15 to 40 per cent. cheaper than English, it is ridiculously weak to flatter ourselves that our colonists will purchase English, when they can by any methods whatsoever obtain French. And it is to be feared, that the utmost efforts of the government will not be able much to lessen smuggling either in Great-Britain, or in the continent of America; the coasts being so extensive, in both, though far more so in the one than the other, since our new acquisitions in North America: much less shall we be able to suppress the infamous practice of smuggling in either. So contiguous also are our island colonies to those of France, and so interwoven with them are our new-acquired ones, that France will most certainly run away with a great share of the trade, which appertains to the British empire, by the same means of smuggling.

TREATIES OF COMMERCE AND NAVIGATION.

Under the article MARITIME, or MARINE AFFAIRS, we have given the substance of the most essential treaties which have had relation to the trade and navigation of the principal states of Europe for above a century past: and having occasionally cited divers others that have taken place since, and given the substance of them, we shall here give the reader those together that have not been taken due notice of, as the necessity of our matter, or as the brevity of our articles in the dictionary required.

TREATY OF NAVIGATION and COMMERCE between the most serene and most potent princess ANNE, by the grace of God, queen of Great-Britain, France, and Ireland, and the most serene and most potent prince LEWIS XIV, the most Christian king: concluded at Utrecht the 31st day of March, O. S. 1713.

I. It is agreed and concluded between the most serene and most potent queen of Great-Britain, and the most serene and most potent the most Christian king, That there shall be a reciprocal and intirely perfect liberty of navigation and commerce between the subjects on each part, through all and every the kingdoms, states, dominions, and provinces, of their royal Majesties in Europe, concerning all and singular kinds of goods in those places, and on those conditions, and in such manner and form, as is settled and adjusted in the following articles.

II. But that the commerce and friendship between the subjects of the abovesaid parties may be hereafter secure, and free from all trouble and molestation, it is agreed and concluded, That if at any time any ill understanding and breach of friendship, or rupture, should happen between the crowns of their royal Majesties (which God forbid), in such case, the term of six months shall be allowed after the said rupture, to the subjects and inhabitants on each part, residing in the dominions of the other, in which they themselves may retire, together with their families, goods, merchandizes, and effects, and carry them whither they shall please; as likewise, at the same time, the selling and disposing of their goods, both

both moveable and immoveable, shall be allowed them freely, and without any disturbance; and, in the mean time, their goods, effects, wares, and merchandizes, and particularly their persons, shall not be detained or troubled by arrest or seizure; but rather, in the mean while, the subjects on each side shall have and enjoy good and speedy justice, so that, during the said space of six months, they may be able to recover their goods and effects intrusted as well to the public, as to private persons.

III. It is likewise agreed and concluded, That the subjects and inhabitants of the kingdoms, provinces, and dominions of each of their royal Majesties, shall exercise no acts of hostility and violence against each other, either by sea or land, or in rivers, streams, ports, or havens, under any colour or pretence whatsoever; so that the subjects of either party shall receive no patent, commission or instruction, for arming and acting at sea as privateers, nor letters of reprisal, as they are called, from any princes or states which are enemies to one side or the other; nor by virtue, or under colour of such patents, commissions, or reprisals, shall they disturb, insult, or any way prejudice or damage the aforesaid subjects and inhabitants of the queen of Great-Britain, or of the most Christian king; neither shall they arm ships in such manner as is aforesaid, or go out to sea therewith. To which end, as often as it is required by either side, strict and express prohibition shall be renewed and published in all the regions, dominions, and territories of each party whatsoever, that no one shall in any wise use such commissions, or letters of reprisal, under the severest punishment that can be inflicted on the transgressors, beside restitution, and full satisfaction to be given to those to whom they have done any damage; neither shall any letters of reprisal be hereafter granted, on either side, by the said confederates, to the detriment, or disadvantage of the subjects of the other, except in such cases only as justice is denied or delayed; to which denial or delay credit shall not be given, unless the petition of the person who desires the said letters of reprisal be communicated to the minister residing there on the part of the prince against whose subjects they are to be granted, that, within the space of four months, or sooner, if possible, he may evince the contrary, or procure the performance of what is due to justice.

IV. The subjects and inhabitants of each of the aforesaid confederates shall have liberty freely and securely, without licence or passport general or special, by land or sea, or any other way, to go into the kingdoms, countries, provinces, lands, islands, cities, villages, towns, walled or unwalled, fortified or unfortified, ports, dominions, or territories whatsoever, of the other confederate in Europe, there to enter, and to return from thence, to abide there, or to pass through the same; and, in the mean time, to buy and purchase, as they please, all things necessary for their subsistence and use: and they shall be treated with all mutual kindness and favour. Provided, however, that in all these matters they behave and comport themselves conformably to the laws and statutes, and live and converse with each other friendly and peaceably, and keep reciprocal concord by all manner of good understanding.

V. The subjects of each of their royal Majesties may have leave and licence to come with their ships, as also with the merchandizes and goods on board the same (the trade and importation whereof are not prohibited by the laws of either kingdom) to the lands, countries, cities, ports, places, and rivers, of either side in Europe, to enter into the same, to resort thereto, to remain and reside there, without any limitation of time; also to hire houses, or to lodge with other people, and to buy all lawful kinds of merchandizes where they think fit, from the first workman or seller, or in any other manner, whether in the public market for the sale of things, in mart-towns, fairs, or wheresoever those goods are manufactured or sold. They may likewise lay up and keep in their magazines and warehouses, and from thence expose to sale, merchandizes brought from other parts; neither shall they be in any wise obliged, unless willingly, and of their own accord, to bring their said merchandizes to the marts and fairs, on this condition, however, that they shall not sell the same by retail in shops, or any where else: but they are not to be loaded with any impositions or taxes on account of the said freedom of trade, or for any other cause whatsoever, except what are to be paid for their ships and goods, according to the laws and customs received in each kingdom. And moreover they shall have free leave, without molestation, to remove themselves, and, if they happen to be married, their wives, children, and servants, together with their merchandizes, wares, goods, and effects, either bought or imported, whensoever and whithersoever they shall think fit, out of the bounds of each kingdom, by land and by sea, on the rivers and fresh waters, discharging the usual duties, notwithstanding any law, privilege, grant, immunity, or custom, in any wise importing the contrary. But, in the business of religion, there shall be an intire liberty allowed to the subjects of each of the confederates, as also, if they are married, to their wives and children; neither shall they be compelled to go to the churches, or to be present at the religious worship in any other place: on the contrary, they may, without any molestation, perform their religious exer-

YQ.L. II.

cises after their own way, although it be forbid, by the laws of the kingdom, privately, and within their own walls, and without the admittance of any other persons whatsoever. Moreover, liberty shall not be refused to bury the subjects of either party, who die in the territories of the other, in convenient and decent places, to be appointed for that purpose, as occasion shall require: and the dead bodies of those who are buried shall be no ways molested. The laws and statutes of each kingdom shall remain in full force, and shall duly be put in execution, whether they relate to commerce and navigation, or to any other right; those cases only being excepted, concerning which it is determined in the articles of this present treaty.

VI. The subjects of each party shall pay the tolls, customs, and duties of import and export, through all the dominions and provinces of either party, as are due and accustomed; and that it may be certainly known what are all the said tolls, customs, and duties of import and export, it is likewise agreed that tables, shewing the customs, port-duties, and imposts, shall be kept in public places, both at London, and in other towns within the dominions of the queen of Great-Britain, and at Roan, and other towns of France, where trading is used, whereto recourse may be had, as often as any question or dispute arises concerning such port-duties, customs, and imposts, which are to be demanded in such manner, and no otherwise, as shall be agreeable to the plain words and genuine sense of the aforesaid tables. And if any officer, or other person in his name, shall under any pretence, publicly or privately, directly or indirectly, ask or take of a merchant, or of any other person, any sum of money, or any thing else, on account of right, dues, stipend, exhibition, or compensation, although it be under the name of a free gift, or in any other manner, or under any other pretence, more or otherwise than what is prescribed above: in such case, the said officer or his deputy, if he be found guilty, and convicted of the same before a competent judge, in the country where the crime was committed, shall give full satisfaction to the party that is wronged, and shall likewise be punished according to the direction of the laws.

VII. Merchants, masters of ships, owners, mariners, men of all kinds, ships, and all merchandizes in general, and effects of one of the confederates, and of his subjects and inhabitants, shall, on no public or private account, by virtue of any general or special edict, be seized in any the lands, ports, havens, shores, or dominions whatsoever of the other confederate, for the public use, for warlike expeditions, or for any other cause, much less for the private use of any one; nor shall they be detained by arrests, compelled by violence, or under any colour thereof, or in any wise molested or injured. Moreover, it shall be unlawful for the subjects of both parties to take any thing, or to extort it by force, except the person to whom it belongs consents, and it be paid for with ready money; which, however, is not to be understood of that detention and seizure which shall be made by the command and authority of justice, and by the ordinary methods, on account of debt or crimes; in respect whereof the proceeding must be by way of law, according to the form of justice.

VIII. Furthermore it is agreed and concluded, as a general rule, That all and singular the subjects of the most serene queen of Great-Britain, and of the most serene and most Christian king, in all countries and places subject to their power on each side, as to all duties, impositions, or customs whatsoever, concerning persons, goods, and merchandizes, ships, freights, seamen, navigation and commerce, shall use and enjoy the same privileges, liberties, and immunities at least, and have the like favour in all things, as well in the courts of justice as in all such things as relate either to commerce, or to any other right whatever, which any foreign nation, the most favoured, has, uses, and enjoys, or may hereafter have, use, and enjoy.

IX. It is farther agreed, That, within the space of two months after, a law shall be made in Great-Britain, whereby it shall be sufficiently provided, that no more customs or duties be paid for goods and merchandizes brought from France to Great-Britain, than what are payable for goods and merchandizes of the like nature imported into Great-Britain from any other country in Europe; and that all laws made in Great-Britain since the year 1664, for prohibiting the importation of any goods and merchandizes coming from France, which were not prohibited before that time, be repealed; the general tariff made in France the 18th day of September, in the year 1664, shall take place again; and the duties payable in France by the subjects of Great-Britain, for goods imported and exported, shall be paid according to the tenor of the tariff abovementioned, and shall not exceed the rule therein settled, in the provinces whereof mention is there made, and in the other provinces the duty shall not be payable otherwise than according to the rule at that time prescribed. And all prohibitions, tariffs, edicts, declarations, or decrees, made in France since the said tariff of the year 1664, and contrary thereunto, in respect to the goods and merchandizes of Great-Britain, shall be repealed. But whereas it is urged, on the part of France, that certain merchandizes, that is to say, manufactures of wool, sugar, salted fish, and the product of whales, be excepted out of the rule of the abovementioned tariff,

tariff, and likewise other heads of matters belonging to this treaty remain, which having been proposed on the part of Great-Britain, have not yet been mutually adjusted, a specification of all which is contained in a separated instrument, subscribed by the ambassadors extraordinary and plenipotentiaries on both sides: it is hereby provided and agreed, That, within two months from the exchange of ratifications of this treaty, commissaries on both sides shall meet at London, to consider of, and remove the difficulties concerning the merchandizes to be excepted out of the tariff of the year 1664, and concerning the other heads, which, as is above said, are not yet wholly adjusted. And at the same time the said commissaries shall likewise endeavour (which seems to be very much for the interest of both nations) to have the methods of commerce on one part, and of the other, more thoroughly examined, and to find out and establish just and beneficial means on both sides, for removing the difficulties in this matter, and for regulating the duties mutually. But it is always understood and provided, that all and singular the articles of this treaty do, in the mean while, remain in their full force, and especially that nothing be deemed, under any pretence whatsoever, to hinder the benefit of the general tariff of the year 1664, from being granted to the subjects of her royal Majesty of Great-Britain, and the said British subjects from having and enjoying the same, without any delay or tergiversation, within the space of two months after a law is made in Great-Britain, as aforesaid, in as ample manner and form as the subjects of any nation, the most favoured, might have and enjoy the benefit of the aforesaid tariff, any thing to be done or discussed by the said commissaries to the contrary, in any wise notwithstanding.

X. The duties on tobacco imported into France, either in the leaf or prepared, shall be reduced hereafter to the same moderate rate, as the said tobacco of the growth of any country in Europe or America, being brought into France, does or shall pay. The subjects on both sides shall also pay the same duties in France for the said tobacco; there shall likewise be an equal liberty of selling it; and the British subjects shall have the same laws as the merchants of France themselves have and enjoy.

XI. It is likewise concluded, That the imposition, or tax, of 50 sols Tournois laid on British ships in France for every ton, shall wholly cease, and be from henceforward annulled. In like manner, the tax of 5 s. sterling laid on French ships in Great-Britain for every ton, shall cease; neither shall the same, or any the like impositions be laid hereafter on the ships of the subjects on either side.

XII. It is further agreed and concluded, That it shall be wholly free for all merchants, commanders of ships, and others the subjects of the queen of Great-Britain, in all places of France, to manage their own business themselves, or to commit them to the management of whomsoever they please; nor shall they be obliged to make use of any interpreter or broker, nor to pay them any salary, unless they chuse to make use of them. Moreover, masters of ships shall not be obliged, in loading or unloading their ships, to make use of those workmen, either at Bourdeaux or in any other places, as may be appointed by public authority for that purpose; but it shall be intirely free for them to load or unload their ships by themselves, or to make use of such persons in loading or unloading the same as they shall think fit, without the payment of any salary to any other whomsoever; neither shall they be forced to unload any sort of merchandizes, either into other ships, or to receive them into their own, or to wait for their being loaded longer than they please. And all and every the subjects of the most Christian king shall reciprocally have and enjoy the same privileges and liberty in all places in Europe subject to the dominion of Great-Britain.

XIII. It shall be wholly lawful and free for merchants and others, being subjects either to the queen of Great-Britain, or to the most Christian king, by will, or any other disposition, made either during the time of sickness, or at any other time, before or at the point of death, to devise or give away their merchandizes, effects, money, debts belonging to them, and all moveable goods, which they have or ought to have, at the time of their death, within their dominions, and any other places belonging to the queen of Great-Britain, and to the most Christian king. Moreover, whether they die, having made their wills, or intestate, their lawful heirs and executors, or administrators, residing in either of the kingdoms, or coming from any other part, altho' they be not naturalized, shall freely and quietly receive and take possession of all the said goods and effects whatsoever, according to the laws of Great-Britain and France respectively; in such manner, however, that the wills, and right of entering upon the inheritances of persons intestate, must be proved according to law, as well by the subjects of the queen of Great-Britain, as by the subjects of the most Christian king, in those places where each person died, whether that may happen in Great-Britain or in France, any law, statute, edict, custom, or droit d'aubaine whatever, to the contrary notwithstanding.

XIV. A dispute arising between any commander of the ships of either side and his seamen, in any port of the other party,

concerning wages due to the said seamen, or other civil causes, the magistrates of the place shall require no more from the person accused, than that he give to the accuser a declaration in writing, witnessed by the magistrate, whereby he shall be bound to answer that matter before a competent judge in his own country: which being done, it shall not be lawful either for the seamen to desert their ship, or to hinder the commander from prosecuting his voyage. It shall moreover be lawful for the merchants on both sides, in the places of their abode, or elsewhere, to keep books of their accounts and affairs, as they shall think fit, and to have an intercourse of letters in such language or idiom as they shall please, without any molestation or search whatsoever: but if it should happen to be necessary for them to produce their books of accounts, for deciding any dispute and controversy, in such case they shall be obliged to bring into court the intire books or writings, but so as that the judge may not have liberty to inspect any other articles in the said books; neither shall it be lawful, under any pretence, to take the said books or writings forcibly out of the hands of the owners, or to retain them, the case of bankruptcy only excepted; neither shall the said subjects of the queen of Great-Britain be obliged to write their accounts, copies of letters, ads, or instruments, relating to trade, on stamped paper, in French papier timbré, except their day-book, which, that it may be produced as evidence in any law-suit, ought, according to the laws, which all persons trading in France are to observe, to be subscribed gratis by the judge, and signed with his own hand.

XV. It shall not be lawful for any foreign privateers (not being subjects of one or of the other confederates) who have commissions from any other prince or state in enmity with either nation, to fit their ships in the ports of one or the other of the aforesaid parties, to sell what they have taken, or in any other manner whatever to exchange either ships, merchandizes, or any other ladings; neither shall they be allowed even to purchase victuals, except such as shall be necessary for their going to the next port of that prince from whom they have commissions.

XVI. The ships of both parties being laden, sailing along the coasts or shores of the other, and being forced by storm into the havens or ports, or coming to land in any other manner, shall not be obliged there to unlade their goods, or any part thereof, or pay any duty, unless they do of their own accord unlade their goods there, or dispose of any part of their lading: but it may be lawful to take out of the ship, and to sell (leave being first obtained from those who have the inspection of sea affairs) a small part of their lading, for this end only, that necessities, either for the refreshment or victualling of the ship, may be purchased; and, in that case, the whole lading of the ship shall not be subject to pay the duties, but that small part only which has been taken out and sold.

XVII. It shall be lawful for all and singular the subjects of the queen of Great-Britain and the most Christian king, to sail with their ships with all manner of liberty and security, no distinction being made who are the proprietors of the merchandizes laden thereon, from any port to the places of those who are now, or shall be hereafter at enmity with the queen of Great-Britain, or the most Christian king. It shall likewise be lawful for the subjects and inhabitants aforesaid, to sail with the ships and merchandizes afore mentioned, and to trade with the same liberty and security from the places, ports, and havens of those who are enemies of both or of either party, without any opposition or disturbance whatsoever, not only directly from the places of the enemy, aforementioned, to neutral places; but also from one place belonging to an enemy to another place belonging to an enemy, whether they be under the jurisdiction of the same prince, or under several. And as it is now stipulated concerning ships and goods, that free ships shall also give a freedom to goods, and that every thing shall be deemed to be free and exempt, which shall be found on board the ships belonging to the subjects of either of the confederates, although the whole lading, or any part thereof, should appertain to the enemies of either of their Majesties, contraband goods being always excepted, on the discovery whereof matters shall be managed according to the sense of the subsequent articles. It is also agreed, in like manner, that the same liberty be extended to persons who are on board a free ship, with this condition, that although they be enemies to both or either party, they are not to be taken out of that free ship, unless they are soldiers, and in actual service of the enemies.

XVIII. This liberty of navigation and commerce shall extend to all kinds of merchandizes, excepting those only which follow in the next article, and which are signified by the name of contraband.

XIX. Under this name of contraband, or prohibited goods, shall be comprehended arms, great guns, bombs, with their fuzees, and other things belonging to them, fire-balls, gun-powder, match, cannon-ball, pikes, swords, lances, spears, halberds, mortars, petards, granadoes, salt-petre, muskets, musket-balls, helmets, head-pieces, breast-plates, coats of mail, and the like kinds of arms proper for arming soldiers, musket-

musket-rests, belts, horses, with their furniture, and all other warlike instruments whatever.

XX. These merchandizes which follow shall not be reckoned among prohibited goods; that is to say, all sorts of cloths, and all other manufactures woven of any wool, flax, silk, cotton, or any other materials whatever; all kinds of cloaths and wearing apparel, together with the species whereof they are used to be made; gold and silver, as well coined as uncoined; tin, iron, lead, copper, brads, coals; as also wheat and barley, with any other kind of corn and pulse; tobacco, and likewise all manner of spices; salted and smoked flesh, salted fish, cheese and butter, beer, oils, wine, sugars, and all sorts of salt, and, in general, all provisions which serve for the nourishment of mankind, and the sustenance of life. Furthermore, all kinds of cotton, hemp, flax, tar, pitch, ropes, cables, sails, sail-cloths, anchors, and any part of anchors; also ship-masts, plank, boards, and beams, of what trees soever, and all other things proper either for building or repairing ships; and all other goods whatever, which have not been worked into the form of any instrument or thing prepared for war, by land or by sea, shall not be reputed contraband, much less such as have been already wrought and made up for any other use; all which shall wholly be reckoned among free goods, as likewise all other merchandizes and things, which are not to be comprehended and particularly mentioned in the preceding article, so that they may be transported and carried in the freest manner by the subjects of both confederates, even to places belonging to an enemy, such towns or places being only excepted, as are at that time besieged, blockaded up round about, or invested.

XXI. To the end that all manner of diffentions and quarrels may be avoided and prevented on one side and the other, it is agreed, That, in case either of their royal Majesties who enter into this alliance should be engaged in war, the ships and vessels belonging to the subjects of the other ally must be furnished with sea-letters, or passports, expressing the name, property, and bulk of the ship, as also the name and place of habitation of the master and commander of the said ship, that it may appear thereby that the ship really and truly belongs to the subjects of one of the princes; which passports shall be made out and granted according to the form annexed to this treaty. This shall likewise be recalled every year, that is, if the ship happens to return home within the space of a year. It is likewise agreed, That such ships being laden, are to be provided not only with passports, as abovementioned, but also with certificates, containing the several particulars of the cargo, the place whence the ship sailed, and whither she is bound; so that it may be known whether any forbidden or contraband goods as are enumerated in the 19th article of this treaty, be on board the same; which certificates shall be made out by the officers of the place whence the ship set sail, in the accustomed form. And if any one shall think it fit or advisable to express in the said certificates the person to whom they belong, he may freely do so.

XXII. The ships of the subjects and inhabitants of both their most serene royal Majesties, coming to any of the sea-coasts within the dominions of either of the confederates, but not willing to enter into port, or being entered, yet not being willing to shew or to sell the cargoes of their ships, shall not be obliged to give an account of their lading unless they are suspected, upon sure evidence, of carrying to the enemies of the other confederate prohibited goods, called contraband.

XXIII. And in case of the said manifest suspicion, the said subjects and inhabitants of the dominions of both of their most serene royal Majesties shall be obliged to exhibit in the ports their passports and certificates, in the manner before specified.

XXIV. But in case the ships of the subjects and inhabitants of both their most serene royal Majesties, either on the sea-coasts or on the high seas, shall meet with the men of war of the other, or with privateers, the said men of war and privateers, for preventing any inconveniencies, are to remain out of cannon-shot, and to send a boat to the merchant-ship which has been met with, and shall enter her with two or three men only, to whom the master or commander of such ship or vessel shall shew his passport, concerning the property thereof, made out according to the form annexed to this present treaty: and the ship which shall exhibit one shall have free passage, and it shall be wholly unlawful any way to molest her, search, or compel her to quit her intended course.

XXV. But that merchant-ship of the other party which intends to go to a port at enmity with the other confederate, or concerning whose voyage, and the sort of goods on board, there may be just suspicion, shall be obliged to exhibit, either on the high seas or in the ports and havens, not only her passports, but her certificates, expressing that they are not of the kind of prohibited, which are specified in the 19th article.

XXVI. But if one party, on exhibiting the above said certificates, mentioning the particulars of the things on board, should discover any goods of that kind, which are declared contraband or prohibited by the 19th article of this treaty, to be designed for a port subject to the enemy of the other, it shall be lawful to break up the hatches of that ship wherein the same shall happen to be found, whether she belong to the subjects of Great-Britain or to France, to open the chests, packs, or casks therein, or to remove even the smallest par-

cel of the goods, unless the lading be brought on shore, in the presence of the officers of the court of admiralty, and an inventory thereof be made: but there shall be no allowance to sell, exchange, or alienate the same in any manner, unless, after due and lawful process has been had against such prohibited goods, the judges of the admiralty respectively shall, by a sentence pronounced, have confiscated the same, saving always as well the ship itself, as the other goods found therein, which, by this treaty, are to be esteemed free; neither may they be detained on pretence of their being, as it were, infected by the prohibited goods; much less shall they be confiscated as lawful prize. But if not the whole cargo, but only part thereof, shall consist of prohibited or contraband goods, and the commander of the ship shall be ready and willing to deliver them to the captor, who has discovered them, in such case, the captor having received those goods, shall forthwith discharge the ship, and not hinder her, by any means, freely to prosecute the voyage on which she was bound.

XXVII. On the contrary it is agreed, That whatever shall be found to be laden by the subjects and inhabitants of either party, on any ship belonging to the enemy of the other and his subjects, the whole, although it be not of the sort of prohibited goods, may be confiscated, in the same manner as if it belonged to the enemy himself, except those goods and merchandizes that were put on board such ship before the declaration of war, or even after such declaration, if so be it were done within the time and limits following; that is to say, if they were put on board such ship in any port and place within the space of six weeks after such declaration, within the bounds called the Naze in Norway, and the Soundings; of two months, from the Soundings to the city of Gibraltar; of ten weeks in the Mediterranean Sea; and of eight months in any other country or place in the world: so that the goods of the subjects of either prince, whether they be of the nature of such as are prohibited, or otherwise, which, as is aforesaid, were put on board any ship belonging to an enemy before the war, or after the declaration of the same, within the time and limits aforesaid, shall no ways be liable to confiscation, but shall well and truly be restored, without delay, to the proprietors demanding the same; but so as that, if the said merchandizes be contraband, it shall not be any ways lawful to carry them afterwards to the ports belonging to the enemy.

XXVIII. And that more abundant care may be taken for the security of the subjects of both their most serene royal Majesties, that they suffer no injury by the men of war or privateers of the other party, all the commanders of the ships of the queen of Great-Britain and of the most Christian king, and all their subjects, shall be forbid doing any injury or damage to the other side; and if they act to the contrary, they shall be punished, and shall moreover be bound to make satisfaction for all cause of damage, and the interest thereof, by reparation under the bond and obligation of their persons and goods.

XXIX. For this cause, all commanders of privateers, before they receive their patents or commissions, shall hereafter be obliged to give, before a competent judge, sufficient security, by good bail, who are men able to pay, and have no interest in the said ship, and are each bound in the whole for the sum of 1,500 l. sterling, or 16,500 livres Tournois; or, if such ship be provided with above one hundred and fifty seamen or soldiers, for the sum of 30,000 l. or 33,000 livres Tournois, that they make intire satisfaction for any damages and injuries whatsoever, which they or their officers, or others in their service, commit during their course at sea, contrary to this present treaty, or the edicts of either of their most serene royal Majesties, published by virtue thereof, under penalty, likewise, of having their special commission and patents revoked and annulled.

XXX. Both their abovenamed royal Majesties being willing to shew a mutual and equal favour, in all their dominions respectively, to the subjects of each other, in the same manner as if they were their own subjects, will give such orders as shall be necessary and effectual, that justice be administered concerning prizes in the court of admiralty, according to the rules of equity and right, and the articles of this treaty, by judges who are above all suspicion, and who have no manner of interest in the cause in dispute.

XXXI. Whensoever the ambassadors of each of their royal Majesties above named, and other their ministers having a public character, and residing in the court of the other prince, shall complain of the unjustness of the sentences which have been given, their Majesties on each side shall take care that the same be revised and re-examined in their respective councils, that it may appear whether the directions and provisions prescribed in this treaty have been observed, and have had their due effect: they shall likewise take care that this matter be effectually provided for, and that right be done to every complainant within the space of three months. However, before or after judgment given, the revision thereof shall depending, for the avoiding of all damages, it shall not be lawful to sell the goods in dispute, or to unlade them, unless with the consent of the person concerned.

XXXII. A suit being commenced between the captors of prizes on one part, and the reclaimers of the same on the other, and a sentence, or decree, being given in favour of

the reclaimer, that same sentence, or decree, security being given, shall be put in execution, the appeal of the captor to a superior judge in any wife notwithstanding; which, however, is not to be observed when judgment has been given against the reclaimer.

XXXIII. In case that either ships of war or merchantmen, forced by storms, or other misfortunes, be driven on rocks or shelves on the coasts of one or the other party, and are there broken to pieces and shipwrecked, whatever part of the ships or tackling thereof, as also of the goods and merchandizes, shall be saved, or the produce thereof, shall be faithfully restored to the proprietors, reclaimers, or their factors, paying only the expences of preserving the same, in such manner as it may be settled on both sides concerning the rate of salvage [see SALVAGE], saving, at the same time, the rights and customs of each nation. And both their most serene royal Majesties will interpose their authority, that such of their subjects may be severely punished, who, in the like accident, shall be found guilty of inhumanity.

XXXIV. It shall be free for the subjects of each party to employ such advocates, attornies, notaries, solicitors, and factors, as they shall think fit; to which end the said advocates and others above mentioned, may be appointed by the ordinary judges, if it be needful, and the judges be required thereto.

XXXV. And, that commerce and navigation may be more securely and freely followed, it is further agreed, That neither the queen of Great-Britain nor the most Christian king shall receive any pirates or robbers into any of their ports, havens, cities, or towns; neither shall they permit them to be received into their ports, or to be protected or assisted by any manner of harbouring or support, by any the subjects or inhabitants of either of them: but they shall rather cause all such pirates and sea-robbers, or whoever shall receive, conceal, or assist them, to be apprehended, and punished as they deserve, for a terror and example to others. And all the ships, goods, or merchandizes, piratically taken by them, and brought into the ports of the kingdom of either, as much as can be found, although they have by sale been conveyed to others, shall be restored to the lawful owners, or their deputies, having instruments of delegation, and an authority of procuration, for reclaiming the same; and indemnification shall be made, proper evidence being first given in the court of admiralty for proving the property. And all ships and merchandizes, of what nature soever, which can be rescued out of their hands on the high seas, shall be brought into some port of either kingdom, and delivered to the custody of the officers of that port, with this intention, that they be delivered intire to the true proprietor, as soon as due and sufficient proof shall have been made concerning the property thereof.

XXXVI. It shall be lawful as well for the ships of war of both their most serene royal Majesties, as for privateers, to their enemies; neither shall they be obliged to pay any thing to the officers of the admiralty, or to any other judges; nor shall the aforementioned prizes, when they come to and enter the ports of either of their most serene royal Majesties, be detained by arrest; neither shall searchers, or other officers of those places, make examination concerning them, or the validity thereof; but rather they shall have free liberty to hoist sail at any time, to depart and to carry their prizes to that place which is mentioned in their commission or patent, which the commanders of such ships of war shall be obliged to shew. On the contrary, no shelter or refuge shall be given in their ports to such as have made a prize upon the subjects of either of their royal Majesties. And if perchance such ships shall come in, being forced by stress of weather, or the danger of the sea, particular care shall be taken (as far as it is repugnant to former treaties made with other kings and states) that they go from thence, and retire elsewhere as soon as possible.

XXXVII. Neither of their most serene royal Majesties shall permit that the ships or goods of the other shall be taken upon the coasts, or in the ports or rivers of their dominions, by ships of war, or others, having commission from any prince, commonwealth, or town whatsoever; and in case such a thing should happen, both parties shall use their authority and united force, that damage done be made good.

XXXVIII. If hereafter it shall happen, thro' inadvertency or otherwise, that any contraventions or inconveniencies on either side arise, concerning the observation of this treaty, the friendship and good intelligence shall not immediately thereupon be broke off, but this treaty shall subsist in all its force, and a proper remedy for removing the inconveniencies shall be procured, as likewise reparation of the contraventions; and if the subjects of the one or the other be found in fault, they only shall be severely punished and chastised.

XXXIX. But if it shall appear that a captor made use of any kind of torture upon the master of the ship, the ship's crew, or others who shall be on board any ship belonging to the subjects of the other party; in such case, not only the ship itself, together with the persons, merchandize, and goods whatsoever, shall be forthwith released, without any further delay, and set entirely free, but also such as shall be found guilty of so great a crime, as also the accessories thereto, shall suffer the most severe punishment, suitable to their crime.

This the queen of Great-Britain and the most Christian king do mutually engage shall be done, without any respect of persons.

Form of the passport [see the article PASSPORT] to be desired of and given by the lord high admiral of Great-Britain, &c. or by the lords commissioners for executing, the office of high admiral of Great Britain, &c. according to the directions of the 21st article of this treaty.

To all to whom these presents shall come, greeting: We high admiral of Great-Britain, &c.

[or we commissioners for executing the office of high-admiral of Great-Britain, &c.] do make known and testify, by these presents, that A. B. of C. the usual place of his dwelling, master or commander of the ship called D. appeared before us, and declared by solemn oath [or produced a certificate under the seal of the magistrate, or of the officers of the customs, of the town and port of E. dated the day of the month of in the year of our Lord 17 of and concerning the oath made before them] that the said ship and vessel D. burthen tons, whereof he is himself at this time master, or commander, doth really and truly belong to the subjects of her most serene Majesty, our most gracious sovereign. And whereas it would be most acceptable to us that the said master, or commander, should be assisted in the affairs wherein he is justly and honestly employed, we desire you, and all and every of you, that wheresoever the said master, or commander, shall bring his ship, and the goods on board thereof, you would cause him to be kindly received, to be civilly treated, and, paying the lawful and accustomed duties, and other things, to be admitted to enter, to remain in, to depart out of your ports, rivers, and dominions, enjoy all manner of right, and all kind of navigation, traffic, and commerce, in all places where he shall think proper and convenient; for which we shall always be most willing and ready to make returns to you in a grateful manner. In witness and confirmation whereof we have signed these presents, and caused our seal to be put thereunto.

Given at the day of the month of in the year 17

Form of the certificates to be required of, and to be given by, the magistrate, or officers of the customs of the town and port, in their respective towns and ports, to the ships and vessels which sail from thence, according to the direction of the 21st article of this present treaty.

We A. B. magistrate, or officers of the customs, of the town and port of C. do certify and attest, That on the day of the month of in the year of our Lord 17 D. E. of F. personally appeared before us, and declared, by a solemn oath, That the ship, or vessel, called G. of about tons, whereof H. I. of K. his usual place of habitation, is master, or commander, does rightfully and properly belong to him, and other subjects of her most serene Majesty, our most gracious sovereign, and to them alone; that he is now bound from the port of L. to the port of M. laden with the goods and merchandizes hereunder particularly described and enumerated, that is to say, as follows. In witness whereof, we have signed this certificate, and sealed it with the seal of our office.

Given the day of the month of in the year of our Lord 17

Form of the passports and letters which are to be given in the admiralty of France, to the ships and barks which shall go from thence, according to the 21st article of this present treaty.

LEWIS count of Thoulouse, admiral of France, to all who shall see these presents, greeting: We make known, that we have given leave and permission to master and commander of the ship called of the town of burthen tons, or thereabouts, lying at present in the port and haven of and bound for and laden with after his ship has been visited, and before sailing, that he shall make oath, before the officers who have the jurisdiction of the maritime affairs, That the said ship belongs to one or more of the subjects of his Majesty, the act whereof shall be put at the end of these presents; as likewise that he will keep, and cause to be kept by his crew on board, the marine ordinances and regulations, and enter in the proper office, a list, signed and witnessed, containing the names and surnames, the places of birth and abode of the crew of his ship, and of all who shall embark on board her, whom he shall not take on board without the knowledge and permission of the officers of the marine; and in every port or haven where he shall enter with his ship, he shall shew his present leave to the officers and judge of the marine, and shall give a faithful account to them of what passed and was done during his voyage: and he shall carry the colours, arms, and ensigns of the king and of us, during his

his voyage. In witness whereof, we have signed these presents, and put the seal of our arms thereunto, and caused the same to be countersigned by our secretary of the marine, at the
day of 17

Signed LEWIS, COUNT of THOLOUSE,
And underneath by

Form of the act concerning the oath.

We of the admiralty of:
do certify, That master of the ship named
in the above passport, has taken the oath mentioned therein.
Done at the day
of 17

XL. The present treaty shall be ratified by the queen of Great-Britain and the most Christian king, and the ratifications thereof shall be duly exchanged at Utrecht, within four weeks, or sooner, if possible.

In witness whereof, &c.

Be it known unto all men, That whereas in the 9th article of the treaty of commerce, concluded this day between the most serene queen of Great-Britain, and the most serene the most Christian king, by their Majesties ambassadors extraordinary and plenipotentiaries, mention is made of some heads of matters, which being proposed on the part of Great-Britain, have not as yet been mutually adjusted; and therefore it was thought fit to refer them to be discussed and determined by commissioners: we, therefore, the underwritten ambassadors, that it may certainly appear what are those heads of matters which are to be referred to commissioners, have resolved to give a particular description of them in this writing, declaring that they are the same, and no other than what follow:

I. No manufacture of either kingdom, and the dominions belonging thereunto, shall hereafter be subject to be inspected and confiscated, under any pretence of fraud or defect in making or working them, or because of any other imperfection therein, but absolute freedom shall be allowed to the buyer and seller, to bargain and agree for the same, as they shall see good, any law, statute, edict, arrest, privilege, grant, or custom, to the contrary notwithstanding.

II. And so far as a certain usage, not confirmed by any law, has obtained in several towns of Great-Britain and France, that is to say, that every one, for coming in and going out, shall pay a kind of tax, called in English HEAD-MONEY, and in French DU CHEF, it is concluded that neither the same, nor any other duty on that account, shall any more be exacted.

III. And the British merchants shall not hereafter be forbidden to sell tobacco to any buyer whom they please; for which purpose, the letting out the duties on the said tobacco to farmers, which has been hitherto practised, shall cease, neither shall such farming be used again hereafter.

IV. The following case only being excepted, that is to say, where British ships shall take up merchandizes in one port, and carry them to another port of France, in which case, and in no other, the British subjects shall be obliged to pay the duties abrogated and abolished by this article, only in proportion to the goods which they take in, and not according to the bulk of the ship.

V. Whereas several kinds of goods contained in casks, chests, or other cases, for which the duties are paid by weight, will be exported from, and imported into France, by British subjects; it is therefore agreed, that, in such case, the aforesaid duties shall be payable only according to the weight of the goods themselves, but the weight of the casks, chests, and other cases whatever, shall be deducted in such manner and proportion as has been hitherto used in England, and is still practised.

VI. It is further agreed, That if any mistake or error shall, on either side, be committed by any master of a ship, his interpreter or factor, or by others employed by him, in making the entry, or declaration, of the goods on board his ship, for such defect, if so be some fraud does not evidently appear, neither the ship, nor the lading thereof, shall be subject to be confiscated; but it shall be free for the proprietors to take back again such goods as were omitted in the entry, or declaration, of the master of the ship, paying only the accustomed duties, according to the rates settled in the books; neither shall the merchants, or the master of the ship, lose the said goods, or suffer any other punishment, if so be the said goods so omitted were not brought on shore before the declaration made, and the custom paid for the same.

VII. And whereas the quality of the ship, master, and goods, will sufficiently appear from such passports and certificates, it shall not be lawful for the commanders of men of war to exact any other verification, under any title whatsoever; but if any merchant-ship shall want such passports, or certificates, then it may be examined by a proper judge, but in such manner, as if it shall be found, from other proofs and documents,

VOL. II.

that it truly belongs to the subjects of either of the confederates, and contains no prohibited goods, designed to be carried to the enemy of the other, it shall not be liable to confiscation, but shall be released, together with its cargo, in order to proceed on its voyage; since it may often happen, that such papers could not come to the ship when she was setting sail from any port, or that they have been lost by some chance or other, or have been taken away from the ship. And if, besides the passports and certificates, made according to the form of this treaty, other passports and certificates happen to be found in the ship, in another form, and perhaps according to the prescription of treaties made with others, no pretence shall be taken from thence of detaining, or in any wise molesting, either the ship, or men, or goods. If the master of the ship named in the passports be removed by death, or any other cause, and another be put in his place, the passports shall nevertheless retain their force, and the ship, and goods laden thereon, shall be secure.

VIII. It is farther provided on both sides, and shall be taken for a general rule, that a ship and goods, although they have remained in the enemy's power for four-and-twenty hours, shall not therefore be esteemed as capture, and be immediately made prize, but, if, on other accounts, they ought to be restored, they may be reclaimed, and shall be given again to the proprietors.

IX. It shall be free both for their royal Majesties, for the advantage of their subjects trading to the kingdoms and dominions of the other, to constitute national consuls, of their own subjects, who shall enjoy that right and liberty which belongs to them by reason of the exercise of their function; but as to the places where such consuls are to be appointed, both sides shall afterwards agree between themselves.

In witness whereof, &c.

Be it known to all men, That whereas in the 9th article of the treaty of navigation and commerce, concluded the 31st day of March, 1713, between the most serene queen of Great-Britain and the most serene the most Christian king, by the ambassadors extraordinary and plenipotentiaries of their Majesties, certain merchandizes, namely, woollen manufactures, sugars, salt-fish, and what is produced from whales, are excepted, in general words, from the rule of the tariff made the 18th day of the month of September, in the year 1664, in order to be afterwards referred to the discussion of commissaries: to prevent, therefore, all mistakes and ambiguity, which might, perhaps, arise from such general terms, and to make it more evidently appear, what particular sorts of goods are to come under the consideration of the aforesaid commissaries, we the under-written ambassadors extraordinary and plenipotentiaries, have declared by these presents, and do declare, that the exception of the above-mentioned merchandizes is to be understood in the manner following:

I. Whalebone cut and prepared, fins and oils of whales, shall pay, at all places of importation in the kingdom, the duties appointed by the tariff of the 7th of December 1699.

II. Cloths, ratines, and serges, shall be likewise subject to the same duties of the tariff of the 7th of December 1699; and in order to facilitate the trade thereof, it shall be allowed to import them by St Valery upon the Somme, by Rouen, and by Bourdeaux, where these goods shall be subject to visitation in the same manner, as those which are made in the kingdom.

III. Salt-fish in barrels only are to be imported into the kingdom, and at all places of entrance in the kingdom, countries, and territories, under the dominion of the king, even at all free ports, the duties of landing and of consumption shall be paid, which were appointed before the tariff of 1664, and besides 40 livres per last, consisting of 12 barrels, weighing each 300 pounds, for duty of entry; which entry shall not be permitted but by St Valery upon the Somme, Rouen, Nantz, Libourne, and Bourdeaux, and shall remain prohibited at all other harbours or ports, as well in the ocean as in the Mediterranean.

IV. Refined sugar, in loaf or in powder, white and brown sugar-candy, shall pay the duties appointed by the tariff of 1699.

In confirmation of which, &c.

At Utrecht, the 28th day of April, in the year 1713.

A TREATY of NAVIGATION and COMMERCE between
Great-Britain and Spain, concluded at Utrecht ^{Nov. 28,}
Decem. 9,
1713.

I. The treaty of peace, commerce, and alliance, between the crowns of Great-Britain and Spain, concluded at Madrid on the 14th day of May 1667 [see the article SPAIN], is ratified and confirmed by this present treaty.

Their royal Majesties mutually promise, that they will faithfully perform and fulfil all and singular the articles of the said treaty, and whatever privileges, concessions, grants, or advantages of any kind are therein, or in the cédulas annexed to it, allowed to their respective subjects; and that they will take care that they shall be at all times performed and fulfilled

by their ministers, officers, and subjects; that the subjects of the two crowns may enjoy the full effect thereof (except in those things concerning which it is otherwise ordained, to mutual satisfaction, in the following articles). Moreover, the treaty of 1670, between the crowns of Great-Britain and Spain [see the article SPANISH AMERICA], for removing differences, restraining depredations, and establishing peace between the said crowns, is hereby confirmed and ratified, without prejudice, however, to any contract, or privilege, or licence granted by his Catholic Majesty to the queen of Great-Britain, or her subjects in the treaty of peace lately concluded, or in the ASSIENTO CONTRACT [see the articles ASSIENTO CONTRACT and SOUTH SEA COMPANY]; and also without prejudice to any liberty or power heretofore enjoyed by the subjects of Great-Britain, either by right, sufferance, or indulgence.

II. No higher duties or customs of any kind, on goods imported or exported, shall be paid by the subjects of their royal Majesties respectively, trading to the dominions of their Majesties, than are exacted from, and paid by, the subjects of the most favoured nation; and if any foreign nation shall hereafter obtain from either side, a diminution of the customs, or any other privileges, the same shall reciprocally be granted to the subjects of each crown. And as it has been agreed as above, touching the rates of duties; so it is ordained as a general rule between their Majesties, That in all lands and places subject to the command of their respective Majesties, all and every one of their subjects shall use and enjoy at least the same privileges, liberties, and immunities, concerning all imports or duties whatsoever, respecting persons, wares, merchandize, ships, freighting, mariners, navigation, and commerce, and enjoy the same favour in all things, whether respecting trade, or any other right whatsoever, which is now, or shall be hereafter, enjoyed by the most favoured nation; as is set forth more at large in the 38th article of the treaty of 1667, specially inserted in the foregoing article.

III. [The third, fifth, and eighth articles, were not ratified as they stood at first in the treaty, but a new draught of them, which was annexed, and filed the explanatory articles. We shall therefore give our readers only the latter, at the end of this treaty.]

IV. The Catholic king consents and promises, that the subjects of Great-Britain residing in the provinces of Biscay and Guipuscoa, shall for the future be allowed to hire houses or warehouses for keeping their goods in, and his Majesty will take care, by repeating his orders for that purpose, that they shall be at liberty to do this in the same manner, and with the same privileges, which are enjoyed by the said British subjects in Andalusia, or any other ports or places in Spain, by virtue of the aforesaid treaty of 1667, or of any edict or ordinance issued by their Catholic Majesties. The subjects of Spain shall enjoy the same liberty in any ports or places of Great-Britain, with all the privileges belonging to them by the aforesaid treaty.

V. See the explanation at the end of this treaty.

VI. And as the respective subjects of their Majesties ought to enjoy an entire, safe, and unmolested use and liberty of navigation and commerce, whilst the peace and friendship entered into by their Majesties and their crowns shall subsist, it is provided by their Majesties, that for any little difference that may arise, their said subjects shall not be deprived of this security, but, on the contrary, they shall enjoy all the benefits of peace until war be declared between the two crowns.

It is further agreed, That if a war should break out and be declared between their Majesties and their kingdoms (which God prevent), in that case, agreeable to the 36th article of the above-mentioned treaty of 1667, the term of six months after the declaration of such rupture, shall be allowed to the subjects of each party residing in the dominions of the other, in which they may retire, with their families, goods, merchandizes, ships, and effects, and carry them by sea or land whither they shall please, paying the due and usual customs: they shall also be permitted to sell and alienate their moveable and immovable effects, and carry away the price thereof freely and without molestation: nor shall their goods, wealth, merchandize, and effects, much less their persons, be in the mean time detained or molested by any seizure or arrest. But rather in the mean while the subjects on each side shall have and enjoy good and speedy justice, so that during the said space of six months, they may be able to recover their goods and effects intrusted either to the public, or to private persons.

VII. It is likewise agreed, that all losses which the subjects of either crown shall duly prove that they sustained in the beginning of the late war (contrary to the tenor of the 36th article of the above-mentioned article of 1667), whether in moveable or immovable goods, shall be reciprocally made good without delay to them, or to their lawful attorneys, heirs, or administrators; and restitution shall be made of such goods as were confiscated and remain, whether they consist of lands, houses, inheritances, or of whatsoever sort they be; and for such as cannot be recovered, a just and

lawful price shall be paid: and it is agreed and concluded by their said Majesties, that the said payments (the claims being fully justified as aforesaid) shall be faithfully made and performed by their respective treasurers.

VIII. See at the end of this treaty.

IX. His Catholic Majesty promises, that those merchandizes which are not particularly specified in the table of rates, which is to be drawn up agreeable to the 3d article of this treaty, shall be charged with the same and no higher duties, in proportion to their value, than the merchandizes mentioned in the said table of rates are charged with. And if any difference should arise between the farmers or the officers of the custom-house and the merchants, concerning the value of any goods, it shall be in the option of the merchant to sell such merchandizes to the farmer or officer at the price set upon them by the farmer; which price shall be immediately paid in ready money, the duty only being deducted. The merchant may likewise, keeping the rest of his merchandizes, give a part of them to the farmer or officer at the rate set upon them, as hath been mentioned, instead of the duty.

X. It is agreed, That in case any merchandizes shall be brought by the subjects of Great-Britain from the coast of Africa into Spain, and be admitted to pay the duties, these duties being duly paid, the merchandizes shall not be charged afterwards, either by the captains-general of the coasts or commanders of the ports, or any other person, under what name or title soever, with any further duty, excepting what is payable in general for all merchandizes of the same kind at the time of sale.

XI. The masters of merchant-ships entering into any port of Spain, shall be obliged; within 24 hours after their arrival, to exhibit two declarations or inventories of their cargoes, or of that part thereof which they are to unlade there, viz, one to the farmer or officer of the customs, and another to the judges of contraband: neither shall they open their hatches, till either the searchers come on board, or leave be given them to do it by the farmers of the custom-houses. No merchandizes shall be unladed with any other view than that of being immediately carried to the custom-houses, agreeable to a permission, which shall be given in writing to that end. It shall not be lawful, however, for the judges of contraband or other officers of the customs, under any pretext whatsoever, to open any bags, chests, casks, or other package of any goods whatsoever belonging to the British subjects, whilst they are carrying to the custom-house, and before they are brought thither, nor unless the owner or his factor be present, who may pay the duties, and take the goods into his own custody. But the judges of contraband, or their deputies, may be present when the goods are taken out of the ships, and when they are declared and opened in the custom-house: and if there be a suspicion of fraud, as for instance, that it is intended to shew one species of goods for another, it shall be lawful for him to open all the bags, chests, or casks, provided it be done in the custom-house and no other place, and in presence of the merchant or his factor, and not otherwise: but when the goods have been hewn and carried out of the custom-house, and the chests, casks, or other package marked with the sign or seal of the proper officer, no judge of contraband, or other officer, shall presume to open them again, or to hinder them from being carried to the merchant's house. Neither shall it be lawful for them, under any pretext whatsoever, to hinder the removal of the said goods from one house or warehouse to another, within the walls or compass of the said city or place, provided that it be done between the hours of eight in the morning and five in the evening, and previous notice be given to the farmers of the right de alcavalas and cientos, with what intent they are moved; and if it be done in order to their being sold, those duties, if not paid before, may be paid there, or at the place of sale; or, if not to be sold, that the usual certificate in writing may be given to the merchant. As to the rest, it shall be lawful to carry merchandizes by land or sea, from any port or place within the king of Spain's dominions to any other port or place, under the conditions expressed in the fifth article of this treaty.

XII. The merchandizes imported into, or exported from, the Canary Islands by British subjects, shall be charged with no higher duties than they paid there in the reign of the late king Charles II. or shall be imposed on them by the new book of rates.

XIII. The subjects of each of their Majesties, who are in debt to the subjects of the other, whether the debts were contracted before the beginning of the late war, or within six months after it began, or during the war under the protection of letters of safe-conduct [see the article PASSPORT]; or, lastly, after a truce was made between the two crowns, shall be bound and obliged faithfully to pay them, in the same manner as if a war had never broke out between the two crowns; nor shall they be suffered to raise any exceptions to the just demands of their creditors on pretence of the war.

XIV. His Catholic Majesty gives the subjects of Great-Britain leave to settle and reside in the town called St Andero, on the conditions expressed in the ninth and thirtieth articles of the treaty of 1667. See the article SPAIN.

XV. As

XV. As to the judge conservator, and others to be substituted in his place, the privilege of having one be granted to any other foreign nation, the same shall also be granted to the subjects of Great Britain: In the mean time, and till something certain be determined in this matter, his Catholic Majesty will give express orders to all and every judge of his kingdom, and to all other persons whatsoever to whom the administration or execution of justice is intrusted, and enjoin them, under the severest penalties, to do justice, and cause it to be executed, without delay, partiality, or affection, in all causes wherein the subjects of Great Britain are concerned.

The Catholic king consents, that appeals from sentences given in causes relating to British subjects, may be brought before the tribunal of the council of war at Madrid, and no where else.

XVI. If this treaty, or any article of it, be violated by any minister, or other subject, of her Britannic Majesty, or of his Catholic Majesty, he shall be answerable for all the damage thereby occasioned; and if he be in public office, he shall, besides making satisfaction to the person injured, as aforesaid, be deprived of his office.

XVII. The subjects of Great Britain, having brought by sea, from some other ports of Spain, wine, brandy, oil, soap, dried grapes, or other commodities, it shall be lawful for them, on producing certificates that the duties were paid at the place whence they set sail, to land the same on board their ships lying at Cadiz, or there to remove them from one ship to another, with consent of the intendants of the marine, and in presence of them, or of their deputies, if they chuse to be there, to prevent any fraud, at a reasonable time to be appointed by the intendants within 24 hours; or to carry them away from thence, without being liable to pay the duty called *hondeaxe*, or any other duty of import or export.

This treaty shall be ratified by the most serene queen of Great Britain and by the most serene Catholic king, and the ratifications thereof exchanged at Utrecht within two months, or sooner, if it can be done.

In witness whereof, &c.

We having seen and considered the above-written treaty, have approved, ratified, and confirmed the same, as we do by these presents, for ourselves, our heirs and successors, approve, ratify, and confirm it, excepting only three articles thereof, viz. the third, fifth, and eighth, concluded at Utrecht, which are to be observed and understood in the manner and form following:

III. Whereas by the late treaty of peace it is agreed and established as a basis and foundation, that the subjects of Great Britain, in what regards commerce, shall enjoy the same liberties and privileges, which they enjoyed in the reign of king Charles II. in all parts of the king of Spain's dominions; which rule is what is also to serve for a basis and foundation of the present treaty of commerce, and is to be understood reciprocally in favour of the king of Spain's subjects trading in the dominions of Great Britain: and as nothing can contribute more to establish the commerce to a mutual benefit, than a fixed, clear, and easy rule in paying the duties, especially on a moderate footing, and proportionable to the value of the merchandize, in order to prevent the frauds that otherwise would be practised to the prejudice of the revenue of either crown, which has been often experienced in Spain, where the established duties by the ancient books of rates are excessive; in consideration whereof his Catholic Majesty, being desirous to avoid the like consequences, and to favour, augment, and facilitate, in all that depends upon him, the commerce, in as ample a manner as her Britannic Majesty desires, hath consented on his part to suppress and make void the different duties payable upon importation and exportation, contained in the ancient books of rates, as also those that have been imposed since, under any name or pretence whatsoever, and content himself with one only duty to be paid upon all goods and merchandize, after the rate of 10 per cent. of their value; and the like duty upon all goods and merchandize, which shall be exported out of his dominions, whether the value be made by weight, measure, piece, or ad valorem. And the same duty shall be collected in all the ports of entry in Spain, comprehending those of Arragon, Valencia, and Catalonia, excepting out of this general rule, Biscaya and Guipuscoa, whose duties of importation and exportation are to remain as they were in the time of Charles II. And that the said 10 per cent. being once paid, the farmers or officers of the custom-houses where these goods shall be entered, shall be obliged to mark the same with the proper seals and marks of their office, and also give the requisite dispatches; by virtue of which the proprietors of the goods may freely transport them to all the other parts of Spain, where they please, without being liable to pay any other duty, imposition, or charges, to the use or benefit of his Catholic Majesty, in any ports or parts of Spain whatsoever, in respect of transporting the said merchandize, over and above what they have paid in pursuance of this new arancel, provided in default of which they shall be esteemed to be fraudu-

lently transported. But it is to be understood, that this is not to extend to the alcavalos, cientos, and millones, in relation to which provision is made in the fifth and eighth articles of this treaty.

And so far as the ambassador of England hath represented that, to avoid all differences and disputes for the future, it is absolutely necessary to establish a certain valuation or rate of the several sorts of merchandize, by which the said duty of 10 per cent. shall always be paid, and not altered, either by means of the augmentation or diminution of the price of the said merchandize, which may hereafter happen in the commerce, in any time, or in any part of the kingdom: it is agreed by their Catholic and Britannic Majesties by their ambassadors, that in the term of three months from the ratification of this treaty, or sooner, if possible, commissaries, named by both their Majesties in due form, shall meet at Madrid or in Cadiz, who, without loss of time, shall proceed to the forming a new book of rates, in such a manner as to fix and limit what shall be paid for the future on all sorts of merchandize, as well upon importation as exportation; and so as that all the different duties which were payable, either before or in the time of Charles II. or since, under whatsoever name or pretence, or collected in different custom-houses or offices, shall be comprehended in this only duty, payable in one sum, whether upon importation or exportation; in all the ports of Spain; and shall extend to the kingdoms of Arragon, Valencia, and principality of Catalonia, and their dependencies, excepting only the provinces of Guipuscoa and Biscaya, of which mention has been already made. And whereas great instances have been made by the ambassador of Great Britain, that directions be given to the said commissaries that they take care, and above all do observe as a fixed rule, that this duty be laid equally and generally in all the ports and custom-houses of Spain, upon the importation and exportation of all goods and merchandize, after the rate of 10 per cent. of the value, which such goods and merchandize bear in the course of trade between the merchants of Cadiz and port St Mary's, to which the ambassadors of Spain have consented; always provided that the goods and commodities which shall be imported into the kingdom of Spain, by the ports of Biscaya and Guipuscoa, and afterwards transported into the other provinces depending on the kingdoms of Castile and Arragon, shall be obliged to pay, at the first custom-house of entry into the said kingdoms, the duties which shall be established in this new book of rates.

V. To prevent the abuses that may be committed in collecting the duties called alcavalos and cientos, his Catholic Majesty consents, that the subjects of her Britannic Majesty shall not be obliged to pay these duties, during such time as they think fit to let their merchandize remain in the magazines of the custom-houses appointed for that purpose; but when they shall think fit to take out the said goods, either to be transported farther into the country, to be sold in the same place, or carried to their own houses, it shall be permitted them so to do, upon giving bond with sufficient security to pay the said duties of alcavalos and cientos for the first sale, in two months after the date of his bond; upon which he shall have receipt given him for the said duties, and the goods shall be marked with the proper mark and seal of the farmers of the said alcavalos and cientos where such bond and security shall be given for the first sale; after which the said merchandize may be transported and sold by wholesale, in any port or place belonging to the king of Spain in Europe; and no obstruction or hinderance shall be made upon account of the said duties, nor the proprietors liable to pay a second time in respect of the first sale, provided those who carry the said merchandizes produce the receipts and marks of the farmer or proper officer concerned in the collection of these duties, or making sufficient proof of their not being sold before. But if, on the contrary, any merchant do sell his goods by retail, he shall be obliged to pay the said duties of alcavalos and cientos a second time, under the pains established by the laws. And his Catholic Majesty declares, that if any officer of the alcavalos and cientos shall exact a second time the said duties on the same merchandize when the said receipts and marks have been produced, or shall obstruct their passage or transportation, or occasion the least impediment, such officer shall be fined 2000 crowns to the benefit of his Majesty's revenues; and the officers of the custom-house shall not demand or take for making such receipts or certificates more than 15 real vellon [see the article SPAIN], unless it be otherwise settled in the new book of rates.

VIII. His Catholic Majesty consents, that the duties commonly called millones, which are payable upon fish and other sorts of domestic provisions, shall not be demanded in the first ports or custom-houses of entry in Spain, during such time as the proprietors will let them remain in the warehouses appointed for that purpose. But in case the owners shall desire to take them out, either to send into the country, sell them in the place, or carry them to their own houses, they are then to give bond, with good security to pay the said duty of millones, in the two months after date of the said bond, upon which the necessary dispatches are to be given them. And the said merchandize shall be marked with the seals or marks

of the farmers of the millones, where the said duties were secured; after which the said goods may be transported to, and sold in, the places where they are to be consumed, without paying any duties of millones. His Catholic Majesty also declares, that if after the receipts are produced, any officer, belonging to the farmers of the millones, should exact a second time the same duties on the same goods, or should oppose their passage, transport, or sale, or occasion the least impediment, the said officer shall be fined 2000 crowns for the benefit of his Majesty's revenues.'

ANNE, by the grace of God, queen of Great-Britain, France, and Ireland, defender of the faith, &c. To all and singular to whom these presents shall come, greeting. Whereas the right reverend father in God, our right trusty and well-beloved counsellor, John bishop of Bristol, our ambassador extraordinary and plenipotentiary, dean of Windsor, and register of our most noble order of the garter, did on our part, together with the plenipotentiaries of the most serene Catholic king, conclude and sign at Utrecht, on ^{Nov. 28,} ^{Decem. 9,} 1713, a treaty of commerce between the crowns of Great-Britain and Spain, and at the same time a separate article was concluded, made between the said plenipotentiaries, who were severally furnished with sufficient authorities, and is as follows:

Separate A R T I C L E.

'By the present separate article, which shall be altogether of the same validity, as if it was inserted word for word in the treaty of commerce, this day concluded between their royal Majesties of Great-Britain and Spain, and shall for that end be ratified as well as the said treaty; his Catholic Majesty consents that it shall at all times hereafter be lawful for the British subjects, who shall live in the Canary Islands for the sake of their trade, to nominate some one person being a subject of Spain, who shall execute the office of judge-conservator there, and shall take cognizance, in the first instance, of all causes relating to the commerce of the British subjects; and his royal Majesty promises that he will grant commissions to such judge-conservator so named, together with the same authority and all the privileges which the judges-conservators have formerly enjoyed in Andalusia. And if the British subjects shall desire to have more judges of that sort there, or to change those that are appointed every three years, it shall be allowed and granted them. His Catholic Majesty consents likewise, that appeals from the sentences of the said judge-conservator, shall be brought before the tribunal of the council of War at Madrid, and no where else. In witness whereof, we the underwritten ambassadors extraordinary and plenipotentiaries of her sacred Majesty of Great-Britain, and of his sacred Catholic Majesty, have signed and sealed these presents at Utrecht, ^{Nov. 28,} ^{Decem. 9,} in the year of our Lord 1713.

JOH. BRISTOL. (L. S.)
DUC. DE OSSUNA. (L. S.)
EL MARQUE DE MONTELEON. (L. S.)

We having seen and considered this separate article, have approved, ratified, and confirmed, as we do by these presents approve, ratify, and confirm the same, promising and engaging our royal word that we will faithfully and inviolably keep all and singular the things therein contained, and that we will not suffer any thing to be done contrary thereunto. For the greater testimony and validity whereof, we have signed this instrument with our royal hand, and caused our great-seal of Great-Britain to be affixed thereunto. Given at our castle at Windsor, the 7th day of February, 1714, in the 12th year of our reign.

The MEASURES taken by our sovereign the late king GEORGE I. to remedy some of the defects of the treaty of Utrecht, taken notice of under our articles REVENUE and TAXES.

TREATY of COMMERCE between Great-Britain and Spain, concluded at Madrid the 14th of December, 1715.

Whereas notwithstanding the treaties of peace and commerce, lately concluded at Utrecht the 13th of July, and the 9th of December 1713, between his Catholic Majesty, and her late Majesty the queen of Great-Britain, of glorious memory, there remained still some differences about trade and the course thereof; and his Catholic Majesty and the king of Great-Britain being inclined to maintain and cultivate a firm and inviolable peace and friendship, in order to attend to this good end, they have by their two ministers under written, mutually and duly qualified, caused the following articles to be concluded and signed.

I. The British subjects shall not be obliged to pay higher or other duties, for goods coming in, or going out of the several ports of his Catholic Majesty than those they paid for the same goods in king Charles the II'd's time, settled by schedules and ordinances of the said king, or his predecessors: and although the indulto, commonly called pie del fardo, be not grounded on any royal ordinance, nevertheless his Catholic Majesty declares, wills, and ordains, that it be observed,

now and hereafter, as an inviolable law; which duties shall be exacted and raised, now and for the future, with the same advantages and favours to the said subjects.

II. His Majesty confirms the treaty made by the British subjects, with the magistrates of St Andero in the year 1700.

III. His Catholic Majesty permits the said subjects to gather salt in the isle of Tortugas, they having enjoyed this liberty in the reign of king Charles II. without interruption.

IV. The said subjects shall pay no where any higher or other duties, than those paid by the subjects of his Catholic Majesty in the same places.

V. The said subjects shall enjoy all the rights, privileges, franchises, exemptions, and immunities whatsoever, which they enjoyed before the last war, by virtue of the royal schedules or ordinances, and by the articles of the treaty of peace and commerce made at Madrid in 1667 [see the article SPAIN], which is hereby fully confirmed; and the said subjects shall be used in Spain in the same manner as in the most favoured nation, and consequently all nations shall pay the same duties on wool and other merchandizes, coming in and going out to sea. And all the rights, privileges, franchises, exemptions, and immunities, that shall be granted, and allowed to the said subjects, the like shall be granted, observed, and permitted to the subjects of Spain, in the kingdoms of his Majesty the king of Great-Britain.

VI. And, as innovations may have been made in trade, his Catholic Majesty promises on his part to use his utmost endeavours to abolish them, and for the future to cause them to be avoided: in like manner the king of Great-Britain promises to use all possible endeavours to abolish all innovations on his part, and for the future to cause them by all means to be avoided.

VII. The treaty of commerce made at Utrecht, the 9th of December, 1713, shall continue in force, except the articles that shall be found contrary to what is this day concluded and signed, which are hereby abolished and rendered of no force, and especially all the three articles, commonly called explanatory. And these presents shall be approved, ratified, and exchanged on each side, within the space of six weeks, or sooner, if possible. In witness whereof, and by virtue of our full powers, we have signed these presents at Madrid, the 14th of December, in the year 1715.

M. DE BEDMAR. (L. S.) GEORGE BUBB. (L. S.)

TREATY of COMMERCE betwixt Anne queen of Great-Britain and Peter king of Portugal, concluded at Lisbon the 27th of December, 1703.

Whereas the league and strict friendship, which is between the most serene and most potent prince Anne queen of Great-Britain, and the most serene and most potent Peter king of Portugal, requires that the commerce of both the British and the Portugal nations should be promoted as much as possible; and her sacred royal Majesty of Great-Britain, hath signified to his sacred royal Majesty of Portugal, by the most excellent John Methuen, Esq; member of the English parliament, and ambassador extraordinary in Portugal, that it would be very acceptable to her, if the woollen cloths, and the rest of the woollen manufactures of Britain, might be admitted into Portugal, the prohibition of them being taken off: that this matter may be treated and transacted, they have given their full powers and commands; that is to say, her sacred Majesty of Great-Britain to the abovesaid most excellent John Methuen, and his sacred Majesty of Portugal to the most excellent Don Emanuel Telles Silvius, marquis of Alegrete, &c. one of the three directors of the treasury, and one of the first gentlemen of the bedchamber, and counsellor of state to his sacred royal Portuguese Majesty: who, by virtue of the full power to them respectively granted, having maturely and diligently considered the matter, have agreed upon the following articles.

I. His sacred royal Majesty of Portugal promises, both in his own name, and that of his successors, to admit, for ever hereafter, into Portugal, the woollen cloths, and the rest of woollen manufactures of the Britons, as was accustomed 'till they were prohibited by the laws, nevertheless upon this condition.

II. That is to say, that her sacred royal Majesty of Great-Britain shall, in her own name, and that of her successors, be obliged for ever hereafter to admit the wines of the growth of Portugal into Britain; so that at no time, whether there shall be peace or war between the kingdoms of Great-Britain and France, any thing more shall be demanded for these wines by the name of custom or duty, or by whatsoever other title, directly or indirectly, whether they shall be imported into Great-Britain in pipes or hogsheds, or other casks, than what shall be demanded from the like quantity or measure of French wine, deducting or abating a third part of the custom or duty. But if at any time this deduction or abatement of customs, which is to be made as aforesaid, shall in any manner be attempted and prejudiced, it shall be just and lawful for his sacred royal Majesty of Portugal, again to prohibit the woollen cloths, and the rest of the British woollen manufactures.

III. The

III. The most excellent lords the plenipotentiaries promise and take upon themselves, that their above-named masters shall ratify this treaty, and within the space of two months the ratification shall be exchanged.

For the faith and testimony of all which things, I the plenipotentiary of her sacred royal Majesty of Great-Britain have confirmed this treaty, by the subscription of my hand, and by the seal of my coat of arms. And the most excellent lord the plenipotentiary of his sacred royal Majesty of Portugal, for avoiding the controversy about precedence between the two crowns of Britain and Portugal, hath subscribed another instrument of the same tenor, changing only what ought to be changed for that reason.

Given at Lisbon, the 27th of the month of Decem. 1703.

JOHN METHUEN. (L. S.)

A DECLARATION and ENGAGEMENT concerning the rights and privileges of the British merchants in the kingdom of Sicily, made at Utrecht the 8th of March, N. S. 1713.

Whereas by several treaties of peace, alliance, commerce, and navigation, formerly made between the kingdoms of Great-Britain and Spain, and at this time subsisting, but more particularly by the treaty concluded at Madrid, the 13th of May, in the year 1667, and the cedulas annexed thereunto, provision was made for the freedom, security, and perfect ease of the commerce of the British subjects trading in the kingdoms and provinces of Spain; the observance and usage of which treaties have hitherto been received in the kingdom of Sicily, in the same manner as in any other the dominions of Spain, and have remained there in full force, except some variations which have been introduced in the course of time; for the rectifying whereof, according to the rule of those treaties, Great-Britain has justly insisted hitherto.

Wherefore, on occasion of transferring the kingdom of Sicily to his royal highness the duke of Savoy, her sacred Majesty of Great-Britain, being watchful to preserve the rights and privileges of her subjects trading in the said kingdom, and being likewise willing to preserve to the Sicilians the privileges they have in Great-Britain, which are so very dear to the most serene duke of Savoy, hath been graciously pleased to give instructions to her underwritten ministers plenipotentiaries, to agree with the ministers plenipotentiaries of his royal highness of Savoy, about making declarations mutually upon this subject. In pursuance thereof, the said ministers plenipotentiaries of his royal highness, in the name of their most serene master, do most solemnly declare and promise, that during the reign of the aforesaid most serene duke in Sicily; as likewise of his heirs and successors, the British merchants are henceforward to have, and shall effectually have, use, and enjoy, all those rights, privileges, liberties, and entire security, as to their persons, goods, ships, seamen, trade, and navigation, in the said kingdom of Sicily; which, by virtue of the treaties made between Great-Britain and Spain, they have hitherto enjoyed, or ought to enjoy; and, to that end that all abuses which deviate from the tenor of the said treaties shall be forthwith removed, and the rights and privileges acquired to the British subjects, by virtue of the aforesaid treaties, shall not on any occasion, or under any pretence, ever be violated or lessened. And if hitherto any more favourable privileges have been granted, or shall hereafter be granted, to the merchants of any other foreign nation any way relating to the persons of the traders, their ships, goods, duties, or the business of merchandizing, the British merchants shall likewise in all respects, and in the fullest manner enjoy the same.

And in like manner, the ministers plenipotentiaries of Great-Britain do, in the manner of her Majesty, confirm that the Sicilians shall hereafter enjoy the same privileges and liberties, which they have hitherto enjoyed, or ought to have enjoyed, as subjects of the king of Spain, by virtue of the aforesaid treaty of the year 1667.

In witness and confirmation whereof, &c.

TREATY of AMITY, COMMERCE, and NAVIGATION, between Great-Britain and Russia, concluded at St Petersburg, December 2, 1734.

I. The peace, friendship, and good correspondence, which happily subsist between their Russian and Britannic Majesties, shall be confirmed and established by this treaty, so as from henceforward there shall be between the crown of all the Russias on one side, and the crown of Great-Britain on the other, as likewise between the states, countries, realms, dominions, and territories, which are under their obedience, a true, firm, and perfect peace, friendship, and good understanding, which shall endure and be inviolably maintained for ever, as well by sea as by land, and on all fresh waters; and the people, subjects, and inhabitants on both sides, of what ever condition or degree, shall behave with entire good will towards each other, and give each other all possible aid and assistance, without doing or offering the least wrong or injury whatsoever.

II.

II. There shall be an entire freedom of navigation and commerce throughout all the dominions of the two contracting parties in Europe, where navigation and commerce are at this time permitted, or shall be permitted hereafter, by the contracting parties to the subjects of any other nation.

III. The subjects of both contracting parties may enter at all times into all the ports or towns of either of the contracting parties, with their ships, vessels, or carriages, into which the subjects of any other nation are permitted to enter, to trade or abide there; and the mariners, passengers, and vessels, whether Russian or English, even though there be any subjects of any other strange nation among the crew, shall be received and treated in like manner as the most favoured nation; and the mariners and passengers shall not be forced to enter into the service of either of the contracting parties, which may have occasion for their service. And the subjects of both contracting parties may buy all kind of necessaries which they shall stand in need of, at the current price; and repair and refit their ships, vessels, or carriages, and furnish themselves with all manner of provisions for their subsistence and voyage, abide and depart at their pleasure, without molestation or impediment, provided they conform themselves to the laws and ordinances of the respective states of the said contracting powers, where they shall so arrive or continue.

IV. The subjects of Great-Britain may bring by sea or by land, into all or any of the dominions of Russia, wherein the subjects of any other nation are permitted to trade, all sorts of goods and merchandizes, whereof the importation and traffic are not prohibited; and in like manner the subjects of Russia may bring into all or any of the dominions of Great-Britain, wherein the subjects of any other nation are allowed to traffic, all sorts of merchandizes of the produce and manufacture of the dominions of Russia, whereof the importation and traffic are not prohibited, and likewise all merchandizes of the produce or manufacture of Asia, provided that it is not actually prohibited by any law now in force in Great-Britain; and they may buy, and export out of the dominions of Great-Britain, all manner of goods and merchandizes, which the subjects of any other nation may buy therein and export from thence, and particularly gold and silver, wrought or unwrought, excepting the silver coined money of Great-Britain.

V. The subjects of Great-Britain, if they happen not to have rixdollars to pay therewith the custom, and other duties payable on the goods they enter, may pay in current money; at the rate of 125 copyks for one rixdollar.

VI. English ships that come to load or unload merchandizes belonging to the subjects of Great-Britain, shall be used with all kindness and dispatch, according to the regulations, without being detained in any manner whatsoever, on pain of the penalties mentioned in the regulations; and should the subjects of Great-Britain enter into any contract with any chancery, or college, for the delivery of any goods or merchandizes, on their giving notice that the same are ready to be delivered, they shall be received, agreeable to the time appointed in the contract, after which, the account shall be adjusted and settled, in such a time as it was agreed upon in the contract between the chancery, or college, and the English merchants.

VII. It is stipulated, that in any town or place of Russia, where any other nations are admitted, the subjects of Great-Britain may pay for goods bought the same currency as has been received for goods sold, unless there be any particular agreement to the contrary.

VIII. It is stipulated, that the subjects of Great-Britain may bring to Russia all sorts of goods or merchandizes, and carry them through the dominions of Russia, the shortest or most convenient way, to Persia, paying 3 per cent. in rixdollars; ad valorem, for duties and transit of the said goods, and no more, under any pretence whatsoever. Nevertheless, the English merchants shall be obliged to agree with the Russian subjects for the carriage charges, either by water or by land, making them a reasonable allowance for the same; and the most strict orders shall be given, that the English merchants may meet with all dispatch and ease upon the road. They likewise may bring from Persia any goods or merchandizes; and carry them through Russia with the same liberty and ease, paying only 3 per cent. in rixdollars, ad valorem, for duties and transit, reckoning the rixdollars as usual in the Russian customs. And in order to prevent all frauds of English subjects, and all vexation and delay of Russian officers, English merchants shall declare the goods designed to be carried through Russia, either to or from Persia, at the first Russian place they arrive, which shall be received and admitted on the bill of lading, policy, or register, according to the value declared, on which a duty of 3 per cent. shall be paid, without opening or unpacking the merchandizes, any more than is absolutely necessary to satisfy the Russian officer that the merchandizes specified in the bill of lading, policy, or register, and no other, or others, are contained in the bale in which the merchandizes are packed. But in case the Russian officer have any grounds to suspect that the goods are not declared to their right value, within 20 per cent. then the Russian officer, paying to the merchant the value declared, and 20 per

10 T

cent.

cent. over and above it, without any deduction, may take the goods and dispose thereof. After the Russian officer's inspection, which is to be done without vexation or detriment to the goods or package, he shall fix leaden seals to the packs, or bales, that contain the goods, number and mark them, and deliver to the merchant a certificate of the payment of the duties; and by virtue of that certificate, leaden seal, mark, and number, they shall have a free passage through Russia, either going to or coming from Persia, without any obstacle or molestation: but should the merchants not carry any or all the bales through Russia, according to the declaration, or should the seals be taken off, and any goods taken out in Russia, if there is any reason to suspect such a conduct, in opposition to the true sense and meaning of this article, such merchant shall be fined, and pay the whole value declared of the pack, or bale, that shall be wanting, or to which the seal should not be found.

IX. It shall be permitted to the subjects of both contracting parties reciprocally, in all accustomed places of export, to load on board their own ships, vessels, or carriages, or any other, all merchandizes bought by them, excepting only such as are prohibited to be exported, and freely to send or carry away the same, provided they have paid the duties, and such ships, vessels, or carriages, have been cleared according to law.

X. The subjects of either party shall pay no more custom or duties, on the importation or exportation of goods, than what the subjects of any other nation pay for the same goods. And in order to prevent any frauds in the duties on either side, the merchandizes which shall be found to have been smuggled in without paying the duties, shall be confiscated, and no other punishment inflicted on the merchant of either side.

XI. The subjects of either party may freely pass, repass, or travel, in all countries which now are, or hereafter shall be at enmity with the other of the said parties, places actually blocked up or besieged only excepted, provided they do not carry any warlike stores or ammunition to the enemy: as for all other effects, their ships, passengers and goods shall be free and unmolested.

XII. Cannons, mortars, fire-arms, pistols, bombs, grenades, bullets, balls, fuzes, flints, matches, powder, saltpetre, sulphur, cuirasses, pikes, swords, belts, pouches, cartouche-boxes, saddles and bridles, in any quantity beyond what may be necessary for the ship's provision, and may properly appertain to, and be judged necessary for, every man of the ship's crew, or for each passenger, shall be deemed ammunition of war; and if any such be there found, they may seize and confiscate the same according to law: but neither the vessels, passengers, or the rest of the goods, shall be detained for that reason, or hindered from pursuing their voyage.

XIII. In case of a rupture between the contracting parties, (which God forbid) effects or vessels of the subjects of either party shall not be detained or confiscated, but there shall be the space of one year at least allowed them, wherein they may sell, dispose, carry off, or send away their effects, and transport their persons.

XIV. The merchants, mariners, vessels, or effects of either party, shall not be arrested or forced into service, without their own consent, under any pretence whatsoever; and if any servant, or mariner, deserts his service or vessel, he shall be delivered up: but nothing contained in this article is to be so understood, as to tend to the hinderance or obstruction of the ordinary course of justice on either side.

XV. In case of wreck on any part of the dominions of the contracting parties, all sorts of assistance shall be given the unfortunate; no violence shall be done them, nor shall their effects, saved either by themselves or others, or drove ashore, be hidden or detained from them; neither shall they be hurt, under any pretext whatsoever, but they shall be preserved for them, and they shall pay what is reasonable, for the assistance given to their persons, ships, or effects.

XVI. English merchants may buy, build, or rent houses, and sell or dispose of them, either at St Petersburg, Moscow, in the German Slabod, Astracan, and Archangel; and in those places their houses shall be exempted from lodging soldiers; in all other places they may likewise buy, sell, or rent houses, but there they shall be subject to quartering soldiers, equally as other inhabitants. Russian merchants may also build, buy, or rent houses in Great-Britain or Ireland, and sell or dispose of them, provided they qualify themselves for that purpose, in the like manner as the subjects of any other the most favoured nations are obliged to do, and they shall be free of lodging soldiers, and have a free exercise of the Greek religion, either in their houses, or any place appointed for that purpose.

XVII. Passports shall be given to all English subjects that might have a mind to retire from Russia, two months after having given notice thereof, without obliging them to give any security, if in that time there appear no just cause to detain them, without obliging them to apply for their passports any where else than to the college of commerce, or any other that may hereafter be substituted for the same. The same care and dispatch to depart, the Russian subjects shall have in

the dominions of Great-Britain, according to what is customary in that country on such occasions.

XVIII. English merchants that take into their service, or hire any servants in Russia, with such passports as the court of justice thinks proper to register, shall afterwards not be obliged to pay for the same to the masters of those servants, any more than what the English merchants and the servants agreed between them; but the English merchants shall not keep the servants longer than the time allowed them by the passports of their masters, and without poker meyns no servant shall be taken into service, or hired: and if the merchants take a security for the honesty of the servant, and it happen that the servant do not behave well, and cheat some body, the merchant shall not answer for it, but the security. Russian merchants shall have the same reciprocal security and justice in the dominions of Great-Britain, for the servants they may there hire, agreeable to the laws of the land.

XIX. All affairs of English merchants in Russia shall be under the cognizance only of the college of commerce, or any other court that may be appointed hereafter, in lieu of this college, to take cognizance of foreign merchants affairs, and no other. Russian merchants in the dominion of Great-Britain shall be under the protection of the laws of that kingdom, as all other foreigners are, and shall be treated as the most favoured nation.

XX. English merchants shall not be obliged to produce their books or papers to any body whatsoever, unless to bear witness in courts of justice; nor shall their books or papers be taken away and detained from them, neither shall their effects be distrained or sold, under any pretence whatsoever, except in case of a bankruptcy, and then only by decree of the college of commerce, or any other court that may be hereafter appointed, in lieu of that college, to take care of the affairs of foreign merchants; and Russian merchants in Great-Britain shall be protected by the laws, as the preceding article directs.

XXI. In case of a law suit, four reputable persons among the foreign merchants shall be named by the college of commerce, to inspect into the books and papers of the plaintiff, if the case require it, and their report to the college of commerce shall be a sufficient evidence.

XXII. The custom-house shall take care to examine the Russian merchants servants, when they sign bargains, whether they have orders or powers of their masters for so doing: if not, they shall not be trusted. The same shall be observed in regard to the English merchants servants, and the bargains shall be for the masters account, who, if they have given orders or powers to their servants, shall then be answerable as if they had made the bargain themselves. All Russian servants employed in shops shall also be registered, and their transactions.

XXIII. If any Russian merchants indebted to English merchants, quit the place where they lived, and retire into the country, and it happen that during their absence, petitions be brought against them, proving the debt, then the college of commerce shall summon them thrice, allowing a sufficient time for their appearance before the college; but should they not appear, the college shall condemn them, and send an express, at the charge of the plaintiff, to the governors, with orders to put the sentence in execution, obliging the debtor to pay his debt.

XXIV. The Russian merchants that come with their goods shall enter them as soon as possible at the custom-house, and, when sold, shall write down the quantity, weight and measure, as the regulations direct.

XXV. The bracks shall be equitably established, and set in good order; the brackers shall be answerable for the quality of the goods, and false package, and subject to pay the losses, on proof being brought against them.

XXVI. Regulations shall be established for removing abuses which there may be in the package of hides and threads; in the interim, if any dispute arise between buyer and seller, in regard to the tare of any goods, the custom-house shall decide it, according to reason and equity.

XXVII. For a greater convenience and encouragement of the trade of Great-Britain, it is agreed that the following English woollen goods shall hereafter pay no more duty than what is set down in this article, viz. English cloth for soldiers shall pay no more than two copyks, in rixdollars, for each archine; the coarse cloth of the county of York, known in the Russian tariff by the name of kofirogi, shall pay no more than two copyks, in rixdollars, for each archine; broad flannels only one copyk, in rixdollars, for each archine; and narrow flannels, but three quarters of a copyk, in rixdollars, for each archine.

XXVIII. It is agreed and concluded that the subjects of both parties shall be respected and treated, in their respective dominions, in like manner as the most favoured nation; and the subjects of Russia which shall come into England, in order to learn arts and commerce there, shall be protected, favoured, and instructed: likewise, if any Russian vessels shall be met with out at sea by any English vessels, they shall in no wise be hindered or molested by them, provided they com-

port themselves in the British Seas in the accustomed manner; but on the contrary, they shall be favoured by them, and that in the very ports or havens belonging to the dominions of Great-Britain.

XXIX. Peace, amity, and good understanding, shall continue for ever between the contracting parties; and as it is usual to limit treaties of commerce for a certain space of time, it is agreed between the contracting parties that this shall continue for the space of fifteen years, to be computed from the day of signing this present treaty: and that before the expiration of the said term, they shall come to a further mutual agreement for renewing and prolonging the same.

Articles of PEACE and COMMERCE between the most high and renowned prince George II, &c. and the most high and glorious, mighty, and right noble prince, Muley Hammet Dahebbi, Ben Muley Ismael, Ben Muley Zeridh, Ben Muley Aly, king and emperor of the kingdom of Fez and Morocco, &c. January 14, 1728.

I. That all Moors or Jews subject to the emperor of Morocco shall be allowed a free traffic, viz. to buy or sell for 30 days in the city of Gibraltar, or island of Minorca, and not to reside in either place, but to depart with their effects, without let or molestation, to any part of the said emperor of Morocco's dominions.

II. That the king of Great-Britain's subjects residing in Barbary shall not be obliged to appear before the cadi, or justice of the country; but only the governor of the place, and his Britannic Majesty's consuls, are to take cognizance of, and adjust the differences they may have with the natives of the country.

III. That the menial servants of his Britannic Majesty's subjects, though natives of the country, either Moors or Jews, be exempt from taxes of all kinds.

IV. That all his Britannic Majesty's subjects, as well passengers as others, taken by any of the emperor of Fez and Morocco's cruisers, on board any foreign ship or vessel whatever, shall immediately be set at liberty, and sent to the city of Gibraltar.

V. That there be permission for buying provisions, and all other necessities, for his Britannic Majesty's fleet, or city of Gibraltar, at any of the emperor of Fez and Morocco's sea-ports, at the market prices, and the same to be shipped off without paying custom, as has been extorted lately, contrary to the treaty of peace subsisting.

VI. All the other articles, being fifteen in number, concluded, agreed, and adjusted, by the honourable Charles Steward, Esq; on the behalf of his Britannic Majesty, and by his excellency bashaw Hamet Ben Aly, Ben Abdalla, and his imperial Majesty's treasurer, Mr Moses Ben Hatter, a Jew, on behalf of the said king of Fez and Morocco, shall stand good, and be of the same force, as in the reign of the most high and renowned prince George I, king of Great-Britain, &c. of glorious memory, and the high and glorious, mighty and right noble prince, Albumazer Muley Ismael, late emperor of Morocco. And it is farther agreed, That all the articles aforementioned, as well the fifteen, as these additional ones, shall, in twenty days after the date hereof, be published in the Arabic language, and affixed on the gates of all the sea-port towns in his imperial Majesty's dominions. Signed and dated at the court of Mequinez. January 14, 1728.

A TREATY of PEACE and FRIENDSHIP between the king of Great-Britain and the emperor of Morocco, in 1751.

George the Second, by the grace of God, king of Great-Britain, &c. duke of Brunswick and Lunenburg, arch-treasurer, and prince elector of the Holy Roman Empire, &c. to all to whom these presents shall come, greeting: Whereas a treaty for establishing peace and friendship was concluded and signed on the 15th of December, 1734, and copied the 15th of Rabbei the First, in the year 1164, which is, in English stile, the 15th day of January, 1750, O. S. and the additional articles of peace and commerce, concluded and signed at the court of Fez, on the 1st of February, 1751, N. S. between us and the high, glorious, potent, and noble prince, Muley Abedela, Ben Muley Ismael, Ben Muley Seriph, Ben Muley Aly, king and emperor of the kingdoms of Fez, Morocco, &c. by William Petticrew, Esq; our consul-general, on our part, and by the alcaide Habel Lohah Ben Hamed Limury, first minister, on the behalf, and by order of, the said king of Fez and Morocco, in the words and form following:

The TREATY of PEACE between his Majesty George the Second, king of Great-Britain, &c. and Muley Abedela, Ben Ismael, king and emperor of Fez, Mequinez, Morocco, &c.

I. For establishing peace and friendship, it is agreed and concluded for firm and valid, both by land and sea, in all the dominions of both powers, that the English in general

shall and may, now, and at all times hereafter, enjoy and continue in peace and friendship with the emperor and his subjects, and be well used and respected by the emperor's subjects, agreeable to the order and commands of the emperor.

II. That such number or quantity of passports as may be necessary, be transmitted to the emperor, indented in such manner as shall tally with the passports that shall be received by the English merchants in England; and if an English man of war meets with any merchant ships belonging to the emperor, such merchant ships shall be obliged to produce and shew their passports, given to them by the English consul.

III. If any dispute shall happen between the English and the emperor's subjects, the same not to be determined by a judge, but ended and adjusted by the English consul and the covey, that is, the mayor of the town where such dispute shall happen.

IV. That none of the emperor's subjects shall, at any time, forcibly enter the houses of the English, or any place belonging to them, or take and carry away any of their goods and effects, unless they have leave and authority from the emperor so to do: that if any of the emperor's subjects shall hire any English ship to carry and convey goods from one part of the emperor's dominions to another, and shall happen by stress of weather, or any other occasion, to touch at any place or places in the voyage, such ship or ships shall not be obliged to pay any thing for the shelter or assistance they may receive; and that no English whatever, or any of their servants (though not English) shall be liable to pay the tax imposed upon the emperor's subjects, called the poll-tax.

V. That the fifteen articles of peace made and concluded between king George the First and Muley Ismael, are hereby agreed to and confirmed, with his Majesty king George the Second, as good and valid, and shall be faithfully kept and observed, together with the aforesaid four articles.

TREATY of PEACE between his Majesty George the Second, king of Great-Britain, &c. and Muley Abedela Ben Ismael, king and emperor of Fez, Mequinez, Morocco, &c.

I. That if any English shall happen to be on board any ship, or ships, enemies to the emperor, that may be taken by the emperor's ships, such English shall be well treated, delivered into the hands of the English consul, and have liberty to go where they please: this article to continue in force for six months from the conclusion of this peace; in which time, it is required that notice shall be given by the king of Great-Britain to all the English subjects, not to embark on board any of the emperor's enemies ships; for after that time, if the English shall so embark, the blame must be their own, as no regard will be had to them more than the emperor's enemies.

II. If any of the emperor's subjects shall be made slaves, and escape to an English man of war, or to Gibraltar, Port Mahon, or any of the English dominions, that they shall be protected, and with all convenient speed sent to their respective homes. The like treatment to be given to the English who shall be slaves, and escape to any part of the emperor's dominions.

III. If any English shall contract any thing to be paid to the emperor's subjects, notes shall be given for the same; and in like manner the same to be observed by the emperor's subjects in the English dominions; and if it shall happen that such subjects of either power cannot write, to get some person to write such notes for them.

IV. That no excuse be made, or ignorance of this peace pretended, the same shall be published and declared to all the subjects of both powers, both what is now agreed on, and the articles concluded with king George the First; which declaration shall be signed by each power, and by them kept, to prevent disputes. This treaty was concluded the 15th of December, 1734, and copied the 15th of Rabbei the First, in the year 1164, which is, in English stile, the 15th of January, 1750.

ADDITIONAL ARTICLES of PEACE and COMMERCE between the most high, illustrious, and most renowned prince, George the Second, &c. and the high, glorious, mighty, and most noble prince, Muley Abedela, Ben Muley Ismael, Ben Muley Seriph, Ben Muley Aly, king and emperor of the kingdoms of Fez, Morocco, Taffilete, Sus, &c.

I. It is agreed on and concluded, That from henceforward there shall be, between his Majesty of Great-Britain, prince and elector of Hanover, &c. and the king of Fez and Morocco, their heirs and successors, a general, true, and perfect peace for ever, as well by land as by sea and fresh waters; and also between the lands, kingdoms, dominions, and territories belonging to, or under the jurisdiction of his Britannic Majesty in Germany, and those appertaining to the king of Fez and Morocco; and their subjects, people, or inhabitants respectively, of what condition, degree, or quality soever, from henceforth reciprocally shall owe the other all friendship;

ship; and that all ships, vessels, passengers with their effects, trafficking voluntary, or compelled by enemies, disasters of the seas, or any accident whatsoever, to the coasts of the emperor of Fez and Morocco's dominions, being his Britannic Majesty's subjects in Germany, shall from henceforth be treated according to the said regulations, as specified by the treaties of peace now subsisting between his Britannic Majesty and the king of Fez and Morocco.

II. It is agreed that all ships and vessels belonging to his Britannic Majesty in Germany, shall carry a proper pass, and that a copy of such pass, with the heads of the said passes, shall be sent to his Britannic Majesty's consul residing in Barbary, to the end that he may deliver the same to the commanders, or captains, of the king of Fez and Morocco's ships of war, or cruisers, to the end that due regard may be had to this peace, and that no commander or captain may offend through ignorance; and all commanders or captains of ships or vessels belonging to his Britannic Majesty's subjects in Germany, meeting with any ship or vessel belonging to the king of Fez or Morocco, or his subjects, if the commander of such ship or vessel produce a pass, signed by the governor of the city they belong to, with a certificate from the English consul, and, in case of his death or absence, from the major part of the English merchants residing in the said place, in such cases, the said ship or vessel shall pursue freely her voyage, without hindrance or molestation.

III. It is agreed that the king of Great Britain's subjects shall not be obliged to appear before justices of the country in any cause, but that only the governor of the city, and his Britannic Majesty's consul, shall take cognizance of, and adjust the difference or suits they may have with the Moors, or other inhabitants in the dominions of the king of Fez and Morocco.

IV. It is agreed that no governor or officer under the king of Fez and Morocco shall, without the king's special order, visit or register the dwelling-houses or magazines of any of his Britannic Majesty's subjects residing in Barbary; and that all British ships taking freight in any port of the king of Fez and Morocco, to carry to other ports of the said kingdom, shall be exempted from all port-charges, as usual, in whatever port they may put in; and that the consul, and the other British merchants, shall be freely allowed to have Moors, or Jews, as their interpreters and brokers, who shall be exempted from all taxes, as likewise all their domestic servants.

All the other articles, being fifteen in number, concluded, agreed, and adjusted, by the admiral Charles Stewart, on the behalf of his Britannic Majesty, and by his excellency bashaw Hamet Ben Alay Ben Abdalla, and his Imperial Majesty's treasurer, Mr Moses Benatar, on behalf of the said king of Fez and Morocco, shall stand good, and be of the same force, as in the reign of the most high, illustrious, and renowned prince, George the First, king of Great-Britain, &c. of glorious memory, and the high, mighty, and most noble prince, Mulay Ismael, late emperor of Morocco, as likewise the other articles, being three in number, agreed and concluded by John Leonard Sollicoffee, Esq; on behalf of his Britannic Majesty, and his excellency bashaw Hamet Ben Aly Ben Abdalla on behalf of the king of Fez and Morocco.

It is agreed on and concluded, that all the articles aforementioned, being eighteen in number, with these additional articles, that are translated into the Arabic language, copies thereof be sent to all his Imperial Majesty's alcaides, and officers of all the ports in his dominions, there to be read by the cady or chief justice, in public assembly, and afterwards to remain deposited, either in the hands of the judge, or the alcaide of the port, that recourse may be had thereto on all occasions which may occur; and that the ratifications of the said articles shall be made within the term of six months, or sooner, if possible, in Spanish, which shall be received, and be of equal force. Dated and signed at the court of Fez, on the 1st of February, 1751, N. S.

Signed ABDELHOVAH ALY MOORY.

TREATY OF PEACE between his Majesty George the First, king of Great-Britain, &c. and Muli Ismael, son of Muli Alli Sherife, king of Fez, Mequinez, Morocco, &c.

I. In order to establish peace between the powers, both by land and sea, and all their respective dominions, it is agreed on, that the English may now, and always hereafter, be well used and respected by our subjects, agreeable to the orders and commands of the emperor.

II. That all English men of war and merchant-ships, that shall come to any part of the emperor's dominions, to trade or otherwise, and shall have on board a cargo not proper for vending in the place where they shall come, may depart with the same to any other part of the emperor's dominions, and shall pay duty but once for the same; and that no duty at all shall be paid for any war implements, such as fire-arms, swords, and any thing belonging to the army, as also for materials of all kinds for ship-building; and if any English ship shall arrive at any of the emperor's ports, with any merchandise destined for any other part of the world, that no duty shall be paid for such merchandise, but shall depart with the same, without any manner of molestation. If any English

ship shall be thrown upon the emperor's coasts by stress of weather, or otherwise, the same shall be protected, and may safely depart, without any ill usage or interruption. In like manner shall be treated the emperor's subjects happening to be thus thrown on the coast of Great-Britain, or the dominions thereto belonging.

III. That all the English ships and emperor's ships may pass and repass the seas without hinderance, interruption, or molestation, from each other; nor shall any money, merchandise, or any demand be made or taken, by the ships of either power from each other; and if any subjects of any other nation shall be on board either the English or the emperor's ships, they shall be safely protected by both parties.

IV. If the emperor's men of war meet with any English ships, and shall want to see their passports, they are to send a boat, with two men of fidelity, to peruse the said passports, who are to return without any farther trouble, and then both sides to proceed quietly on their respective voyages; the same usage to be received by the emperor's merchant-ships from the English men of war, who shall allow the passports made out by the English consul, and, if the consul shall not be present to make them, then the passports made out by the English merchants to be good and valid.

V. If the English men of war, privateers, or letter of marque ships shall take prizes from any nation with whom they shall be at war, they shall have liberty to bring and dispose of the same in any of the emperor's dominions, without any duty or charge whatsoever.

VI. If any English ship shall by storm, or in flying from her enemy, come upon the emperor's coasts, the same shall be safely protected, and nothing touched and taken away, but shall be under the direction of the English consul, who shall send the goods and people where he shall think fit.

VII. It is the mutual agreement of the king of Great-Britain and the emperor, that the emperor do issue out orders to all parts of his dominions, for the well using of all the English subjects, and that particular places be appointed for the burial of their dead; that the consuls, brokers, shall freely go on board any ship, without interruption; that the English consuls, merchants, and other subjects of Great-Britain, may safely travel by land with effects, without any hindrance whatever; and if any English settled in the emperor's dominions shall be desirous to return home, that they may so do, with their families, goods, and effects, without interruption: if any English die, the effects of such to be taken under the care of the consul, to be disposed of as directed by the will of such person, and, if no will, for the benefit of such person's next heir; and if any debts shall be owing to such deceased person, the same to be paid by order of the governor, or any other person in power, where such person shall die; and that a subject of the emperor's be appointed to demand and receive the same, and deposit the same in the hands of the English consul, for the aforesaid uses. If any English shall contract debts in the emperor's country, and remove from thence without satisfying the same, no other persons shall be liable to pay such debts. The like usage and treatment the subjects of the emperor are to receive in the king of Great-Britain's dominions; and that the king may send as many consuls to the emperor's dominions as he shall think necessary.

VIII. That no English merchant, captains of ships, or other person or persons whatsoever, that are English subjects, shall be forced to sell any of their goods for less than the real value; and that no captain, master, or commander of any English ship shall be compelled, without their own will and consent, to carry any goods or merchandizes for any person or persons whatsoever; nor shall any sailor be forced away from any English ship.

IX. If any quarrel or dispute shall happen between any Englishman and a Mussulman, by which hurt to either may ensue, the same to be heard before, and determined by the emperor only; and if an Englishman, who may be the aggressor, shall make his escape, no other Englishman shall suffer upon his account; and if two Englishmen shall quarrel, to be determined by the English consul, who shall do with them as he pleases; and if any quarrel or dispute shall happen between Mussulmen in England, or in any of the English dominions, by which hurt may ensue, the same to be heard before one Christian and one Mussulman, and to be determined according to the laws of Great-Britain.

X. If it shall happen that this peace, by any means, shall be broke, the consul, and all other English, shall have six months time to remove themselves, with their families and effects, to any place they please, without interruption; and that all debts owing to them shall be justly paid to them!

XI. If any English in the emperor's dominions, or the emperor's subjects in the English dominions, shall maliciously endeavour to break the peace, such of them who shall be proved to so intend, shall by each power be punished for such offence, each power to take cognizance of their own subjects.

XII. If any of the emperor's subjects shall purchase any commodity in the English dominions, they shall not be imposed on in price, but pay the same as is sold to the English.

XIII. That

XIII. That not any of the Spanish, whether captains, sailors, or other persons, under the English government in Gibraltar or Port-Mahon, shall be taken or molested, sailing under English colours, with passports.

XIV. That no excuse be made, or ignorance pretended, of this peace, the same shall be published and declared to all the subjects of each power, which declaration shall be signed by each power, and kept by them to prevent disputes.

XV. If any man of war shall be on the emperor's coasts, that are enemies to the English, and any English men of war, or other English ships, shall happen to be, or arrive there also, that they shall not in any manner be hurt, or engaged by their enemy; and when such English ships shall sail, their enemies ships shall not set sail under forty hours afterwards.

And if, after the conclusion of this peace, any ship shall happen to be taken by either powers, within six months after the proclamation of the peace, that the same, with the people and effects, shall be restored. Made and declared in the presence of the emperor's servant, Ahammad Basha, son of Alli, son of Abdalla, by the authority given to him by the emperor. Dated this 23d of January, in the year 1721, English stile. Wrote and given to Charles Stewart, Esq; the English ambassador, in the seventh year of the reign of our late royal father, king George the First.

We having seen and considered the above-written treaty, with the additional articles, have approved, ratified, and confirmed the same, in all and singular their clauses, as by these presents we do approve, ratify, and confirm the same for us, our heirs and successors, engaging and promising, on our royal word, sacredly and inviolably to perform and observe all and singular their contents, and never to suffer, as far as in us lies, any person to violate the same, or in any manner to act contrary thereto. In witness whereof, we have caused our great seal of Great-Britain to be affixed to these presents, signed with our own royal hand. Given at our court at Kensington, the thirty-first day of July, in the year of our Lord 1751, and of our reign the 25th.

GEORGE R.

ARTICLES of PEACE and COMMERCE between the most serene and mighty prince Charles III. by the grace, &c. and most illustrious lords the basha, dey, and aga, governors of the famous city and kingdom of Algiers, &c. concluded by Arthur Herbert, Esq; admiral of his Majesty's fleet, April 10, O. S. 1682.—With the few alterations made and included at the renewal thereof in 1686: all which are, for distinction, in a different character.

I. In the first place it is agreed and concluded, That from this day, and for ever forwards, there be a true, firm, and inviolable peace between the most serene king of Great Britain, France, and Ireland, &c. and the most illustrious lords the basha, dey, and aga, governors of the city and kingdom of Algiers, and between all the dominions and subjects of either side; and that the ships, or other vessels, and the subjects and people of both sides, shall not henceforth do to each other any harm, offence, or injury, either in word or deed, but shall treat one another with all possible respect and friendship; and that all demands and pretensions whatsoever, to this day, between both parties, shall cease and be void.

II. That any of the ships or other vessels, belonging to the said king of Great-Britain, &c. or to any of his Majesty's subjects, may safely come to the port of Algiers, or to any other port or place of that kingdom, there freely to buy and sell, paying the usual customs of 10 per cent. as in former times, for such goods as they sell; and the goods they sell not, they shall freely carry on board, without paying any duties for the same: and that they shall freely depart from thence whensoever they please, without any stop or hindrance whatsoever. As to contraband merchandizes, as powder, brimstone, iron, planks, and all sorts of timber fit for building of ships, ropes, pitch, tar, fusils, and other habiliments of war, his said Majesty's subjects shall pay no duty for the same to those of Algiers.

III. That all ships, and other vessels, as well those belonging to the said king of Great-Britain, or to any of his Majesty's subjects, as those belonging to the kingdom or people of Algiers, shall freely pass the seas, and traffic, without any search, hinderance, or molestation, from each other; and that all persons or passengers, of what country soever, and all monies, goods, merchandizes and moveables, to whatsoever people or nation belonging, being on board any of the said ships or vessels shall be wholly free, and shall not be stopped, taken or plundered, nor receive any harm or damage whatsoever from either party.

IV. That the Algiers ships of war, or other vessels, meeting with any merchant-ships, or other vessels, of his said Majesty's subjects, not being in any of the seas appertaining to his Majesty's dominions, may send on board one single boat, with two fitters only, besides the ordinary crew of rowers; and that no more shall enter any such merchant-ship, or vessel, without express leave from the commander thereof, but the two

fitters alone; and, upon producing a pass under the hand and seal of the lord high admiral of England and Ireland, or of the lord high admiral of Scotland, for the said kingdom respectively, or under the hands and seals of the commissioners for executing the office of lord high admiral of any of the said kingdoms, that the said ship shall proceed freely on her voyage; and that, altho', for the space of fifteen months next ensuing after the conclusion of this peace, the said commander of the merchant ship, or vessel, produces no such pass, yet if the major part of the seamen of the said ship, or vessel, be subjects of the said king of Great Britain, the said boat shall immediately depart, and the said merchant-ship, or vessel, shall freely proceed on her voyage: but that, after the said fifteen months, all merchant-ships, or vessels, of his said Majesty's subjects, shall be obliged to produce such a pass as aforesaid.

And any of the ships of war of his said Majesty, meeting with any ships, or other vessels of Algiers, if the commander of any such ship or vessel shall produce a pass, confirmed by the chief governors of Algiers, and a certificate from the English consul there residing, or if they have no such pass, or certificate, yet if, for the space of fifteen months next ensuing the conclusion of this peace, the major part of the ship's company be Turks, Moors, or slaves belonging to Algiers, then the said Algiers ships or vessels shall proceed freely; but that after the said fifteen months, all Algiers ships or vessels shall be obliged to produce such a pass and certificate as aforesaid.

THE ONLY ALTERATION IN THIS REGARDS THE FIFTEEN MONTHS TERM ALLOWED FOR PASSES, &c.

V. That no commander, or other person, of any ship or vessel of Algiers, shall take out of any ship or vessel of his said Majesty's subjects, any person or persons whatsoever, to carry them any where to be examined, or upon any other pretence; nor shall they use any torture or violence to any person, of what nation or quality soever, being on board any ship or vessel of his said Majesty's subjects, upon any pretence whatsoever.

VI. That no shipwreck belonging to the said king of Great-Britain, or to any of his subjects, upon any part of the coast belonging to Algiers, shall be made, or become prize; and that neither the goods thereof shall be seized, nor the men made slaves, but that all the subjects of Algiers shall use their best endeavours to save the said men and their goods.

VII. That no ship, or any other vessel of Algiers, shall have permission to be delivered up, or go to Sallee, or any place in enmity with the said king of Great-Britain, to be made use of as corsairs, or sea-rovers, against his said Majesty's subjects.

VIII. That none of the ships, or other smaller vessels of Algiers, shall remain cruising near, or in sight of his Majesty's city and garrison of Tangier, or of any other his Majesty's roads, havens, ports, towns, and places, nor any way disturb the peace and commerce of the same. TANGIER NOW OMITTED.

IX. That if any ship, or vessel, of Tunis, Tripoly, or Sallee, or of any other place, bring any ships, vessels, men, or goods, belonging to any of his said Majesty's subjects, to Algiers, or to any port or place in that kingdom, the governors there shall not permit them to be sold within the territories of Algiers.

X. That if any of the ships of war of the said king of Great-Britain do come to Algiers, or to any other port or place of that kingdom, with any prize, they may freely sell it, or otherwise dispose of it at pleasure, without being molested by any: and that his said Majesty's ships of war shall not be obliged to pay customs in any fort; and that if they shall want provisions, victuals, or any other things, they may freely buy them at the rates in the market.

XI. That when any of his said Majesty's ships of war shall appear before Algiers, upon notice thereof given by the English consul, or by the commander of the said ships, to the chief governors of Algiers, public proclamation shall be immediately made to secure the Christian captives: and if, after that, any Christians whatsoever make their escape on board any of the said ships of war, they shall not be required; nor shall the said consul or commander, or any other of his Majesty's subjects, be obliged to pay any thing for the said Christians.

XII. That from and after the time that the ratification of this treaty by the king of Great-Britain, shall be delivered to the chief governors of Algiers, no subjects of his said Majesty shall be bought or sold, or made slaves in any part of the kingdom of Algiers, upon any pretence whatsoever. And the said king of Great-Britain shall not be obliged, by virtue of this treaty of peace, to redeem any of his subjects now in slavery, or who may be made slaves before the said ratification; but it shall depend absolutely upon his Majesty, or the friends and relations of the said persons in slavery, without any limitation or restriction of time, to redeem such, or so many of them, from time to time, as shall be thought fit, agreeing for as reasonable a price as may be, with their patrons or masters, for their redemption, without obliging the said patrons or masters, against their wills, to set any at liberty, whether they be slaves belonging to the beylic (or public), the galleys, or such as belong particularly to the basha, dey,

dey, aga, or any other person whatsoever. And all slaves, being his Majesty's subjects, shall, when they are redeemed, enjoy the abatements of the duty due to the royal house, and of the other charges, by paying such reasonable sums as any slaves of other nations usually pay when they are redeemed.

XIII. That if any subject of the said king of Great-Britain happen to die in Algiers, or in any part of its territories, his goods or monies shall not be seized by the governors, judges, or other officers of Algiers, who likewise shall not make any enquiry after them: but the said goods or monies shall be received and possessed by such person or persons, whom the deceased shall, by his last will, have made his heir or heirs, in case they be upon the place where the testator deceased. But if the heirs be not there, then the executors of the said will, lawfully constituted by the deceased, shall, after having made an inventory of all the goods and monies left, take them into their custody without any hinderance, and shall take care the same be remitted, by some safe way, to the true and lawful heirs; and in case any of his said Majesty's subjects happen to die, not having made any will, the English consul shall possess himself of his goods and monies, upon inventory, for the use of the kindred and heirs of the deceased.

XIV. That no merchants, being his Majesty's subjects, and residing in or trading to the city and kingdom of Algiers, shall be obliged to buy any merchandizes against their wills, but it shall be free for them to buy such commodities as they shall think fit: and no captain or commander of any ship or vessel belonging to his said Majesty's subjects, shall be obliged, against his will, to lade any goods to carry them, or make a voyage to any place whither he shall not have a mind to go. And neither the English consul, nor any other subject of the said king, shall be bound to pay the debts of any other of his Majesty's subjects, except that he or they become sureties for the same, by a public act.

XV. That the subjects of his said Majesty in Algiers or its territories, in matter of controversy, shall be liable to no other jurisdiction but that of the dey, or the divan, except they happen to be at difference between themselves, in which case they shall be liable to no other determination but that of the consul only.

XVI. That in case any subject of his said Majesty, being in any part of the kingdom of Algiers, happen to strike, wound, or kill a Turk, or a Moor, if he be taken, he is to be punished in the same manner, and with no greater severity than a Turk ought to be, being guilty of the same offence; but if he escape, neither the said English consul, nor any other of his said Majesty's subjects, shall be in any sort questioned and troubled therefore.

XVII. That the English consul now, or at any time hereafter, residing at Algiers, shall be there, at all times, with entire freedom and safety of his person and estate, and shall be permitted to chuse his own terjiman (interpreter) and broker, and freely to go on board any ships in the road, as often and when he pleases, and to have the liberty of the country; and that he shall be allowed a place to pray in, and that no man shall do him an injury, in word or deed.

XVIII. That not only during the continuance of this peace and friendship, but likewise, if any breach or war happens hereafter to be between the said king of Great-Britain and the kingdom of Algiers, the said English consul, and all others his said Majesty's subjects, inhabiting in the kingdom of Algiers, shall, always and at all times, both of peace and war, have full and absolute liberty to depart and go to their own, or any other country, upon any ship or vessel, of what nation soever they shall think fit, and to carry with them all their estates, goods, families, and servants, without any interruption or hinderance.

XIX. That no subject of his said Majesty, being a passenger, and coming or going with his baggage, from or to any port, shall be any ways molested or meddled with, although he be on board any ship or vessel in enmity with Algiers: and in like manner, no Algerine passenger, being on board any ship or vessel in enmity with the said king of Great-Britain, shall be any way molested, whether in his person or in his goods, which he may have laden on board the said ship or vessel.

XX. That at all times, when any ship of war of the king of Great-Britain's, carrying his said Majesty's flag at the main top-mast head, shall appear before Algiers, and come to an anchor in the road, immediately upon notice thereof given by his Majesty's consul, or some officer from the ship, to the dey and regency of Algiers, they shall, in honour to his Majesty, cause a salute of 21 cannon to be shot off, from the castles and forts of the city, and that the said ship shall return an answer by shooting off the same number of cannon.

XXI. That presently after the signing and sealing of these articles by the basha, dey, aga, and chiefs of Algiers, all injuries and damages, sustained on either part, shall be quite taken away and forgotten, and this peace shall be in full force and virtue, and continue for ever: and for all depredations and damages that shall be afterwards committed or done by either side, before notice can be given of this peace, full satisfaction shall immediately be made, AND WHATSOEVER REMAINS IN KIND SHALL BE INSTANTLY RESTORED.

XXII. That in case it shall happen hereafter, that any thing is done or committed contrary to this treaty, whether by the

subjects of the one or the other party, the treaty notwithstanding shall subsist in full force, and such contraventions shall not occasion the breach of this peace, friendship and good correspondence, but the party injured shall amicably demand immediate satisfaction for the said contraventions, before it be lawful to break the peace: and if the fault was committed by any private subjects of either party, they alone shall be punished, as breakers of the peace and disturbers of the public quiet. And our faith shall be our faith, and our word our word.

Confirmed and sealed, in the presence of Almighty God, April 10, of Jesus 1682, of the Hejira 1093, Abri 11.

This is the treaty which remains still in force, and has been ever since referred to when any renewals, with additional articles have been made by our succeeding sovereigns. It was (mutatis mutandis) renewed and confirmed, April 5, 1686, by Sir William Soame, Bart. when he was going ambassador extraordinary from king James II. to the Grand Signior, with scarce any alterations, except literals, and what else has been observed. In 1691, Thomas Barker, Esq; sent for by Shaaban Hozia, then dey of Algiers, renewed and confirmed the same, without alteration or addition.

In 1700, Capt. Munden, jointly with Robert Cole, Esq; then consul for our nation at Algiers, renewed and confirmed the same, with the following additional articles.

I. We the most excellent and most illustrious lords, Mustafa dey, Ali basha, and Mustafa aga, governors of the most famous and warlike city and kingdom of Algiers, do, by these presents, renew and confirm the peace we so happily enjoy, with William, king of Great-Britain, France, and Ireland, defender of the Christian Faith, and his subjects, made in the year of Jesus, 1682 (of the Hejira 1093, and renewed four years after) in every part and article, more particularly that of the eighth, wherein it is expressed, that no ship or vessel belonging to our government of Algiers, shall cruise near, or in sight of, any of the roads, havens, or ports, towns, or places belonging to the said king of Great-Britain, or any way disturb the peace and commerce of the same: and in compliance with the said eighth article of that treaty, we do sincerely promise and declare, that such orders shall for the future be given to all our commanders, that under a severe penalty, and our utmost displeasure, they shall not enter into the channel of England, nor come, or cruise in sight of any part of his Majesty of Great Britain's dominions any more for the time to come.

II. That whereas it had been declared, that all ships and vessels belonging to the subjects of the said king of Great-Britain should have passes, &c. by the last day of September, in this present year of Jesus 1700: we do by these declare, at the desire of Capt. John Munden, commander in chief of his said Majesty's ships in the Mediterranean, and Robert Cole, Esq; his Majesty's consul, now residing at our city of Algiers, on behalf of their great master, that no passes shall be required or expected from any of the English ships or vessels, in any part of the world, but that they shall proceed on their voyage, without producing, or shewing a pass to any of our cruisers, till the last of September 1701. And after that time is expired, and any ship of England be seized, not having a pass, we do hereby declare, that the goods in that ship shall be prize; but the master, men, and ship, shall be restored, and the freight immediately paid to the said master, to the utmost value as he should have had, if he had gone safe to the port whither he was bound.

III. That whereas Capt. John Munden has given us good assurance that he had a great affront some years past, from some of our rude sailors at our mole, we do hereby promise, that, at all times, whenever any of the king of Great-Britain's ships of war shall come to this place, order shall be immediately given to an officer of the government who shall attend at the mole, all the day-time, during their stay here, to prevent any such disorders for the future, that no misunderstanding may happen between us: and in any such case, the officer at the mole shall secure the person or persons so offending, who shall be punished with the utmost severity. By the help of God, and if he please, these articles, now made between us, shall be maintained. To the truth whereof, we have hereunto set our hands and seals, Algiers, in the year of the Hejira 1112, which is in the Christian account August 20, 1700.

In 1703, admiral Byng, afterwards lord viscount Torrington, renewing the peace for queen Anne with the same Mustafa dey, inserted the two new articles, which are as follow: the preliminary one being only a confirmation of the foregoing, for which reason it is omitted.

I. That whereas, by the said articles of peace, made and concluded by admiral Herbert in 1682, it was agreed, that the subjects of England should pay 10 per cent. custom for the goods they should sell at Algiers, or in the dominions thereof; now, for the better settling and maintaining a good commerce between the subjects of England and those of Algiers, it is agreed and declared, that, from henceforwards, the English shall pay but 5 per cent. custom; and that contraband goods, as is declared before, shall not pay any custom.

II. And

II. And it is farther agreed and declared, that all prizes taken by any one of the subjects of the said queen of Great-Britain, and all ships and vessels built and fitted out in any of his Majesty's plantations in America, that have not been in England, shall not be molested; in case of their not having passes: but that a certificate in writing, under the hands of the commanding officers who shall take any prizes, and a certificate under the hand of the governors or chiefs of such American colonies or places where such ships were built or fitted out, shall be sufficient passes for either of them. And our faith shall be our faith, and our word our word.

Algiers, confirmed and sealed, in the presence of Almighty God, October 28, in the year of Jesus 1703, of the Hejira 1115.

This was again renewed in the reign of his late Majesty king George I. when, in 1716, admiral Baker had orders to visit Tripoly, Tunis, and Algiers. With the two first, as will appear in the ensuing pages, he confirmed our former treaties in person; but to Algiers he deputed the Argyle and Chester, two of his Majesty's ships, to whose commanders, Capt. Coningsby Norbury, and Capt. Nicholas Eaton, in conjunction with Mr Thomas Thompson, then acting as consul in the absence of his brother Samuel Thompson, Esq; he gave a full power to ratify and confirm all the above treaties, with these following new articles.—After the preamble, the first article concludes thus:

I. If any demands or pretensions shall be now left depending, between the subjects or others of either party, they shall be amicably redressed, and full satisfaction shall be made to each other, according to the truth and justice of their claim: nor shall any of the same be cancelled, or made void by this treaty.

II. That as the island of Minorca in the Mediterranean Sea, and the city of Gibraltar in Spain, have been yielded and annexed to the crown of Great-Britain, as well by the king of Spain, as by the several powers of Europe engaged in the late war, it is now hereby agreed and fully concluded, that from this time forward for ever, the said island of Minorca and city of Gibraltar, shall be esteemed, in every respect, by the government and people of Algiers, to be part of his Britannic Majesty's dominions, and the inhabitants thereof be looked upon as his Majesty's natural subjects, in the same manner as if they had been born in any other part of the British territories: and they, with their ships and vessels wearing British colours, and being furnished with proper passes, shall be permitted freely to trade and traffic in any part of the dominions of Algiers, and shall pass without any molestation whatsoever, and shall have the same liberties and privileges that are stipulated in this, and have been made in any other treaties in behalf of the British nation and subjects; and therefore none of the cruisers of Algiers shall, at any time, cruise within sight of the said island of Minorca and city of Gibraltar.

III. That if any English ship shall receive on board any passengers and goods belonging to the kingdom of Algiers, the English shall defend the said Algerines and their goods, so far as lies in their power, and not deliver them to their enemies. And the better to prevent any unjust demands being made upon the crown of Great Britain, and to avoid disputes and differences that may arise, all goods and merchandizes that shall from henceforward be shipped by the subjects of Algiers, on board the ships or vessels of British subjects upon freight, shall be first registered in the office of cancellaria, before the British consul residing in the port where they are so shipped; and the quantity, quality, and value thereof shall be expressed; and the consul is to manifest the same in the clearance given to the ship or vessel before it shall depart, to the end that, if any cause of complaint should happen hereafter, there may be no greater claim made on the British nation, than what by this method may be proved just and equitable.

IV. That if any of the Algerine cruisers shall meet with ships provided with scallop passes, of either ships or satias, that shall fit with those delivered to them by the British consul, they shall pass free and unmolested. Algiers, October 29, 1716.

ARTICLES OF PEACE AND COMMERCE, between his most sacred Majesty George, &c. and the most excellent lords, Ali basha, Hassan Ben Ali bey, Cara Mustafa dey, the aga, and the divan of the most noble city of Tunis, and the whole body of the militia of the said kingdom. Renewed and concluded, A.D. 1716, by John Baker, Esq; vice-admiral, &c.

I. That all former grievances and losses, and other pretensions between both parties, shall be void and of no effect; and from henceforward a firm peace for ever, free trade and commerce, shall be and continue between the subjects of his most sacred Majesty George, king of Great-Britain, &c. and the people of the kingdom of Tunis, and the dominions thereunto belonging. But that this article shall not cancel or make void any just debt either in commerce or otherwise, that may be due from any person or persons to others of

either party; but that the same shall be liable to be demanded and be recoverable as before.

II. That the ships of either party shall have free liberty to enter into any port or river belonging to the dominions of either party, paying the duties only for what they shall sell, transporting the rest without any trouble or molestation, and freely enjoy any other privileges accustomed: and the late exaction that has been upon the lading and unlading of goods at Goletta and the Marine, shall be reduced to the ancient customs in those cases.

III. That there shall not be any seizure of any ships of either party, at sea or in port, but that they shall quietly pass without any molestation or interruption, they displaying their colours: and for prevention of all inconveniences that may happen, the ships of Tunis are to have a certificate under hand and seal of the British consul, that they belong to Tunis: which being produced, the English ship shall admit two men to come on board them peaceably, to satisfy themselves they are English; and, although they have passengers of other nations on board, they shall be free, both they and their effects.

IV. That if any English ship shall receive on board any goods or passengers belonging to the kingdom of Tunis, they shall be bound to defend them and their goods, so far as lies in their power, and not deliver them unto their enemies; and the better to prevent any unjust demands being made upon the crown of Great Britain, and to avoid disputes and differences which may arise, all goods and merchandizes that shall, from henceforward, be shipped by the subjects of this government, either in this port or any other whatsoever, on board the ships or vessels belonging to Great-Britain, shall be first entered in the office of cancellaria, before the British consul residing at the respective port, expressing the quantity, quality, and value of the goods so shipped; which the said consul is to certify in the clearance given to the said ship or vessel before she departs, to the end that, if any cause of complaint should happen hereafter, there may be no greater claim made on the British nation; than by this method shall be proved to be just and equitable.

V. That if any of the ships of either party shall, by accident of foul weather, or otherwise, be cast away upon the coast belonging to either party, the persons shall be free, and the goods saved and delivered to their lawful proprietors.

VI. That the English which do at present, or shall at any time hereafter, inhabit in the city or kingdom of Tunis, shall have free liberty; when they please, to transport themselves with their families and children, though born in the country.

VII. That the people belonging to the dominions of either party shall not be abused with ill language, or otherwise ill treated; but that the parties so offending, shall be punished severely according to their deserts.

VIII. That the consul, or any other of the English nation, residing in Tunis, shall not be forced to make their addresses, in any difference, unto any court of justice, but to the Bey himself, from whom only they shall receive judgment; this in case the difference should happen between a subject of Great-Britain, and another of this government, or any other foreign nation; but if it should be between any two of his Britannic Majesty's subjects, then it is to be decided by the British consul only.

IX. That the consul, or any other of the English nation, shall not be liable to pay the debts of any particular person of the nation, unless obliged thereunto under his hand.

X. That as the island of Minorca, in the Mediterranean Sea, and the city of Gibraltar in Spain, has been yielded and annexed to the crown of Great-Britain, as well by the king of Spain, as by all the several powers of Europe engaged in the late war; now it is hereby agreed and fully concluded, that from this time forward for ever, the said island of Minorca and city of Gibraltar, shall be esteemed in every respect by the government of Tunis, to be part of his Britannic Majesty's own dominions, and the inhabitants thereof to be looked upon as his Majesty's natural subjects, in the same manner as if they had been born in any part of Great-Britain; and they with their ships and vessels wearing the British colours, shall be permitted freely to trade and traffic in any part of the kingdom of Tunis, and shall pass without any molestation whatsoever, either on the seas or elsewhere, in the same manner, and with the same freedom and privileges, as have been stipulated in this and all former treaties, in behalf of the British nation and subjects.

XI. And the better and more firmly to maintain the good correspondence and friendship, that hath been so long and happily established between the crown of Great-Britain and the government of Tunis, it is hereby agreed and concluded, by the parties before-mentioned, that none of the ships or vessels belonging to Tunis, or the dominions thereof, shall be permitted to cruise, or look for prizes of any nation whatsoever, before or in sight of the aforesaid city of Gibraltar, or any of the ports of the island of Minorca, to hinder or molest any vessels bringing provisions and refreshments for his Britannic Majesty's troops and garrisons in those places, or give any disturbance to the trade or commerce thereof; and if any prize shall be taken by the ships or vessels of Tunis, within

within the space of ten miles of the aforesaid places, it shall be restored without any dispute.

XII. That all the ships of war belonging to either party's dominions, shall have free liberty to use each others ports, for washing, cleaning, or repairing any their defects, and to buy and to ship off any sort of victuals, alive or dead, or any other necessaries, at the price the natives buy at in the market, without paying custom to any officer: and whereas his Britannic Majesty's ships of war do frequently assemble and harbour in the port of Mahon, in the island of Minorca, if at any time they, or his Majesty's troops in garrison there, should be in want of provisions, and should send from thence to purchase supplies in any part of the dominions belonging to Tunis, they shall be permitted to buy cattle alive or dead, and all other kind of provisions at the prices they are sold at in the market, and shall be suffered to carry them off, without paying duty to any officer, in the same manner as if his Majesty's ships were themselves in the port.

XIII. That in case any ships of war belonging to the kingdom of Tunis, shall take, in any of their enemies ships, any Englishmen, serving for wages, they are to be made slaves; but if merchants or passengers, they are to enjoy their liberty and effects unmolested.

XIV. That in case any slave in the kingdom of Tunis, of any nation whatsoever, shall make his escape, and get on board any ship belonging to the dominions of his sacred Majesty the king of Great Britain, &c. the consul shall not be liable to pay the ransom, unless timely notice be given him to order that none such be entertained; and then if it appears that any slave has got away, the said consul is to pay to his patron the price for which he was sold in the market; and if no price be set, then pay three hundred dollars, and no more.

XV. And the better to prevent any dispute that may hereafter arise between the two parties, about salutes and public ceremonies; it is hereby agreed and concluded, that whenever any flag-officer of Great-Britain shall arrive in the bay of Tunis, in any of his Majesty's ships of war, immediately upon notice given thereof, there shall be 25 cannon fired from the castle of Goletta, or other the nearest fortification belonging to Tunis, according to custom, as a royal salute to his Britannic Majesty's colours, and the same number shall be returned in answer thereto by his Majesty's ships; and it is hereby stipulated and agreed, that all ceremonies of honour shall be allowed to the British consul who resides here, to represent in every respect his Majesty's person, equal to any other nation whatsoever, and no other consul in the kingdom to be admitted before him in precedency.

XVI. That the subjects of his sacred Majesty of Great-Britain, &c. either residing in or trading to the dominions of Tunis, shall not, for the time to come, pay any more than three per cent. custom on the value of goods or merchandize, which they shall either bring into or carry out of this said kingdom of Tunis.

XVII. It is moreover agreed, concluded, and established, that at whatsoever time it shall please the government of Tunis to reduce the customs of the French nation no less than they pay at present, it shall always be observed that the British customs shall be 2 per cent. less than any agreement that shall for the future be made with the said French, or that shall be paid by the subjects of France.

XVIII. It is moreover agreed, concluded, and established, that in case any British ship or ships, or any of the subjects of his Majesty of Great-Britain, shall import at the port of Tunis, or any other port of this kingdom, any warlike stores, as cannons, muskets, pistols, cannon powder, or fine powder, bullets, masts, anchors, cables, pitch, tar, or the like; as also provisions, viz. wheat, barley, beans, oats, oil, or the like; for the said kinds of merchandize, they shall not pay any sort of duty or custom whatever.

We the parties before mentioned, having seen and perused the preceding articles, do hereby approve, ratify, and confirm, the several particulars therein mentioned; and they are to remain firm for ever, without any alteration. In testimony of which we do hereunto set our hands and seals in the presence of Almighty God, in the noble city of Tunis, the 30th day of August, old stile, and the year of our Lord Jesus Christ, 1716, being the 26th day of the moon Ramadam, and the year of the Hejira 1128.

(L.S.) J. BAKER. (L.S.) (L.S.) (L.S.)

ARTICLES OF PEACE AND COMMERCE, between his most sacred Majesty George, by the grace, &c. and the most excellent lords Mahomet bey, Yusuf dey, Shaaban rais, the divan, and the rest of the officers and people of the city and kingdom of Tripoly, renewed, concluded, and ratified, this 19th of July 1716, by John Baker, Esq; vice admiral, &c.

I. In the first place, it is agreed and concluded, that from this time forward for ever, there shall be a true and inviolable peace, between the most serene king of Great-Britain, and the most illustrious lords and governors of the city and kingdom of Tripoly in Barbary, and between all the dominions

and subjects of either side: and if the ships and subjects of either party shall happen to meet upon the seas, or elsewhere, they shall not molest each other, but shall shew all possible respect and friendship.

II. That all merchant-ships belonging to the dominions of Great-Britain, and trading to the city or any other part of the kingdom of Tripoly, shall pay no more than three per cent. custom for all kinds of goods they shall sell; and as for such as they shall not sell, they shall be permitted freely to embark them again on board their ships, without paying any sort of duty whatsoever, and shall depart without any hinderance or molestation.

III. That all ships and other vessels, as well those belonging to the said king of Great-Britain, or to any of his Majesty's subjects, as those belonging to the kingdom or people of Tripoly, shall freely pass the seas, and traffic where they please, without any search, hinderance, or molestation, from each other: and that all persons or passengers, of what country soever, and all monies, goods, merchandizes and moveables, to whatsoever people or nation belonging, being on board any the said ships or vessels, shall be wholly free, and shall not be stopped, taken, or plundered, nor receive any harm or damage whatsoever, from either party.

IV. That the Tripoly ships of war, or any other vessels thereunto belonging, meeting with any merchant-ships, or other vessels of the king of Great-Britain's subjects (not being in any of the seas appertaining to any of his Majesty's dominions) may send on board one single boat, with two fitters, besides the ordinary crew of the rowers; and no more but the two fitters to enter any of the said merchant ships, or any other vessels, without the express leave of the commander of every such ship or vessel: and then, upon producing to them a pass under the hand and seal of the lord high admiral of England, or the commissioners for executing of the said office, the said boat shall presently depart, and the merchant-ship or ships, vessel or vessels, shall proceed freely on her or their voyage. And though the commander or commanders, of the said merchant-ship or ships, vessel or vessels, produce no pass from the lord high admiral of England, or &c. yet, if the major part of the ships or vessels company be subjects to the said king of Great-Britain, the said boat shall presently depart, and the merchant-ship or ships, vessel or vessels, shall freely proceed on her or their voyage: and any of the said ships of war, or other vessels of his said Majesty, meeting with any ship or ships, vessel or vessels, belonging to Tripoly, if the commander or commanders of any such ship or ships, vessel or vessels, shall produce a pass, signed by the chief governors of Tripoly, and a certificate from the English consul residing there; or, if they have no such pass or certificate, yet if the major part of their ships company or companies be Turks, Moors, or slaves belonging to Tripoly, then the said Tripoly ship or ships, vessel or vessels, shall proceed freely.

V. That no commander or other person, of any ship or vessel of Tripoly, shall take out of any ship or vessel of his said Majesty's subjects, any person or persons whatsoever, to carry them any where to be examined, or upon any other pretence, nor shall use any torture or violence unto any person, of what nation or quality soever, being on board any ship or vessel of his Majesty's subjects, upon any pretence whatsoever.

VI. That no shipwreck belonging to the said king of Great-Britain, or to any of his Majesty's subjects, upon any part of the coast belonging to Tripoly, shall be made or become prize; and that neither the goods thereof shall be seized, nor the men made slaves, but all the subjects of Tripoly shall do their best endeavours to save the said men, and their effects.

VII. That no ship or any other vessel of Tripoly, shall have permission to be delivered up, or to go to any other place in enmity with the said king of Great-Britain, to be made use of as corsairs at sea against his Majesty's subjects.

VIII. That if any ship or vessel of Tunis, Algiers, Tetuan, or Sallee, or of any other place being in war with the said king of Great-Britain, bring any ships or vessels, men or goods, belonging to his said Majesty's subjects, to Tripoly, or to any port or place in that kingdom, the governors there shall not permit them to be sold within the territories of Tripoly.

IX. That if any subject of the king of Great-Britain happens to die in Tripoly, or its territories, his goods or monies shall not be seized by the governors or ministers of Tripoly, but shall all remain with the English consul.

X. That neither the English consul, nor any other subject of the said king of Great-Britain, shall be bound to pay the debts of any other of his Majesty's subjects unless they become surety for the same by a public act.

XI. That the subjects of his said Majesty in Tripoly, or its territories, in matter of controversy, shall be liable to no other jurisdiction but that of the dey or divan, except they happen to be at difference between themselves, in which case, they shall be liable to no other determination but that of the consul only.

XII. That in case any subject of his Majesty, being in any port of the kingdom of Tripoly, shall happen to strike, kill, or

be wound a Turk or Moor, if he be taken, he is to be punished in the same manner, and with no greater severity, than a Turk ought to be, being guilty of the same offence: but if he escape, neither the said English consul, nor any other of his said Majesty's subjects, shall be in any sort questioned or troubled on that account.

XIII. That the English consul now, or at any time hereafter, residing at Tripoly, shall be there at all times with entire freedom and safety of his person and estates, and shall be permitted to chuse his own interpreter and broker, and freely go on board any ship in the road, as often and when he pleases; and to have the liberty of the country; and that he shall be allowed a place to pray in, and that no man shall do him any injury in word or deed.

XIV. That not only during the continuance of this peace and friendship, but likewise if any breach or war happen to be hereafter, between the said king of Great-Britain and the city and kingdom of Tripoly, the said consul, and all other his Majesty's subjects inhabiting in the kingdom of Tripoly, shall always, and at all times, both of peace and war, have full and absolute liberty to depart, and go to their own country, or any other, upon any ship or vessel, of what nation soever they shall think fit, and carry with them all their estates, goods, families, and servants, though born in the country, without any interruption or hindrance.

XV. That no subject of his said Majesty, being a passenger from or to any port, shall be any way molested and meddled with, though he be on board any ship or vessel in enmity with Tripoly.

XVI. That if any ships of war of the said king of Great-Britain come to Tripoly, or to any other port or place of that kingdom, with any prize, they may freely sell it, or otherwise dispose of it at their own pleasure, without being molested by any: and that his Majesty's said ships of war shall not be obliged to pay customs in any port; and that, if they shall want provisions, victuals, or any other things, they may freely buy them at the rate in the market.

XVII. That when any of his Majesty's ships of war shall appear before Tripoly, upon notice thereof given by the English consul, or by the commanders of the said ships, to the chief governors of Tripoly, public proclamation shall be immediately made, to secure the Christian captives; and if, after that, any Christians whatsoever make their escape on board any of the said ships of war, they shall not be required back again, nor shall the said consul or commander, or any other his Majesty's subjects, be obliged to pay any thing for the said Christians.

XVIII. That all merchant-ships coming to the city or kingdom of Tripoly (though not belonging to Great-Britain) shall have free liberty to put themselves under the protection of the British consul, in selling and disposing of their goods and merchandize, if they shall think proper, without any hindrance or molestation.

XIX. That at all times, when any ship of war, of the king of Great-Britain, &c. carrying his said Majesty's flag, appears before the said city of Tripoly, and comes to an anchor in the road, immediately after notice thereof given by his said Majesty's consul, or officer from the ship, unto the dey and government of Tripoly, they shall, in honour to his Majesty, cause a salute of twenty-seven cannon to be fired from the castle and fort of the city; and that the said ship shall return an answer, by firing the same number of cannon.

XX. That no merchant-ship belonging to Great-Britain, or any other nation under the protection of the English consul, being in the port of Tripoly, shall be detained from proceeding to sea on her voyage longer than three days, under pretence of arming out the ships of war of this government, or any other whatsoever.

XXI. That no subject of the king of Great Britain, &c. shall be permitted to turn Mussulman in the city and kingdom of Tripoly (being induced thereunto by any surprize whatsoever) unless he voluntarily appears before the dey or governors, with the English consul's interpreter, thrice in twenty-four hours space, and every time declares his resolutions to become a Mussulman.

XXII. That the most serene king of Great-Britain's consul, residing in Tripoly aforesaid, shall have liberty, at all times when he pleases, to put up his said serene Majesty's flag on the top of his house, and there to continue it spread as long time as he pleases; likewise the said consul to have the same liberty of putting up and spreading the said flag in his boat, when he passes on the water; and no man whatsoever to oppose, molest, disturb, or injure him therein, either by word or deed.

XXIII. That whereas the island of Minorca, in the Mediterranean Sea, and the city of Gibraltar, in Spain, have been yielded up and annexed to the crown of Great Britain, as well by the king of Spain, as by all the several powers of Europe engaged in the late war: now it is hereby agreed and fully concluded, That from this time forward, for ever, the said island of Minorca, and city of Gibraltar, shall be esteemed, in every respect, by the government of Tripoly, to be part of his Britannic Majesty's own dominions, and the inhabitants thereof to be looked upon as his Majesty's natural sub-

VOL. II.

jects, in the same manner as if they had been born in any part of Great-Britain; and they, with their ships and vessels wearing British colours, shall be permitted freely to trade and traffic in any part of the kingdom of Tripoly, and shall pass without any molestation whatsoever, either on the seas or elsewhere, in the same manner, and with the same freedom and privileges, as have been stipulated in this and all former treaties, on behalf of the British nation and subjects.

XXIV. And whereas in the treaty of peace concluded in the reign of king Charles II, in the year 1676, by Sir John Narborough, Knt. an article was inserted, by which the ships and vessels of Tripoly were not permitted to cruise before, or in sight of, the port of Tangier, then belonging to Great-Britain: now it is hereby concluded and ratified, That, in the same manner, none of the ships or vessels belonging to Tripoly shall cruise, or look for prizes, before or in sight of the ports of the island of Minorca, and the city of Gibraltar, or to disturb or molest the trade thereof, in any manner whatsoever.

XXV. That all and every the articles in this treaty shall be inviolably kept and observed between his most sacred Majesty of Great-Britain, and the most illustrious lords and governors of this city and kingdom of Tripoly, and all other matters not particularly expressed in this treaty, and provided for in any former, shall still remain in full force, and shall be esteemed the same as if inserted here. Dated in the presence of Almighty God, in the city of Tripoly, this 19th day of July, 1751, according to the Christian computation; and of the Mussulman Hejira, the 10th of the moon Shaaban, 1128.

Whitehall, December 10, 1751.

ADDITIONAL ARTICLES to the antient treaties subsisting between his Majesty and the dey and government of Algiers, agreed to by the present dey Mahomet, and his Majesty's plenipotentiaries, the honourable Augustus Keppel, and Ambrose Stanyford, his Majesty's agent and consul-general at Algiers.

That all packet, or express-boats, bearing his Majesty's commission, which shall be met by any of the cruisers of Algiers, shall be treated with the same respect as his Majesty's ships of war, and all due respect shall be paid to his Majesty's commission; and both at meeting and at parting they shall be treated as friends; and if any of the Algerine cruisers commit the least fault or violence against them, the captains, or raziars, so offending, shall, on their arrival at Algiers, and proper complaint being made of them, be most severely punished, without admitting of their excuses. Dated at Algiers, the 3d of June, 1751; and in the year of the Hegeira 1164, the 20th day of the moon Regil.

By the KING, a PROCLAMATION, requiring passes formerly granted to ships and vessels trading in the way of the cruisers belonging to the governments on the coasts of Barbary, to be returned into the office of admiralty of Great-Britain, and other passes, of different forms, to be issued.

GEORGE R.

Whereas by our proclamation bearing date the 31st day of December, in the third year of our reign, we did charge and command all our loving subjects, who then were, or should be possessed of any passes for ships and vessels belonging to our subjects trading to Portugal, the Canaries, Guinea, the Indies, into the Mediterranean, or elsewhere, in the way of the cruisers of the government of Algiers (except such passes as had been granted to ships gone, or going to the East-Indies, or other remote voyages, where they could not be timely furnished with new passes) that they should, within the space of twelve months, to be computed from the first day of March then next, return the same, and furnish themselves with passes of a new form, under the hands and seals of our commissioners for executing the office of high admiral of Great-Britain and Ireland, in lieu thereof, for their several ships and vessels, in such manner as by the said recited proclamation was directed. And whereas it hath been humbly represented unto us, That it may have happened that, during the late war, several passes granted pursuant to the said recited proclamation, may, either by accident or undue means, have fallen into the hands of foreigners, who, by colour of such passes, may carry on their trade: We, taking the premises into our royal consideration, and judging it necessary to put a speedy stop to all such indirect practices, which do not only tend to the prejudice of our trading subjects, but may occasion a misunderstanding between us and the governments on the coast of Barbary, for preventing thereof, have thought fit, by the advice of our privy-council, to publish this our royal proclamation, and do hereby declare, that all such passes of the present form now in being, shall not continue in force longer than till the 1st day of April, 1752 (except such passes as have been granted to ships gone, or going to the East-Indies, or other remote voyages, where they cannot be timely furnished with new passes). And we do hereby strictly charge and command all our loving subjects, who are or shall be possessed of any such passes, that they do before the 1st day of April, 1752, return the same (except such as are before excepted) into the office of the admiralty of

Great-Britain, or to the respective collectors of our customs at the out-ports of Great-Britain and Ireland, or to the governors of some of our foreign plantations or dominions, in order to their being cancelled, and that they do furnish themselves with passes of a new form, under the hands and seals of our commissioners for executing the office of high-admiral of Great-Britain and Ireland, in lieu thereof, for their several ships and vessels, according to the treaties subsisting between us and the said governments on the coast of Barbary, and the regulations made by our royal father of glorious memory, by order in his privy-council, on the 14th day of June, in the year 1722, and our instructions given to our said commissioners for executing the office of high admiral of Great-Britain and Ireland touching the same. And whereas many ships and vessels belonging to our loving subjects, continue several years trading from port to port in the Mediterranean, without returning home, whereby they cannot so conveniently procure their passes to be exchanged, we do hereby, for the ease of our trading subjects, publish and declare our pleasure, That upon the application of any owner of any ship or vessel, or other substantial merchant, to the office of the admiralty of Great-Britain, and oath made by him of the property of such ship or vessel, and that three-fourths of the company are our subjects, according to an act made in the twelfth year of the reign of our royal predecessor, king Charles the Second, (intituled, An Act for encouraging and increasing of shipping and navigation;) and upon entering into the usual bond for the return of such pass at the end of the voyage, it shall and may be lawful for our commissioners for executing the office of high admiral of Great-Britain and Ireland, or our high admiral of Great-Britain and Ireland for the time being, and they are respectively empowered to make out a new pass for such ship or vessel, and send the same to such of our consuls in the Mediterranean as the said owner or merchant shall desire, with directions to such consul, that, upon application to him from the master of the ship for which the pass is made out, and surrendering up his old pass, and entering into a like bond for the return of such new pass, he shall deliver out the said new pass to such master, and transmit the old one, with the bond, to the office of admiralty of Great-Britain. And in order more effectually to hinder, for the future, any abuses that may be attempted by foreigners, relating to the new passes to be issued as aforesaid, we do hereby further declare our royal will and pleasure, That all such new passes to be hereafter issued, for any ships or vessels belonging to any of our subjects of the island of Minorca, or Gibraltar, shall be made out in a particular form, different from the form of the new passes to be issued for ships and vessels belonging to any other part of our dominions, and that such passes shall be lodged with the respective governors, lieutenant-governors, or commanders in chief, for the time being, of the said island of Minorca, or Gibraltar, and issued out only by them, according to the regulations made by our said royal father in council, as aforesaid: and the said respective governors, lieutenant-governors, and commanders in chief, are hereby charged and required not to issue or deliver out any such passes to any persons whatsoever, other than such as are really our subjects, inhabiting in the said island of Minorca, or Gibraltar, respectively, and strictly to conform themselves to the regulations and instructions made and given as aforesaid. And we do hereby further publish and declare, That, by our orders made this day in our privy-council, we have ordered and directed, That the proper officers of our customs, in the several ports of our kingdoms of Great-Britain and Ireland, do demand of the masters of all merchant-ships, so soon as they shall return into port from a foreign voyage, all passes granted as aforesaid, which shall be in their possession, to be produced to the said respective officers of our customs; and that, if the same shall appear to be of an older date than twelve months, for ships and vessels trading on this side the Straights Mouth, or for ships and vessels trading to a greater distance, in case the voyages of such last-mentioned ships and vessels shall be determined, then such passes shall be delivered up to the said respective officers of our customs, and be by them returned to the office of the admiralty of Great-Britain: and in case the master of any such ship or vessel shall refuse to produce or deliver up such passes, according to the true intent of our order, then the said officers shall certify the name of every such master, and of the ship or vessel, to our commissioners for executing the office of high admiral of Great-Britain and Ireland, or our high admiral of Great-Britain and Ireland for the time being, to the end that directions may be given for putting the bond, entered into on the granting any such pass, in suit. And all our governors, lieutenant-governors, and commanders in chief of any of our islands, colonies, or plantations, consuls residing in foreign parts, and all other our officers and ministers whatsoever, and all our loving subjects whom it may concern, are hereby expressly required and commanded to yield due obedience unto, and strictly to observe all the orders, instructions, regulations, and directions before mentioned, on pain of our high displeasure.

Given at our court at St James's, the 29th day of March, 1750, in the twenty-third year of our reign.

GOD save the KING.

At the court at St James's, the 29th day of December, 1751, present the King's Most Excellent Majesty in council.

Whereas his Majesty was pleased by his proclamation, bearing date the 29th day of March, 1750, to declare, That all passes of the present form now in being, which had been granted for ships and vessels belonging to his Majesty's subjects trading in the way of the cruizers of the government of Algiers, should not continue in force longer than until the 1st day of April, 1752 (except such passes as had been granted to ships gone, or going, to the East-Indies, or other remote voyages, where they could not be timely furnished with new passes) and his Majesty did thereby strictly charge and command all his subjects, who were or should be possessed of any such passes, that they should, before the said 1st day of April, 1752, return the same (except such as are before excepted) into the office of the admiralty of Great-Britain, or to the respective collectors of the customs at the out-ports of Great-Britain and Ireland, or to the governors of some of his Majesty's plantations and dominions, in order to their being cancelled; and that they should furnish themselves with passes of a new form, under the hands and seals of the commissioners for executing the office of the lord high admiral of Great-Britain and Ireland, in lieu thereof, for their several ships and vessels, as by the said recited proclamation is directed:—And whereas, since the issuing the said proclamation, it has been agreed by and between his Majesty and the dey of Algiers, that the passes of the present form should not expire so soon as the 1st day of April, 1752, but be continued, and remain in force, until the 30th day of October, 1752, at which time the passes of the new form are to commence, except only in the case of ships going to the East-Indies, or other remote voyages, whose passes are to continue good for the space of three years, from the 30th day of October, 1751. His Majesty, with the advice of his privy-council, doth therefore hereby declare and order, That the passes of the present form do continue in force until the said 30th day of October, 1752: upon which day, the passes of the new form shall commence and take place, except in the case of ships going to the East-Indies, or other remote voyages, whose present passes are to remain good for three years from the said 30th day of October, 1752. And his Majesty doth hereby charge and command all his subjects who shall be possessed of any such passes, that they do, before the said 30th day of October, 1752, return the same (except such as are before excepted) into the office of the admiralty of Great-Britain, or to the respective collectors of the customs at the out-ports of Great-Britain and Ireland, or to the governors of some of his Majesty's plantations or dominions, in order to their being cancelled; and that they do furnish themselves with passes of a new form, under the hands and seals of the commissioners for executing the office of lord high admiral of Great-Britain and Ireland, in lieu thereof, agreeable to the requisites of his Majesty's afore-mentioned proclamation of the 29th of March, 1750.—Whereof all persons whom it may concern are to take notice, and conform themselves to his Majesty's pleasure, hereby signified,

WILLIAM SHARPE.

The PRIVILEGES of an ENGLISHMAN, in the kingdoms and dominions of PORTUGAL. Contained in the treaty of peace concluded by Oliver Cromwell. And various laws, decrees, &c. at sundry times, and on divers occasions, made by the kings of Portugal, in favour of the ENGLISH NATION. To which is added the king of Portugal's new law, concerning the diamonds found in the Brasils.

SIX PRELIMINARY ARTICLES, treated of and agreed upon between the ambassador extraordinary from the king of PORTUGAL, and the state counsellor of parliament; in the name of the republic of ENGLAND. Done in London, in the year 1652.

ARTICLE I.

That between the above said, by the one and the other party, it is agreed, and likewise the said ambassador has thought fit to give his word, in the name of the king, that all those Englishmen who by any means are held in custody, either upon account of securities, or pledge, or by any other means whatsoever, occasioned by the controversies arisen between the one and the other people, in any of the dominions of Portugal, who by prince Rupert have been carried from hence, or put into its port of Lisbon, shall be delivered and set at liberty, and their securities discharged, or made of none effect.

ARTICLE II.

It was agreed with the said ambassador, who gave his word in the name of the king, to deliver immediately the ships, monies,

monies, and goods belonging to the English, which are retained in any of the places in the dominions of the king of Portugal, that they shall be delivered without any farther delay, in the same specie, in case they remain in the same goodness and value, as they were in when they were taken and retained; and if they are become worse, or of less value or goodness in specie; or if, by reason of the detention, they are any ways decayed, and become of less worth; or if they are lost; in these cases they shall be paid for, and satisfaction shall be given for them, according to the just price or value they bore at the time they were taken. And as touching the reparation of the damages, it shall be ordered in the manner as the council have declared their sentiments, by letter bearing date the 15th of November 1651. And the said ambassador obliged himself to give satisfaction for the whole.

A R T I C L E I I I.

It was agreed upon by the one and the other party, That all those who were the authors or helpers to kill the Englishmen mentioned in the petition, which the counsel exhibited to the said ambassador, who have been found or taken in any places in the dominions of the king of Portugal, or who may be found for the future, shall be punished by the said king, according to the merits of their crimes; or they shall be penally delivered with their accusations to the parliament, to be by them chastized; and the same, being subjects to the said king of Portugal, shall be punished for their malefactions, as also those who were their accomplices or abettors, and the rest of the above-mentioned of any degree or condition whatsoever; and also such as after this treaty shall be named by the parliament of the republic of England; and if they abscond, or run away to the ports of the said king, they shall be punished. And the said ambassador gave his word, in the name of his king, to observe this article.

A R T I C L E I V.

It was agreed upon between the above said on both parts, That the king of Portugal, in the name of, i. e. in lieu of those expences made by this republic, the which the counsel declared to the said ambassador, they might, in right of this nation, liquidate from the goods of the Portuguese that were occupied or taken by reprisal, which amounted to 14,246l. 11s. shall pay to the parliament 50,000l. in good and lawful money of England, in the manner herein after declared, that is to say, 20,000l. or as much Portuguese money as is equal to it in value, which shall be paid to that person whom the parliament or council of state may appoint to receive it in Lisbon, on the first of March next ensuing after this treaty, or within the space of one month, as it shall appear by a writing under the said ambassador's hand, wherein it shall be expressed, that the said sum shall be paid in Lisbon; and afterwards shall be paid 15,000l. of the same good and lawful money of England, on the last day of the month of July, 1653, O. S. and in like manner the last 15,000l. (which makes the sum of 50,000l.) on the first day of the month of November, 1653, O. S. and that the two last payments shall be made here in the city of London.

In the same article it was agreed upon, that as to the sum which by agreement is to be paid in Lisbon money, if any thing should be wanting of the intire sum, the whole shall be made good, and paid by the said king of Portugal; because it is to be understood, that all that entire sum and quantity ought to be returned to the parliament in good and lawful money of England; and the said ambassador, in the name of his king, obliged himself to pay the 50,000l. in the payments and monies above declared and represented.

A R T I C L E V.

It was agreed upon between the one and the other parties above said, That all the ships and goods of the English, which have been brought to Portugal by Rupert and Maurice, or by any of their ships, and there made use of, or are any where there detained, left, or by their order carried from thence, shall immediately be restored to their owners; or instead thereof full satisfaction and reparation shall be made. The which above-mentioned things the said ambassador has given his word, in the name of his king, to observe and perform.

A R T I C L E V I.

Between the above said of the one and the other parties, it was agreed upon, That as well the ship called the Conversion, as all other ships belonging to this republic of England, and all whatsoever vessels of this republic, that by Rupert, or by any of the ships of his fleet, have been carried to Portugal, and are in possession of the king of Portugal, or any of his subjects, or before this have been taken

and applied to use, or which by any authority have been taken as prize, shall be restored again, with all their apparel, preparations, guns, and instructions; and just recompence shall be made for the retention of them; to which the said ambassador gave his word, in the name of his king, to perform the contents of this article in faith and testimony whereof, the said ambassador has signed these six preliminary articles with his own hand, and sealed them with his seal.

Given on the 29th day of December, in the year of our Lord, 1652.

Articles of PEACE, ALLIANCE, and COMMERCE, concluded between the most serene lord protector of England, Scotland and Ireland, on the one part; and the most serene king of Portugal, and of the Algarve, on the other part. Done at Westminster, on the 10th of July, in the Year 1654.

A R T I C L E I.

In the first place, that there shall be a good, true, and firm peace, between the republic of England, and the most serene king of Portugal, and between the regions, countries, dominions, and principalities, under the empire of the one and the other, and the people, subjects, and the inhabitants of both, of any condition, rank, or dignity whatsoever, as well by land as by sea, in rivers and fresh waters; in such manner that the people and subjects shall favour and succour one the other, with reciprocal good will, and honest affection; and that neither of the said parties, nor their people, subjects, or inhabitants, shall commit, or attempt any thing against the other, in any place, either by land or sea, or in the harbours or rivers of either; nor shall they consent to, or assist in any war, council, or treaty, to the prejudice of the other party; nor shall either of the said parties house or harbour the rebels or fugitives of the other in any of their countries, kingdoms, dominions, ports, or frontiers.

A R T I C L E I I.

That between the republic of England and the king of Portugal and their people, subjects, and inhabitants, as well by land as by sea, in rivers and fresh waters, in all and every one of the regions, countries, dominions, territories, provinces, islands, colonies, cities, towns, villages, ports and frontiers, there shall be free commerce in those places, in which there is at present, or has been commerce in time past; in such manner that without permit or other licence, general or special, as well by land as by sea, in rivers and fresh waters, the people, subjects and inhabitants, of either of the parties, may go, enter and navigate in the said dominions and kingdoms, and in all their cities, towns, harbours, coasts, bays, and places, with carriages, horses, packs, and ships, as well laden as to be laden, carry merchandizes, buy, sell, and at the current prices to procure provisions, and what necessities they may want for their stay and voyage, to repair their ships and carriages, whether their own or such as are hired or borrowed, and with the same liberty to depart from thence with their goods, merchandizes, and all other things whatsoever, either to their own or foreign countries, as they shall think fit; and that without any hindrance or impediment, saving, however, all the laws and statutes of each place.

A R T I C L E I I I.

That the people and inhabitants of this republic shall be at liberty to buy up all sorts of wares, goods and merchandizes, and the same to use and enjoy in the kingdoms, provinces, territories, and islands of the king of Portugal, at the first hand, either in small parcels or by wholesale, in whatsoever number and size, when and wheresoever they please; neither shall they be compelled to buy them of the farmer of the customs or monopolists, nor shall they be obliged to buy at any fixed price. They may also at discretion sell, traffic, and freely carry away, any sorts of goods, wares, and merchandize, whatsoever, from the said kingdoms and dominions, paying only the duties and customs in the consular due on the goods they carry out, as they were paid the 10th of March, 1653-4, O. S.

And, as to their buying and selling by the intervention of brokers, the said people of this republic, shall enjoy and use the same liberties, privileges and exemptions as the Portuguese themselves; nor shall they be treated with more rigour than the same inhabitants and natives; and that which is called the ancient charter, and all the privileges and immunities that heretofore have been granted to the English at any time, by all or any of the kings of Portugal, shall be confirmed by edicts, to the end that the people and natives of the said republic may enjoy them, together with all other privileges and immunities which are already granted, or shall be granted from the time to come, to any nation, kingdom, or republic, in alliance with the said king of Portugal.

ARTICLE IV.

That, whenever the people and natives of this republic arrive with their ships in the harbours of the king of Portugal, the said people and natives shall not be constrained, by the ministers, officers, and subjects of the said king of Portugal, to load, or put on board their ships, any other sorts or quantities of goods and merchandize, but only such as shall be by them approved of: neither, while they stay in the said harbours, shall there be put on board their ships, any more than two guards, or officers, at most; and in the unloading their ships, there shall be no unnecessary delays. And if the said ships, which are laden with dry goods, should not be unloaded within the space of ten days, and the ships laden with fish and provisions, within the space of 15 days, after their entrance into the port, they shall not, however, be obliged to pay any stipend, or sum of money, or any salary to the said guards, or officers, nor upon their account be at any farther expences, more than for the said ten or fifteen days respectively.

ARTICLE V.

If it should so happen that the subjects of the most serene king of Portugal, or others, within the kingdoms and dominions of the said king, should be imprisoned, and their goods and merchandize seized, stopped, and detained, by the office of the court of inquisition, or by its judges, or ministers, or by the king's exchequer; and should owe any money, or come to be indebted to any of the people of this republic, the said debts shall be fully and intirely paid out of the above-said goods, and merchandize, within six months next ensuing after the imprisonment, and seizure of the goods as above-said, without hindrance, or any molestation, from the said tribunal, or its judges, or ministers; but, if among the said goods and merchandize, so seized and held, there should remain in being, any goods and merchandize belonging to the said people and natives, the same shall immediately be restored to them.

ARTICLE VI.

That the captains, masters, officers, and mariners of the ships of this republic, or of any of its people, shall not attempt to sue, or in any wise molest, the said ships or people of this republic, within the said kingdoms and dominions of Portugal, on account of their wages, or salary, under pretence of their professing the Romish religion; nor shall they, under this or any other pretence, apply themselves to the service of the king of Portugal, or by any other means leave the ships whereunto they belong; and if they become delinquents, and offend in this point, their names being taken account of, they shall be chastised by the magistrates and officers of the place, and compelled to return to their ships; and if they cannot be found, it shall be lawful for the masters of such ships, or vessels, to detain their cloaths, goods, or wages, for the satisfaction of damages.

ARTICLE VII.

That the consuls, who shall hereafter reside in any part of the dominions of Portugal, for the assistance and protection of the people of this republic, shall be from henceforward nominated, and made by the said lord protector; and when so nominated, they shall have and exercise the same authority, as any consul, of this or any other nation whatsoever, doth now, or shall hereafter exercise in the dominions of the said king, although they do not profess the Romish religion. And, for the judging of all causes, relating to the people of this republic, a judge conservator shall be deputed, from whom no manner of appeal shall be granted, except to the Senate of Rellacao, where the law-suits commenced, and appealed to that court shall be determined within the space of four months.

ARTICLE VIII.

That if any of the people of this republic shall die within the kingdoms and dominions of the most serene king of Portugal, the books, accounts, goods and assets, belonging to them, or to others of the people of this republic, shall not be seized or possessed by the judges of the orphans and persons absent, or by their ministers and officers; nor shall they be liable to their jurisdiction; but the same goods, merchandize, and accounts, shall be delivered to the English factors, or procurators residing in that place, who are nominated or deputed by the deceased; but, if the deceased, whilst living, did not nominate any, then the said goods, merchandize and accounts, shall, by the authority of the judge conservator, be delivered to two or more English merchants residing in the place, and approved of by the English consul, after having given security by unexceptionable bondsmen (who shall also be approved by the same English consul) for restoring the said goods, merchandize and accounts, to the right

owners, or to their true creditors; and the goods which shall appear to have been the deceased's, shall be delivered to his heirs, executors or creditors.

ARTICLE IX.

That neither the king of Portugal, nor any of his ministers, shall detain or arrest any merchants, masters of ships, captains, or mariners; or their ships, merchandizes, or other goods which belong to this republic, or any of its people, either for war, or any other use whatsoever, unless the lord protector, or those to whom such ships and goods appertain, are first apprised thereof, and give their consent; but that the said ships, men, and goods, may freely, and without hindrance or impediment from the above-said king or his ministers, depart from the harbours and dominions of the said king, at their own pleasure; and that the sales of the merchandize and goods belonging to this republic, shall not be hindered, or delayed, under pretence that the king has occasion for them, or for any other reason whatsoever; nor shall they be taken for the king's use, nor for any other uses whatsoever, if the persons who are concerned in the goods do not consent thereto.

ARTICLE X.

That the people of the republic of England may freely carry in their ships all sorts of goods, merchandize, and things of what kind soever, even arms, provisions, or other such like, from the harbours and dominions of the said republic, or any other harbours or dominions whatsoever, provided they are not taken immediately from the harbours and dominions of Portugal, to be carried directly to any ports and territories whatsoever of the king of Spain; and that neither the most serene king of Portugal, nor any of his subjects, shall hinder the said ships, goods, or men, by seizures, reprisals, or any other means whatsoever, from navigating securely to the harbours and territories of the said king of Spain, and from trading therein; and that the people of this republic may freely carry arms, corn, fish, and all other sorts of merchandize, into the kingdoms, ports and territories of the king of Portugal, and sell the same at their pleasure, either by retale or wholesale, to any persons whatsoever, and for whatever price they can get; and they shall not be prohibited, circumscribed, or incapacitated by his said royal Majesty, or his ministers, governors, farmers of the revenue, or monopolists, or by any chamber or jurisdiction of any tribunal whatsoever, either public or private: and that such goods and merchandize as have once paid the customs or clearances in any port or harbour whatsoever, belonging to his Majesty, may be freely carried into any other ports or places whatsoever, of his said Majesty, without paying any farther duties, clearances, or sums of money, besides what the Portuguese merchants should pay, if the goods and merchandize did belong to them.

ARTICLE XI.

That the people and natives of the republic of England shall trade and traffic freely and safely from Portugal to the Brazils, and the other conquests of the said king in the West-Indies, and from the Brazils and the said conquests to Portugal, in all sorts of goods and merchandize whatsoever (except meal, fish, wine, oil, and Brazil wood, which are prohibited by the king, in pursuance of his contract with the Brazil company) paying the duties and customs which others pay who trade into those parts; and it is to be understood that the English ships hired by the Portuguese are to sail in company with the Portuguese fleet; and that the said people and natives arriving from any of the harbours and places in Brazil, and the said conquests, at any of the dominions of the said king whatsoever, shall not be compelled to unload their ships, or to put out any goods belonging to the English; but the officers of the customs shall cause the goods to be weighed while they are on board the ships, to the end that the customs and tributes due on them may be paid; and that no heavier duty or impost, nor greater sum of money, or expence, shall be demanded by, or paid to, the king's officers, than if the goods were put on shore; nor shall there be any delay in dispatching and dismissing the said ships. And after they are arrived at any of the dominions whatsoever, of the said king, and have paid the customs and duties above mentioned, they shall freely proceed to any other harbour or place whatsoever; and the goods put on board the English ships, either by the subjects of the said king, or by others, to be transported to any part whatsoever of the dominions of Portugal, shall by no means pay greater customs, or any other different duties, than if they were put on board Portuguese ships. And likewise, that the people and natives of the republic of England shall have the liberty of navigating to the colonies, islands, regions, ports, districts, towns, villages, and dominions, belonging to the king of Portugal, in the East-Indies, Guinea, Bengal, the island of St Thomas, or to any other part whatsoever, on the coasts and shores of Africa; and there to stay

or reside, negotiate, trade, and traffic, by land or by sea, on the rivers and fresh waters, in any goods and merchandize whatsoever; and to transport all kinds of merchandize to any place or region, with the same freedom as formerly; and also with the same that was ever granted, by any treaty heretofore, or shall hereafter be granted, to the natives of any other nation, in alliance and friendship with Portugal: and as to the customs and duties to be paid in those regions, they shall not pay more or heavier than those which are paid by any person or persons trading in any of the said places or regions. And likewise the king of Portugal, and his subjects, as well the Brazil company as all others, as often as they have need of foreign ships for carrying on their trade and navigation to the Brazils, or for the regions and islands above mentioned, or else where, shall hire the ships of this republic, and its people, at the usual and ordinary rates, as many as they please, and no other ships of any prince or republic; provided the number of English ships to be hired be sufficient to supply their wants: excepting that the Brazil company (as is contained in the charter of liberties granted to them by the king's letters patent) may hire, of what nation soever they please, two ships of war, and four others, to be sent with fish to the Brazils; and that as well the said Brazil company, as all other the subjects of the said king, who follow the business of merchandizing, may freely hire as many English ships as they please, and sail therein to the Brazils, and the other conquests of the said king, in the West Indies, without any licence, general or special, first to be obtained for that end; and the stipend agreed upon to be charged with the interest, shall run on, and an account thereof shall be kept till the whole is paid, though it should exceed the stipend on the time contracted for.

ARTICLE XII.

That, whereas the most serene king of Portugal, by his rescript sealed with his seal, and dated at Lisbon, the twenty-first day of January, in the year of our Lord, 1641, granted to the natives of the lands under the dominion of the states of Holland, &c. free liberty of importing and exporting all sorts of merchandize to and from his kingdoms, dominions, and territories; the people of the republic of England shall use and enjoy the same liberty in the kingdoms and dominions of the said most serene king of Portugal.

ARTICLE XIII.

That none who are commonly called Alcaydes (i. e. Bailiffs) or any other officer of his royal Majesty, shall seize or arrest any of the people of this republic, of what rank or condition soever, except in a criminal cause, being detected in any flagrant fact; unless he be first impowered in writing by the judge conservator; and that the aforesaid people, in all other respects, as to their persons, domesticks, and dwellings, books of accounts, interests, merchandize, and all other goods belonging to them, shall enjoy equal and the same immunity, within the dominions of the most serene king of Portugal, from imprisonment, arrests, and other molestations whatsoever, as already is, or shall hereafter be, granted to any other prince or people whatsoever, in alliance with the king of Portugal; nor shall they be hindered, by any permit or protection to be granted by the said king to his subjects, or others frequenting his dominions, from recovering their debts; but they shall have a right to sue any man to justice for the recovery of any just debt, although he be sheltered under the patronage or protection of any person whatsoever, or secured by any alvara, or written law, or whether he be a farmer of the revenues, or invested with any other privilege.

ARTICLE XIV.

And so far as much as the rights of peace and commerce would be null and useless, if the people of the republic of England should be disturbed for conscience sake, when they pass to and from the kingdoms and dominions of the said king of Portugal, or reside there for the sake of exchanging their merchandize: That commerce may therefore be free and secure both by land and by sea, the said king of Portugal shall take effectual care, and provide, that they be not molested by any person, court, or tribunal, upon account of the said conscience, or for having with them, or using, any English Bibles, or other books; and that it shall be free for the people of this republic to observe and profess their own religion in private houses, together with their families, within any of the dominions of the said king of Portugal whatsoever; and the same to exercise on board their ships and vessels, as they shall think fit, without any trouble or hinderance; and finally, that a place be assigned them for the burial of their dead. But withal, the English are cautioned not to exceed what is written in this article.

VOL. II.

ARTICLE XV.

If it shall happen hereafter, that any controversies or doubts do arise between the said republics, which may endanger the interruption of commerce between the one and the other nation, public notice shall be given to the people and subjects of both parties, through all the kingdoms and provinces of both, and the space of two years, after such notice, allowed for transporting themselves, goods, ships, merchandize, and any other substance whatsoever, without any molestation, impediment, or damage, offered, in the mean-time, either to their persons or goods. And it shall be lawful for the said people and subjects on both sides, to whom any debts may be owing at the time of such public notice, legally to demand the same within the said two years, in the places and dominions where they are owing; and from thence-forward uninterrupted justice shall be done them, in such manner, that in effect those creditors may be able to obtain their own within the time prescribed.

ARTICLE XVI.

If it shall happen, that while this treaty, friendship and society, are subsisting, any thing be committed or attempted by any of the people or natives of either of these parties, contrary to this treaty, or any part thereof, by land or by sea, on the rivers or fresh waters; the friendship, confederacy, and intercourse betwixt these nations, shall not for this cause be interrupted or broken, but shall rather entirely subsist and sustain its full force; and those only in particular, who violate the said confederacy, shall be punished, and none else; and justice shall be done, and satisfaction given, to all those concerned, by all those who by land, sea, on rivers, and fresh waters, shall act or commit any thing contrary to this confederacy, in any part of Europe, or in any other place within the freights of Gibraltar, or in America, or along the coasts of Africa, or in any of the lands, islands, seas, creeks, bays, rivers, or in any places on this side the Cape of Good Hope, within the space of one year after justice shall be demanded; but in all places as above, beyond the said cape, within eighteen months after justice be required in the manner above mentioned. And if the violators of the said confederacy do not appear, nor surrender themselves to trial, nor give satisfaction within this or that space of time now limited, according to the distance of the place, they shall be deemed as enemies to both parties; and their goods, substance, and revenues, whatsoever, shall be seized, condemned, and applied to the making of full and just satisfaction for the injuries done by them; besides which, the offenders themselves, when they happen to be in the power of either of the parties, shall be liable to the punishments which their respective crimes deserve.

ARTICLE XVII.

If it happens, that any controversy does arise between the said king's inspectors, officers, or ministers, and the said merchants, concerning the goodness of fish, or any other sorts of provisions whatsoever, which shall be carried to any of the said king's dominions; the same shall be determined by the arbitration of good men, provided they are Portuguese, who shall be equally chosen by the magistrate of the place, and the consul of the English nation; and they shall determine the business in such a manner, that no damage may accrue to the owner in the mean time, while the matter is in dispute.

ARTICLE XVIII.

That it shall be lawful for the people and subjects of either party, to go to the ports of the other, there to reside, and from thence to depart, with the same liberty, not only with merchant ships and transports, but also with convoys and men of war, equipped for repelling the force of the enemy, whether they are driven there by stress of weather, or come in for refitting their ships, or for victualling them, provided they do not exceed the number of six men of war, if they come there of their own accord; nor shall they stay, or continue, any longer time than may be necessary to refit their ships, or to purchase such necessary things as they want; that peradventure they may not be the cause of interrupting the commerce of other nations which are allied in friendship. And if at any time any unusual number of ships should chance to come to such harbours, it shall not be lawful for them to enter, without first having leave from those in whose jurisdiction such harbours may be, unless they are constrained to do it against their will, by the force of tempestuous weather, or other urgent necessity for avoiding the danger of the sea, and shipwreck; the which, if it should happen, they shall immediately shew the cause of their coming thither to the president, or chief magistrate of that place; nor shall they stay there any longer

time than they are allowed by the president or magistracy of that place; nor shall they commit any hostilities in the said harbour, which may be detrimental to the said republic or king.

A R T I C L E X I X.

That neither the said republic, nor king, shall suffer the ships and goods of either of them, or of their people, which shall at any time be taken by the enemies or rebels of the other, and brought to any ports or places of the other's countries, to be conveyed away from the right owners, or transfer the property; but the same shall be restored to them, or their attornies, provided they lay claim to such ships before they are sold and unladen; and either prove their right, or exhibit testimonies to make appear their property in them, within three months after the said ships and goods are so brought in: in the mean time, the proprietors themselves shall pay and discharge the necessary expenses for the preservation and keeping of the said ships and goods.

A R T I C L E X X.

That the people and merchants of the republic of England, who frequent the kingdoms, dominions, and countries of the said king, upon account of trade, or who arrive at this harbour with their ships, shall not pay for anchorage, or other port charges, or any other duties, or sums of money, more than those which were customarily paid to the king, and the chamber of Lisbon; but if any ill custom should introduce others for the future, they shall not be paid.

A R T I C L E X X I.

That no manner of tribute shall be demanded from any of the people of this republic, either in Lisbon, or in any other place, to be expended in the chapel of St George; nor shall they be compelled to hold any personal offices, or to wear any sort of arms, or to furnish others therewith.

A R T I C L E X X I I.

That the merchants of either of the aforesaid parties, and their factors, servants, negotiators of their families, or other servitors, mariners, masters of ships, and people of the navy, may securely and freely pass to and fro in the dominions, territories, and countries of the said republic and king; as also in their harbours, and on their out-skirts: and the people and subjects of the one may have and possess dwelling-houses of their own in any of the dominions of the other; and also warehouses for keeping their goods and merchandize, as long as they hire them, without being molested by any body. They may also wear swords, and carry with them both offensive and defensive arms, according to the usage and custom of the place, that they may the better be able to defend themselves and their goods.

A R T I C L E X X I I I.

That all goods and merchandizes of the said republic or king, or of their people or subjects, of both parties, laden on board the ships of the enemies of either, being there found, shall be made prize, together with the same ships, and sold at public sale. But that all the goods of the enemies of either, or merchandize laden on board the ships of either party, or of their people and subjects, shall be uncouched.

A R T I C L E X X I V.

That all just debts owing to the English by the king of Portugal, on account of merchandize taken or bought, or finally of ships laden either before or after putting their goods or sequestration to this time, shall be paid and discharged immediately, within two years next following: and that all recognizances, bonds, and surety-ships, given and entered into by the English, on account of any ships hitherto laden by the king of Portugal, or any of his subjects, for the ports of Brazil or Angola, and afterwards detained in any of his Majesty's harbours, or seized and occupied by prince Rupert and prince Maurice, or hindered in any wise by the said king, or by any of his officers or ministers from being able to perform their contracts, shall from this time forward be cancelled, broken, and made null: and that neither their persons, nor their ships nor goods, shall be put under arrest, or in any wise molested by the said king, or by any of his subjects, on account, and by reason, of the said contracts.

A R T I C L E X X V.

Whereas there was a convention between the new parliament, and the ambassador extraordinary from the king of Portugal; and the said ambassador, in the second of the six preliminary articles, which were agreed to on the 29th of December, 1652, obliged himself, that all the ships, goods, monies, and debts, appertaining to any Englishmen whom-

soever, which were taken and detained in the dominions of the king of Portugal, should immediately be freely restored in specie, provided they were still of the same value, and remain in the same good condition they were in at the time when they were first detained; but if they are grown worse than they were, then satisfaction should be given for them, according to their true price or value when they were first detained. But as to the compensation of the damages, they being ascertained by a declaration of the council, in their letter bearing date the 15th of November, 1652, and therein declared by the council, that it was not their intentions to press and demand restitution by vigour of law, but only in such manner as should be conformable to equity and reason, and that the ambassador might witness his inclinations to procure a peace; upon this supposition he obliged himself, that the damages should be made good. In the fifth article of the said preliminaries, the said ambassador farther took upon him, or engaged, that all the ships and goods of the English, which by the princes Rupert and Maurice, or by any ship whatsoever under their command, have been carried to Portugal, and there disposed of, or are still remaining, or either by them or their command, have been carried again from thence, shall either immediately be restored to their owners and proprietors, or reparation and satisfaction shall be given for them. And because some controversies are still remaining concerning the petitions or demands of the merchants and others, touching satisfaction; to the end these petitions or demands, these complaints of right and equity, may be judged and determined, it was by both parties contracted, concluded, and agreed upon, that the said petitions, or demands, about the damages and satisfactions, shall be referred, as they are by these presents referred, to the judgment, award, and sentence, of Dr Walter Walker, John Crowther, Dr Henry da Sylva, secretary of the embassy, and Francis Perreira Rebella, agent in the affairs of the said embassy, indifferent persons, and chosen as well on the part of the king of Portugal, as of the lord protector; who by these presents are made and constituted recognizers, arbitrators, and judges, to hear and examine all and every one of the demands and complaints of every one of the merchants and masters of ships, and others who claim a right to all or any of the ships, monies, debts, merchandizes, and all other goods whatsoever, mentioned in the said preliminary articles: which arbitrators shall meet and sit in the city of London, on the 20th day of July next, O. S. and the same day they shall take a solemn oath before the judges of the high court of Admiralty of England, that they will renounce all favour or respect to either party, and all private interest in judging the matters to them referred; and, by these presents, they are instituted and authorized to summon any persons whatsoever, and to order such depositions and papers to be laid before them, as shall have any relation to the business referred to them; and, whether they take the said oath or not, they shall, in a summary way, examine and enquire into the truth of all these petitions and complaints, and also all and every one of the damages which were occasioned by the said arrests and detainers. And the said arbitrators are authorized by these presents to finish all the causes above mentioned, and to liquidate, adjudge, and finally determine, the damages or losses, as they, or the major part of them, in their discretion and consciences, shall judge to be justice and equity, and to publish their final sentence in writing under their hands; which sentence, so published, shall bind and oblige both parties, without any appeal, revival, or redemption whatsoever. And the said king binds himself effectually to perform, keep, and observe the same, in all its members and articles, as also to pay, or cause to be paid, such sum or sums of money as shall be adjudged him as aforesaid. And besides which it is agreed, that if the said arbitrators do not agree and finally determine upon the said things to them referred, before the first of September next, O. S. then the said petitions or demands, which are left undetermined by the said arbitrators, shall be submitted, as they are by these presents submitted, to such person of the said lord protector's council, as the said lord protector shall nominate, within any time whatsoever, after the first of September next: for which end the said lord protector shall, by his mandate, authorize such person so nominated, finally to determine upon all and every one of the petitions or demands aforesaid. And if, before the pronouncement of sentence by the said counsellor, any papers should arrive from Portugal, or any procurator to solicit about any of those causes, the said counsellor shall give them a new hearing, and the sentence which shall be given by such person so instituted under his hand and seal, shall conclude and bind both parties, and the same shall be duly complied with and executed. And for the greater caution and security that such sum of money, as shall be adjudged by the said arbitrators, or arbitrator, may be honestly paid, it is agreed and concluded, that one moiety of the duties and customs of Portugal, arising from all the goods and merchandize whatsoever, of the natives and populace of this republic, who trade to Portugal, shall, immediately after the date of this treaty, be applied to the said payment. Which moiety shall, from time to time, be paid to that person which the lord protector

protector shall nominate; thereby giving satisfaction to the merchants, masters of ships, and proprietors, for their losses or damages.

ARTICLE XXVI.

It was concluded and agreed upon, that this present peace and confederacy shall not be broken by any other league or confederacy either already made, or that shall be made, by the most serene protector of England and king of Portugal, with any other princes or republics whatsoever; but this peace and confederacy shall be intirely kept, and its effects always remain in full force.

ARTICLE XXVII.

It was agreed and concluded, that both parties shall truly and firmly observe, and put in execution, the present treaty, and all and every one of the things therein contained and comprehended, and cause the same to be observed and performed by the people and subjects of the one and the other party.

ARTICLE XXVIII.

It was agreed and concluded, that the present treaty, and all and every one of the things therein contained and concluded, shall be ratified by the said lord protector and king, by the letters patent of both parties, adorned with the great seal in due and authentic form, within six months next ensuing; and within the said time mutual instruments shall be delivered on both sides: and also, this peace and confederacy shall immediately (after the delivery and exchange of the instruments) be proclaimed in the usual forms and places.

In truth and testimony of all which, we the commissioners of his highness the lord protector, and the ambassadors extraordinary of the most serene king, by virtue of our respective commissions and full powers, have signed the present treaty with our hands, and sealed it with our seals.

Done at Westminster, the 10th day of July, in the year 1654.

A SECRET ARTICLE between the lord protector of England, Scotland, and Ireland, on the one part; and the most serene king of Portugal, and of the Algarves, on the other part. Agreed on with the lord high chamberlain, his Majesty's ambassador extraordinary in London.

That the people and inhabitants of England, trading (as has been already mentioned) in the kingdoms, dominions, ports, or territories of the said king, shall not pay more duties and taxes, but only in the manner following, viz. That the English goods, merchandize, and manufactures shall never exceed 23 per cent. on their valuation for the payments of the duties; and they shall be favourably valued, according to the regimen of the custom-house, and the ancient laws of the kingdom: and supposing there should be any motive for raising the valuation, by reason of a rise in the real value of goods or merchandize, it shall not be done but by the consent and in the presence of two English merchants who reside and dwell in Portugal, and are chosen by the English consul; and granting that the merchandize should fall from its present or future exact value, the valuation and doubt shall be determined by disinterested persons, who shall be chosen by the English consul, and the officers of the custom-house; and the abovesaid inhabitants of the said kingdom trading in the said dominions and lordships of this republic, shall pay the present taxes and duties as they are newly imposed and settled in this present month of May 1654, according to the usage and laws of the place, both parties observing the laws and ordinances of each place respectively. And thus it was agreed upon and concluded, that the abovesaid article, and every thing contained therein, shall be confirmed or ratified by the said king, and by the said lord protector, by the letters patent of the one and the other party, sealed with the great seal, in due and authentic form, within six months next following; and within the said time instruments shall be passed or exchanged by the one and the other party.

In faith and testimony whereof we sign: the commissioner of the said most serene king, by the force, vigour, and virtue of our commissions respecting this act, and we sign this secret article with our hands and firms, and we seal it with our manual seals.

Done at Westminster the 10th day of the month of July, 1654.

A CHARTER of the PRIVILEGES and LIBERTIES of the English; consisting of various ancient provisional laws, alvaras, and decrees, granted by several of the kings of Portugal, in favour of the English, and others.

DON JOHN, by the grace of God, king of Portugal, and of the Algarves of this side, and beyond the seas in Africa, lord

of Guiney, and the conquest, navigation, commerce of Ethiopia, Arabia, Persia, and the Indies, &c. To all justices, commissioners, auditors, judges, officers of justice, and persons of my kingdom and dominion of Portugal; where, or before whom, this my present charter of privileges may be presented, and to whom the acknowledgement thereof by right may belong: know, that in this my very noble, and always loyal city of Lisbon, in the court of the custom-house thereof; to me, and to my auditor, who at that time was doctor Nicholas Dias Tinoco, as judge-conservator of the English, a petition was made, in the name and behalf of all the English nation then residing in this city; wherein they set forth, that among the laws, charters, and decrees, which the sovereign of these kingdoms had granted in their favour, it was provided, that no bailiff, or constable, should enter their houses, to execute any warrants, or mandates, on their persons, or goods; nor should it be done in any other place, or by any other person, but by their judge-conservator, or by his mandate, under the penalty of twenty crusadoes forfeiture to their use; except the officers of justice should be going in pursuit of a malefactor, detected in some flagrant fact: and that also they were excused, or exempted from paying any manner of rates, taxes, and loans, or performing any personal services, or holding any offices of charge whatsoever. And likewise, that they should not be imprisoned, or detained in prison, even in a criminal case, otherwise than by the mandate of my said auditor, their judge-conservator, without homage, according to the provisional law of the king, Don Emanuel; who, we hope, is taken into glory; and that likewise they were authorized to carry arms, offensive and defensive, in all this kingdom, as well by night as by day, before, or after, the ringing of the evening-bell, either with light, or without light, and enter with them into the prohibited places of all this kingdom. And, in like manner, they informed me how they had been vexed and disturbed by the scavengers, officers, who used to persecute them, notwithstanding, in order to excuse any differences, they used to send them one hundred reis, which they would not accept of; but from the Portuguese they accepted of forty reis, and less; but, because the petitioners were strangers, they condemned them in 1000 reis, or, at least, in 500 reis. And, likewise, when they went out of this city about their business, the justices of the country villages used to vex and disturb them; and they would not keep, or have any regard to, their said privileges, but rather put different and wrong constructions upon them, in order to vex and trouble the said petitioners; and they took away their arms, which they carried, and were authorized to carry.

They begged of me, and of my said auditor, their judge-conservator, to declare by his dispatch, that they were authorized to use the said arms, and that; if any officer of justice had a mind to impeach them, it should be done before their judge-conservator, and no other judge, or justice, whatsoever, under penalty of being suspended from their offices, and falling under the lash of their privileges; and they would thankfully receive the favour done them.—This was the contents of the said petition: together with which, Thomas Bostock, an Englishman, presented the charter of the liberties and privileges of the English nation, in which were inserted the subsequent papers and articles, viz.

DON FERDINAND, king of Portugal, &c. to thee Fernando Rodriguez, by my authority, judge of the causes relating to my custom house of Lisbon, or to any other, who after thee shall occupy thy place, health, &c. Know thou, that it being my pleasure to favour the English merchants, natives of the kingdom of England, and the dominions of the prince of Wales, I give thee to them for their judge in the law-suits they have, or may have, with any persons of my dominions, on account of merchandize bought or sold by them, to or from such person, or persons, of my dominions.

I thee therefore command, that thou (or whoever may be in thy place) take cognizance of the law-suits and causes, that between the parties abovesaid may happen, either by complaint of the one, or the other, upon account of merchandize, as is above already expressed. And, I command, that henceforward no others shall take cognizance of the said law-suits, besides thee, the said Fernando Rodriguez, or any other person, that by my authority may fill thy place, as judge of my said custom-house; and thou shalt not do any thing to the contrary, or beyond this my command. In witness whereof, I have commanded this my grant to be given in Lisbon, the 29th day of October, 1450, written by Stephen Armes, for the king Don Ferdinand.

THE KING.

DON JOHN, by the grace of God, king of Portugal, and of the Algarves, &c. To all to whom this letter shall come, we by it make known, that whereas we are graciously pleased to favour all the English merchants of the kingdom of England, who come to the city of Lisbon, or other places whatsoever of the kingdom, it is our pleasure and commands, that they shall henceforward have and enjoy all the privileges and liberties that are granted to the Genoese, and other merchants, who at this time come to, or reside in, our kingdoms,

doms, either in the city of Lisbon, or in any other places whatsoever, within our said kingdoms. We therefore command all judges and justices of the said kingdoms, and all general receivers of the revenues, scriveners, and all others whatsoever, to whom this may be presented, that they look into the said privileges and liberties, which the said Genoese, and others, frequenting our dominions, have obtained from these kingdoms, and have been heretofore confirmed by us; and see that they keep, observe, and fully comply with the same, in favour of the English merchants, for the same cause and reason as they strictly observe them in the favour of the said Genoese, and other merchants, at present residing in our kingdoms, it being a new favour we shew to the said English, having before given them privileges and liberties. In testimony whereof we have commanded this our letter-patent to be given in their favour, in the city of Coimbra, the 10th of August, 1400. Written by James Paes, for the king Don John.

The KING.

DON ALFONSO, by the grace of God, king of Portugal, and of the Algarves, &c. To all to whom this our letter shall come, we by it make known, that we privilege all the Flemings, Germans, French, and Britons, who come to reside in our kingdoms; and, forasmuch as Michael Arman, a German shoemaker, and a dweller in our city of Lisbon, is a subject of one of the said nations, which we so privilege, and he humbly imploring our favour; that we command our privilege to be given him, and considering his request, we have thought fit to shew him our grace and favour; therefore it is our royal pleasure and will, that from henceforward he shall not be constrained to pay any of our demands, rates, taxes, or loans, whatsoever; nor shall he do any services, or take upon him any charge whatsoever, or servitudes that are, or have been, occasioned by us, or by our councils, upon any account whatsoever: they shall not guard either prisoners, or monies, nor shall they be tutors, or preceptors, to any persons whatsoever; nor shall they be obliged to hold any manner of offices, or servitudes, under us, or our councils, against their will. In like manner they shall not be obliged to go into our service, either by sea or land, in any parts or places whatsoever; nor shall they be obliged to keep horses, arms, or mules for our service, notwithstanding any law or custom to the contrary. In the like manner we command that no person, of what state or condition soever, shall be so presumptuous as to take from them their dwelling-houses, or cellars, or stables; nor shall they quarter therein; neither shall their bread, wine, cloaths, or any other thing whatsoever of theirs, be taken from them against their will. We give them leave to hire and ride on beasts of burden, with saddle and bridle, all over our kingdoms and dominions, notwithstanding the prohibition and ordinance made about this to the contrary. And we command our harbinger, the harbinger of the queen our consort (whom above all we prize and love) as also of the princes and lords of the said city, that in case all and every one of us should have occasions, their said houses shall not be taken from them for the use of us, or any other persons, in any manner, or by any means whatsoever. Such is our royal favour, upon pain of our displeasure, and the forfeiture of six milreis to be paid for our use by any person whatsoever, who shall act contrary to this our mandate; the which we command our collectors and receivers to levy, and receive for our use, and the scriveners of their offices, shall enter it in their books, that a good and true account thereof may be kept under the penalty of paying double the sum for their neglect.

We therefore command all our justices, judges, officers of justice, collectors, receivers, and all other officers, and persons whatsoever, to the sight or knowledge of whom this may come, that they shall acknowledge, and hold the said Michael Arman, German shoemaker, for relieved; and excused from the abovesaid things; and he shall not be obliged, or constrained to any of them: therefore see that you comply with, and cause this our letter to be well and truly complied with, and kept and observed for the causes and reasons therein contained; nor shall ye do, or consent that any thing shall be done to the contrary hereof, in any manner, or by any means whatsoever; for such is our grace and favour, that it shall so be done, and let neither one nor the other do any thing to the contrary. Given in the city of Evora, the 28th day of March, 1452. Written by Loupo Fernandes for the king Don Alfonso.

The KING.

DON EMANUEL, by the grace of God, king of Portugal, and of the Algarves, &c. To all to whom these our letters may come, health, and desire of love. And whereas we are accustomed to honour such as are worthy, and with liberal beneficence tread in the paths of honour: and whereas our approved subject, Simon Lopes, having applied to us with his accustomed humanity, we have heard him, and liberally granted his request, as will appear by these our letters, wherein may be seen our gracious favours in behalf of the esteemed gentlemen Anthony de Belver and Conrado Selim

in their own names, and in the names of their company of noble merchants of the august and imperial city, and other towns of Germany; wherein they signified to us their desire of settling a house of their company in this city of Lisbon; in order to negotiate, trade, and merchandize in our kingdoms, if we approved of granting them some favours and liberties, which they requested of us, conformable to such as were given them in other countries; and as we have understood their request, and considered how much honour and humanity is due to such gentlemen, as well upon account of their persons, as being worthy of all favour; as on account of their commodious trade, which according to our opinion will be advantageous for our people; as also on account of their being imperial citizens of the august emperor of the Romans, Maximilian our beloved cousin. For which reasons we consent to their petition with very good will, granting them the liberties and privileges they desire, the which have never been granted to any others, or even to our own subjects, as in these letters will appear and be contained at large, viz.

In the first place, we make over a freedom to the said noble merchants, whereby they may freely negotiate, trade, sell, and buy, in all our kingdoms and dominions, either by their own proper persons, or by their factors and servants. It is our will, and we command, that whensoever their merchandize arrives in any ship or vessel before, or in the port of, or near this city, at the time of unloading, before any thing be unladen, our discharging officers shall first acquaint them of the time they intend to go on board; that if they please they come and bring boats with them, and therein see their goods unladen; but if they do not come, or send within three hours; a little more or less, then the said officers may unload, although the owners of the goods are on shore in the city.

It is our commands, that as soon as their goods are brought into the custom-house, they shall immediately pay the decima and fiza, except for woollen cloths, of which they shall pay the fiza at the time of sale, according to the present practice, and as it is contained in our articles; which fizas shall be paid to the officers of the tables, whereunto such duties do belong, and they shall enter the same in their books as paid, that all doubts about the payment may be avoided for the future. And so soon as they have paid the duties, and received the said goods in their own possession, they may carry them where they please, all over our kingdoms and dominions, without being obliged to acquaint any body of their moving from place to place, or of the sales they make of the said goods; much less shall they be obliged to enter or take out a permit from any of our offices of inland duties: nor shall they incur any penalty, or be deemed as smugglers, on account of their not entering the same, or taking out a permit for moving their merchandize from place to place, according to the method ordained by our charters, articles, and laws: and this is to be understood of such goods and merchandize as have paid our duties, and have cleared, of which they shall have certificates from our officers, that by virtue of the same they may carry and sell their merchandize all over our kingdoms, without paying any thing more; and they shall be treated in the same manner as the Flemings, as is contained in their privileges.

It is our will and pleasure, that no officer, nor farmer of the duties, nor any other person whatsoever, shall enter into their houses to search, nor shall they in any wise oppress them, except by mandate of our accountant-general: he first having information from some unsuspected person, or persons, making it appear, that they have in their houses some counterband or run goods; and when such an occasion shall offer of sending to their house, it shall be done by one scrivener of the custom-house, and one of the farmers of the duties, if there be any; and without the said scrivener they shall not go to their houses to search for the said counterband goods.

It is our will and pleasure, that they shall not pay any duties, either for the provisions, or the furniture they import for the use of their house, much less shall they any duties for the woollen cloths they import for cloathing their factors and servants, allowing them two suits a year for each person; also canva's and wrappers of hemp for bags, and crocus for their merchandize, they depositing on oath, that they import all those things for their own private use, and not for sale; because, if they are for sale, they shall pay the usual duties.

It is our will and pleasure, and we command, that none of our officers of justice presume to enter into their houses, except the said corregidor, or such as shall be sent by him, and no other, under the penalty of twenty crusadoes forfeiture to their use; except the officers of justice are in pursuit of some malefactor detected in any flagrant crime; in such case they may enter into their houses.

It is our will and pleasure, that they shall carry arms not only themselves, but also their domestic servants and attendants, so far as fix of them in number, which arms they may carry by night and by day, all over our kingdoms and dominions, as well before the ringing of the evening-bell, as afterwards, with or without light, provided, however, that they

they do not use them otherwise than they ought to do; and this notwithstanding our laws to the contrary: the which servants, however, shall not be Spaniards, for none of that nation shall enjoy this liberty.

It is our will and pleasure, and our order, that any person whatsoever, who will not observe, keep, and comply with these privileges, or doth any thing contradictory to them, such person shall incur the penalty of 50 cruzados, in which he shall be condemned for the use of the hospital of All Saints in this city; and by these presents we command our accountant-general, that he knowing of any person who will not keep and comply with these privileges, according as is therein contained and declared, shall immediately cause execution to be made for levying the penalty on the said person, which shall immediately be delivered to our general-receiver of the said hospital, and charged in the books for every time they violate these privileges, or do any thing contrary thereunto; besides which we command all other justices and officers of justice whom it may concern, that they observe this declaration, and see that it be intirely kept and complied with, together with all other privileges they have obtained of us, effectually putting the said penalty in execution; forasmuch as it is our will and intention, that the grace and favour we shew them shall in all things be understood to redound more to their advantage than to their prejudice; and because our pleasure is such, we have commanded this our alvara, or law, signed by us, to be given in their favour; the which shall be as valid as if it had been our letter, registered in the court of chancery, notwithstanding any law or ordinance there may be to the contrary. Done in Almeyrim the 7th day of February, in the year 1411. Written by Andrew Pireo.

By the said privilege which we have granted them, they may load their merchandize in any ships they please, as well Portuguese as strangers, trading and lading from the islands: and besides this, we make them our natives; and we are just now informed, that at the Caza do Vero Pezo, the officers put doubts and difficulties to them, when they loaded their goods in foreign ships, as our said natives are wont to do: from whence it follows, that it is of damage to them to be privileged persons, which was not our intention, but rather we intended to do them all favour and honour. Therefore, for the declaration of which it is our will and pleasure, that as well in this case, as in any other whatsoever, which they have a mind to enjoy as strangers, they may do it; because we will not have it so that their privileges shall lessen any favour granted them as strangers, if it be possible to avoid it. And therefore they have for their privilege, that no officer of justice whatsoever can enter into their houses, without an order from their said judge, under certain penalties; and we are informed that some officers and persons have meddled with them, and with things belonging to them, and have used them ill; and, in order to provide against this, it is our will and pleasure, and we require, that no officer of ours either disturb or meddle with them, or any thing that belongs to them, except their said judges, or any by their order. And if any such case should happen, wherein their persons and their factors ought to be taken into custody and imprisoned, it is our will and pleasure, that they shall be conducted to the castle by their said judge, or his bailiff, in person, and not by their servants or followers; and if the cause of their imprisonment be such as will admit of bail, we command that immediately, without other delay, the said bail may be taken. Thus stands the case, wherein it is so largely contained and declared, and was contained and declared in the said privileges and petition; the which being presented to me, and by me considered, as also by my said auditor Dr Nicholas Dias Tinoco, I therein pronounce my dispatch as followeth, viz.

Let them make use of arms as is expressed in their privileges; and, for this end, the charters and mandates they petition for shall be granted and drawn out for them in authentic form, wherein shall be included the article that speaks of arms, and that other justices cannot enter their houses without an order from this conservatory; and all bailiffs, constables, and all other officers of justice, that shall do any thing to the contrary, shall immediately be notified by the scrivener of the said conservatory, that without the approbation of this court, they meddle not with these privileged persons, under the penalty of being suspended from their offices, and falling under our displeasure. Lisbon, the 11th of May, 1645.

By the said Tinoco.

And this dispatch being put to the said petition, by virtue thereof this present charter of privileges was passed or drawn out in authentic form, for all in general, and every one in particular; by which I command, so soon as this shall be presented to you, being first registered in my chancery, you comply with it, and keep it, and cause that it may be very intirely complied with, and kept, in the manner as is therein contained; and in complying therewith, ye shall not hurt, molest, nor vex the said Thomas Bostock, nor his servants and factors; nor shall ye do, or cause to be done, any act

VOL. II.

or acts, as serving writs, warrants, &c, upon him, of his house, except it be done by the mandate of the said my auditor, his competent judge conservator, and not by the mandate of any other judge, without approbation of this conservatory; it being so decreed them by a charter granted in favour of the English, by the king Don Emanuel (who we hope is taken into glory.) But rather ye shall render, or cause to be rendered him all favour and honour. The which let one and another so comply with; and nothing to the contrary shall ye do, nor shall ye put any doubt or delay to the observance of it; lest the penalty of 50 cruzados be levied upon you, and ye fall under the lash of the said privileges, and of being suspended, &c.

Given in this very noble and always loyal city of Lisbon, and court of the custom-house, and conservatory thereof, the 4th day of the month of November, from the year of the birth of our Lord Jesus Christ, 1647.

The king our lord sent this by Dr Anthony de Faria Machado, his judge-advocate, and his auditor, &c. &c. &c.

A DECREE about Englishmen's not being served with any executions, without an order from their judge-conservator.

On the part, and in behalf of the English nation, it was represented to me, that it being granted them by the 13th article of the treaty of peace, that no judge, or other officer of justice, could order to be seized, or taken into custody, any subject of the king of Great-Britain, my good brother and cousin, for any cause, either civil or criminal, without first having an order for so doing from the judge-conservator; the said article is so little regarded, that Englishmen are every day seized and taken into custody, without the precedency of such order from the judge-conservator; so that the said article is by no means observed, or complied with; and because, according to the wording thereof, it is said, that only in flagrant crimes the English could be imprisoned by any of my ministers, and in other cases recourse ought to be had to the conservator, or that he should write his consent to the orders of other judges before they should be valid; I recommend to the lord chief justice of the house of supplication, that he cause the said article to be observed in its due form. In Lisbon, the 23d of August, 1667.

KING.

WHEAT, which is brought from the islands, or from any other parts beyond the seas, may be imported free of duties in any parts or places of this kingdom:

I the king make known to whom this my alvara, or law, may come; that by the courts, which I held in this city of Lisbon, on the 28th of January, 1641, a reply to which I commanded to be given, in the year 1642, it was requested of me by the state, in chapter 55, that I would please to exempt all wheat imported from the islands, and other parts beyond the seas, from paying any duties in this kingdom, it being a provision absolutely necessary for the inhabitants thereof: and, as I have maturely considered the convenience and good of the common-weal of the kingdom, and other subjects, and for other reasons, for which I am accustomed to grant what is requested of me by temporal laws, and by their means to shew grace and favour; it is my will and pleasure, that the wheat which comes to this kingdom, as well from the islands as from any other parts beyond the seas, shall not pay any manner of duty; from which it shall be exempted, and free for ever. I therefore command the inspectors of my treasury, judges, justices, commissioners, and all other officers of justice, and other persons of these kingdoms and dominions, to whom this my alvara, or law, may be presented, and to whom the acknowledgement thereof doth belong, that they comply with it and keep it; and cause it to be intirely kept, observed, and complied with, according as is therein contained, without putting the least doubt or contradiction to it; because such is my grace and favour: and it shall be registered in the books of my treasury, and of the custom-house, and its regimens, and all other places where it may be necessary, that it may come to the notice of every body; and it shall be valid, as if a law made in court, and a charter given in my name, and sealed with the seal-pendent, notwithstanding the ordinance in the second book, title the 40th, to the contrary. Anthony de Moraes writ it in Lisbon, the 25th of May, 1647.

KING.

Of the things which owe no duties in this city of Lisbon; taken from the 12th chapter of the Book of Rates of the Custom-house.

All wheat, barley, rye, Indian corn, and pulse that are brought into this city from any foreign parts whatsoever, shall not pay any manner of duties in this custom-house; nor flesh-meat, cheese, or butter; forasmuch as I have shewn favour to the chamber and people of the said city, to free the

said things from duties; and, in the same manner, arms, powder, horses, gold, silver in lump, or in coin, and books, shall not pay any duty whatsoever in the said city and custom-house thereof. But all other things, and any kinds of merchandize, of what sort or quality soever, which belong to this custom-house, and are brought thereto by sea or by land, as is already said, although express mention should not be made in the said books of rates, of every species of goods in particular, yet they shall pay the said duties of 10 per cent. for the decima, and 10 per cent. for the sisa; and this, because the said merchandize and things shall pay the same duties of 20 per cent. in all and every one of the custom-houses of this kingdom, islands, and dominions hereof; and the people who bring them to the said custom-house of Lisbon, shall bring with them certificates from the officers of the other custom-houses from whence they came, to make appear that they have paid the duties, inasmuch as otherwise they will be obliged to pay the duties in this city for any goods that are brought to the custom-house thereof. This is all that was expressed in the said 12th chapter, which, by order of the commissioner of the custom-house, James Soares, the Notary Luis da Costa has taken this copy of, in authentic form, the 2d of August, 1668.

A PROVISION, or LAW, whereby the English are exempted from paying decima on their stock, and from being obliged to take upon them any charge in war.

I the king make known, to whom this alvara, or law, shall come, that as I am desirous to oblige the English nation with particular marks of my royal favour, on account of the ancient friendship or alliance which I have had with that crown, and now in particular, in respect of some motives which induce me to it; it is my will and pleasure to shew grace unto the English merchants, and others of the same nation, residing in these kingdoms and dominions of Portugal, who have not been therein naturalized, by exempting them from paying the decima on their stock, which all the other dwellers in this kingdom pay: and I grant them liberty, that they shall not be obliged to keep horses; and if they have any for their own service, they shall not be taken from them against their will, nor shall they be obliged to any other charge of war. And because the publication of this privilege may be followed with great inconveniences, this alvara, or law, shall remain in all secrecy; and for the better keeping it so, it shall not go out of the hands of the English consul, for the time being, residing in my court; nor shall it be registered in any other book but in that of secrets, in the secretary's office, in the expedient or original writing from whence this was transcribed in Alcantara, the 29th of May, 1656. And I Peter Severinde Noronha wrote this by particular command of his Majesty, whom God preserve.

KING.

Of such things as owe no duties whatsoever; which are as follow, viz.

Pulse from England, Scotland, and Ireland, New-England, and its dominions; that is to say, beans, peas, lentils, wheat, barley, Indian corn large fort, ditto small fort, rye, butter, cheese, gun-powder, horses, gold, silver, in lump or in coin, books, flesh-meat of any sort whatsoever; concerning which there is a sentence against the contractors or farmers of the inland duties on flesh, obtained by Henry Bomelman, in the years 1645 and 1646, pronounced in court, the said farmers being plaintiffs, and the said Bomelman defendant; wherein it was decided, that the things in dispute owed no more than 40 reis for the entry, and 200 reis for the guard; which sentence lies in the office of the scrivener, Christopher de Campos. Also no duty shall be paid for biscuit, or any other species of bread, cannon-shot of iron or bell-metal, bandeliers, pikes, and muskets. But, however, these things ought to pass through the custom-house, and the accoutrements of war be offered to the service of the king; and, if he has no occasion for them, then the owners thereof may carry them where they please.

ALVARA, or a LAW, in favour of the ENGLISH; allowing them to repute their ships as Portuguese, which pay no duties going from Lisbon to the Western Islands, and other conquests belonging to the crown of Portugal; which are word for word in the manner following; viz.

I the king make known, to whom this alvara, or law, may come, that the English merchants residing in the Western Islands, sent to acquaint me by their petition, that I had been pleased to command, among other agreements and resolutions of the treaty of peace lately concluded with the lord protector of England, that they might transport and carry any sort of merchandize, which had paid the duties in any one port, to any other ports or places, without paying any more duties, or any manner of tribute, besides what is paid by the native Portuguese themselves, for the goods that belong to them; and that, having once paid their duties in this city, they

shall not pay again any sort of tribute in any other port; and that the English ships which are freighted by Portuguese, shall not pay more duties than is paid for the goods navigated in Portuguese vessels, as will appear by the tenth and eleventh articles of the treaty, the authentic tenor whereof was by them presented: and whereas the said articles were not duly observed and complied with in the said islands, but, on the contrary, the English were vexed and disturbed with doubts and molestations, and that the natives of the islands had unjustly extorted a great deal of money from them, since the said articles of peace were made and published; whereas, in the observance thereof, due regard ought to have been had to the exemptions I granted to the English, because the royal mandates ought always to be effective, and the transgressors of them punished:

Therefore they requested of me, that I would please to favour them with my provisional law, to oblige the ministers of the said islands, to whom the observance of what is contained in the said articles doth belong, that they comply with the same, and observe and keep them in the manner as is therein expressed; and that they should not consent to the molestation of the petitioners, nor take from them more than they ought to pay, and that restitution should be made of what they had hitherto been unjustly obliged to pay. Considering what they alleged, and the form of my orders, which had been given on such like matters, they hoped I would grant their request, and with all humility they would thankfully receive the favour.

I, having seen and considered the said petition, did thereupon send my decree, dated the first of June of this present year, wherein it was written, that a provisional law should be prepared and passed by the council of my treasury, in favour of the said petitioners, conformable to the articles of peace; and if it should appear to the said council, that there was any thing in the matter, necessary to be represented to me, they should do it immediately. And in compliance with this my order, the council gave their dispatch, that the said provisional law should be made and passed, in the form ordained by my said decree, and that the articles of peace mentioned in the said petition, should be requested from the secretary of state's office, which was accordingly complied with; but, as the said articles are written in Latin, they were translated into the Portuguese language, and are as follows, viz.

[Here follow articles the tenth and eleventh, which are wrote in full length, in folio 11.]

Wherefore I command the commissioners of my treasury, and all other ministers and officers thereof, and the justices of the said islands, and all other persons to whom this my provisional law may be presented, and the acknowledgement thereof doth belong, that they comply with it, and keep it intirely; and that they cause it to be observed, complied with, and kept, in conformity to the articles herein translated, without any manner of doubt or contradiction; because such is my will and pleasure: and it shall be valid, though its effect should last more than one year, notwithstanding the ordinances or regimens that may be to the contrary; the which shall be registered in the books of the custom-house, that it may be publicly known to all people. Anthony Velloso Estafio writ it in Lisbon, the 4th of July, 1657; and John Pereira Bitancur ordered it to be transcribed.

QUEEN.

ALVARA, or a LAW, to exempt the English from paying brokerage against their will.

I the king make known, to whom this alvara, or law, may come, that having a regard to what the English merchants, residing in the island of Madeira, sent to inform me of by their petition, requesting that I would please to order my provisional law to be passed, in order to prevent the brokers from obliging them to pay brokerage, unless they, of their own accord and free-will, thought fit to employ them, according to the third article of the last treaty of peace with England: and having seen what they allege, and likewise the information given by Dr Manoel da Cunha, conservator of the English, together with the answer given upon this by my attorney-general, it is my will and pleasure, and command, that the brokers shall not oblige the English to pay brokerage, except the said English shall freely, and of their own accord, employ them, as they request in their petition; having considered the articles of peace, and likewise the said answer of my attorney-general. And this alvara, or law, shall be duly complied with, in the manner as is therein contained; and it shall continue in force, though its effect may last more than one year, notwithstanding the ordinance in the second book, title the 40th, to the contrary. Emanuel de Couto writ it in Lisbon, the 27th of January, 1661, and sent this by two conveyancers. Jacinto Facundes Bezerra ordered it to be transcribed.

QUEEN.

ALVARA:

ALVARA, or a LAW, which the king, DON ALPHONSUS VI. granted, at the request of the English merchants, on account of such cafes in law that may take place in the conservatory, even with such persons as are privileged.

I the king make known, to whom this alvara, or law, may come, that the merchants of the crown of England represented to me, that notwithstanding the conservatory, which by an article of peace I have granted them for their causes, they are obliged to litigate in other courts, under pretence that the words of the general concession do not abrogate the privileges granted in law, and are enjoyed by their contenders, which is a great hindrance to trade, they being obliged to attend various courts, and delay their causes, with trials about preferences: and because, in all things which are not repugnant to justice, I desire to favour the subjects of the king of Great-Britain, my good brother and cousin, I have ordered this matter to be examined with all due consideration; and it has been my pleasure to resolve, that the said conservatory shall take place, even with such as are privileged, and with privileges which are incorporated in law, either upon account of persons, or upon account of things; such as officers of the mint, of the court of India, and mines, and other such like; that every body, in causes which proceed from trade, shall be obliged to answer, or litigate, whether they are plaintiffs, or defendants, in the said conservatory, notwithstanding any laws or ordinances whatsoever to the contrary: therefore, for this effect, it is my will and pleasure to annul them; but, however, with the declaration it is not my intention, by this concession, to alter any thing whatsoever belonging to the judge or court of my exchequer, upon account of the quality of the matters and things therein transacted; and it is always to be understood, that appeals are to be made from the said conservator of the English, to whom they belong, as has been hitherto practised. And this alvara, or law, shall be complied with, in the manner as is therein contained; and it shall be valid, though its effect may last more than one year, notwithstanding the ordinance in the second book, title the 40th, to the contrary. Emanuel de Couto writ it in Lisbon the 16th of September, 1665. Jacinto Facundes Bezerra ordered it to be transcribed.

K I N G.

The superintendant of the collectors of the $4\frac{1}{2}$ per cent. of the parish of St Paul in this city, notwithstanding the order given him in this junto or council, shall not oblige the subjects of the Catholic King, the French, English, and Hollanders, who are not naturalized, to pay what was charged to them on their stock; and those who have lands in this kingdom, and are not naturalized, shall pay only what is charged on the said lands, his Majesty having declared it so by his decree of the 9th of the present month of July. And all other strangers of other nations ought to pay what is charged them on their stock; because, in order for them to enjoy this privilege, it is necessary they should shew what they have to entitle them to it, that it may be observed and kept accordingly. And this dispatch shall be recognized in the office of the accountant-general of war. Lisbon, the 18th of July, 1699, with four firms of the ministers of the junto of the three states. Registered, folio 106.

TRANSCRIPT of the RESOLUTION about the TAX on STOCK.

In the book of advices from the counties and hundreds, which serves in this office of the accountant-general of war and the kingdom, in folio 211, is registered the order given to the auditor of the town of Crato, about the particular things mentioned in this provision; of which tenor, other orders have been given to all the rest of the ministers and superintendants of the parishes of this city, and its districts; of which the following is a transcript.

PROVISIONAL, fol. 211. of the BOOK, Number XII.

Don John, by the grace of God, &c. I make known to thee, auditor of the hundred of Crato, that I am informed by the consultations of the junto of the three States, that the subjects of several different nations dispute the payment of the tax on their stock, which they were charged with, under pretence that they are privileged by the articles of peace, which free them from paying the said tax. I was pleased to resolve, on the 28th of April last, that the French, and the subjects of other nations, ought to pay the tax on stock, which was charged to them according to their trade, and that the subjects of the Catholic king, my good brother and cousin, and those of England and Holland, ought to be exempted from this contribution; but, however, such as are naturalized, notwithstanding the privileges of England and Holland, ought to pay the tax on stock, in the same manner as the natives of this kingdom do. And I send you this advice of my said resolution, that thou mayest observe it in that hundred, in the part which concerns thee; and due no-

tice shall be taken of this order in the office of the accountant-general of war. The king our lord sent this by Don Philip de Souza, captain of his royal guards, and by Francis de Mello, forrester-general of the kingdom, both deputies of the junto of the three states. Lewis Simeons de Azevedo writ it in Lisbon, the 7th of May, 1708. Gaspar Salgado, who serves as secretary, ordered it to be transcribed. Accordingly, these are the contents of the said privileges, which in every thing shall be duly complied with, according as is therein contained; and by virtue hereof, they shall be observed and kept, and every one shall comply with them, and nothing to the contrary shall ye do, &c. And this is registered in my chancery of the accounts of the kingdom and palace. Given in this city of East Lisbon, the 8th day of the month of February, from the year of the birth of our Lord Jesus Christ, 1717.

A TREATY of COMMERCE betwixt the most serene lady ANNE, queen of GREAT-BRITAIN, and the most serene lord Don PETER, king of PORTUGAL, and of the Algarves, &c. Agreed upon and concluded in Lisbon, the 27th of December, 1703.

P R O L O G U E.

Whereas the league and strict friendship which is between the most serene and most potent prince Anne, queen of Great-Britain, and the most potent Peter, king of Portugal, requires that the commerce of both the British and Portuguese nations should be promoted as much as possible; and her sacred royal Majesty of Great-Britain, hath signified to his sacred royal Majesty of Portugal, by the most excellent John Methuen, Esq; member of the English parliament, and ambassador extraordinary in Portugal, that it would be very acceptable to her, if the woollen cloths, and the rest of the woollen manufactures of Britain, might be admitted into Portugal, the prohibition of them being taken off: that this matter might be treated and transacted, they have given their full power and commands; that is to say, her sacred Majesty of Great-Britain to the abovesaid most excellent John Methuen, and his sacred Majesty of Portugal to the most excellent Don Emanuel Telles, marquis of Alegrete, Conde da Villa Major, knight professed in the order of Christ, &c. &c. &c. who, by virtue of the full powers to them respectively granted, having maturely and diligently considered the matter, have agreed upon the following articles, viz.

A R T I C L E I.

His sacred royal Majesty of Portugal promises, both in his own name, and that of his successors, to admit for ever hereafter into Portugal, the woollen cloths, and the rest of the woollen manufactures of the Britons, as was accustomed till they were prohibited by the laws; nevertheless upon this condition, that is to say,

A R T I C L E II.

That her sacred royal Majesty of Great-Britain shall, in her own name, and that of her successors, be obliged for ever hereafter to admit the wines, of the growth of Portugal, into Britain; so that at no time, whether there shall be peace or war between the kingdoms of Britain and France, any thing more shall be demanded for these wines by the name of custom or duty, or by any other title whatsoever, directly or indirectly (whether they shall be imported into Great-Britain in pipes or hogheads, or other casks) than what shall be demanded for the like quantity or measure of French wine, deducting or abating one half of the custom or duty. But if at any time this deduction or abatement of customs, which is to be made as aforesaid, shall in any manner be attempted and prejudiced, it shall be just and lawful for his sacred royal Majesty of Portugal, again to prohibit the woollen cloths, and the rest of the British woollen manufactures.

A R T I C L E III.

The most excellent lords the plenipotentiaries promise and take upon themselves, that their above-named masters shall ratify this treaty, and within the space of two months the ratifications shall be exchanged.

For the faith and testimony of all which things, I the plenipotentiary of her sacred royal Majesty of Great-Britain, have confirmed this treaty by the subscription of my hand, and by the seal of my coat of arms: and the most excellent lord the plenipotentiary of his sacred royal Majesty of Portugal, for avoiding the controversy about precedence, between the two crowns of Britain and Portugal, hath subscribed another instrument of the said tenor, changing only what ought to be changed for that reason.

Given at Lisbon, the 27th of the month of Decem. 1703.

JOHN METHUEN. (L. S.)

A New

A NEW LAW, concerning the DIAMONDS found in the MINES of BRASIL.

DON JOHN, by the grace of God, king of Portugal, and of the Algarves, on this side, and beyond the seas in Africa, lord of Guinea, and the conquest, navigation, commerce of Ethiopia, Arabia, Persia, and the Indies, &c. I make known to whom this my law may come, that as the mines of diamonds, which are found in my dominions, do belong to me in the same manner, and by the same title, as all the mines of metals, I have therefore a right to make such reserves of them as I may think proper; and as, by the custom of those dominions in which diamonds are found, such as are of a special greatness, are reserved for the sovereign; therefore it is my will and pleasure, that even in the countries in which, by my permission, diamonds are extracted (besides the other precepts and regulations prescribed by the laws, and such as I have been pleased to give) all diamonds that are of the weight of twenty carats, or upwards, shall be reserved for my use; and the persons who find them, or take them out of the mines, shall deliver them immediately, within thirty days (to be counted from the time of their finding or taking them up) into my mints, or to the next neighbouring ministers, that they may remit them to the mints; of which delivery an entry shall be made by the scrivener, who has the charge of that office, which he shall be obliged to remit to the governor. And such diamonds being manifested and delivered by any slave whatsoever, that slave shall be made free, and he shall have his charter of freedom granted him, and drawn out in my name by the superintendent of the mint, or by the minister to whom he made such delivery; and to his owner shall be given four hundred milreis for the value of the said slave, which shall be paid him in the said mint where the said diamond was delivered or remitted to. And if the delivery be made by a freeman, to him the said freeman shall be given the same four hundred milreis. And all the diamonds, of the weight of twenty carats, or upwards, which may be found henceforward, and not delivered in the manner above mentioned, it is my will and pleasure, that they shall be forfeited to my use, whose hands soever they may be found in; of which all, or any persons, may impeach, inform, or denounce; and their denunciation being proved, and the diamond taken into custody, they shall receive four hundred milreis as a reward, to be paid them only out of my treasury. And if the informer be a slave, that slave shall have his liberty given him, and his owner shall receive four hundred milreis for the value of him, except the information of the slave be given against his master; for then in such case the slave shall be free, and two hundred milreis shall be given him, and both the freedom and the premium shall be paid and complied with, after the denunciation is adjudged to be good; and the master shall have nothing for the value of his slave, but he shall incur the penalties here-under declared. And, in the same manner such may be informed against, who finding or taking out diamonds, of the weight of twenty carats, or upwards, do clandestinely hide, smuggle, or secret them, and not manifest and deliver them in the manner above prescribed; which persons, besides the loss of the diamond, or its value, I command, shall incur the penalties established against those who smuggle, secret, or run gold; and, being a slave, he shall undergo the punishment of being whipt and confined to the galleys during his life. In like manner such persons may be informed against, who send such diamonds out of the kingdom; which persons, besides the loss of the value of the diamonds, shall incur the penalty of being banished ten years to Angola, and confiscation of all their goods; and those informations being given by the slaves of such delinquents, the said slaves shall have their liberty given them as a reward. But if the information be given by a slave belonging to another person, then, besides the slave's being set at liberty, his master shall receive four hundred milreis for the value of him, as is declared above.

And because it is not my royal intention to comprehend the diamonds that have been taken out of the mines to the time of the publication of this resolution, it is my pleasure, that all persons who have diamonds in their possession, that weigh twenty carats, or upwards, which were taken out of the mines before the publication of this resolution, do manifest them within two months (to be counted from the day of the publication hereof) before any of my auditors of the state of Brasil, and the other ministers of this kingdom, and in all my dominions where such diamonds are; and that they deliver them to the said ministers to be remitted to this court, and delivered into the mint thereof, in order that they may be purchased for my use, at the just valuation that shall be put upon them. And such as are not manifested and delivered within the said space of time, shall be reputed as discovered or found after the said publication; and they shall be irremissibly lost or forfeited to my use in any hand where-soever they may be found: which persons may be impeached, informed of, or denounced against, and the informers shall have the same reward, and the delinquents the same punishment, as above mentioned; and in the same manner

may be impeached such as are accomplices or abettors in the smugglings here prohibited: and on them shall be executed the same punishments in this resolution established, and the informers shall have the same rewards.

Wherefore I command the lord chief justice of the house of supplication, governor of the high court of king's-bench, and the house of Oporto, vice-king of the state of Brasil, or whoever fills that place, judges of the said courts, governors of the conquests, and all justices, commissioners, auditors, judges, officers of justice, and persons of these my kingdoms and dominions, that they observe, comply with, and keep this my law, and cause the same intirely to be observed, complied with, and kept, as it is therein contained. And that it may come to the notice of every body, in order to cut off the allegation of ignorance, I command my chancellor-general of these kingdoms and dominions, or who-so-ever fills his place, that he cause it to be published in the chancery, and send transcripts thereof, under my seal and his firm, to all the justices of the counties and hundreds of these kingdoms, and to the auditors of the donatory countries, in which the justices do not enter into visitation; whom I command to proclaim it immediately in the places where they are, and cause it to be proclaimed in all their hundreds and tithings; and it shall be registered in the books of my disembargo, and house of supplication, and of Oporto, and in the Ultramarine council, and all other places where such like laws are used to be registered; and this original shall be deposited in the Tower of Records. Given in West Lisbon, the 24th of December, 1734.

KING.

COPIES of the TWELFTH and THIRTEENTH ARTICLES of the TREATY made betwixt the CROWNS of ENGLAND and PORTUGAL, at the Marriage of CHARLES the Second, June 23, 1661. Taken from fol. 1. of the register-book, by petition made by consil Poyntz, to his Majesty Don JOHN, December 12, 1716. Translated.

ARTICLE XII.

In order that the subjects of the king of Great-Britain may enjoy greater advantages in trade and commerce in all the dominions of the king of Portugal, it was agreed, that if the merchants and factors (besides the privileges which were granted to them by the first treaties) ask, in virtue of this, to reside in all places where they have a mind especially, they may inhabit and enjoy the same privileges and immunities, as far as relates to trade, as the native Portuguese, in the cities and places of Cochim and Dio, provided that the subjects of the king of Great-Britain, that are to reside in the above places, do not exceed the number of four families in each of them.

ARTICLE XIII.

The same privileges, liberties, and immunities, shall be enjoyed by the subjects of the king of Great-Britain, in the place of Bahia de todos os Santos, Pernambuco, and Rio de Janeiro, and in all other the dominions of the king of Portugal in the East-Indies.

For the DEFINITIVE TREATY of 1763, see the article AMERICA.

TURKEY COMPANY and TRADE. Under the article LEVANT TRADE, we have shewn that the FRENCH, in the year 1535, were the first nation that made TREATIES OF COMMERCE with the Porte: we have likewise there shewn, by what wise measures and regulations that neighbouring nation first established, and has since advanced, this branch of commerce to a greater extent and advantage than is now done by any other European power. And if those wise measures and regulations are duly weighed and considered, we cannot be at all surprized, that the effects thereof should prove more lucrative and successful to France than the measures taken by other nations, with regard to that trade, have proved to them. Likewise,

Under the article ORIENTAL TRADE, we have resumed this subject, and given an historical view of the conduct and proceedings of our own Turkey company, and the case of the governor and this company of merchants trading to the Levant Seas, as laid before the parliament by the Turkey company in the year 1753, in order to prevent the trade being laid absolutely open, as was then aimed at. Under this article, also, I have given an abstract of what has been argumentatively urged, in opposition to this company, in order to lay that trade open to all his Majesty's subjects.—These particulars we have judged necessary to state before the public, as preliminary to the determination of the expediency of opening this trade.

But as this matter was depending before the parliament, when I drew up what has been said under ORIENTAL TRADE, and it being then doubtful what measures would be taken with this company, I thought it more eligible to postpone what I had further to observe in relation hereunto, till the determination of the legislature should be known. And that the reader may have

have before him what the parliament have done upon this occasion, we shall here insert the last act made with regard to this company, anno vicesimo sexto Georgii II. regis, intitled, An act for enlarging and regulating the trade into the Levant Seas, which is as follows:

Whereas king James the First, by his letters patent, bearing date the 14th day of December, in the third year of his reign, did grant to several persons therein named, and to their sons, and such others should then after be admitted, or made free, that they should be one fellowship, and one body corporate and politic, by the name of The Governor and Company of Merchants of England, trading into the Levant Seas; and, by the same name, should have perpetual succession; and did direct, that all persons, subjects of this realm, being mere merchants, which then were, or after the date of the said letters patent should happen to be, under the age of twenty-six years, or not out of his or their apprenticeships, should be admitted into the freedom of the said company, if he or they should demand the same within one year next after he or they should attain the age of twenty-six years, or within one year after the end of his or their apprenticeships, and should offer and pay to the said governor and company, for his or their admittance, the sum of twenty-five pounds; and did further direct, that all persons, subjects of this realm of England, being mere merchants, above the age of twenty-six years, should be admitted into the freedom of the said company, upon paying a fine of fifty pounds; and did also direct, that all and every the sons of such as were or should be free of the said company, and also all their apprentices employed in that trade for the space of three years, or upwards, within the limits of the said letters patent, should, after the end of their apprenticeships, be admitted to the freedom of the said company, on payment of the sum of 20s. only. And whereas king Charles the Second, by his letters patent, bearing date the 2d day of April, in the thirteenth year of his reign, did ratify and confirm the said letters patent of king James the First, and did further direct, That no person residing within twenty miles of the city of London, should be admitted into the freedom of the said company, or have any benefit of the privileges thereof, unless he be made free of the said city. And whereas the trade into the Levant Seas has very much decreased, and the taking of less fines for the admission of persons into the freedom of the said company, and the not restraining the freedom thereof to mere merchants, and to such persons as, residing within twenty miles of the city of London, are free of the said city: and the securing to all persons admitted into the said company, the liberty of exporting, at all times hereafter, all sorts of goods and merchandizes (not prohibited by law to be exported) to any port or place within the limits of the said letters patent, from what parts of Great-Britain, and at what time, and in what quantity, and on board what ships (navigated according to law) they shall respectively think proper; and also of importing, in the like manner, from any port or place within the limits of the said letters patent, raw silk, or any other goods or commodities purchased within the said limits (not prohibited by law to be imported) are the most probable means of recovering and extending the said trade, for the benefit of this nation: may it therefore please your Majesty that it may be enacted, and be it enacted, by the king's most excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons, in parliament assembled, and by the authority of the same, That from and after the 24th day of June, 1754, every subject of Great-Britain, desiring admission into the said company of merchants of England, trading into the Levant Seas, commonly called, or known, by the name of the Turkey Company, shall, upon request for that purpose, made by himself or any other person in his behalf, to the governor, or deputy-governor, of the said company for the time being, be admitted into the said company, within the space of 30 days after such request shall be made, and shall have, use, and enjoy all the liberties, privileges, jurisdictions, franchises, power, and authorities, granted to the said company by the said letters patent, as largely, fully, and amply, to all intents, constructions, and purposes, as any member of the said company could, can, or may have, use, and enjoy the same, by virtue of the said letters patent, such subject paying or tendering, or causing to be paid or tendered, for such his admission, for the use of the said company, the sum of 20l. and no more, any thing in the said letters patent, or either of them, to the contrary in any wise notwithstanding.

And be it further enacted, by the authority aforesaid, That from and after the 24th day of June, 1754, the following oath, in lieu of the oath heretofore taken by persons, upon their admissions to their freedom in the said company, shall be taken by every person, upon his admission to his freedom, either before the governor or deputy-governor of the said company, or before two of his Majesty's justices of the peace (who are hereby respectively impowered and required to administer the said oath) which justices are hereby required to certify, under their hands and seals, that the said oath was taken by _____ on the _____ day of _____ before us, two of his Majesty's justices of the peace in and for

VOL. II.

— You swear to be good, faithful, and true, to our sovereign lord king George, his heirs and successors: you shall be obedient and assiduous to the governor, his deputy, and assistants, of the company of merchants of England, trading into the Levant Seas, in all lawful matters: you shall truly hold and keep to your power (having no singular regard to yourself, to the hurt and prejudice of the common-weal of the said company) all statutes, acts, and ordinances, which have been duly made, according to the grant of privileges granted to the said company, and consistent with an act of parliament made in the 26th year of the reign of king George the Second, intitled, An act for enlarging and regulating the trade into the Levant Seas: the secrets of the said company you shall not disclose; and, if you shall know any person or persons, that intend any hurt, harm, or prejudice, to our aforesaid sovereign lord the king's Majesty, his heirs, or successors, or to the said company, or the privileges of the said company, you shall give knowledge thereof to the said governor, deputy, or assistants, or to some of them; and you shall not colour or free any goods belonging to any one not free of the said company.

So help you God.

And be it further enacted, by the authority aforesaid, That from and after the said 24th day of June, 1754, it shall and may be lawful to and for all and every person and persons, being free of the said company as aforesaid, separately or jointly, to export, or cause to be exported, from any port or place in Great-Britain, to any port or place within the limits of the said letters patent, in any British or plantation-built ships (navigated according to law) at any time, and to any person or persons whatsoever, being freemen of the said company, or sons or apprentices of freemen (such freemens sons or apprentices being his Majesty's Christian subjects) so long as such person or persons shall remain under, and submit to, the protection and direction of the BRITISH AMBASSADOR AND CONSULS RESPECTIVELY, for the time being, any goods, wares, or merchandizes whatsoever, not prohibited by law to be exported; and also to import, in like manner, from any port or place within the limits of the said letters patent, raw silk, or any other goods, wares, or commodities, purchased within the said limits (not prohibited by law to be imported) upon paying or securing the customs, and other duties payable for the same to his majesty, his heirs, and successors, by virtue of any law now in force, or hereafter to be made; and, upon paying such impositions or sums of money as shall be assessed and charged upon all goods, wares, or merchandizes, to be exported or imported as aforesaid, or upon any ships laden with the same, for defraying the necessary expences of the said company, any thing in the said letters patent, or either of them, or any ordinance, constitution, or bye-law of the said company, made, or to be made, to the contrary, in any wise notwithstanding.

Provided always, That the exportation of gold or silver, either in foreign coin or bullion, shall remain subject to the bye-laws of the said company, made or to be made in that behalf.

And be it further enacted, by the authority aforesaid, That it shall and may be lawful for the said governor or deputy-governor, and company, in general court assembled, to make such rules, ordinances, or bye-laws, for the good government of the said company, as the major part of the members present at such general court shall think necessary; but no such rule, ordinance, or bye-law, shall be valid, or of any force or effect whatsoever, unless the same be confirmed at a subsequent general court, to be held at least one calendar month after the general court at which such rule, ordinance, or bye-law was made; and if any seven, or more, of the freemen of the said company, shall think themselves aggrieved by any rule, ordinance, or bye-law, made or to be made, it shall be lawful for them to present an appeal, in writing, against the same, to the commissioners for trade and plantations, who are hereby impowered and required, with all convenient speed, to hear such appeal, and to approve or disapprove such rule, ordinance, or bye-law, and in such manner as to them, or the major part of them present, shall appear fit and reasonable. Provided, also, That in case any such appeal shall be brought against any future rule, ordinance, or bye-law, to be made by the said governor and company, such appeal shall be brought within twelve calendar months after such rule, ordinance, or bye-law, shall be so made and confirmed as aforesaid; and if any such appeal shall be brought against any rule, ordinance, or bye-law of the said company now in force, such appeal shall be brought within twelve calendar months after the said 24th day of June, 1754.

Provided, also, That the persons appealing against any such rule, ordinance, or bye-law, shall, at the same time, give notice in writing of such appeal, to the governor, deputy-governor, or secretary of the said company, for the time being. Provided, nevertheless, That no such rule, ordinance, or bye-law, shall be of any greater or other force or validity, than the same would or ought to have been if no such appeal had been given by this act.

II A

Provided

Provided always, and it is hereby further enacted, That whenever any general court of the said company shall be appointed to be held, for the making of any rule, ordinance, or by-law, public notice thereof shall be given in the London Gazette, at least 20 days before the time appointed for the holding of such general court.

Provided always, and it is hereby enacted, That all rules, orders, and regulations made for preventing infection, shall be and remain in full force and virtue, as if this act had never passed. See our article *QUARANTINE*.

And be it further enacted, by the authority aforesaid, That no goods or merchandizes liable to retain the infection of the plague, and coming from the Levant, without a clean bill of health, shall be landed in any part of Great-Britain or Ireland, or of the isles of Guernsey, Jersey, Alderney, Sark, or Man, unless it shall appear to the satisfaction of his Majesty, his heirs, or successors, or of his or their privy-council, that the said goods or merchandizes have been sufficiently opened and aired in the lazaretto of Malta, Anconâ, Venice, Messina, Leghorn, Genoa, and Marseilles, or one of them*.

* Before the making of this act, it was observed, by a judicious advocate for laying the trade intirely open [see *ORIENTAL TRADE*] and which may deserve attention, as the trade is now circumstanced, viz. 'That all ships returning from the Levant in times of infection, might perform quarantine either at Port Mahon or Gibraltar, as these places are directly in their voyage homewards, and might be made very convenient for supplying them with proper stores and refreshments; so that it would be, in some measure, the interest of ships on a long voyage, to call at one or other of these places, especially if they were made *FREE PORTS*. Moreover for the greater security, all ships returning from the Levant might be obliged, under the penalty of forfeiting ship and cargo, to touch at one or other of these ports, and obtain bills of health from the magistrâtes, before they proceed to England. These cautions are very practicable in themselves, and yet much stricter than have been usually required either of the Turkey company, or of the merchants trading to Barbary and Morocco.'

R E M A R K S.

The preceding act of parliament having obviated some, if not most, of the principal objections that have been made against the company, and in favour of laying the trade absolutely open [see our article *ORIENTAL TRADE*], we shall only observe, that it must be left to a few years experience to shew whether the general permission of trade to the Levant, given by the aforesaid act, will tend to enlarge this commerce, according to the intent and title, or not.—But, to have rendered this act still the more effectual; it is to be wished, we humbly presume, that the heavy charges that necessarily attend the Turkey trade (as the support of the ambassador, consuls, &c.) were borne by the state instead of the company.—I am not unapprized of the unprecedented munificence of his present most gracious Majesty, to our ambassador at the *Porte**, in order to give more weight to our minister, and to render our mercantile interest in Turkey the more respectable; and yet it seems the French have, by the measures they take, more influence than we, and have rapidly advanced their commerce in the Turkish empire, while ours has been many years upon the decline. When this trade was first established, there might be many good reasons why the Turkey company was charged with the support of the ambassador at the *Porte*, together with their consuls, &c. and the same reason might exist for a number of years, but things have now taken a very different turn. It has been proved to a demonstration that our Levant trade hath declined; it has indeed languished to that degree, that our Turkey merchants, who some years since figured at the top of the commercial world, now bow their diminished heads. Yet is not the trade intirely sunk; on the contrary, we import annually from Aleppo above 600 bales of raw silk. This alone is a great national object; for if these 600 bales of raw silk contain 180,000 small pounds†, what a benefit do we not receive by the manufactory of this silk, in the article of labour?

* As this may be a piece of secret history to most, yet, in justice to the king's liberality, I think the public should know, that, besides the appointments allowed by the company to our ambassador at the *Porte*, his Majesty, out of regard to the merit of Mr. Porter, while *commissaire d'affaire* at the court of Vienna, and to induce him the more earnestly to promote the interest of his kingdoms at the *Porte*, has allowed him out of his privy-purse, which was never done to any ambassador there before, the additional appointment, as *commissaire d'affaire*, of 1000*l.* sterling per annum, with this memento, 'that it is not to be made a precedent of.'

† A bale of 25 batmans, or 300 small pounds, produce 180,000 lb.

In regard to the laying the Turkey trade intirely open in England, it will give great light into this subject to apprise the reader of what has been urged pro and con, with relation to

the laying open the Levant trade in France; nor will it prove useful so to do upon this peculiar occasion only, but it will give us a lively idea of the measures taken in France, in order so thoroughly to canvass all commercial topics, that the resolutions of the state may terminate in the promotion of the general prosperity. And this I am the more disposed to do, as it may, some time or other, determine us to make establishments of the like kind.

What I shall present to the reader upon this occasion, is an extract from some *MEMORIALS* presented by the *DEPUTIES OF THE COUNCIL OF TRADE IN FRANCE*, to the *ROYAL COUNCIL*, in 1701, being the year after the establishment of the said council of trade by king Lewis XIV.

A *MEMORIAL* of the deputies of the trading towns in the west of France, concerning the commerce with the Levant, the goods used in that trade, and why Marseilles alone has the privilege of trading thither.

Experience teaches us that the English carry on [in 1701] the trade of the Levant with much greater advantage than our nation; their woollen cloths are better made, are better and cheaper than ours, and, therefore, are more in request, and have a greater vent. They carry thither lead, pewter, copperas, logwood, which are goods that they are masters of, together with a great deal of pepper; and, that they may not drain their country of its gold and silver, the ships which are freighted with those goods are laden likewise with dry fish, of their own catching, sugars from their colonies, and other goods of their own product, which they sell on the coasts of Portugal, Spain, and Italy, and receive the produce in pieces of eight, which they carry to the Levant, to add to the stock necessary for purchasing the merchandizes which they take in there, and carry to England.

This way of trading is very beneficial to the English, since by supplying themselves with coin from foreigners, they draw so much the less from home; and besides, they make a profit by the goods they sell in their passage upon the coasts of Portugal, Spain, and Italy, which contributes to render this a good trade, and enables them to sell the merchandizes of the Levant much cheaper than any other nation.

Upon the like plan it would be more advantageous to France to permit the towns of the west to carry on this trade in the same manner directly.

We have, as well as the English, woollen cloths, stuffs, paper, silks, tobacco, fish of our own catching, and linen cloths, which they have not; we can, like them, make up our cargoes of different sorts of goods, some for the Levant, and others for Spain, Portugal, and Italy; we may sell those goods by the way, and carry the produce in money to the Levant to help make our purchases.

Thus the towns of the west might carry on this trade without sending our money abroad, our manufactures would be consumed in greater quantities, as far as the competition with those of the English would permit, and we might bring back in our ships all the merchandizes of the Levant that are wanted in the western parts of France, which would then come much cheaper to us than now they do.

Since the towns of the ocean have been obliged to go and unlade their goods at Marseilles, instead of endeavouring to continue and increase that trade, they have been forced to relinquish it absolutely. And indeed, how can it be expected they should come from the extremity of the Levant to pay their respect to Marseilles? subject themselves to consume a fourth or a third more of victuals than usual? pay greater wages to seamen, and higher rates for insurance? lie at heavy charges while they are unlading and relading their goods; and by this long delay, and that of making a round-about voyage, run the risk of being still at Marseilles, when they might have been at home?

The pretence of contagious distempers, ought not to be made use of against the towns of the ocean to exclude them from this trade; since every body is taught by self-preservation to guard against them, there being likewise proper places appointed for quarantine on such occasions; besides, the passing of the Straights, and the change of climate, purifies the malignant air; for which reason, the English and Dutch returning from the Levant have no need of such precautions; and there's hardly any instance, that this trade has introduced among them any pestilential distemper, which some would put us in apprehension of.

By the arrêts, none but the towns of Dunkirk and Rouen can receive goods from the Levant directly without touching at Marseilles; nor they without paying 20 per cent. for entry; the other ports complain of being excluded: this extraordinary duty has been laid on but since the year 1685, whereby the throwing up of that trade has not only been continued, but it has likewise given occasion to the farmers to be very vexatious in extending that duty to merchandizes which are not subject to it, as allums, oils of Italy and Barbary, manna, aloes, assaetida, wax of Camenice, musk, sal armoniac, gum senegal, nay, even to sublimated mercury, which is prepared at Amsterdam, and to other the like goods that

that they could impute to this trade; which has occasioned the excessive dearth of all drugs that are used in our manufactures.

Consequently, our manufactures have laboured under this dearth: which is contrary to the views we ought to have, of increasing the export and vent of them to foreign parts, and putting them, as much as possible, upon an equal foot with foreign manufactures.

The town of Marseilles, which is solely impowered to manage the Levant trade, thrives by the exclusion of the other maritime towns, to the prejudice of the public: that city ought not to oppose the liberty demanded by the ports in the ocean, to drive the said trade directly, and to bring home their returns without paying the 20 per cent.

Marseilles, by being a free port, by its near situation to the Levant, and the settled correspondence of its merchants there, will always have sufficient advantage over the ports and towns of the west. Marseilles is not excluded from any commerce permitted to the towns of the west (or ports of the ocean); therefore, what justice is there in appropriating the trade of the Levant to that city alone?

Besides, the manner in which Marseilles carries on this commerce cannot be approved, since it is manifest, that the goods which it sends thither, of the growth or make of the kingdom, being in moderate quantities, and of little consideration, the merchants of that town make the greatest part of their remittances in pieces of eight and in other sorts of coin; which consumes a good part of the returns from Cadiz and the Indies, and greatly contributes to make bullion more scarce throughout the kingdom.

The merchants of Marseilles lay out a great part of such remittances in linen cloth and stuffs of the Levant, which, whatever precaution be taken, do not fail of being dispersed about the kingdom, to the prejudice of our own manufactures. It would be proper to prohibit, not only the importation, but likewise the wear of them in France; and that nothing were brought from the Levant, but drugs and unwrought materials proper for our manufactures, such as galls, cotton, hair, sugar, silk, wool, and the like.

The privilege which the merchants of Marseilles have, of enjoying this trade in exclusion of the other towns of the kingdom, joined to the 20 per cent. which is charged on the same sorts of goods, and the fixing particular ports for importing of goods into the kingdom, give those merchants an opportunity to starve the trade of the kingdom, and to enrich themselves so much, that notwithstanding the 20 per cent. the charges of carriage, commission-money, duties of export, and the disadvantage of the exchange, which may together be reckoned at above 35 per cent. we find our account better in fetching those goods from foreigners, than from the merchants at Marseilles; who, being favoured so much, do not give themselves the trouble to send them into the provinces of the kingdom.

They sit still for us to come to their market, that they may have an opportunity of imposing what rates they please: nor are they ever sufficiently stocked to supply all our demands. And since the drugs which they bring to Marseilles from the Levant, come thither from the east in caravans, which enhances the price of them considerably, and that the same drugs which come directly from the East-Indies to the ocean, are not subject to the 20 per cent. for entry, no more than is cotton, the deputies conceive, that it would be a piece of justice to forbid the farmers to exact the duty of 20 per cent. upon the said drugs so brought from the Levant.

THE REPLY of the deputies of the western ports of France to the preceding ANSWER.

1. We must own that the liberty which the towns of the ocean demand, may somewhat diminish the commerce of Marseilles in the Levant: but the benefit which it will procure to the state and to the public, by the abundance of merchandizes and the increase of navigation, is of much greater weight; besides, Marseilles may extend its commerce into the ocean, to make itself amends for the diminution of their Levant trade: our colonies are a fair field for them to exercise their navigation in.

2. This article is exaggerated, and it were needless to answer it: however, we shall say that there is not any merchandize of the Levant comprized among those specified in a list by the deputy of Marseilles, that has not a consumption in the west; except as for the glass manufacture, which are but of small consumption.

3. If from the year 1669 to 1685, the sea-port towns of the west in general have not carried on the trade to the Levant, it is because at that time our nation had not mariners, ships, skill, nor emulation, for improving all sorts of commerce: it is however true, that the towns of Rouen and Bourdeaux had correspondence there, and sent ships thither.

The deputy of Marseilles makes a wrong interpretation of the decree of 1685. The duty of 20 per cent. takes its rise from 1669, and was laid upon the Levant merchandizes which were first landed in Italy, England, and Holland: and the effect of the decree of 1685, has been only to debar the

king's subjects from fetching the merchandizes of the Levant directly to Rouen, where, before that decree, they were exempt from the duty of 20 per cent. to which they are now subject, whether they come directly from the Levant, or whether they have been first landed in any other country. This is an effect of the powerful protection which Marseilles has had, to the prejudice of the state and of the public. It is to avoid taking from England and Holland the Levant merchandizes, that we demand liberty to trade directly to the Levant.

4. If the traders of Marseilles are suffered to set against us their titles of prescription, it is to no purpose to propose any thing; but the council has thought fit to give leave to lay before them the grievances of such arrêts as are prejudicial to commerce in general.

5. We own it is good to guard against running of goods: it belongs to the general farmers to take the necessary precautions, but the 20 per cent duties are more likely to favour than hinder it.

6. We agree we have not spices as the English and Dutch have; but Marseilles has them not any more than we; and as to all other merchandizes, it is beyond contradiction true, that we get them more commodiously than Marseilles, and cheaper; because the commerce of the Ocean being of much greater extent than that of Marseilles in particular, procures us all things with greater ease, and in greater plenty.

7. This article is not maintainable; and it is indisputable that the sale of our fish in Portugal, Spain, and Italy, will produce specie for the Levant, as it does actually supply the English therewith.

The commerce which the towns of the ocean maintain in Portugal and Spain, by linen cloths and other manufactures of the kingdom, is a perpetual fund to furnish them with specie, which Marseilles has not, nor ever can have. The deputy of Marseilles contradicts himself, in saying that there is no carrying sugars and tobacco into Italy and the Levant, since he himself puts sugars into his account of what merchandizes are proper for the Levant; and as for tobacco, it is well known that Genoa, Leghorn, and other towns of Italy, consume considerable quantities of Clairac and St Domingo tobacco: and the towns of the ocean are willing, for the good of the state, to bind themselves not to send abroad any coin of the kingdom either to strangers or others, and to carry to the Levant only the product of those merchandizes which they shall sell in foreign countries, provided Marseilles submits to the like law.

If an account be taken of the goods sent from Marseilles to the Levant, and of those which are imported at Marseilles, communibus annis, it will be seen what difference there is in the value, and how much specie must have been carried out to purchase the overplus.

The balance which has been produced upon two sorts of Levant merchandizes essential to our manufactures, proves the truth of what the deputies of the west have advanced concerning the prices during the months of October, November, and December, when the commerce was in the greatest tranquillity, and upon the foot of the present time, when the prices of merchandizes of the Levant are very high in England and Holland, through the fear of a war. Which has a counter-effect favourable to Marseilles, since by her situation she is free from that fear, and should not be sensible of the like change; and therefore the deputy of Marseilles should not bring his comparison upon the foot of the present time, because it would be a false rule.

9. This reason is in favour of the towns of the ocean, since Marseilles by its situation will always have great advantages over them; and as for the merchandizes proper for the Levant, the towns of the west will have them in our provinces as commodiously as at Marseilles.

10. If it is true, as the deputy of Marseilles asserts, that the Dutch fetch from Marseilles the merchandizes of the Levant, they will fetch them from the ports of the ocean much more willingly and commodiously.

11. All the preceding articles shew, that the intention of the merchants of the west is perfectly opposite to such views; and that it is purely and solely to avoid fetching from England and Holland the merchandizes of the Levant, that they now ask the liberty of trading to the Levant directly.

12. The merchants of the west reckon they shall considerably augment their fisheries, and by that means have wherewithal to furnish in abundance this kingdom, Spain, and Italy.

13. It is agreed, that Marseilles is the natural port of the city of Lyons for commerce; but it does not at all suit the towns of the west, who have ports and ships of their own for trading; and if the merchandizes of the Levant come dearer to the towns of the west, they give so much the less umbrage to Marseilles; therefore that city ought not to oppose the liberty that is desired.

14. Since we propose a general liberty for all towns to follow the Levant trade, there would be no inconvenience if the town of Sette should enjoy it: the competition which the deputy of Marseilles is apprehensive of, cannot but be advantageous to the state, on account of giving greater vent to the king-

dom and its manufactures, as likewise occasioning a more plentiful importation of the goods of the Levant, which will make the market better for the public: if hereby some private men are losers, the state still gains; and instead of having any fear, left such permission when granted to the towns should enable the English, Dutch, and Italians, to make us abandon that commerce; on the contrary, several towns united may, better than Marseilles alone, rival those nations.

15. The ports of the west have places appointed for performing quarantine, and it is easy to take the same precautions as are taken at Marseilles to defend ourselves from the plague; besides, it is undeniable, that the passage of the Straights to come to the north, and the change of climate, purifies that infectious air, and the English and Dutch for that reason are exempt from such quarantine.

16. It must be allowed that the 9th article of the treaty of Ryfwic, gives to the Dutch the same advantage, as to the king's subjects, in point of trading to the Levant; but we need not fear their coming from the Levant directly into our ports, with cargoes of 50, 60, and 100,000 crowns to subject themselves to the humour of the buyers. That nation solely applies itself to make marts of goods at home, and to fix such a price upon them as they think fit, and then to furnish retailers therewith. It is the less to be feared that they should bring to France the merchandizes of the Levant directly, if it be true what the deputy advances in his 11th article, that Marseilles will furnish that nation with them. Besides, the Dutch being almost continually at war with the nations of Barbary, cannot carry on that trade without great convoys, which enhances very much the merchandize, and hinders them from carrying the same to France, where they would be losers, and renders their navigation to the Levant very inconsiderable. To conclude, The towns of the west have actually the liberty of going to the Levant; and, in a word, they want only to free themselves from the subjection of going to unlade and lade again at Marseilles, which is equivalent to a formal exclusion, and has obliged the traders of the west to quit that commerce.

17. Whatever memorial may be given upon this head, it will fall of itself.

A MEMORIAL of the deputy of Marseilles, in answer to the foregoing; setting forth the grounds and reasons of the privilege which that town enjoys of trading to the Levant.

It is a very difficult task, when a single man is obliged to answer such knowing and acute persons as the deputies of the ports of the western sea; and if I had not a just cause to defend, a cause in which the interest of the state, as well as that of the town of Marseilles in particular, is concerned, I should distrust my ability, through want of practice, in drawing up memorials so well put together, and so politely turned as those given in by those gentlemen: but as the present dispute is about facts, and that the trade of the Levant has ever been allowed to be the most beneficial to the state, the council will please to permit me to lay before them my reasons in the best manner I can, without being too solicitous about purity of stile, which is not my talent.

1. The pretension of these gentlemen is not new; they have often endeavoured at the same thing, though without effect, because it is against the good of the general trade of the kingdom, as I shall prove in the sequel of this memorial. This proof is founded upon the ancient course and practice of trade, which they themselves take notice of; and upon the information and insight which the king has had of the prejudice resulting from this proposition to the general commerce of his dominions, for this reason his Majesty has fixed things in the condition they have been for a long time, and are in to this day.

2. It is certain, that the permission which they require of driving a trade to the Levant, is not proper to be granted them; because neither in their own towns, nor among their neighbours, can they find a consumption of divers gross commodities, which they would be forced to take in to make up the lading of their ships, as does Marseilles which enjoys this advantage.

3. One sure proof that this trade is not proper for them, is, that it does not appear, they ever set about it, notwithstanding the permission which all the ports of the west had to drive this trade, before and after the establishment of the free port of Marseilles, which was in 1669 until 1685. For the ports of Rouen and Dunkirk had this permission, because the convenience of their having the merchandizes of the Levant by the way of Holland and England, more easily than by fetching them from thence directly, which they find very difficult, always put them upon that prejudicial practice of giving their profits to those foreigners and enemies, to the damage of the king's subjects; and, if his Majesty had not put a stop to it, by his decree of the 15th of August, 1685, which lays a duty of 20 per cent. upon the merchandizes of the Levant which should come from England or Holland into France, in order to exclude them for the good of his subjects, it is certain that by this time those nations would have supplied France

with all the Levant goods, and the king's subjects would have utterly lost that trade, so important to the state.

This is so true, that the experience of it puts the thing out of doubt. I ask those gentlemen, the deputies, whether it be not true, that after 1669, while they brought in by their ports the commodities of the Levant from Holland and England, when no duty was laid to hinder those merchandizes from entering otherwise than by Marseilles, France was filled with those goods; whereby the trade of the Levant by Marseilles was reduced to the last gasp, as not finding any longer a consumption, but only in Provence and the parts adjacent? This is what occasioned the king's passing the said arrêt of 1685, wherein the special causes moving him thereto are inserted; without the passing of which arrêt, it is evident, that these two foreign nations, who have long fought to destroy our Levant trade, as well by their ambassador at the Porte, as by their intelligence and secret practices in France, had entirely cut us out of it.

4. His Majesty, and all his ministers, who since the establishment of this free-port, which was done upon due cognizance of the matter, and mature consideration, have ever since done their utmost to support this important trade; foreseeing, some years after the said arrêt, that they could not so soon root out the intelligence which those nations had settled in France by their dealings with the French merchants, who continued to let them bring in their merchandizes, by the facility which they found in compounding the 20 per cent. with the general farmers, or by counterbalances, very frequent and common; his Majesty renewed his arrêt of prohibition, by that of November 1, 1688, confirmative of that of 1685. And because, even after that, the abuses in some measure continued, and he found more and more the necessity of putting a stop to them, he made another arrêt of the 3d of July, 1692, containing the same prohibitions, and still confirmative of the edict which made Marseilles a free port, and settled the duty of 20 per cent. Since 1692, things have gone on according to the intention of the king, who has continually caused orders to be given to the intendants of the provinces, to see to the execution thereof; and there has likewise passed a confirmative arrêt in relation to Dunkirk, the 30th of January, 1700.

5. Now, after all this, can it be expected, that his Majesty should alter this establishment? And how can the least part of it be dispensed with, either for their carrying on the trade themselves directly to the Levant, or taking in goods at Leghorn, as they propose? Is it not alike mischievous to our trade? And if the king, instead of granting such permission, shall not be pleased to put a stop to the abuses which are still practised, both by compounding the duty to almost nothing at all, and by the daily pouring in of prohibited goods, through the ports and upon the coast of the west, to the prejudice particularly of the king's farms, (as it happened not long since with 4 or 500 bales of goat's hair, which were imported on the coast of Picardy, whereby great quantities of the like goods which were in France, belonging to the king's subjects, became of no value, because it is a perishing commodity;) in all likelihood our trade, which is of consequence to the state, will be extremely diminished. It is well known what cardinal Richieu said to the advantage of this trade, and what was done by M. Colbert, after mature consideration, and upon the particular enquiries he made into it, and generally all that has been done in favour of it by the ministers, who have succeeded them to this time: how can men, after this, think of procuring any change in this establishment? It is well known, trade is so nice a thing, that it is often lost by endeavouring to change the management of it, as may be proved by many instances.

6. All the artful subtilties, with which the memorials of the said deputies abound, in order to prevail upon the council to grant them this commerce, are founded much more upon private designs, to the prejudice of the general interest, than upon reason; and all the comparisons which they make from the English and Dutch touching in their way upon the coasts of Spain and Italy, there to sell their goods, are fallacious, and bear no similitude; for those nations have part of the merchandizes which are any wife proper to sell on those coasts, from the Indies, or else they are the product of their own country, with neither of which these gentlemen of the western ports of France are stocked.

7. The fisheries of the English or Dutch have no relation to this commerce: I affirm that the ships of those nations trading to the Levant, do not carry any fish, and that the gentlemen of the west could not do it; that the very same ships which are employed by the English or Dutch in fishing, carry them from the places where they catch them to those coasts, and that they do this but once a year; that therefore their proposition of going and exchanging their merchandizes for pieces of eight in Spain, and carrying that money to the Levant, to avoid thereby the exporting of French money, is not real, it is only a pretence; since, even though they had any merchandizes to carry to Spain, which they have not, except some linen cloths, these are goods that are long in going off, and this length of time would subject them to great charges; and it is exaggerating to say, that they can

carry to the coasts of Spain and Italy, sugar and tobacco from the French colonies, since Lisbon furnishes them with both, in greater quantities than they have occasion for; and it is beyond dispute true, that they cannot carry on this trade but almost wholly by money, of which (whatever they say) the English carry great quantities from Holland and Germany. 8. As to what they object concerning their manufactures, that they can get materials from England with much more advantage than by Marseilles, I defy them, and am persuaded that they have not computed rightly: that may indeed happen in some of the materials, but I lay it down for fact, that they will very often, and almost always, draw what is necessary for them by the way of Marseilles, cheaper than from foreign countries, or by their commerce directly, or at least as cheap.

9. Marseilles has a very particular and advantageous situation and proximity to the Levant; she has in her town, her province, and in those of Languedoc and Dauphiné, her neighbours, all sorts of manufactures proper for the Levant, and has had settled correspondence, and been used for some ages to this trade, which by experience she manages with perfect economy; and it looks as if God had endowed her with these advantages for the good of the state, to carry on by her means this so important commerce from France with the Levant, and from the Levant with all France.

10. It is so apparent and so true, that Marseilles is always filled with all assortments of merchandizes (whatever they say) and even more than Holland and England; that Marseilles often furnishes the Dutch with goods which they have not, and would do the same to the English, if it were permitted to carry any thither; but they have taken due care of that by a vigorous prohibition, and the merchandizes which should be carried thither would be burnt, and perhaps the ships too; so watchful are they to preserve the trade to themselves, to which they are the more stimulated by an inbred hatred which they have to the French: under what colour of justice, therefore, should France permit her natives to go fetch the merchandizes of the Levant from them? Which forms another principal reason against the pretension of these deputies; and it is certain, that even though it were permitted them, there would not be that correspondence with the English as is imagined; nor would they come, either more or less, to fetch the commodities of our kingdom; for they who come for wines and brandies are only dealers in those goods, and not Levant merchants, and so would not have occasion to exchange their merchandizes for ours.

11. They ought to be the less indulged in this permission, because they ask it for no other reason but to have a pretence of carrying on their old clandestine trade with those two nations, as from past example it is evident they used to do.

12. It is an idle pretence to say, that some of their ships going to Italy with their fish, might find means to touch there for Levant merchandizes at Leghorn, whither there go so few of them, that they may always for their fish have ready money; by which means they constantly relade with oil and alum on the coast of Italy, which are merchandizes of greater use to them. It is to Marseilles whither almost all the ships of their fishery come, to the number of 30 or 40 every year, where they find their commission favourable, and in return take soap, oil, merchandizes of the Levant, and fruits of Provence, whereby the greatest part of them have an opportunity of making great freights homeward. This is very convenient for them, and gives them a profit which they would not have, if Marseilles were not able to furnish them with all those things; there would be no need of going so far if they desired to truck their fish for Levant merchandizes, they might do it much more easily and advantageously at Marseilles than at Leghorn.

13. If they will carry on the Levant trade by Marseilles, as Lyons and other cities of the kingdom do, no body hinders them; they may thereby have the same advantages which they fancy the Marseillians have, without disturbing, by their vain pretensions, an order established for trade so long ago; it being certain, that if they went to fetch the Levant merchandizes directly, they would cost them much dearer than if they took them at Marseilles. They cannot oppose to this any thing, but some charges of insurance, which they pay from Marseilles to the ports in the ocean; but this expense is so moderate, that it bears no comparison with the extraordinary charges they would be obliged to be at, in going directly to the Levant, and in returning home; and before they could well have settled their correspondence there, they would suffer considerable losses, which has always been the cause why they have not undertaken it.

If the general farmers make them pay the duty of 20 per cent. for such goods as are not subject to it, it is their business to obtain justice against them, and the deputy of Marseilles will gladly enter into measures to assist them.

14. There is another principal reason which that deputy has to offer, viz. If this permission be given to the ports of the ocean, it must likewise be given to the port of Cette, which would demand it; and that could not possibly be done, without entirely destroying the Levant trade in France, by an infallible decay which this disorder would occasion, it not be-

VOL. II.

ing possible to reconcile all these several competitors; the rather, because it is known that Marseilles itself, by order of M. Pontchartrain, has been obliged (for the preservation of this trade, though they had it solely) to make a regulation of the number of shipping employed in it, to avoid the too great concourse of them, which was very pernicious, as well at their arrival in the Levant, as at their return: this hinders the Dutch from driving this trade, as they were permitted by the treaty of Ryfwic. If these gentlemen were allowed this permission, how could we possibly avoid a general disorder, which would bring this trade to decay; and which the English, Dutch, and Italians, would take advantage of, and put us, perhaps, in danger of losing it entirely? it being undoubtedly true, that these gentlemen, who have always had a good intelligence with those two nations their neighbours, would make no other use of this permission, but to lend their names to the English to drive this trade under the flag of France, and for a small private interest, would not value ruining that of Marseilles. We may further insist upon the inconveniencies that would affect all the payments which Marseilles makes for all the consuls, the averages of the Levant, the pension of the ambassador, and other extraordinary casual expenses, which could never be well adjusted: this disorder would likewise infallibly bring the plague into France, and we shall hear what work it has very lately made in a ship of St Malo.

I cannot believe, that after so many obstacles, and so many regulations, so well concerted, and continually enforced to this present day, counter to this proposition, and made to preserve in its perfection this important trade, which is the greatest and most profitable one of the kingdom, the government will destroy it by a permission which will produce nothing good and settled; as may be gathered from what has already happened in the kingdom, which by the like novelties has lost several trades and manufactures.

15. Whatever they say to dissipate the apprehension of the danger of bringing the plague into France, it is almost certain they could not avoid it; and there is no doubt to be made, but this would be the greatest calamity which could befall the kingdom. The deputy of Marseilles affirms, that the contagious distemper never ceasing to be in the Levant and Barbary, sometimes in one part, sometimes in another, because in those countries they take no precaution to avoid it, these gentlemen having neither experience, nor proper places for purging the merchandizes from that evil which cleaves to them (as is found true at Marseilles, where oftentimes several die of the plague during the quarantine), would infallibly give the plague to France, which they of Marseilles avoid, by rules which are more rigorously observed there than in any city in the world. This special experience in the Marseillians is so well known every where, that the Italians, though an ingenious people, and who have proper places for these precautions, so dread the plague, that, when there come into their ports any ships from a place where it is known to be, they drive them away, and their asylum is at Marseilles, which receives them, with their wonted precautions; and oftentimes those ships and merchandizes, by endeavouring to guard against the plague, would communicate it to the kingdom. Must the king put it to the venture, among men who have neither experience, nor proper places for the purpose, whether they will bring in the plague or not?

It is in vain for them to say, That the climate they inhabit, and the length of the passage, would stifle this evil, and hinder the communication of it; and to suppose that the English and Dutch never had it. This cannot be insisted on, since both the one and the other have had it oftener than once, though the coldness of their country, which really serves in some measure to preserve them from it, is beyond comparison greater than in France; and I have been informed for certain, that, not above 30 or 40 years ago, Holland and Flanders had it to a great degree, and that Picardy was afflicted with it likewise, as also Rouen, Dieppe, and other places, where it made great havoc: and there is no doubt but it came from the Levant: and though it might have been there but once, yet we may have it often in France, especially if opportunities be given of introducing it: and as this would be one of the most dreadful evils that could happen, people ought to be very apprehensive of it.

16. Over and above all that I have been saying, there is an article, which of itself ought to destroy the pretensions of these gentlemen to this trade, as a memorial which was communicated to me on their part has very reasonably foreseen. By the 9th article of the treaty of commerce at Ryfwic, the Dutch are permitted to drive this very trade in France, and under the same advantages with the king's subjects. In this case, they would not enjoy the permission they ask, and it would be the Hollanders who would ingross the whole trade, by their ports, which would entirely ruin ours; and though there be a likelihood now of a war with the Dutch, they will not fail, in the next treaty of peace, to stipulate and obtain the confirmation of that article.

17. It ought likewise to be observed, that Marseilles, by means of this trade, causes infinitely more money to be brought

into France than she causes to be carried out; which I shall take another occasion to prove.

The rejoinder of the deputy of Marseilles, to the foregoing reply.

1. First, He represents that they formerly deny the principle of his first memorial, by every article of which it is plainly proved, that such permission would ruin the commerce of the Levant, and the navigation of the king's subjects, and totally transfer it to strangers, and that all his Majesty has done since 1669, by every successive arrêt 'till this day, to avoid this misfortune, would be in vain; that his conduct and wise precaution herein, leaves no room to doubt that this proposed competition was not found suitable to this trade, but rather that it would cause a general disorder in all the scales or marts of the Levant, which would considerably raise the price of their goods; and this would soon bring on the total ruin of that commerce; and the same would befall that of the western ports of France, if there were the like concurrence: and therefore it is for the interest of the state and of the public, to preserve both the one and the other, as hath wisely been practised hitherto.

2. The gentlemen of the western ports cannot be ignorant that they are unable to consume all the merchandizes which they should be obliged to take in to fill their ships, and which, consequently, they would be overstocked with; among others, there are four sorts of very cumbersome commodities, and which always make three-fourths of a ship's lading, viz. coarse wool, hides in the hair, ashes in great quantities, and flax; all which are merchandizes proper for the manufactures set up in Provence, Languedoc, and Dauphiné, and which the provinces of the west are without.

3. He persists in affirming, That no town in the west, not even Bourdeaux and Rouen, ever drove the trade of the Levant, though they were better able to do it before 1685 than since; and I do not believe that Rouen, which is the principal town on that coast, has any ships to carry it on, nor Bourdeaux neither, except some small vessels which serve them to go up the river. The deputies cannot deny the truth of this.

The edict of 1669, and the subsequent ordinance, laid a duty of 20 per cent. on such merchandizes of the Levant as should be imported into Marseilles, after having been first carried into foreign countries; but it left the port of Rouen, and that of Dunkirk, free to carry on the Levant trade directly, without paying the 20 per cent. yet they never did it, because it was not a suitable trade for them. But they made use of that permission to get the Levant merchandizes by the way of England and Holland: so that, by that means, they filled France with those merchandizes, and this brought the trade of the French in the Levant to almost nothing: which gave occasion to his Majesty (in order to remedy such a misfortune) to pass the arrêt of the 15th of August, 1685, commanding, That all such commodities of the Levant as should enter by the said ports of Rouen and Dunkirk, which had not first been landed at Marseilles, should pay 20 per cent. The causes are inserted in the said arrêt; and, were it not for that arrêt, which hinders that evil practice with those nations, it is to be feared it would have gone on still.

4. The council may indeed allow things, which are really grievances, to be redressed: but these gentlemen of the west need not trouble themselves; they will never persuade the council to destroy edicts, passed with so thorough knowledge of the cause, and so often ratified until this present time; that were to contradict all that the king has done, and is what the deputy of Marseilles is in no apprehension of.

5. It was, as we just now said, to hinder the dealings with the English and Dutch, that his Majesty was pleased to lay on that duty of 20 per cent. and, notwithstanding the said duty, such dealings are still carried on, either by compounding the duty, or by running the goods: and it is on this account that the deputy complains, because of the mischief it does to commerce in general; and the farmers are obliged, for the interest of the state, to keep a watchful eye upon this matter.

6. They do not give a direct answer to the question in this article; for they not only have not all that the English have to carry on this commerce in Spain and Italy (which they take for granted), but hardly any of the manufactured goods proper for the Levant, which Marseilles is provided with, either in her city or province, as well as in her neighbourhood of Languedoc and Dauphiné, and such as they cannot possibly have.

7. He affirms it to be fact and true, That the ships laden with their fish do not go into the Levant; they go from the place of their fishing to the Mediterranean, and chiefly to Marseilles, and this but once a year: that the greatest part of the product of such fish, and all that they presuppose to carry with them in the course of their pretended voyage, would serve for no more than to pay seamen's wages, victuals, and the charges of the voyage; and what is over and above is not sufficient for a fund for that trade, and therefore they ought not to reckon

it. Tobacco abounds in the Levant, and as for sugars, they are both of them articles of small consideration.

It is in vain for them to compare themselves to the English, whose ships with fish go not to the Levant, and who use other ships wholly for that voyage, and have a great many goods proper for sale on their way, and in the Levant, which the gentlemen of the west have not. As for linen cloth, it is agreed that a great many of them are sent to Cadiz for the Indies; but this is not a fund for them to reckon upon, to be made use of in the same voyage, no more than are the other linen cloths that they may vend in some places of the coasts of Spain, which are long in going off, and which they sell at a very long credit; and Marseilles, in this particular, has a greater advantage than they, by means of large quantities of imported manufactures, proper for that country, which she sends thither generally all the year round, and which go soon off, almost all for ready money, which brings her pieces of eight, and these she makes use of partly for the Levant; and she has the further advantage of making use of assortments of goods, which she draws to herself, by means of uttering divers commodities and merchandizes to the Dutch, which the gentlemen of the west do not, for want thereof. Marseilles therefore, which consumes a great deal less money than is thought, does not make use of that foreign coin which she acquires by means of the permutation of her wares and commodities; and it argues great ignorance to say, That the western gentlemen can carry on the Levant trade without money, especially since they have not the wares and manufactures which Marseilles has.

8. The deputies of the west were pleased to pitch upon that time, and upon two particular sorts of merchandizes, in order to make a calculation their own way; and it is observed they are continually taking advantage of every thing, and this occasions their calculation (under favour) to be false; and the deputy of Marseilles proves by his, that it is so far from being true, that those gentlemen buy the merchandizes dearer at Marseilles than in England and Holland: that the same merchandizes are bought at Marseilles much cheaper than in those countries, and that it is generally so. He has added to his calculation divers other merchandizes, for one and the same proof, to shew the difference there is between Marseilles and England and Holland. He proves what he advances by certificates from the royal brokers; and, to satisfy these gentlemen as to the difference of the time, the deputy of Marseilles, in selecting that time, has taken a medium, which is the month of April; though the same merchandizes can never increase in a neighbouring country, but they must increase, by means thereof, in another, whatever they pretend to the contrary.

9. It is upon account of her advantageous situation, that the king has chosen Marseilles to preserve this commerce to the state: for this reason likewise it is, that all the manufactures proper for the Levant are set up in abundance about Marseilles; and the gentlemen of the west cannot have them unless they go for them in that place. It was for all these reasons that the king, to preserve this important trade, did grant his edict of franchise to Marseilles, and made all the other subsequent edicts to this day, and especially to hinder the towns of the west from abusing the liberty heretofore granted them.

10. That the Hollanders draw sometimes from Marseilles certain merchandizes which are convenient for them, and which they have not at home, and which they find among the assortments at Marseilles, where the warehouses are always full of them, and which the gentlemen of the west cannot have, because, though they were to be let into this trade, they would carry it on but poorly: whereas Marseilles, when it abounds, can, by reason of its nearness, send suddenly to the Levant for such merchandizes as she may want, and much cheaper than they who are forced to be at extraordinary expence, by reason of the length of their voyage.

11. If the gentlemen of the west had formerly carried on this trade, and if, during the time that they were permitted to do it, they had not made use of this permission to introduce the merchandizes of the English and Dutch into France, what they advance might possibly be true; but the ill use which they made of it in times past, notwithstanding all the edicts and orders of the king to reform the abuses, is apt to make us suspect the contrary.

12. They have increased their trade hitherto as much as they could, and they cannot hope to increase it more: were it not for Marseilles, which consumes the greatest part of their fish, they would be forced to lessen their fishing; and this is what will certainly happen, if the least blow be given to her trade by this permission.

13. The port of Marseilles was not chosen solely for the sake of the city of Lyons, but for the sake of the whole kingdom, as a door through which the chiefest trades are carried on, and particularly that of the Levant, which is of the greatest importance, and which cannot be well managed but by the port of Marseilles; and it is proved by divers memorials which the deputy of that city has to present, that it would be entirely lost by dividing it, and would fall into the hand of strangers.

strangers. For this reason, his Majesty has always thought fit to preferve it to Marfeilles.

14. It is evident, and beyond all question, that a general opening of the Levant trade would entirely, in a short time, destroy it. The constituting Marfeilles a free port, was not done without good grounds, and to put an end to that disorder which a general permission had caused; and all that has been done from that time to this, to correct the abuses that had crept in, is it not a certain proof that such a permission would destroy it infallibly? since even Marfeilles could not hold up her head without regulating the number of ships that are to sail to each port of the Levant, and which was done by order of M. de Pontchartrain, within these three years, otherwise it had been ruined. What then would become of this trade, if every body were let into it, and crowded in upon one another? The vent of manufactures at Marfeilles is as great as can be wished, for such manufactures which she has, and the west has not; and the pretended cheapness at which France would have the Levant merchandizes, would last but a little while, because competition would make them dearer in the Levant, and cheaper in France, which would disable the merchants from continuing that trade, without ruining themselves, and so it would pass to foreigners. As for the permission demanded for the port of Sette, Marfeilles has laid memorials before the council, with reasons for not granting it, and desires the council to cast their eyes over them; and then they will be convinced that the gentlemen of the west ought not to have it neither.

15. The deputy of Marfeilles has made sufficient answer to this article, by the memorial which he has given in, whereby he shews plainly, that the plague would not fail to enter into France, as it did heretofore, by means of the English and Dutch. But this being a very important article, the deputy will give an answer more at large, by a special memorial.

16. It is disguising the truth, by their favour, to maintain that the Dutch would not carry on this trade in France. They demanded that article in the treaty of peace for no other end or purpose; and it would be very suitable to that nation, who would drive that whole trade by the ports, which would help them to destroy that of Marfeilles: and are those gentlemen ignorant that the Dutch go thither continually, with several ships which private men send thither, and seldom with convoys? It is true that they, like us, are sometimes at war with the nations of Barbary, but commonly they are at peace, as now. And all the reasons and replies of these gentlemen of the west, have no other foundation but their fondness to drive that trade with those nations, rather than to carry it on themselves: and we repeat it again, That they are not excluded this trade, since they may carry it on by Marfeilles, as Lyons and some other cities of the kingdom do; and even though they were permitted to do it by their own ports, they could not possibly do it, considering the war we are going into at present.

17. The memorial given in by the deputy of Marfeilles, concerning the money she makes use of for her trade, proves the truth of what he advances; and his memorial is clear upon that head, which is an abstract of all his reasons, and evidently demonstrates, that there is no possibility of granting this Levant trade to other ports besides Marfeilles (consider-

ing the difficulties that occur) without intirely losing it to foreigners.

For the usefulness and excellency of these institutions in the kingdom of France, see our article CHAMBER of COMMERCE, and REMARKS thereon, and LEVANT TRADE; see also our articles TRADE.

REMARKS.

In order to come at the truth, in relation to commercial affairs, we find that the ROYAL COUNCIL OF FRANCE promote alterations between the DEPUTIES of the respective provinces: by which means, all the pertinent matter that can be urged pro and con, upon interesting points, by the mercantile people, comes before the ROYAL COUNCIL; and where any repugnances or fallacies seem to appear, from different and contradictory representations, the ROYAL COUNCIL is excited to make the severer inquisition into the matter, whereby they are the better enabled to come to such resolutions as tend most to the general emolument of the state.

Those who have applied themselves to these kind of studies, have allowed, that there cannot be brought before the legislature of this kingdom any points more difficult in themselves, more entangled with a multiplicity of relations, or more perplexed with diversity of circumstances, than those which relate to the concerns of trade; concerns on which the most experienced often disagree, and on which the most sagacious may deceive themselves with erroneous conjectures. There are no questions which require so much personal knowledge of the subject to which they relate, nor is there any subject with which so few gentlemen in our parliament have had opportunities of being acquainted: there are no questions which their variety of relations to different persons exposes to be so easily misrepresented without detection, nor any in which the opposition of particular interests so much incites a false representation. In all these cases deceit is easy, and there is a strong temptation to deceive.

The methods we see from the preceding example (which I have introduced on purpose) that are practised by the French, have certainly a very happy tendency to the discovery of truth, and to prevent the royal council from being perplexed and misled by private interests, in opposition to the general: for it is no little discredit to the contending deputies to attempt to impose upon each other, and far more so to aim at any barefaced imposition upon the royal council: whereby all matter foreign to the point in question, all personal altercations and sophistry, impertinence and verbosity, are laid aside. But whoever has attended to occasional controversies of this nature in our nation, both without doors, and too frequently elsewhere, have too much reason to think they are seldom untainted with such matter, and such unbecoming warmth and animosity as can tend only to eclipse, instead of illuminate the truth; and this we fear has too often occasioned the public interests to be mistaken, overlooked, or misrepresented, to the great injury of the state.—How far these ill consequences might be prevented, by an institution bearing some similitude to that in France, is humbly submitted to those whose duty it is to take these things into their deliberate consideration.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE, continued from the End of Letter S.

CHIEF LAWS WITH RESPECT TO TEA.

TEA—counterfeited, adulterated, manufactured with Terra-Japonica, or any drug, or mixed with any ingredients, is forfeited, with the ingredients, and 100l. 11 Geo. I. c. 30. §. 5.

—May not be imported but from the place of its growth, nor upon any other pretence, upon forfeiture. 11 Geo. I. c. 30. §. 7.

—The importation from any foreign parts, by licence, repealed. 6 and 7 W. III. c. 7. §. 3. 3 and 4 Ann. c. 4. §. 6. 6 Geo. I. c. 21. §. 45, 46. 7 Geo. I. c. 21. §. 12.

—Seized, which cannot be sold at a public sale for 5s. per pound, may be burnt, or otherwise destroyed; and the seizer rewarded as the commissioners shall think fit, not exceeding 18d. per pound. 12 Geo. I. cap. 28. §. 3.

—Any dealers in tea, who shall dye, fabricate, or manufacture any sloe leaves, liquorice leaves, or leaves of tea that have been used, or of any other tree, shrub, plant, in imitation of tea, &c. are to forfeit 10l. for every pound weight. 4 Geo. II. c. 14. §. 11.

—Every person, declared at the company's public sale of tea the best bidder, is, within three days, to deposit with the

company 40s. for every tub or chest; and on neglect to make such deposit, forfeits six times the value, and rendered incapable of bidding for, or buying, any teas there for the future. 18 Geo. II. c. 26. §. 7.

—The East India company, if tea imported be not sufficient to answer the consumption in Great-Britain, and to keep the price upon an equality with the neighbouring countries of Europe, may, with licence from the commissioners of the treasury, import, from any part of Europe, in British ships legally navigated, what they shall think necessary; to be entered at the custom-house, and subject to the same subsidies and duties, rules, &c. as tea imported from the East-Indies. 18 Geo. II. c. 26. §. 10, 12.

—Upon neglect of the company to supply this market sufficiently at reasonable prices, the commissioners of treasury may grant licences to any other person, or body corporate, to import tea from any parts of Europe, subject to such duties, &c. as if imported by the said company, to be lodged in warehouses at the charge of importers, approved of by the commissioners of the customs till publicly sold and duties paid.—Notice of sale to be given six days in the Gazette. 18 Geo. II. c. 26. §. 11, 12.

TEA, exported to Ireland, or his Majesty's plantations in America, the bond entered into, not to be discharged without a certificate under the hands and seals of the collector, comptroller, or surveyor of the port where landed, testifying the landing; the certificate, if from Ireland, to be produced in 6 months; if from America, in 18 months from the date thereof, otherwise the bond to be put in suit. 21 Geo. II. c. 14. §. 1.

— To be exported as above, the permit received upon delivery of the tea from the warehouse, must, before shipped, be delivered to the searcher, or proper officers, of the port where entered for exportation, who must, upon suspicion of a deficiency in quantity or quality, open and examine the package, and whether it has been duly entered OUTWARDS, and endorsed on the entry; and if it does not agree in quantity and quality with the PERMIT and ENDORSEMENT, or is entered under a wrong denomination, it is forfeited with the package, and may be seized and prosecuted by any officer of the customs.—If otherwise, the officer to cause the same to be repacked at his own charge, which is to be allowed him by the commissioners of the customs, if thought reasonable. 21 Geo. II. c. 14. §. 1.

— Not to be exported to Ireland, or the British plantations, in any package but that in which it was imported, or in any quantity less than the entire lot in which it was sold, on forfeiture. 21 Geo. II. cap. 14. §. 2.

— Entered for exportation as above, the package to be marked by the searcher in four different parts on the outside, as the commissioners of the customs shall direct; and if found again on shore, is forfeited, and may be seized and prosecuted by any officer of the customs or inland duties. 21 Geo. II. cap. 14. §. 3.

— All tea, above the quantity of six pounds, found in any British ship arriving in Great-Britain from foreign parts (except ships employed by the India company) forfeited, though intended to be reported for exportation. 28 Geo. II. c. 21. §. 1.

The chief Laws with regard to TOBACCO.

TOBACCO.—Not of the British plantations.—The impost having been secured at importation, if the importer is afterwards desirous to discharge his bond before the expiration of the 15 months, he is allowed a discount after the rate of 101. per cent. per annum, for so much of the said 15 months as remain unexpired. 12 Ann. sess. 2. c. 8. §. 3. 5 Geo. I. c. 7. §. 1.

— Of the British plantations.—The importer may, if he is not willing to pay ready money, become bound with one or more sufficient sureties, (to be approved by the collector and comptroller of the port of importation) in one or more bonds, for payment of the additional duty, new subsidy, subsidy 1747, one-third subsidy and impost, within 18 months, to commence at the end of 30 days after the master's report of the ship, or from the merchant's entry within those 30 days, which shall first happen. 9 Geo. I. c. 21. §. 3. 21 Geo. II. c. 2. §. 5.

If, after such security be given for payment of the duties in 18 months, the importer be desirous to discharge his bond in ready money, any time before the expiration thereof, he shall be abated upon such bond, so much as the discount, at the rate of 71. per cent. per annum shall amount unto, in proportion to the time unexpired. 9 Geo. I. c. 21. §. 12. 24 Geo. II. c. 41. §. 31.

— Upon payment of the old subsidy, and security of the other duties by the importer's own bond, may be put into warehouses, provided at his charge, and approved by the commissioners of the customs; if destroyed in such warehouses by fire, the duties to be allowed. 12 Ann. c. 8. §. 5. 5 Geo. II. c. 7. §. 1. 24 Geo. II. c. 41. §. 32.

— Damaged or mean, is not to have any allowance, either at the scale or otherwise; but upon the merchant's refusing to pay the duty, he may separate such damaged tobacco, by cutting off, from the hogheads, so much as he shall refuse to pay or secure custom for; and any three or more of the principal officers of his Majesty's customs shall cause such tobacco to be burnt or destroyed, without making the importer any allowance for freight or charges, except as follows; viz. If any British plantation tobacco hath received damage on board any ship at sea, or by the ship's being forced on shore in any part of Great-Britain; or after arrival, by the ship's bulging on an anchor, or by the lighter into which the tobacco is put, in order to be landed; the merchant refusing to pay, or secure the duty for the same, hath liberty to separate such tobacco as afore observed, and to receive for every pound of damaged tobacco, so separated, the merchant is to be allowed one half penny.—The same to be paid by the commissioners or collectors, or other chief officers of the customs.—But such allowance is not to exceed 30 shillings on any one hoghead. 9 Geo. I. c. 21. §. 13.

— The stalks may not be separated from the leaves, on pretence that the same is damaged or mean tobacco. 9 Geo. I. c. 21. §. 5.

— Allowance for draught at the scale, to be only 8 lb. upon every hoghead of 350 lb. or more; which allowance is not to be deducted upon exportation. 9 Geo. I. c. 21. §. 15.

— Only tobacco of the British plantation, that has paid the duties, and been manufactured in Great-Britain, may be consumed on board British ships of war in any part of Europe, upon forfeiture of the respective places of their commander or purser, and 3 shillings per pound weight. 6 Ann. c. 22. §. 13.

— Shipped at any place in the British plantations in America for Great-Britain, after the 25th of March, 1752, the collector or comptroller, or other chief officer of the customs there, or any two of them, are at the clearing out of the vessel to deliver to the commander, or person taking charge of her, a manifest under their hands and seals of office, containing a true account of all the tobacco taken on board, the number of packages, the quantity, marks, numbers, and tare of each package; and at the same time transmit a duplicate thereof to the respective commissioners of the customs in Great-Britain, on forfeiture of 200l. to be recovered in any court of record at Westminster, or court of admiralty in the plantations, where the offence is committed. 24 Geo. II. c. 41. §. 1.

— The person having charge of the vessel, upon her arrival at his port of discharge in Great-Britain, and at the time of making his report, must deliver the said manifest to the collector of the customs there, on forfeiture of 100l. and the collector is to deliver it to the land-waiters appointed upon the ship. 24 Geo. II. c. 41. §. 2.

— The land-waiters are, from the manifest, to enter in their books (before any tobacco is landed) the marks, numbers, weights, tares, and contents of the several packages, under the penalty of 50l. and to cause such landing mark, as the commissioners of the customs shall direct, to be set upon every package, and are to enter every such landing mark in their books, on forfeiture of 50l. 24 Geo. II. c. 41. §. 3.

— May not be imported into Great-Britain, otherwise than in cask, chest, or case only, each containing 450 pounds weight of net tobacco at the least, on forfeiture of all the tobacco, together with the package. 24 Geo. II. c. 41. §. 20.

— Imported from the British plantations on the continent of America in bulk, or otherwise than in casks, chests, or cases, containing each two hundred weight, or 224 lb. at least, is forfeited, and 6d. per pound weight, except small quantities for the crews smoking; $\frac{2}{3}$ to his Majesty, and $\frac{1}{3}$ to the seizer or fuer. 10 and 11 W. III. c. 21. §. 29.

— Exported.—No debenture to be made out after the 29th of September, 1751, nor any drawback to be allowed upon tobacco imported after that time, unless it is shipped and exported from the same port where it was originally imported, and (if unmanufactured) in the original package, with the same marks in and with which it was imported, no other tobacco being put therein, nor any taken out, except 10 pounds, which shall be allowed to be taken out of each package after the same is weighed at importation, as is now the practice. The penalty for entering unmanufactured tobacco for exportation, from any port but the port of importation, or in any other package, or without the same marks as imported, is forfeiture of the tobacco, and 200l. by the person who enters it, or causes it to be entered, besides of drawback; and whoever knowingly exports any package of tobacco, out of which more than 10 pounds has been taken, forfeits 20l. for every package exported. 24 Geo. II. c. 41. §. 4.

— But if, upon landing, the tobacco in any hoghead or cask, by cutting off the damaged part, is under the weight of 450 pounds; the importer may, in the presence of the land-waiter, cause the sound tobacco to be put together into one or more hogheads, out of which the damaged was taken; and the land waiters are to enter in their books the exact weight of the tobacco, with the marks and numbers of each such hogheads, and note that they were refilled in their presence; then such tobacco (provided the quantity in each hoghead is 425 pounds weight or more) may be exported from the port of importation, as if the package had not been altered. 24 Geo. II. c. 41. §. 5.

— The person who enters unmanufactured tobacco outwards, must, before shipping it for exportation, indorse upon the cocket and bill the plantation or manifest mark and number, the landing mark and number, with the weight of each package at the time of landing; also the exporter's mark and number, with the weight of each at the time of entry for exportation; and write off the weight of each package from the identical entry thereof at importation. Every person refusing, or neglecting so to do, forfeits 5l. for every package, besides loss of drawback; and the searcher is not to admit any cocket, unless marked as aforesaid. 24 Geo. II. c. 41. §. 6.

— Unmanufactured, may not be loaden in any vessel in Great-Britain, with intent to be exported, but in casks, chests, or cases only, containing 425 pounds weight or more of tobacco in each, on forfeiture of the tobacco and

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

task, &c. containing the same; except packages containing samples shipped and exported at the same time and place with the casks, &c. out of which they were taken. 24 Geo. II. c. 41. §. 21.

— Exported (though manufactured) in any package but casks of three hundred weight or more, is not to be allowed any drawback, except tobacco cut or rolled. 9 Geo. I. c. 21. §. 14.

— Mixed with rubbish or dirt, or any other thing, shall be allowed no drawback; and every person who shall enter or ship such for exportation, or cause it to be done, or who shall enter any thing as tobacco for exportation, which, upon examination by the proper officer, appears not to be so, shall forfeit all the goods and the package; and 50l. for every package. 24 Geo. II. c. 41. §. 24.

— Manufactured or unmanufactured, may not be entered or shipped for exportation in any vessel, not of the burthen of 70 tons or upwards, except to Ireland; and if exported thither in any vessel under the burthen of 20 tons, it is not to be allowed any drawback. 24 Geo. II. c. 41. §. 25. 8 Ann. c. 13. §. 20.

— Any officer of the customs apprehending a vessel outward-bound with tobacco on board, not of the burthen of 70 tons or upwards, may stop and detain her, and the whole cargo, till she is admeasured, as directed by 6 Geo. I. c. 21. and if she proves to be of that burthen, he shall not be subject to any action for damages; but the master of such vessel entering and clearing her out as of that burthen, when she is under it, forfeits 100l. for every such offence. 24 Geo. II. c. 41. §. 25. 8 Ann. c. 13. §. 20.

TOBACCO EXPORTED TO IRELAND.—If, upon producing a certificate, less appears to be landed there than shipped from hence, an allowance not exceeding two per cent. may be made for waste during the voyage. 6 Geo. I. c. 21. §. 48.

— Entered for other foreign parts, if landed in Ireland, is forfeited, and double the drawback; and the debenture for the drawback is to be void. 6 Geo. I. c. 21. §. 49.

— Entered out for any other place than Ireland, the exporter is to swear that the same is not landed in any part of Great-Britain or Ireland. 6 Geo. I. c. 21. §. 50.

— Imported from the BRITISH PLANTATIONS in America.—The importer manufacturing it, or delivering it out to be manufactured upon his own account, must first deliver to the collector, or chief officer of the customs, at the port of importation, an account in writing, signed by himself and the manufacturer, or their known agents, with their names and places of abode, containing the plantations or manifest mark and number of each package, with the name of the ship, and time when imported, the landing mark and number, the weight at importation, and the weight at the time of delivering it out; and the importer must write off the weight from the entry at importation. The penalty for neglecting to give or sign such account, or knowingly giving or signing a fraudulent one, is 20l. for every package, by each person concerned. 24 Geo. II. c. 41. §. 7.

— The importer selling or delivering such tobacco out of his possession, must, within 14 days after delivery, give to the collector the same account in writing, signed by himself and the purchaser, or their known agents, and write off the weight from the entry in the same manner, and subject to the same penalties, as in case of delivering it out to be manufactured. 24 Geo. II. c. 41. §. 8.

— REMOVED BY LAND.—TOBACCO OR TOBACCO STALKS, exceeding 24lb. weight, or SNUFF exceeding 10lb. weight, may not be conveyed from the place of importation to any other place in Great-Britain, without a certificate from the collector and comptroller, or chief officer of the customs, at the place of importation; and if unmanufactured, with the importer's oath thereto (if the importer applies for it) that the duties were paid or secured at importation, by whom, when, and in what ship imported; or with the purchaser's oath thereto (if he applies for it) attesting the marks and numbers of the hogheads, out of which it was taken, from whom purchased, and when: if TOBACCO-STALKS or SNUFF, or MANUFACTURED TOBACCO, are so removed, then the certificate must have the importer's oath thereto (if he applies for it) that such stalks were stripped, or such snuff or manufactured tobacco was made, from one or more hogheads, for which the duties were by him paid or secured at importation; or the purchaser's oath thereto (if he applies for it) that such stalks were stripped, or the snuff or manufactured tobacco was made, from one or more hogheads, which had been delivered and received according to the direction of this act; which certificate such officers are to grant, and after entering in their books, to deliver to the person applying for the same, without fee or reward for certificate or oath, on forfeiture of 10l. for every offence. 24 Geo. II. c. 41. §. 9.

TOBACCO.—The proprietor, factor, or agent of the tobacco, &c. (before it is removed) is to insert on the back of the certificate the names of each package, with the marks and numbers, and the weight of each species of goods in each package, the place from whence delivered, and to which they are to

be conveyed; and by whom, or the name of the inn from whence carried, and the name of the person to whom consigned; and to which he must subscribe his name, and make oath to the truth thereof. The certificate must express the number of days it is to continue in force, and accompany the goods to the place to which they are to be carried; and the person there receiving it, must cause it to be delivered to the chief officer of the customs there; or if there is no officer of the customs, to the officer of excise for that division, who is to examine the same with the goods; which, if they agree therewith, are to be taken away by the person to whom they belong; and such officer is to enter the certificate in a book kept for that purpose. 24 Geo. II. c. 41. §. 10. 26 Geo. II. c. 13. §. 4.

— Such goods, in the quantity above-mentioned, removing by land without such certificate, are forfeited, and the packages, together with the cattle and carriages; and the carrier, or person employed in removing the same, is to be committed to the county gaol for one month, by a justice of the peace for the county where the offence is committed, or the offender found.—And any person, who shall counterfeit, forge, erase, or alter such certificate, or the duplicate thereof, or procure the same to be done, shall forfeit 50l. for every offence. 24 Geo. II. c. 41. §. 12.

— Such goods, in the quantity above-mentioned, may not be conveyed by land from any place in Great-Britain to any other, unless the package is marked on the outside with the respective words TOBACCO, TOBACCO-STALKS, or SNUFF, in letters not less than three inches in length, on forfeiture thereof, with the package, and also 1s. per pound weight to be paid by the owner thereof. 24 Geo. II. c. 41. §. 23.

TOBACCO REMOVED BY WATER.—No TOBACCO, TOBACCO-STALKS, or SNUFF, may be shipped on board any vessel to be carried by water from any place in Great-Britain to any other, until every part thereof is entered at the custom-house, at the port nearest the place where they are shipped; and if UNMANUFACTURED, it must be shipped in the original package in which it was imported, preserving the same marks and numbers, but not without a certificate from the collector or comptroller, or chief officer of the customs at the port of importation, that the duties thereof were paid or secured at importation; by whom, the time when, and in what vessel imported: if it is TOBACCO-STALKS, or SNUFF, or other MANUFACTURED TOBACCO, it is not to be so shipped without a certificate from the said officers, that the duties were paid or secured at importation, for the tobacco from which they were stripped, made, or manufactured; which certificates the said officers are required to grant to the importer, or his known agent, applying for the same, without fee or reward, on forfeiture of 10l. for every offence. 24 Geo. II. c. 41. §. 13.

— Before such goods are shipped, the proprietor must insert on the back of the certificate the names of each particular package, with the marks and numbers, the weight of each particular species of goods in each package, and the place from whence brought, and to which they are to be carried. 24 Geo. II. c. 41. §. 14.

— The certificate must, before shipping, be delivered by the proprietor to the person taking charge of the vessel, who, immediately upon his arrival in any port or place in Great-Britain, must deliver it to the collector or chief officer there, who must examine the goods with the certificate; and if they agree therewith, the goods are to be discharged, and may be taken away by the person to whom they belong. 24 Geo. II. c. 41. §. 15.

— Such goods found on board any vessel before such certificate is obtained, or without its being on board therewith, or if it is forged, or does not agree in all respects with the goods, then all such goods are forfeited, together with the packages, and may be seized and prosecuted by any officer of the customs; and the person taking charge of the vessel shall forfeit 6d. per pound weight; and any person who shall counterfeit, forge, erase, or alter such certificate, shall forfeit 100l. 24 Geo. II. c. 41. §. 16.

TOBACCO, or TOBACCO-STALKS, exceeding 24 pounds weight, or SNUFF exceeding 10 pounds weight (which has been removed by water from the place of importation to any other place in Great-Britain) may not be removed afterwards from thence by land, without a certificate from the collector and comptroller, or chief officer of the customs, at the place to which they were carried by water, that it appears to them by the entry of the certificate, which came by the goods from the place of importation, that the duties thereof were paid or secured there, and in what vessel they were brought by water, and when, and that the person applying for the same had made oath to the truth thereof; which certificate such officers are required (after writing it in their books) to deliver to any person applying for it. 24 Geo. II. c. 41. §. 22.

— The proprietor of the goods, or his factor or agent (before they are removed) must insert on the back of the certificate the names of each package, with the marks and numbers,

numbers, the weight of each species of goods in each package, the place from whence brought, and to which they are to be carried, and the name of the person to whom they shall be sent, which he must subscribe with his name, and make oath to the truth thereof.—And such goods found so removing without such certificate, or if the certificate appears to be forged or counterfeited, are forfeited, and the package, together with the horses, cattle, and carriages employed, and may be seized and prosecuted by any officer of the customs: the carrier or person employed in the removal also forfeits 10 l. and is to be committed to the county-gaol for one month by any justice of the peace for the county where the offence is committed, or the offender found.—And any person who shall counterfeit, forge, erase, or alter such certificate or duplicate thereof, or procure it to be done, shall forfeit 100 l. for every offence. 24 Geo. II. c. 41. §. 22.

TOBACCO.—The second purchaser of an intire hoghead of unmanufactured tobacco, is intitled to the benefit of a certificate on removal by land or water, in like manner as the first purchaser from the importer; but in this certificate the name of the importer or seller may be omitted, provided the seller to the second purchaser has delivered to the collector, or chief officer of the customs at the port of importation, such accounts as the importer is required to give by 24 Geo. II. c. 41. 26 Geo. II. c. 13. §. 6.

—Any certificate for removal of tobacco, tobacco-stalks, or snuff, by land or water, is to be deemed a proper one, though the name of the importer is not inserted therein, provided his name is expressed in the bill from which the certificate is prepared. 26 Geo. II. c. 13. §. 5.

—Any person who shall put out, alter, or deface any mark or number set upon any package of tobacco in America, or in Great-Britain, at importation or exportation, shall forfeit 20 l. for each package. 24 Geo. II. c. 41. §. 19.

—Tobacco-stalks and snuff, seized and condemned, are to be burnt in the presence of the collector and comptroller of the customs at the place where the goods are at the time of condemnation; or, for want of such, in the presence of the collector or supervisor of excise for that district. 24 Geo. II. c. 47. §. 27, 28.

—The officers who seized and prosecuted, are to be paid (if it is tobacco, or tobacco-snuff) at the same rate as if it was sold for 6 d. per pound, which by 12 Geo. I. c. 28. §. 10. being one-third of the gross sale clear of all charges, amounts to 2 d. per pound: if tobacco-stalks, or damaged tobacco, they are to be paid 1 d. per pound, in lieu of all other allowance, by the receiver-general of the customs at London or Edinburgh respectively, or by the collector of the out-ports where seized and burnt, out of any duties applicable to incidents; provided the officers, before whom it was burnt, certify to the respective commissioners of the customs the exact quantity burnt, who are thereupon to grant their order for payment. 24 Geo. II. c. 41. §. 27, 28.

The following particulars are to be transmitted to the register of tobacco by the persons under mentioned, viz. an account of the certificate received with the goods by the officer of the customs or excise respectively; and duplicates of original certificates for removing by land, by the officers who granted them at the port of importation; and certificates for removal by water by the chief officer of the customs at the port where the goods were landed, within one month after he receives it, provided the goods agree therewith; and duplicates of certificates for removal by land, after the first removal by water, by the person who granted it; and once in every calendar month, one of the land-waiters book of the landing and discharging of tobacco imported from the British plantations in America, and copies of every entry thereof for exportation, with the endorsements, and copies of every account of tobacco intended to be manufactured, and copies of every account of tobacco sold by the importer, to be transmitted by the collector and comptroller, or chief officer of the customs, of every port in Great-Britain where the business was transacted: which several accounts are to be by him entered in such manner and form, that the marks and numbers of every hoghead, cask, or other package, and their weights at importation, may be compared with the marks, &c. respectively at exportation, or delivery for home-consumption, or to be manufactured, in order to preserve the identity thereof; and the said register is to transmit to the commissioners of the customs, at London and Edinburgh respectively, an account in writing of any thing which appears to be done contrary to the meaning of this act; and once in 6 months he is to lay before the lords of the treasury, a copy of such his representations made to the said commissioners. Any collector, or chief officer, neglecting to transmit any of the accounts before-mentioned, to forfeit 50 l. for every such neglect. 24 Geo. II. c. 41. §. 10, 11, 15, 17, 22.

TOBACCO imported from the British plantations in America.—The importer is every year, between the 1st and 24th of June, to deliver to the collector, or chief officer of

the customs, at the port of importation, an account in writing, under his hand, of all tobacco in his custody, power, or possession, which has been entered 18 months or more at that time, containing the number of packages, with the respective marks, numbers, and weights of each, and the place where lodged; upon receipt of which, such officer is to cause the goods to be examined thereby, and then to transmit the account to the register of tobacco. 24 Geo. II. c. 41. §. 18.

Any importer neglecting so to do, or if the account proves fraudulent in any respect, forfeits 50 l. for every offence.—Ditto act of parliament.

—Any vessel, under the burthen of 70 tons, having on board 100 lb. weight of tobacco, or any tobacco-stalks, or 50 lb. weight of snuff, found at anchor, or hovering within the limits of any port, or within two leagues of the shore, or discovered to have been within the limits of any port, and not proceeding on her voyage, (unless in case of unavoidable necessity and distress of weather, of which the master, purser, or person taking charge, must give notice, and make proof before the collector, or chief officer of the customs, immediately after arrival) all such goods are forfeited, with the package, or the value thereof, whether bulk shall have been broke or not; and the master, or person taking charge of the vessel, forfeits 100 l.

—And if any vessel, above the burthen of 70 tons, having such goods on board, shall be found hovering as aforesaid, and no notice of distress is given, the master, or person taking charge of it, forfeits 100 l. 24 Geo. II. c. 41. §. 26.

TOBACCO-STALKS, or SNUFF, removed from one place to another in greater quantities than by 24 Geo. II. c. 21. is allowed, and not attended with the certificate required, may be seized and prosecuted by any officer of the customs or excise; and the proof that it was removed from the port of importation with a proper certificate, and that the duties thereon were paid or secured, is to lie on the claimer, and not on the officer who seized it. 26 Geo. II. c. 13. §. 2.

TOBACCO.—All bonds for payment of duties on tobacco, shall be deemed to be due and payable upon the day of payment, mentioned in the condition of the bond, and interest to be computed from the said day whereon the bond shall be paid off in money, or the day the searcher certifies on the debenture, that the tobacco is shipped for exportation; and no security to be vacated till all interest be paid thereon. 24 Geo. II. c. 41. §. 29.

—The chancellor, or either of the barons, of the Exchequer, to grant a fiat for issuing process of immediate extent against any person bound for the duties on tobacco before the bond becomes due, on affidavit laid before him by one of the securities, or the executor or administrator of such security, that the person bound is decayed in circumstances, and setting forth the danger of loss to the crown, unless some more speedy method of recovery than usual be made use of: if the money is recovered before the bond becomes due, the obligor is to be allowed therefrom the usual discounts. 24 Geo. II. c. 41. §. 30.

—The penalties and forfeitures by this act are to be, one moiety to the use of his Majesty, &c. and the other moiety to the use of such person as shall inform, prosecute, or sue for the same; and the said penalties and forfeitures may be sued for; and the causes arising by this act may be tried and determined in any of his Majesty's courts of record at Westminster, if such offences are committed in England, or if the offender be in England at the time of commencing the prosecution; or in the court of Exchequer at Edinburgh, if the offence be committed in Scotland, or the offender be in Scotland at the time of commencing the prosecution, at the election of the commissioners of the customs for England and Scotland respectively. 24 Geo. II. c. 41. §. 33.

TOBACCO, of the growth of Europe, or mixed therewith, may not be sold or delivered to the seamen on board any of his Majesty's ships of war. 6 Ann. c. 22. §. 12.

—The stalks or stems, stripped from the leaf, may not be imported; and upon seizure and condemnation, the commissioners of the customs may cause them to be publicly burnt, allowing the seizer 1 d. per pound weight, clear of all charges of condemnation. 12 Geo. I. c. 28. §. 13.

—The **STALKS or STEMS**, when separated from the rest of the leaf, and exported by themselves, are not to have any drawback. 9 Geo. I. c. 21. §. 20.

—May not be planted in Great-Britain, Ireland, Guernsey, or Jersey, upon forfeiture thereof, or the value, and 40 s. for every rod or pole of ground planted; half to the king, and half to the suer; and also 10 l. more; one-third to the king, one-third to the poor of the parish, and one-third to the suer.—Except in physic-gardens, and not exceeding half a rod in any one garden.—Sheriffs, justices, &c. within ten days after information, are to cause such tobacco to be destroyed.—Justices, a month before each general quarter sessions, are to issue out warrants to the constables, &c. to search for such tobacco, and to make a presentation upon

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

upon oath, at the quarter-sessions.—Constables, within 14 days after such warrant, may call assistance, and destroy such tobacco; upon neglect, are to forfeit 5 s. per rod.—Assistance refused, the forfeiture is 5 s.—Resisting, the penalty is imprisonment for three months, or to forfeit 5 l. and imprisonment, till a recognizance of 10 l. penalty, with two securities, be entered into, not to offend again. 12 Car. II. c. 34. §. 1, &c. 15 Car. II. c. 7. §. 18, &c. 22 Car. II. c. 26. §. 2, &c. 5 Geo. I. c. 11. §. 19.

LEAVES OF WALNUTS, hops, sycamore, or any other leaves, herbs, plants, or materials, may not be cut in the form, or in imitation of any of the usual sizes or cuts of tobacco of the British plantations, or coloured or cured, to resemble such tobacco for sale, or knowingly sold or offered to sale as such tobacco, upon forfeiture of 5 s. per pound weight. The charges of prosecution to be borne by his Majesty. 1 Geo. I. c. 46. §. 1.

—Such leaves, &c. may not be exported with intent to obtain a drawback, as for tobacco, upon forfeiture of 5 s. per pound weight, besides former penalties. 1 Geo. I. c. 46. §. 2.

—May, with all engines, utensils, and tools, be searched for, and seized by the officers of the customs, at seasonable hours, and with a warrant from the justices; who, at their quarter-sessions, are to determine such seizure, and after condemnation, cause them to be burnt. 1 Geo. I. c. 46. §. 3, 4.

Servants employed in cutting, manufacturing, &c. or selling, upon conviction before two justices, may be committed to the house of correction, there to remain, not exceeding six months. 1 Geo. I. c. 46. §. 5.

TOBACCO-PIPE CLAY. See the conclusion of letter W, WOOL.

TURKEY.—Currants, and all goods of the growth, product, or manufacture of Turkey, must be imported only in ships belonging to Great-Britain or Ireland; except such ships as are of the built of the country whereof the said goods are the growth, production, or manufacture, or of such port where the said goods commonly, or most usually, are first shipped for transportation, on forfeiture of ship and goods. 12 Car. II. c. 18. §. 8.

V.

V E N

VENICE. This ancient republic may be divided into three parts: these are the dominions in Italy, called Terra Firma; those in Dalmatia, and those in the Ionian and Egean Seas; called the Levant. The Terra Firma dominions are again subdivided into the following territories, viz. the Dagado of Venice, the Padnano, Vicentino, Veronese, Bresciano, Bergamasco, Friuli and Aquilegio, Istria, Cremesco, Polesin de Revigo, Marcas Trevigiana.—The coasts of Dalmatia contain the towns of Zara, Nona, Spalato, Sebenico, Trau, Clissa, and Cattara; and the isles of Charto, Otero, Vegtia, or Vegia, Arbe, Pago, Isola, Longa, La Barza, Lessna, Curzola, and some few more of small note.—In the Levant, the isles of Cephalonia, Corfu, Zant, La Praga, Millo, Cerigo, Tine, Kimolo, or Argentaria, and the Morea.

The Venetians have little produce of the country, or manufacture of the people, except the silk, and the silken manufactures: the former respects the land part, the latter the city, where many of the silk manufactures are made: but yet the state is very opulent, because they abound with universal merchants; and this is owing to an universal correspondence, by which, as the Dutch are to these northern parts, so are the Venetians to all the shores of the Adriatic gulph, the isles of the Arches, and the sea-coasts of the Turkish dominions; for to all these places they send their ships, freighted with the growth and manufactures of other countries, as England, Holland, France, New Spain, &c. in return for which they bring but few goods, except from Turkey, whence they bring large quantities of silk, which they sell again, among their own manufacturers in the city, as also in their Terra Firma dominions, and likewise to the duchies of Milan and Mantua.

By their inland commerce they convey their silk into the several countries as well of their own dominions, as those of the emperor, and into all the countries between the gulph and the river Danube; through all which the Venetians have a great and flourishing commerce, partly by the help of canals, and partly by small navigable rivers.

The trade which may be called their own, and which is more considerable, is by the navigation of those great rivers the Po, the Adige, the Adda, the Mincio, and others, by which they carry all the heavy goods they import from foreign parts, into the rich and populous provinces of Lombardy, and have a communication even with Milan and Turin.

By these rivers, also, they have a correspondence with the country of Trent and Tirol, and even with Bavaria itself; as also, by the lower branches of the Po, and the canal de Ferrara, they have with all the southern provinces of the papal dominions, as Ferrara, Bologna, Urbino, and Parma, and as far into the country westward as Modena, &c.

As they have the sole commerce of most of these countries, and in such a manner as not to be interrupted by any rival nations, it is not to be wondered that the Venetians have a very thriving and gainful trade, and that they can advantageously disperse the large importations they make from almost all parts of Europe, as from Spain, Portugal, England, and Holland, they having a considerable call for goods from them all.

Nor do they bring any valuable returns back from their inland countries, for they have few productions in those provinces, except corn: neither have they metals or minerals, iron excepted; nor wool, cotton, or hair, or any considerable manufacture for employing their people: so that the Venetians are said to drive the most ready-money trade of any of the Mediterranean countries, because they export such great quantities of goods to countries which have no returns to make them but money.

However, they receive large quantities of other merchandize from the Turkish dominions; it is thought more than any one nation besides. The particulars are, Raw silk, directly from Smyrna and Scanderoon.

Coffee, from the Red Sea, by the way of Alexandria.

Spices, from India, and by the same way.

Galls, from Aleppo.

Drugs, &c. { Mastic, and } from Scio.
Turpentine, }

V E N

Drugs, &c. { Senna,
Balm,
Mummy,
Dates, and
India cotton, } from Egypt.

Cotton, and cotton-yarn, from Cyprus.

Greek wines from the islands.

Though the Venetians may have mines of iron and lead in the territories of the Vicentine and Friule, and in other parts, yet we find English lead and Swedish iron have a good market at Venice, as also English block-tin, and most kinds of wrought iron and brass: nor have we yet had any sufficient proof of those metals being found there in quantities, except some iron, as far off as Stiria and Carinthia.

The Venetians were formerly the principal glass-makers in Europe, and furnished all this part of the world with looking-glasses, and other glass wares of all sorts, which were in high esteem. But they have been excelled by the French, and the French by the English, who, without flattery, do now make the best glass wares in the world; and the English plate-glass and drinking-glasses are carried not to France only, but even to Venice itself.

They have a very considerable silk manufacture, as before noticed, not only in the city of Venice, but in the countries of Brescia, Verona, Bergamo, and other parts; and they carry their fine brocaded silks, velvets, sattins, and Mantua silks, as also figured damasks, to Constantinople one way, and to Vienna the other way: and this trade is very considerable, and it brings them great returns in money, and employs multitudes of their people.

The Venetians have another trade, which is of no less concernment, it being almost peculiar to themselves; it consists in naval stores: for the provinces of the Vicentine, the Trevigiana, and part of Friuli, are full of firs, and those so well grown and large, that they cut masts there, even for their biggest ships of war: they have likewise good oak for building. In consequence of their fir woods, they have pitch and tar; and the same countries produce great quantities of hemp and flax: so that they have deals, timber, masts, sails, hemp, flax, pitch, and tar, all of their own; which none of the princes or states in the Mediterranean can boast of in the same manner.

Nor is this solely beneficial to them in regard to their own navy, and to fill their own magazines, but they furnish all those materials, in great quantities, to the other ports of Italy, as Genoa, Naples, Messina, and Palermo, or to any other places where they build ships, especially those of force; and the knights of Malta fetch most of their naval stores from hence. Were the countries this way furnished for trade, and with wealth sufficient to carry it on, they would send hither for ships, and Venice would be the arsenal of the Mediterranean, as Holland has been of other parts of Europe.

They are possessed of a very large coast on the other side of the Adriatic gulph, called Dalmatia, where they have some good ports, though no city of any considerable commerce; neither does the country produce any thing extraordinary for merchandize: it supplies the city of Venice with corn and mutton, in great quantities; and, in return, the Venetians supply the people with their foreign merchandize.

Yet the Venetians want many things which their own territories cannot supply them with, and which, since they lost so much of their dominions to the Turks, they are obliged to purchase from them, and from the Greeks under the Turkish government: and these are as well necessities as merchandize.

They have no wine; the mountainous countries to the north of the city are, like the Alps, too cold for the vines, nor do they pretend to make any: and therefore they are so meanly supplied by the Greeks, who mix water with their rich wines, till they reduce them almost to water: yet the Venetians, taking care to reduce the price in proportion, are content with the liquor, though they know it is so spoiled.

They are supplied with wines from several of the islands, as particularly from

SKYROS, where the wine is very good and rich, and bought very cheap.

NEGROPONT: here the Venetians buy very good wine also, and raisins of the sun, or dried grapes: but the wine is dearer here than at Skyros.

ANDROS: from hence the Venetians fetch both wine and oil, also good oranges and lemons; and pomegranates they bring thence in such plenty, that they make a kind of vinegar of their juice.

TINOS: here the Venetians fetch the best wines they drink, except that of Florence, of which we have spoken already; and, as this island is their own, they encourage the trade very much. Also the Venetians fetch a great deal of silk here, of a meaner sort than the Italian and Turkey silk, which they fraudulently mix with it sometimes in their manufactures, but principally use it in making tapestry, and other substantial manufactures.

MYCONE: here is that wine, which, though excellent well-tasted, and rich and strong in its natural original as a juice, is so greatly adulterated by the Myconians, before they bring it to Venice.

The Venetians bring cotton-yarn, also, and goat's-hair, from these islands, and several kinds of silk, some worse than that of Tinos, and some better. The cotton and hair they work into several useful manufactures, which supply the place of woollen, for they have very little wool, and what they have is of little use in any kind of manufacture: wherefore they import considerable quantities of English, and other woollen manufactures.

They have some refining-houses for sugar, they purchasing large quantities of muscavado sugars in England and in France, which they boil and refine, as is done in England; they also refine the Brazil sugars, though very white before.

Their manufacture of bone-lace is still considerable, as well for the use of the city, as for the trade of the countries adjacent; but is so much outdone by the Flanders manufacture, that very little, if any, is brought into these parts of the world.

It should not be omitted, among their importations, that they fetch a great quantity of wax from all those islands above named; which they generally consume in the city of Venice, where the quantity they use is very great, almost all the persons of figure burning none but wax candles, and the poorer sort lamps, for they have but little tallow.

It may be observed here, that the cities of Venice and of Rome are, of all the cities of Europe for their bigness, the most noted for pomp and shew, the confluence of strangers to both being scarce conceivable. At Venice, the diversions of the carnival, the magnificence of the buildings, among which are 400 noblemens palaces, with the splendid appearance of ladies richly attired, &c.

This causes a prodigious trade in things otherwise of no great moment, as equipages, coaches, gondaloes, liveries, habits of ceremony, and such things; as also in furniture, paintings, and other extraordinary of that kind. Hence there are more tailors, upholsters, gold and silver lace-makers, embroiderers, and, to sum up all, footmen and pages, and you may allow me to add fiddlers and strumpets, than in any other city in the world, Paris and London excepted.

At Venice, the numerous throng of gentry, and persons of the first quality, to the carnival, is such, that they frequently number 20 or 30 sovereign princes there at a time, besides others of lower rank, without number: and the noblemen of Venice themselves, though they are very numerous, and affect splendor and magnificence in apparel and jewels, as also in their furniture, yet they do not entertain so many valets, and other domestics, as is the custom at Rome: and because they cannot keep coaches and horses in Venice, yet their grandeur the other way is equally expensive, and occasions abundance of those trades before enumerated.

Nor, indeed, does any thing conduce more to the promoting commerce, than the gay and sumptuous drefs of the people, especially where the humour once becomes national, as it is at Venice, as well as at Rome.

The Venetians trade with the Turks in the Morea, and the gulph of Thessalonica, and to some of the islands, as before observed. And as those countries are full of Greeks, and other Christian inhabitants, they carry them proper manufactures, such as wrought silks, fine linen, bone-lace, and all sorts of haberdashery for the women, who love to go fine, especially in the isles. What they carry back in return is difficult to enquire, but is from all parts according to the production of the place, such as currants, raisins, figs, drugs, rice, corn, oil, wine, cotton, silk, &c. and this is the reason why Venice is the magazine for the scarcest drugs, and from whence they are sent over the whole Christian world. As for money, they take little in the islands; the islanders rather carry some money from the Venetians.

Of the FOREIGN EXCHANGES of VENICE.

The ufance of Venice with respect to the following places, viz.

To Amsterdam, two months after date.

VOL. II.

To Antwerp	} 2 months	} after date,
Hamburgh		
London		
Augufte	} 3 months	}
Vienna		
Frackfort		
St Gall	} 15 days	}
Genoa		
Naples		
Florence	} 5 days	} after acceptation,
Leghorn		
Rome		
Milan	20 days	after date.

After the expiration of the time of these different ufances, bills of exchange have six days of grace to run.

It is forbidden to pay or accept bills of exchange endorsed, if not by the procuracion of the last endorfer. All bills of exchange drawn upon any place or fair whatsoever must, under pain of being void, be paid in bank, and the bank keep their accounts, and almost the whole republic also, in ducats and gros.

There are particular persons who keep their accounts in livres, sols and deniers gros, whose subdivisions are by 20 and 12; and others keep them in ducats current.

The lira, or livre = 10 ducats bank, or 240 groffi.

The ducat of bank imaginary money, which is used in the exchanges, = 24 groffi, or 124 foldi, or 6 $\frac{1}{2}$ liras.

The gros = 5 $\frac{1}{2}$ foldi banco, or 32 piccioli.

The foldo banco = 12 gros, or $\frac{1}{2}$ ducat banco.

The lira, or livre banco, = 240 gros, or 10 ducats banco = 12 ducats current, or 74 liras 8 foldi piccioli.

The ducat bank = 7 liras, 8 foldi, 9 $\frac{1}{2}$ piccioli, or 148 $\frac{1}{2}$ foldi current, or piccioli.

☞ The word piccioli signifies a denier, or a penny, and it is also called current money, piccioli or current being synonymous words.

The sequin of gold = 20 liras current money, and is of the standard of 23 $\frac{1}{4}$ carats, and it weighs 66 grains.

The Venetian crown, or ducaton, = 8 liras 10 foldi of the said money, of the standard of 11 $\frac{1}{2}$ deniers, and it weighs 600 grains.

The reduction of ducats bank money into current, and the latter again into the former; and also of liras bank into liras piccioli, and liras piccioli into liras bank.

800duc. 12fols d'orban. * 960duc. 14 fol. 5 den. d'or cur. $\frac{1}{2}$ 160 2 5 to be add. | 160 2 5 the $\frac{1}{2}$ to be sub.

* 960duc. 14 5 den. cur. = 800duc. 12 fols d'or in banco. 6 liras 4 foldi 6 liras 4 foldi

5760	4800
192	160
3 liras 2 foldi pic.	3 liras 2 foldi pic.
1 4 4	0 12 5
0 2 6	

5956 8 10 cur. | 4963 14 5 banco. $\frac{1}{2}$ 992 14 5 sub. | 992 14 5 $\frac{1}{2}$ to be added.

4963 14 5 ban. = 5956 8 10 current.

Besides the bank money of the prince, there is another current money, which gives a fur-agio from 15 to 20 per cent. according to particular conjunctures.

Besides the abovesaid bank and current monies, there are liras piccioli, which is the money with which merchandizes are ordinarily bought, and these are reduced into ducats current, of 6 liras 4 foldi, by multiplying the liras by 20 foldi, and by dividing the product by 124 foldi, the value of the ducat current.

The lira, or lire, = 20 foldi piccioli.

The foldo, or fol, = 12 piccioli, or bagattini.

We shall now touch upon the several operations of the exchanges, in order to know for what sums bills must be made, that I would remit to my correspondents of the undermentioned cities, in their several and respective monies.

Before we enter into these operations, it is proper to apprise the reader that, for the same reasons given under the article HOLLAND, in relation to the exchange between that republic and Spain, with regard to the reduction of the parts of the ducat of 375 maravedees, in like manner we shall, for facility of computation, subdivide the ducat banco of Venice into 20 fols d'or, and 12 deniers d'or, although the ordinary subdivision is into 24 gros, or 124 marchetti; and, in conformity hereto, we will suppose that I owe the following sums, in ducats, fols, and deniers d'or, bank money, to my several correspondents.

V E N

		Course of Exchange.	
At	Duc. Sols Den.		
Amsterdam	1060 17 3	at 88 $\frac{1}{2}$ deniers gros	} per said ducat banco.
Antwerp	600 10 —	at 92 deniers gros of exchange	
London	14 19 18	at 52 $\frac{1}{2}$ pence sterling	} per said ducat banco.
Hamburg	55 10 4	at 86 $\frac{1}{2}$ gros of Hamburg	
Genoa	373 15 —	at 103 marchetti per crown of 4 lires banco.	} per said ducat banco.
Leghorn	78 1 —	at 102 piafres of 20 sol d'or, per 100 duc. banco.	
Rome	225 17 5	at 62 crowns d'effampe per 100 ducats banco.	} per said ducat banco.
Naples	515 — —	at 116 $\frac{1}{2}$ ducats of 10 carlins per 100 ditto.	
Lyons	800 12 —	at 62 ducats banco per 100 crowns of 3 lires.	} per said ducat banco.
Augusta	500 15 —	at 96 rixdollars of 90 kreutzers per 100 duc. banco.	
Vienna	548 12 9	at 188 florins current per 100 ditto.	} per said ducat banco.
Milan	724 3 6	at 154 marchetti per crown of 117 s. exchange.	
Ancona	400 — —	at 93 crowns of 10 julios per 100 ducats banco.	} per said ducat banco.
Florence	300 — —	at 78 crowns of 7 $\frac{1}{2}$ lires per 100 ditto.	
Bolzano	800 — —	at 116 marchetti per rixd. of 93 kreutzers exch.	} per said ducat banco.
Novi	1930 — —	at 19 $\frac{1}{2}$ ducats banco per 100 crowns mark.	

C A S E I.

Of the EXCHANGE of VENICE upon HOLLAND.

To reduce 1060 duc. 17 sols 3 deniers banco of Venice, into florins, sols, and penings banco of Amsterdam, exchange at 88 $\frac{1}{2}$ den. per ducat as above.

O P E R A T I O N.

1060 Ducats, 17 sols, 3 deniers, multiplied
By the 88 $\frac{1}{2}$ Deniers gros of exchange.

8480
8480
265 for $\frac{1}{2}$ of 1060
44 $\frac{1}{2}$ for 10 sols, the $\frac{1}{2}$
22 for 5 sols, the $\frac{1}{2}$
8 $\frac{1}{2}$ for 2 sols, the $\frac{1}{2}$
1 $\frac{1}{2}$ for 3 sols, the $\frac{1}{2}$ } of the exchange.

93621 Deniers gros.

the $\frac{1}{2}$ 2340 florins, 10 sols, 8 penings banco, for which the draught must be made upon Amsterdam.

I N S T R U C T I O N.

Multiply the 1060 duc. 17 sols 3 den. by the price of exchange of 88 $\frac{1}{2}$, and divide by 40 deniers gros, the value of a florin, and the quotient will be 2340 florins, 10 sols, 8 penings banco, to be received at Amsterdam; the proof of which you have under the article HOLLAND, in the exchange of Holland upon Venice.

C A S E II.

Of the EXCHANGE of VENICE upon ANTWERP.

To reduce 600 $\frac{1}{2}$ ducats banco of Venice, into livres, sols, and deniers gros, permission money * of Antwerp, exchange at 92 per ducat.

* It must be observed, that Antwerp, and all Brabant, exchanges with most places in exchange or permission-money, as it is called, which differs 8 $\frac{1}{2}$ per cent. from the current money; that is, 100 livres gros exchange money, make 108 $\frac{1}{2}$ livres gros current money; thus the crown of 48 palais exchange money, makes 52 palais, or sols, current money.

O P E R A T I O N.

600 $\frac{1}{2}$ Ducats banco, to be multiplied
By 92 Deniers gros exchange.

1200
5400
46 for the $\frac{1}{2}$.

55246 Deniers to be divided by 240, give 230 livres, 3 sols, 10 deniers gros, money of exchange, or permission-money, for which sum the draught must be made upon Antwerp.

Multiply the 600 $\frac{1}{2}$ ducats by the price of exchange of 92 deniers, and divide the product 55246 by 240 deniers gros, the value of a livre gros, and the quotient will be 230 livres, with a remainder of 46 to be multiplied by 20 sols, the value of the said livre, and dividing by the same it gives 3 sols, with another remainder of 200, which being multiplied by 12 deniers, the value of a sol, and divided again by the same divisor, you will have 10 deniers gros to be received at Antwerp.—The proof of which must be easy to those who understand the operation.

C A S E III.

Of the EXCHANGE of VENICE upon LONDON.

To reduce 1459 ducats, 18 sols, 1 denier d'or, bank money of Venice, into pounds shillings, and pence sterling of England, exchange at 52 $\frac{1}{2}$ pence sterling per ducat.

V E N

O P E R A T I O N.

1459 Ducats, 18 sols, 1 denier, to be multiplied
By 52 $\frac{1}{2}$ pence sterling, the exchange.

2918
7295
729 $\frac{1}{2}$ for $\frac{1}{2}$ of 1459
364 $\frac{1}{2}$ for $\frac{1}{2}$ of 1459
26 $\frac{1}{2}$ for 10 sols, the $\frac{1}{2}$
13 $\frac{1}{2}$ for 5 — the $\frac{1}{2}$
5 for 2 — the $\frac{1}{2}$
2 $\frac{1}{2}$ for 1 — the $\frac{1}{2}$
 $\frac{1}{2}$ for 1 denier.

77010 pence sterling, to be divided by 12 and 20, give 320l. 17 s. 6d. sterling, for which the draught must be made upon London.

I N S T R U C T I O N.

Multiply the 1459 ducats, 18 sols, 1 denier, by the price of exchange of 52 $\frac{1}{2}$ pence sterling, divide the product 77010 pence by 12 and 20, and you have pounds, shillings, and pence sterling. Note, The proof of this must be so easy to those at all acquainted with arithmetic, that we think it needless to say more.

C A S E IV.

Of the EXCHANGE of VENICE upon HAMBURGH.

To reduce 552 ducats, 10 sols, 4 deniers banco of Venice, into marks lubs of banco of Hamburg, exchange at 86 $\frac{1}{2}$ gros of Hamburg, per said ducat.

O P E R A T I O N.

552 Ducats, 10 sols, 4 deniers banco, to be multiplied
By 86 $\frac{1}{2}$ gros exchange.

3312
4416
276 for $\frac{1}{2}$ the $\frac{1}{2}$
138 for $\frac{1}{2}$ the $\frac{1}{2}$ of 552.
69 for $\frac{1}{2}$ the $\frac{1}{2}$
43 $\frac{1}{2}$ for 10 sols.
1 $\frac{1}{2}$ for 4 deniers.

48000 Gros, to be divided by 32, gives 1500 marks lubs banco, for which the draught must be made upon Hamburg.

I N S T R U C T I O N.

Multiply the 552 ducats, 10 sols, 4 deniers, by the price of exchange, and divide the product 48000 gros by 32 gros, the value of the marks lubs, and the quotient will produce 1500 marks lubs to be received at Hamburg. For the proof of which see the article HAMBURGH, Vol. I.

C A S E V.

Of the EXCHANGE of VENICE upon GENOA.

To reduce 373 ducats, 15 sols, 9 deniers d'or, bank money of Venice, into lires bank money of Genoa, exchange at 103 marchetti of Venice per crown of 4 lires of Genoa.

O P E R A T I O N.

373 Ducats, 15 sols, 9 deniers, to be multiplied
By 124 marchetti.

1492
746
373
62 for 10 sols, the $\frac{1}{2}$ of 124
31 for 5 sols, the $\frac{1}{2}$
5 for 9 deniers, the $\frac{1}{2}$ of 5 sols.

46350 marchetti, to be divided by 103, gives 450 crowns of 4 lires bank money, for which the draught must be made upon Genoa.

I N S T R U C T I O N.

Reduce the 373 ducats, 15 sols, 9 deniers, into marchetti, by multiplying them by 124, the value of a ducat, and dividing the product 46350 marchetti by 103 marchetti, the price of exchange, and you will have a quotient of 450 crowns of 4 lires, which being multiplied by 4, make 1800 lires banco to be received at Genoa; for the proof of which see the article GENOA, Vol. I.

If any thing after the first and second divisions should remain, it must be multiplied by 20 and 12, and by dividing the same by the exchange, it will give sols and deniers d'or to be received at Genoa, with the crowns.

C A S E

V E N

CASE VI.

Of the EXCHANGE of VENICE upon LEGHORN.

To reduce 785 ducats 1 fol banco of Venice, into piaftres of 20 fols d'or of Leghorn, exchange at 102 of the said piaftres per 100 ducats.

OPERATION.

If 100 ducats banco give 102 piaft. what will 785 $\frac{1}{20}$ ducats? 102 exch.

$$\begin{array}{r} 1570 \\ 7850 \\ 5 \overline{) 1570} \\ \hline 1570 \\ \hline 0 \\ \hline 1570 \\ 102 \overline{) 1570} \\ \hline 1020 \\ \hline 550 \\ 102 \overline{) 550} \\ \hline 408 \\ \hline 142 \\ 102 \overline{) 142} \\ \hline 142 \\ \hline 0 \end{array}$$

800 Piaftres; 15 fols, for which the draught must be made upon Leghorn.

Sols 15|02

INSTRUCTION.

The question is stated according to the direct rule of proportion, and the operation carried on according thereto. See the article ARITHMETIC.

CASE VII.

Of the EXCHANGE of VENICE upon ROME.

To reduce 2258 ducats, 17 fols, 5 deniers d'or, bank money of Venice, into crowns d'estampe of Rome, exchange at 62 crowns per 100 ducats.

OPERATION.

If 100 ducats of Venice give 62 crowns d'estampe, what will 2258 ducats 17 05. 62 exchange.

$$\begin{array}{r} 4516 \\ 13548 \\ 31 : - : 0 \text{ for } 10 \text{ fols, the } \frac{1}{2} \\ 15 : 10 : 0 \text{ for } 5 - \text{ the } \frac{1}{2} \\ 6 : 4 : 0 \text{ for } 2 - \text{ the } \frac{1}{10} \\ : 15 : 6 \text{ for } 3 \text{ deniers.} \\ : 10 : 6 \text{ for } 2 \text{ deniers.} \end{array}$$

Anfw. 1400 crowns, 10 fols d'estampe, the draught must be made for. 10|00

CASE VIII.

Of the EXCHANGE of VENICE upon NAPLES.

To reduce 515 ducats, 5 deniers d'or, banco of Venice, into ducats del regno of Naples, exchange at 116 $\frac{1}{2}$ of the said ducats of Naples per 100 ducats of Venice.

OPERATION.

If 100 ducats of Venice give 116 $\frac{1}{2}$ ducats Naples, what will 515 duc. 5 — give? 116 $\frac{1}{2}$ exchange.

$$\begin{array}{r} 3090 \\ 515 \\ 515 \\ 257 : 10 \text{ for the } \frac{1}{2} \\ 2 : 10 \text{ for the } 5 \text{ den.} \end{array}$$

The draught should be made up on Naples of duc. reg. } 600|00

CASE IX.

Of the EXCHANGE of VENICE upon FRANCE.

To reduce 800 ducats, 12 fols d'or, banco of Venice, into livres, fols, deniers Tournois of France, exchange at 62 of the said ducats per 100 of said crowns.

OPERATION.

If 62 ducats give 100 crowns, what will 800 $\frac{12}{20}$ ducats? 100

$$\begin{array}{r} 80000 \\ 60 \text{ for the } \frac{1}{2} \end{array}$$

80060 to be divided by 62, give 1291 crowns, 17 fols, 5 deniers Tournois, for which the draught must be made on Lyons.

Note, To reduce the French crowns into livres, fols, and deniers, multiply the same by 3:

Thus 1291 crowns, 17 fols, 5 deniers.

3

3873 Livres, 17 fols, 5 den, Tourn. of France.

V E N

CASE X.

Of the EXCHANGE of VENICE upon AUGUSTA.

To reduce 500 $\frac{1}{2}$ ducats banco of Venice, into rixdollars, kreutzers and fenings, current money of Augusta, exchange at 96 rixdollars exchange money of said Augusta, per 100 ducats banco of Venice.

OPERATION.

100 Ducats banco. 500 $\frac{1}{2}$ Ducats, to be multiplied
100 Rixd. exch. By the 96 Rixdollars exch.

$$\begin{array}{r} 10000 \\ 3000 \\ 4500 \\ 48 \text{ for the } \frac{1}{2} \\ 24 \text{ for the } \frac{1}{4} \\ \hline 48072 \\ 127 \\ \hline 336504 \\ 96144 \\ 48072 \end{array}$$

Rixd. 610|5144
90.

Kreutz. 46|2960
4

Fenings 1|1840

The draught must be made for 610 rixd. 46 kreut. and 1 fening.

INSTRUCTION.

Multiply the 500 $\frac{1}{2}$ ducats, by the price of exchange of 96 rixdollars, and the product 48072 by 127 rixdollars, current money (because it is the equality of 100 rixdollars exchange money, the current money being 27 per cent. higher than that of exchange): separate 4 figures to the right-hand of the new product 6105144, and it will produce for quotient 610 rixdollars to be received at Augusta, in current money.— Multiply the remainder 5144 by 90 kreutzers, the value of the rixdollar, and separating 4 figures as before, it gives 46 kreutzers: multiplying also these 4 last figures by 4 fenings, the value of the kreutzer, and separating again in the same manner, it produces 1 fening more. Separating the four last figures of the three products, is the same as dividing by 10000, the product of 100 ducats of Venice, multiplied by 100 rixdollars exchange of Augusta, which is done with respect to the equality of the said 100 ducats, with the exchange of 96 rixdollars of exchange.

CASE XI.

Of the EXCHANGE of VENICE upon VIENNA.

To reduce 541 ducats, 12 fols, 9 deniers d'or, banco of Venice, into florins, gros, and fenings of Vienna, exchange at 188 of the said florins per 100 of the said ducats.

OPERATION.

If 100 ducats of Venice give 188 florins of Vienna, what will 542 ducats 12 s. 9 d.?

$$\begin{array}{r} 542 \\ 188 \\ \hline 4336 \\ 4336 \\ 542 \\ 94 : - : - \\ 18 : 16 : - \\ 4 : 14 : - \\ 2 : 7 : - \end{array}$$

1020|15 : 17
120

The draught must be made upon Vienna for 1020 florins, 3 gros, and 2 fenings.

$$\begin{array}{r} 317 \\ 12 \\ \hline 2104 \end{array}$$

CASE XII.

Of the EXCHANGE of VENICE upon MILAN.

To reduce 724 ducats, 30 fols, 6 deniers d'or, banco of Venice, into livres, fols, and den. current money of Milan, exchange at 154 marchetti of Venice, per crown of 117 fols, exchange money of Milan.

OPER A-

VEN

OPERATION.

117 fols of the crown	724 duc. 3 : 6, to be multi.*
73 fols current	* By 124 marchetti

770	8541 fols current
8162 divisor.	89798
	359192
	448990
	718384
	854 $\frac{1}{10}$, for the 2 fols, the

766965572 $\frac{1}{10}$, dividend;
766965572 $\frac{1}{10}$, divided by 8162, will give 9396, 7 fols, 10 den. current money, and 4698 livres, 7 fols, 10 deniers, also cur. money, for which the draught must be made upon Milan.

INSTRUCTION.

Reduce the 724 ducats, 3 $\frac{1}{2}$ fols, into marchetti, by multiplying by 124, the value of the ducat, and the product will be 89798 $\frac{1}{10}$; multiply the 177 fols of the crown by 73, the product will be 8541; multiply these two products, the one by the other, and it will give 766965572 for a dividend.—Multiply separately the exchange of 154 marchetti by 53, the product will be 8162, for a divisor, which gives for a quotient, 93967 fols, and 6918 for a remainder; and which being multiplied by 12 deniers, the value of a fol, and dividing by the same, it gives 10 deniers.—Separate the last figure of 93967 fols, and take the $\frac{1}{10}$ of the remainder, and you will find that the sum to be received at Milan is 4698 livres, 7 fols, 10 deniers, current money.—Multiplying the exchange of 154 marchetti, by 53 fols exchange, is because you multiply the 117 fols of the crown of Milan, by 73 fols current of Milan, these two multipliers being in proportion the one to the other, for we have seen in the exchange of Genoa upon Milan, that 106 fols of exchange makes 146 current. See the article GENOA, Vol. I.

CASE XIII.

Of the EXCHANGE of VENICE upon ANCONA.

To reduce 400 ducats banco of Venice, into crowns of 10 julios of Ancona, exchange at 93 of the said crowns per cent. of said ducats.

OPERATION.

If 100 ducats ban. Ven. give 93 crowns Anc. what will 400?	400
Crowns of Anc. to be rec.	372 $\frac{1}{100}$

CASE XIV.

Of the Exchange of Venice, upon BOLZANO.

To reduce 800 ducats banco of Venice into florins, kreutzers, and fenings, current money of Bolzano, exchange at 136 marchetti of Venice, per rixdollar of 93 kreutzers of Bolzano.

OPERATION.

136 marchetti of exch.	124 marchetti
60 kreutzers	800 ducat
810 divisor.	99200
	93
	297600
	892800

9225600 dividend, being divided by 8160, gives 1130 florins, 35 kreutzers, 1 fenning, current money, for which the draught must be made upon Bolzano.

INSTRUCTION.

Reduce the 800 ducats into marchetti, by multiplying them by 124; multiply the product, 99200, by 93 kreutzers, the value of the exchange rixdollar, the new product will be 9225600, the dividend.—Multiply the exchange of 136 marchetti by 60 kreutzers, the value of a florin, the product will be 8160; the divisor, which will give 1130 florins, with a remainder of 480, to be multiplied by 60 kreutzers, the value of a florin, and dividing by the same, you will have 35 kreutzers, and 240 remaining, which multiplied by 4 fenings, the value of a kreutzer, and dividing as before, it gives 1 fenning.

VEN

CASE XV.

Of the EXCHANGE of VENICE upon FLORENCE.

To reduce 300 ducats banco of Venice into crowns of 7 $\frac{1}{2}$ lires of Florence, exchange at 78 of the said crowns per 100 of the said ducats.

OPERATION.

If 100 ducats of Ven. give 78 crowns of Florence, what will 300	300
Crowns of 7 $\frac{1}{2}$ lires	234 $\frac{1}{100}$

CASE XVI.

Of the EXCHANGE of VENICE upon NOVI, or BIZENZONE.

To reduce 1930 ducats banco of Venice, into crowns mark of Novi, exchange at 193 of the said ducats per 100 of the said crowns of Novi.

OPERATION.

If 193 ducats give 100 crowns, what will 1930 ducats?	100
	193
193000(1000 cro. mark, for which the draught must be made in the Easter fair upon Novi.	193000

Of the WEIGHTS and MEASURES of VENICE.

Their measure for linen and filks is the brace, and that is of two sorts, viz. 5 braces for silk make something less than 3 English ells; or 160 braces make about 57 $\frac{1}{2}$ ells in London, 98 in Holland, 117 $\frac{1}{2}$ in Hamburgh, 122 $\frac{1}{2}$ in Bréslau, 104 in Danzig, 117 in Leipzig: and the brace for linen is about half an English ell.

Their weights are distinguished in gros and futtle weights. Their gros quintal, by which they weigh brags, metal, feathers, and other lumbering commodities, is 100 lb. gros. The other, by which they weigh silk, spices, and drugs, is 100 lb. futtle.

Now 100 lb. gros weight makes 158 lb. futtle weight, or 106 lb. in London avoirdupois weight.

And 100 lb. futtle weight makes about 63 $\frac{1}{2}$ lb. of their gros weight, or about 65 $\frac{1}{2}$ lb. in London.

And 100 lb. futtle weight of Venice has been found to make about 61 $\frac{1}{2}$ lb. in Hamburgh, 65 $\frac{1}{2}$ lb. in London, 60 lb. in Amsterdam, 59 lb. in Frankfurt.

Their gold and silver weights are as follow, viz. 4 grains is 1 carat, 9 carats (or saliques) is 1 quarta, 4 quarta's 1 ounce, and 8 ounces is one mark; and 100 lb. Troy weight has been found to make about 116 $\frac{1}{2}$ of the above marks: and the same in Verona.

Their wine measure is the amphora, of 4 bigorza's; each bigorza is 4 quarts, and each quart 4 fachie, and each fachie is 4 lera's; but, by wholesale, the amphora is 14 quarts, and the bigorza 3 $\frac{1}{2}$ quarts.

Oil they sell by weight and by measure; the mizaro is 40 mero, and the mero is about 3 $\frac{1}{2}$ pints by measure, but by weight it is more.

Corn is sold by the storo, and is in quantity about one sextier of Paris.

The BANK of VENICE.

This is commonly called Banco del Giro: that is, properly, a public depositum, for the reception of the cash of merchants and traders, &c. It was established by an edict of the republic, which declares, That the payment, for merchandizes by wholesale, and bills of exchange, is to be made in bank; and that all debtors and creditors shall be obliged, the one to carry their money to the bank, and the other to receive their payment in bank, by making a transfer from one account to the other.

An excellent memoir received from Venice remarks, That none are obliged to pay for merchandize in bank, every one being free to do so, or otherwise: and with relation to bills of exchange, if it is expressed VALUE IN BANK, i.e. the value to be paid in bank, such bills are to be paid in bank; but when it is expressed in CURRENT MONEY, that is to say, in ducats, or livres current, or in sequins, philippines, or other species, they must be paid in these respective monies, unless the parties agree to negotiate the affair in bank; but, in such case, the concerned must previously agree upon the agio. See the article AGIO.

It is allowed sometimes to make real payment, particularly in retail trade, or when strangers desire ready money, or when others shall require current money for the transaction of business by bills of exchange, or otherwise to dispose of it.

The necessity that there sometimes is of making these effective, or money payments, has occasioned a ready-money bank-account to be opened, for the accommodation of those whose affairs require it.

It has been experienced, that this cash account has not caused any sensible diminution in the funds of the bank; this liberty of drawing for ready cash has, on the contrary, occasioned an augmentation thereof.

By means of the bank, the republic, without cramping the freedom of trade, and without paying any interest, has made herself mistress of five millions of ducats, to which the fund of this bank is fixed: whereby, on pressing emergencies, the Venetians have rarely occasion for extraordinary taxes. The regularity also exercised in the administration of the affairs of the bank, for which the state is guaranty, has rendered this establishment so permanent, that there is great reason to judge its duration will be equal with that of the republic itself.

The accounts of the bank are kept in livres, sols, and deniers gros: the livre is 10 ducats bank, or 240 gros, the ducat being equal to 24 gros.

Money of exchange is always understood to be that of ducats in bank, which is imaginary, 100 whereof make 120 ducats current money: so that the difference between bank and current ducats is 20 per cent. brokers being prohibited to raise the same higher.

The memoir before cited illustrates this matter as follows: 100 ducats bank make 100 effective, which have besides another agio upon the ducats current, or upon the current money; and this agio, like the other, is called an agio of bank, which is always fixed at 20 per cent. and, on the contrary, the other agio is uncertain, and varies more or less: for example, suppose this variable agio to be 20 per 100, if we would know how many 100 ducats bank will produce current, we must first add the fixed bank agio of 20 per cent. and afterwards upon the 120 ducats must be added the value of 20 per cent. thus 100 ducats bank will make 154 ducat and 19 gros current.

The bank is shut four times a year, viz. the 20th of March, the 20th of June, the 20th of September, and the 20th of December; and it remains shut every time for the space of 20 days. During this time, business is not obstructed, the money payments go on, and what is transacted in bank, is transferred upon the opening thereof.

The said memoir likewise informs us, That the precise times of opening and shutting the bank have been settled, by an ulterior decree of the senate, of the 20th of February, 1730, as follows: (1.) That it shall be shut the Saturday before Palm-Sunday, and opened again the Monday after the Octave of Easter. (2.) From the 23d of June to the second Monday in July. (3.) From the 23d of September to the second Monday in October. (4.) From the 23d of December to the second Monday in January. The bank is also shut on all ordinary holidays, and every Friday, when there is no such holiday; but at present the bank is not shut on law-court holidays, nor on the Fridays of the month of March, as heretofore.

There are, besides, other extraordinary times of shutting up the bank, which is for eight or ten days, during the Carnival, and as many for the Passion Week. It is shut likewise every Friday of the week, when there is no holiday, for the ballancing of their accounts.

Bills of exchange for places and fairs are paid in bank. A seller cannot refuse payment in bank for his merchandize, when there is no agreement to the contrary.—Bills of exchange, from the expiration of their time to run, have six days of grace, or *RISPECTO DI BANCO*; and, in default of payment, you are not obliged to make protest, but the sixth day, after which you run the hazard, if not done.

From the moment that the bank is shut, a debtor is not obliged to the payment of bills of exchange in cash, nor in any other manner; nor can a protest be made till the opening of the bank, and that only after six days of grace, according to custom, excepting, nevertheless, in the case of a failure, and, when this happens, strict measures may be taken, provided the time of usance, with regard to bills, is expired.

Bills of exchange endorsed cannot be paid in bank: the person to whom the bill is payable, must send a letter of attorney to his correspondent at Venice, to receive it for him; otherwise it is necessary that the bill be made payable to such correspondent.

Contracts for goods and merchandizes are made for current money, and not in bank, except those for oil and quicksilver, which are always dealt for in bank money.

As the accounts of the public bank of exchange are kept in livres, sols, and deniers, when transfers are therein made, it must be done by reckoning 10 ducats banco per livre: for example, if you have occasion to write in bank, ducats 1246 : 8, it is not specified in ducats and gros, but in liv. 124 : 12 : 8, which make the said sum of ducats banco. To give an idea with what facility and convenience parties may be paid in bank, the following is the method practised.

Afdrubal is indebted to sundries for sundry particulars:

To Berentio, for a bill of exchange remitted from London upon said Afdrubal, of the sum of ducats banco	2689 : 4
To Cafimiro, for a bill of exchange, remitted to Afdrubal upon Amsterdam	3847 : 9

VOL. II.

Brought over	6536 : 13
To Domitian, for the value remitted to said Afdrubal	4754 : 17
To Emilio, for ballance of an account current, settled with Afdrubal	1589 : 5

Total ducats	12880 : 11
--------------	------------

To discharge these several sums in bank, when Afdrubal has the sum in bank requisite so to do, he appears before two of the book-keepers of the bank (who write uniformly, at the same time, in two separate bank books) and he says or dictates to them as follows:

By Afdrubal, for a bill from London	1. 268 : 18 : 4
to Cafimiro, for one from Amsterdam	384 : 14 : 9
to Domitian, received	475 : 9 : 5
to Emilio, for ballance	158 : 18 : 5

Livres bank	1288 : 0 : 11
-------------	---------------

In this manner the whole is regulated, without need of any receipt, declaration, or acquittance, between the parties. It is not even necessary for the creditors to be present when these articles are wrote off, except Emilio, because when he settles the ballance of an account, the creditor must be there, and affirm, by a simple *AYE*, to the writer, that such sum makes the ballance, an act of this kind being more valid than any other acquittance that can be required by the payer. And suppose that Afdrubal has not, by his credit in bank, a sum sufficient to pay what he owes, or that he has none at all; in this case he must carry into bank so much current money as the said sum amounts to, upon the footing of 20 per cent. agio: or, by the means of a broker, he must find such who will lend him that sum (after having agreed for the said agio, perhaps at $\frac{1}{2}$ difference) and transfer the same in bank, to the credit of Afdrubal's account: suppose that Flaminio is the person who receives the value thereof, he goes to the bank book-keepers, and orders them to write as follows:

By Flaminio. To Afdrubal, l. 1288 : 0 : 11. In this manner the disposition that Afdrubal has made in bank, is justly regulated for the value of the several beforementioned sums. By these examples, the great convenience of this bank may be judged of, particularly in a city where such large transactions in bank and exchange are negotiated.

VIRGINIA. We having spoken so largely already throughout this work, in relation to the high importance of the colonies to this kingdom, it cannot be necessary to urge that matter further; nor is it needful, we apprehend, to say more than we have done, with respect to the precarious state wherein our plantations on the continent of America seem to be at present, from the unjustifiable conduct of the French. What we have said upon these points, is to be met with under the articles **BRITISH AMERICA, CANADA, COLONIES, FLORIDA, LOUISIANA, MAP, NORTH CAROLINA, PENNSYLVANIA, PLANTATIONS, SUGAR COLONIES, TRADE.**

And as this is the last time that we shall have occasion in this work to speak of our colonies in America, it may not be unacceptable to give a summary of the measures taken by FRANCE to protect and extend the commerce of their colonies and plantations in this part of the world; whereby it will appear, in a narrow compass, by what means they are at present enabled to figure it so powerfully in the American world,

REMARKS on the article VIRGINIA, before the last war.

The MEASURES taken by FRANCE to promote and extend the TRADE and COMMERCE of their COLONIES and PLANTATIONS in AMERICA.

The measures taken by the French to people their colonies, are,

I. To people them with a number of WHITES proportionate to that of BLACKS, that the latter may not be an overmatch for the former, and raise insurrections*.

* The case is otherwise with regard to our colony of JAMAICA. See an Essay concerning Slavery, and the danger Jamaica is exposed to from the too great number of slaves, &c.

II. They send over French workmen, so articulated as servants, to render labour cheap, and to instruct the negroes in such things as may render them more beneficial to the French planters.

III. They regularly instruct the people in the use of arms, as well to defend their colonies at the least expence to the crown, as to train them to hunting, not only for food, but to enlarge the peltry trade in New France†. See our article FRENCH AMERICA.

† We have not been so careful in regard to either of these material particulars.

IV. Those who are bred up in the hospitals in France (where there is a prodigious number) are sent to America for planters, and every single man of these is obliged to marry an Indian woman. And to enable them to trade among themselves, they had a supply of 25,000,000, in bank bills, granted them, by an arrêt of the 16th of July, 1719. See the article CANADA.

V. The French king gave the clergy considerable grants of lands in Canada, and sent thither a great number of missionaries and Jesuits to Quebec, who are dispersed among the Indians, fall in with their customs, and thereby have greatly extended their trade and influence among them.

VI. They have taken effectual measures, from time to time, to establish formidable colonies from Florida and the Mississippi, to Canada, upon the back of all the British colonies on the continent of America, and have erected many strong forts in the most advantageous situations, and destroyed several nations of our Indian allies, and drawn others off from our interest, and added them to their own *.—See our articles BRITISH AMERICA, FLORIDA, LOUISIANA, NORTH CAROLINA, PENNSYLVANIA, PLANTATIONS, &c.

* Can any measures prove more effectual to reduce the Indians to their obedience?

VII. The negro-trade, for the benefit of their island colonies in particular, is regulated upon wiser principles than that of any other nation.—Their great East-India company, with all its privileges, &c. is the support of their African trade. See the articles FRANCE, and FRENCH AFRICAN TRADE and COMPANY; see, in particular, an account of the bounties, exemptions, privileges, and encouragements, given by the French to their African Company, &c. See also the article FRENCH AMERICA, in regard to the trade of their island and continent colonies in America, where we have treated of this matter very fully, extracted from the registers of the council of state. See further, LE CODE NOIRE, ou RECUEIL des reglemens rendus jusqu'à présent [1742] concernant le gouvernement, l'administration de la justice, la police, la discipline, & le commerce des negres dans les colonies Françaises. Et les conseils & compagnies établis à ce sujet †.

† By these means they have peopled their island colonies cheaply with negro slaves, and can thereby afford the produce of their colonies cheaper than we can that of ours.

VIII. For the further regulations of the commerce of France, see the article CHAMBER of COMMERCE, and my REMARKS thereon. See also the article TURKEY TRADE and COMPANY, in the conclusion, for an exemplification of the methods of proceeding of the DEPUTIES of COMMERCE or council of trade †, in order that nothing essential may be omitted to be laid before the ROYAL COUNCIL, for the government of their resolutions in regard to points of trade. See also the article CONSUL, with our REMARKS thereon.

‡ This council it is which oversees the manufactures of the kingdom, and procures to them those encouragements, that liberty, and those immunities which gave birth to them, and preserves them. It directs the mutual commerce between France and its colonies, to their best common advantage. Well informed of the state of the national trade, by a comparison of the annual imports and exports, it observes the branches of it which want protection. From this knowledge it is that they govern opportunely their solicitations to foreign powers for new advantages; that they defend those which they possess, or profit of those which present themselves. It is from the representations of this board that those treaties of commerce are projected, which commonly accompany treaties of peace. In short, this council is a center of union for trade, the marine, and the revenue, to furnish one another with reciprocal and necessary occasional assistance.

IX. After establishing the said council of commerce, ordinances were issued for regulating the conduct of the governors, fur-intendants, &c. in America, and a sovereign council was appointed in each colony, consisting of 12 counsellors, and the intendant as president.—This council is the supreme judicature, in all causes, without appeal, in the colonies. Here every one pleads his own cause, viva voce, or by memorial, solicitors and barristers being not to appear there: thus lawsuits are quickly determined §.—Besides these, there is in each colony a lieutenant-general, both civil and military, an attorney-general, the great provost, and a chief justice in eyre.—The chief officers are such checks on each other, that few abuses, injurious to the crown or subject, are committed without speedy redress.—The French have a governor general † of Louisiana, or Mississippi, residing at New Orleans,

§ Does not this prevent the planters and traders being distracted with lawsuits, which unfit them to exert their trading industry?

† Our colonies being differently constituted among themselves, and having no governor-general, &c. to direct their affairs

upon one steady plan of conduct, for the safety and prosperity of all, are liable to great disadvantages and dangers.—We have many difficulties to encounter in relation to our charter-governments, which require the redress of parliament.

and the lieutenant-governor at Mobile. See the article LOUISIANA.

X. The revenues arising in the French colonies are accounted for in the chamber of accounts, and all officers give security for the due performance of their duty; whereby there is a constant fund for the use of the colonies, applied as advised by the council of trade *.

* We have no such competent fund for the constant support of our colonies.

Of the DUE EXECUTION of the ORDONNANCES, EDICTS, and ARRETS, in relation to TRADE, issued in FRANCE, concerning their Plantations.

I. The council of commerce is the channel of conveyance, in regard to matters of trade, to the royal council.—The former examines and discusses, as we have shewn before, all propositions and memorials, and the secretary keeps an exact register thereof: these are laid before the royal council.—With such steadiness and independency does this council of commerce act, that they have frequently opposed and overruled the determinations of the regal council. By this means the council of trade guards against encroachments, as well on the rights of the crown as on the property of the subjects, and the ordinances or arrêts of the crown scarce ever fail to be duly executed: for the council of state is so constituted, that it may be truly said to be (as a late judicious writer observes) the eyes, the ears, and the hands of the king, as there is no act done but what may be redressed, by applying to the king in this council of state: if the officers of the crown are aggrieved by acts of power in their superiors, they may, and often do, meet with redress on that head: which regulation hath a wonderful effect in the foreign concerns of the French nation, whereby all channels of information are left open to the view of the crown, the officers of the lower class not being debarred access to the crown, nor liable to oppression of their superiors without redress. Thus care is taken for the security of the subjects in America, so as not to leave them a prey to governors, and other officers in the plantations. And in order the more effectually to enforce the execution of the royaledicts, arrêts, and ordinances, the penalties for the violation thereof are vigilantly inflicted. See our articles before referred to †.

† This point certainly deserves due attention in this kingdom.

The FRENCH MANAGEMENT of the INDIANS in NORTH AMERICA.

I. We have seen how the French intermarry with the Indians, and of what use their missionaries and Jesuits are among those people.

II. The French who carry on the fur-trade in Canada do it by licence: but they employ great numbers of Indian traders, whom they call COUREURS DE BOIS, who are expert in that trade, and go in canoes, and trade with most of the savage nations † round the government of Canada. The coureurs de bois are, at present, become very numerous, being computed, at least, at 1500 men, who are often employed as a kind of flying corps, and joined with the French Indians, either to attack the ENGLISH, or such Indians as are in friendship with them.

‡ Is not this far more judicious than our methods of traffic with the Indians?

III. The French for many years being prevented, by the FIVE NATIONS in our interest, from discovering the great lakes, carrying on trade, and forming alliances with the Indians who lived to the southward and westward of them, they prevailed with our Charles II. to forward a peace between the French and those nations.—This gave them a power, to extend their lines, and build FORTS to the southward, by which means the FIVE NATIONS have been much galled, ever since the building of FORT FRONTENAC, NIAGARA, and others.

IV. The French have cut off many of them, by treachery and open force, when the English have neglected to support them; so that those warlike people are so reduced, as to be unable to withstand the French, which has been owing to our engaging them in wars with the French, and then leaving the burthen of the war on them §. See LOUISIANA.

§ This disregard and treachery on our side towards the Indians, will hardly be thought to cement their friendship towards us.

V. The French also have built a FORT near the water-fall of SAUT ST MARIE, and erected another of considerable strength at CROWN POINT, on the lands of the FIVE NATIONS,

TIONS, which is of more service to the French, and, consequently more hurtful to the English, than any of the forts the French have built from Quebec to the river Ohio. By this fort they keep the Five Nations under constant alarms, and distress them and their allies in their huntings; and by CROWN POINT, FORT FRONTENAC, NIAGARA, &c. they keep open a communication with the western Indians. VI. They likewise prevent the English from making a proper use of the Five Nations against the eastern Indians, who live in the province (as the French call it) of GASPESIE, which is part of NOVA SCOTIA: by this means, the Indians to the eastward of NEW ENGLAND are left at liberty to make continual inroads upon the English settlements of NOVA-SCOTIA: though this might be prevented, if the FIVE NATIONS could, with safety, attack the eastern nations in the province of GASPESIE, in the back parts of Nova Scotia.*

* Upon what plan, on our side, the ill consequences of these measures may be greatly prevented, if executed in time, see our REMARKS on the article LOUISIANA.

VII. CROWN POINT is near to the branches of HUDSON'S RIVER, which runs by Albany to New York: therefore, from the situation of this fort, the province of NEW YORK may be brought into imminent danger; and, indeed, may endanger the safety of the whole British continent of America; for if the French take us at an unguarded hour, and make themselves masters of New York, they may cut off the communication between our NORTHERN and SOUTHERN COLONIES, and, by the aid of their INDIANS, they might have it in their power to destroy the English settlements.

VIII. Though the English have above ten times the number of settlers which the French have in their colonies on the continent of America, yet the English frontiers making near 1500 miles in length, and the French having now most of the Indians in their interest, it is not easy to guard against the Indians in their sudden attacks; for before the English can collect a force to oppose them, the Indians may retire and shelter themselves behind the FRENCH FORTS; and in such an extensive forest, through swamps and thickets, it is scarce possible to pursue them with any prospect of advantage, or to supply an army with necessaries in such an enterprize †.

† Should not all imaginable ways be taken to secure the Indians ever after in our interests?

IX. The design of the French, in taking the great lakes, was to secure the Indians and the fur-trade to themselves.—The building of CROWN POINT was to awe the FIVE NATIONS, or bring them into the measures of FRANCE.—The treaties with the EASTERN TRIBES OF INDIANS, and erecting the province of GASPESIE out of NOVA SCOTIA, was to enlarge their territories on the SEA-COAST, and extend their FISHERIES.—These encroachments, added to those made at the OHIO, must render them very formidable. X. If the French surrender to us the FORTS which they have lately taken at OHIO, and yet continue to extend their SOUTH LINE, they would thereby take in a great part of VIRGINIA, and of NORTH and SOUTH CAROLINA, and leave us wholly exposed to the excursions of the INDIANS in all our frontier settlements; therefore the ENGLISH ought not only to demolish the FORTS which they have lately built on the branches of the river OHIO, but to take CROWN POINT and NIAGARA, and also to erect FORTS instantly, for the protection of the FIVE NATIONS, and for enlarging our trade and commerce with the INDIANS §.

§ How our Indian trade and affairs have suffered by the handlers at ALBANY, see our REMARKS on the article LOUISIANA.

XI. If the French come to a DIVISION with the English on the continent of America, their intention apparently is to include our INDIAN ALLIES within their limits, and to turn our own weapons against us.

XII. Many of the Indians to the west of the APALACHIAN MOUNTAINS have acknowledged themselves subject to the crown of GREAT-BRITAIN, and, were we to determine their territories to be within the FRENCH limits, it would be throwing them into the arms of FRANCE, destructive of all our frontier settlements, and put an intire stop to the trade and commerce which hath hitherto been carried on with them; and, in such case, the FRENCH, doubtless, would erect divers FORTS within their territories, and compel our present INDIAN FRIENDS to make war on us.

XIII. The ULIBALYS, CHICANES, and CHATTAS, who were the most considerable nations upon and between the river Coza and the MISSISSIPPI, kindly entertained the English, who resided among them several years, and carried on a safe and peaceable trade with them, 'till about the year 1715, when, by the intrigues of the FRENCH, they were either MURDERED, or obliged to make room for those NEW INVADERS, who have since unjustly possessed and fortified the same stations, in order to curb the natives, and to cut off

the communication with the English traders; whereby the French have ingrossed a profitable trade for above 500 miles, of which the BRITISH SUBJECTS were a few years ago the sole masters. See our article FLORIDA.

XIV. But if such LIMITS were determined between the ENGLISH and the FRENCH, those who settle on our frontiers would not be more secure in respect of their lives or possessions, as it has always been, and always will be, the policy of France to stir up their friendly Indians to annoy our frontier settlements, and afterwards disavow every act done by them.

XV. What has greatly contributed to the success of the French affairs in America, and has given them such weight and influence with the Indians, is the appropriation and due application of a fund for those purposes.—How these evils may be, or might have been, we most humbly conceive, happily prevented, see our article LOUISIANA [REMARKS thereon] and such other articles as we have referred to occasionally on our AMERICAN AFFAIRS.

Of the FRENCH ISLAND-COLONIES in AMERICA.

I. In a memorial of the French deputies of commerce, laid before the royal council in the year 1701, the said deputies represented, That the French had then 8,850 white men, and 45,600 blacks in their island-colonies*; but, by a calculation made in the year 1751, the FRENCH had then, in the said colonies, upwards of 51,500 white men, fit to bear arms, independent of many thousands of sailors employed in the trade of the colonies, and 364,800 slaves of both sexes; and, since the increase of their colonies, they have increased upon the ENGLISH, in settling of ST. LUCIA, TOBAGO, DOMINIQUE, &c. By what means these things have come to pass, see the articles beforementioned, particularly FRANCE, FRENCH AFRICAN TRADE and COMPANY, and FRENCH AMERICA. See LEeward ISLANDS.

* It is proper to remark here, That the deputies of commerce do not make any mention of the islands of St Vincent, St Lucia, or Tobago. See our article BRITISH AMERICA. The colonies specified by the said deputies are, CAYENNE, GRENADA, MARTINICO, GUADALOUPE, MARIAGALANTE, ST CRUCE, HISPANIOLA, or ST DOMINGO, PETIT GUAVE, LA DOMINIQUE, LES XANTIES, ST MARTIN, and ST BARTHOLEMY (a.)

(a) Vide Memoire sur la compagnie de Guinée, sur le commerce des colonies François de l'Amérique, & l'état présent des îles que la France y occupe, les moyens de s'y conserver, & s'y étendre, & leurs sentimens sur les ports & commerces exclusifs, en particulier sur les partys du tabac & du sucre.

II. By a calculation made from the year 1737 to 1744, it appeared, That the amount of the produce of the French settlements on the continent of America, and also of their fishery on the coast of Newfoundland, &c. was 820,000 l. sterling per annum, and upwards.—That the said freight, in time of peace, amounted to 220,000 l. sterling, and upwards, which, inclusive of their fishery, annually employed 9000 seamen.

III. And it appears, by the beforementioned French memorial of the deputies of commerce in 1701, that the French did not employ above 100 sail of ships in the WEST-INDIA TRADE, and these ships were not near the size, dimensions, or burthen of their ships at present employed therein; neither were their commodities of equal goodness or value of those which they now produce; but, by a calculation made of the amount of the produce of their West-India colonies, from the year 1737 to 1744, the French Islands have, in sugar, rum, molasses, indigo, pimento, cotton, pepper, ginger, coffee, &c. &c. produced to the value or amount of 2,400,000 l. sterling per ann. and upwards, independent of an extensive and profitable trade carried on from St Domingo with the Spaniards in America. Moreover, that in the French WEST-INDIA COMMERCE, 120,000 tons of shipping, with 11,000 seamen, are annually employed; the freight of which (as computed) amounted to 480,000 l. sterling per annum.—These are the effects which those regulations, arrêts, edicts, and ordonnances issued in France, with relation to their colonies, and exhibited throughout our work, have produced.

The STEADY MEASURES taken by the FRENCH to PROTECT and EXTEND their AMERICAN COLONIES.

I. It has always been the conduct of France, in relation to the Spanish depredations committed in their American trade, to check them, by empowering their governors to grant private commissions, and employ ships of force, to treat their guards de costa as pirates; and they avow or disavow the conduct of their governors therein, as the circumstances of their affairs require.—When the Spaniards have complained of the French governors making reprisals, or treating the Spanish guards costes as pirates, the answer of the French hath generally been, That it was the duty of their governors to protect the

king,

king's subjects, but if they found their conduct blameable with respect to the subjects of Spain, they would grant them satisfaction therein. However, it has always so happened, that the French have found sufficient cause to throw the blame on the Spanish governors, and the *guardes de costes* commissioned by them †.

† Might not the like measures have preserved our logwood-trade to us, from which, it seems, we are now absolutely excluded by the Spaniards, notwithstanding our undoubted right to the same? See our article *Logwood*.

II. In the settlement of St Domingo, the French did not appear openly to support the buccaneers who first settled there, but only supplied them with arms and ammunition, 'till they strengthened themselves and got possession of a great part of St Domingo.

III. The French have, for some years since, carried on a very lucrative, though illicit trade, from the Mississippi to Mexico, and we have not heard of any complaints on that head from the Spaniards, or their *guardes de costes*, committing any depredations on them on that account. They have also carried on an extensive smuggling trade from St Domingo to the Spanish settlements, which has somehow been winked at by the Spaniards: and yet some are willing to flatter themselves, that there is not so good an understanding between the French and the Spaniards, as between the latter and the English*.

* Is it any indication of friendship on the part of the Spaniards, towards the English, when they have thus long suffered the French to carry on an illicit trade, and have lately extirpated the English logwood-cutters from their rightful possessions, while they pretended to be negotiating a treaty with us, to settle that matter amicably? Does not the Spaniard's present attempt too upon the Dutch colonies of *Isequebe* and *Berbice*, shew as high regard for that republic, as their honourable treatment of us does to Great-Britain? Will the Dutch be blind, as long as the English have been, to their true interests, and suffer themselves to be lured into a jealousy? Sure the Protestant maritime powers will at length be roused, and never suffer Popish perfidy to be triumphant.

That the French have, by the grossest falsehoods and perfidy, endeavoured to make shameful and unjustifiable encroachments upon the British colonies and plantations in America, has been shewn in various parts of this work, as may be seen by the various articles before referred to.—We shall, at present, only add a word more upon this occasion.

NOVA SCOTIA being the only province in AMERICA, belonging to the crown of England, that can be made a sufficient barrier to cover any of our plantations from the invasions of the FRENCH, and check their motions on that side of the continent, by sea and land: the French have practised every art of deceit and treachery to encroach upon this colony. In my REMARKS upon the article MAP, I have taken occasion to shew, that there is an office in the French marine for depositing charts and plans, to be made use of for the benefit of their navigation; nor is this nation less solicitous in regard to geography than hydrography; for it too frequently appears, that their geographers are directed to adapt their maps to the views, schemes, and pretensions of their statesmen, however unjustifiable they may be: nay, we have all imaginable reason to believe, that those Machiavellians have set even their historians to work, to assert and maintain those things for truth, with respect to their POSSESSIONS, that from them their map-makers may the more plausibly describe upon paper, those shameful encroachments upon the dominions of other states, to the end that their statesmen may the more plausibly support them by artful negotiations.—This we have shewn to be the case, in variety of instances throughout this work, which we have often referred to; and the truth of this charge against the French has been lately unanswerably corroborated, with great judgment and accuracy, in a treatise intitled, *THE CONDUCT of the FRENCH with respect to the BRITISH DOMINIONS in AMERICA*, particularly *NOVA SCOTIA*.—In a letter to a member of parliament.—Printed for T. Jefferys.

AN EXTRACT from Dr MAYHEW's remarkable POLITICAL SERMON, preached lately before the GOVERNOR, COUNCIL, and REPRESENTATIVES of MASSACHUSETTS BAY in NEW ENGLAND, on the interesting circumstances of NORTH AMERICA before the last war.

* What horrid scene is this, which restless, roving France, or something of an higher nature, presents to me, and so chills my blood! Do I behold these territories of freedom become the prey of arbitrary power! Do I see the motly armies of French and painted savages taking our fortresses, and erecting their own, even in our capital towns and cities! Do I behold them spreading desolation through the land! Do I see the slaves of Lewis, with their Indian allies, dispossessing the free-born subjects of king George, of the inheritance received from their forefathers, and purchased by them at the

expence of their ease, their treasure, their blood! To aggravate the indignity beyond human toleration, do I see this goodly patrimony ravished from them, by those who never knew what property was, except by seizing that of others for an insatiable lord! Do I see Christianity banished for Popery! the Bible for the mass-book! the oracles of truth for fabulous legends! Do I see the sacred edifices erected here to the honour of the true God and his Son, on the ruins of pagan superstition and idolatry, erected here, where Satan's seat was! Do I see these sacred edifices laid in ruins themselves, and others rising in their places, consecrated to the faints and angels! Instead of a train of Christ's faithful, laborious ministers, do I behold an herd of lazy monks and Jesuits, and exorcists, and inquisitors, cowed and uncowed impostors! Do I see a Protestant there stealing a look at his Bible, and, being taken in the fact, punished like a felon! What indignity is yonder offered to the matrons! and here to the virgins! Is it now a crime to reverence the hoary head! and is he alone happy that taketh the little ones, and dasheth them against the stones! Do I see all liberty, property, religion, happiness, changed, or rather transubstantiated into slavery, poverty, superstition, wretchedness! And, in fine, do I hear the miserable sufferers (those of them that survive) bitterly accusing the negligence of the public guardians! and charging all their calamities less upon the enemies, than upon the fathers of their country! O dishonest, prophane, execrable sight! O piercing sound! that entereth into the ears of the Lord of Sabbath! Where, in what region, in what world am I? Is this imagination (its own busy tormentor), or is it something more divine? I will not, I cannot, believe 'tis prophetic vision, or that God has so far abandoned us.

And how different a scene is now opening upon me, with clearer indications of truth and reality! There insolence and injustice punished! Here, 'the meek inheriting the earth!' Liberty victorious! Slavery biting her own chain! Pride brought down! Virtue exalted! Christianity triumphing over imposture! and another Great-Britain arising in America! But I must not declare the whole.—The Lord God omnipotent reigneth! Just and true are all thy ways, O thou king of fairs! And them that in pride thou art able to abase, 'What has pride profited, or what good has vaunting brought you,' ye restless disturbers of our peace? What good your masses? your relics? your crossings? your Ave Marias? and to which of your fairs will you now turn?

But we are not, my honoured fathers, to presume on God's protection, much less on his giving us any signal advantages over them that are ever either planning or executing mischief against us, without using the proper means for obtaining that protection, and these advantages: as the apostle said to the mariners, after assuring them of deliverance from the impending danger, 'Except these abide in the ship, ye cannot be saved;' so it may be said to our British colonies, 'Ye cannot be saved from the storm ye are now threatened with, yea, which is already begun, except ye are at union amongst yourselves, and exert your strength together, for your common interest. Upon this condition you are safe, even without a miracle: otherwise, nothing short of one can save you. And can you, without the utmost indignation, think of becoming a prey to those who are so much inferior to you in all respects, merely for want of unanimity, public spirit, the manly resolution of your forefathers, and a little expence?' For a display of the matchless perfidy of FRANCE, see our articles AMERICA, BRITISH AMERICA, CANADA, FLORIDA, FRANCE, LOUISIANA, NORTH CAROLINA, PLANTATIONS, INDIANS IN NORTH-AMERICA.

REMARKS on this article VIRGINIA, since the last war, and the treaty of 1763.

Under our article AMERICA, we have given the treaty of peace, concluded in the year 1763, at large. By the present as well as the various articles we have above referred to from this, and also from divers others referred to from them, it appears that the fulness of time was come, before the last war, that Great-Britain must either extirpate the French out of NORTH-AMERICA, or that the French would extirpate the subjects of Britain from thence. By the last treaty of peace, we seem now to have secured, from the power of the French, the whole range of our British colonies from north to south of this extensive continent, by the cession of CANADA and all its DEPENDENCIES, and more particularly the cession of CAPE BRETON, to the crown of Great-Britain. See CANADA, MISSISSIPPI, NEWFOUNDLAND.—By the said treaty we have also obtained the cession, from Spain, of East and West Florida; so that, at present, our North American colonies are secured to this kingdom by divers maritime barriers; we mean, on the most northerly parts, by the GULPH and RIVER ST LAWRENCE, and by CAPE BRETON; by the extended ocean, on the east, from CAPE BRETON to FLORIDA; by the GULPH of MEXICO on the south, by our possessions therein, as the BAY of APALACHE, PENSACOLA, and MOBILE; and on the west, by the British right of navigation to and from the River MISSISSIPPI: so that now we shall be able to exert the full force of our maritime strength to maintain

maintain and preserve to the British crown those estimable colonies. The small possession of NEW ORLEANS, which the French enjoy on the east of the MISSISSIPPI, does not seem to put it in their power, any more than their other possessions on the west of the river, to endanger those colonies from that power; especially if we attach the INDIANS on the east thereof to our interest; which now it appears that we can hardly fail of doing effectually, and soon. For by a letter from OSWEGO, dated August the 7th, 1764, to colonel Burton, at MONTREAL, we have an account, that "Matters are entirely settled with all the Indian nations who attended the meeting at NIAGARA; the greatest ever known, being about 2000 Indians. Some reports spreading prevented the CHENUSSIOS coming for a long time: at length they came and delivered up the prisoners, &c. &c. and gave to his Majesty and his successors, for ever, the land on both sides the freights to LAKE ERIE (or CARRYING PLACE) four miles on each side, and liberty of a port on the north side of Lake Erie, &c. So that his Majesty will be possessed of all territory from LAKE to LAKE; a cession of near 300,000 acres. They have also given two Seneca hostages, for the SHAWNEESE and DELAWARE king, whom the CHENUSSIOS engage to deliver up at this part, with all prisoners amongst them. There were 22 different nations at the congress, eleven of which were western Indians; all behaved well, and were discharged in the best humour. The MICHILLEMAKINAC INDIANS have engaged to protect the garrison which may be sent there. The COGNAWAGOE warriors are gone with the army, and behave well. Peace is settled by a solemn treaty, in writing, with the HURONS of DETROIT: the treaty of peace and alliance with the CHENUSSIOS is also ratified and confirmed in writing; so that every thing is done that could be wished for, or expected." And

Before this goes to the press, we have the following accounts from Philadelphia, dated September 6, 1764.

"Ten deputies from the Delawares, Shawanese, Hurons of Sandusky, and other Indians of the countries between Lake Erie and the Ohio, met Col. Bradstreet at Presque Isle, on his way to their country, with the forces under his command, and in the most submissive manner begged for peace, which he granted them on terms to the purport following:

"1. That all the prisoners in their hands should be delivered to him at Sandusky in twenty-five days.

"2. That they should renounce all claim to the posts and forts we now have in their country; and that we shall be at liberty to erect as many more as we think necessary to secure our trade; and that they shall cede to us for ever, as much land round each fort as a cannon-shot can fly over, on which our people may raise provisions.

"3. That if any Indian hereafter kill any Englishman, he shall be delivered up by his nation, and tried by the English laws, only to have half the jury Indians. And if any one of the nations renew the war, the rest shall join us to bring them to reason.

"4. That six of the deputies should remain with him as hostages, and the other four with an English officer; and one of our Indians should proceed immediately to acquaint those nations with these terms of peace, and forward the collecting of the prisoners, to be ready at the day appointed.

"It is said that the colonel has told them, that if this peace is not confirmed by their chiefs, no other will be granted them; and that, if they continue the war, they shall find their country filled with warriors immediately, who will cut them off from the face of the earth.

"It seems the motion of the two armies at once towards their country, viz. that under Colonel Bradstreet, from Niagara, and that from this province, under colonel Bouquet, has greatly intimidated those people, who at first haughtily stood out, and refused to meet Sir William Johnson at the congress of Niagara. See the article INDIAN NATIONS.

UNITED PROVINCES of the STATES-GENERAL. Under the articles FLANDERS, HOLLAND, NETHERLANDS, DUTCH AMERICA, DUTCH WEST-INDIA COMPANY, DUTCH COMPANY of the NORTH, DUTCH LEVANT COMPANY, DUTCH EAST-INDIA COMPANY, we have considered the nature of the commerce of this republic; to which we have subjoined such REMARKS as we have judged requisite to support the power and dignity of the States-General of the United Provinces, whose interest we look upon to be inseparable from that of Great-Britain. We have more particularly shewn the ill consequences which soon attend this republic, for want of the barrier being duly settled for her preservation, as well as our own. From this principle it is, that, in all our wars in Flanders, we have fought for the Dutch as for ourselves, and that it has been the repeated sense of the parliament, That a strong barrier for the Dutch in Flanders, against France, is necessary for the safety of England, as well as Holland. This we have endeavoured to demonstrate from reason and authority, under the articles above referred to. [See FLANDERS and NETHERLANDS.]

VOL. II.

If we make a calculation of the forces of France in time of war, we shall find that they have not amounted to less than 100,000 horse, and 300,000 foot; nor is there any other potentate in Europe, if in the whole world, able to bring such an army, and so well appointed, into the field. On the other hand, we know very well what an aversion both the parliament and people of Great-Britain have to a standing army, as a thing destructive of their liberty and freedom; nor need we be told how unable an undisciplined rabble is to withstand a body of regular troops: so that our security chiefly lies in being masters at sea. This is what we, in conjunction with the United Provinces, may still be, if the Dutch will increase their marine, and exert their naval power, as they have heretofore gloriously done. But should the French king be once possessed of Flanders, he may easily surprize and conquer Holland: nor is it possible for that small republic to withstand him. Being once possessed of the Dutch towns and harbours, he is, by consequence, not only master of all the ships and naval stores that are laid up in them, but may augment them to as great degree as the Dutch have formerly done. And having once united the ports and fleets of Holland with his own, it is a vain thing for us to pretend any longer to the dominion of the sea: for if this should ever come to pass (which God forbid!) and the fleets of Spain should join those of France, as is too likely to be the case, we must submit to the yoke of France: for they may then pour in above 100,000 veteran troops upon us, from all quarters; nor will it be possible for us, without a miracle, to withstand them. So that in truth we are as much concerned to hinder the French from over-running the United Provinces, as he that dwells at one end of a street is to quench those flames that are raging at the other: for, as Sir W. Temple very well observes, 'If France were once master of Flanders, the body of that empire would be so great and so entire, so abounding in people and riches, that, whenever they found or made an occasion of invading the United Provinces, they have no hopes of preserving themselves by any opposition or diversion.'—And if they be ruined one year, we are undone the next.

† Temple's Observations on the United Provinces.

The necessity of a BARRIER, or a chain of strong towns in the Low COUNTRIES, to hinder the French from surprizing Holland, has been the sense of our parliament from the time of king Charles II. and is at present the sense of the wisest men in the nation, and of the truest friends to our constitution. In the year 1713, the parliament, in their humble representation presented to her Majesty, and printed by the Speaker's order, they affirm, in direct terms, 'That the SUCCESSION and BARRIER are two points of the GREATEST IMPORTANCE to both nations,' i. e. to BRITAIN as well as HOLLAND.

The present insecurity of the United Provinces, for want of a good barrier being settled, we may reasonably enough presume, has been none of the least incentives with France to act so barefacedly as they do at present against Great-Britain, imagining that it will not be in her power, without the aid of the Dutch, to right herself, especially if they should bring Spain into their measures (of which I make no doubt but they were certain before they struck any stroke in America); and, however omnipotent some people are sanguine enough to think this kingdom alone, yet we have had the experience of three long wars to convince us, that the strongest confederacies which can be formed, are scarce a match for France; and, therefore, they that are for trusting to the SINGLE STRENGTH of ENGLAND, in opposition to a force so much superior, must certainly very much mistake the true interest of their country. Our constitution will not consist with a standing army: the French king, on the contrary, can never be without one: therefore it is our business to secure the assistance of such as have always a standing force, ready to oppose to his; and by their fleets at sea, as well as their armies on the continent, may, in conjunction with us, either deter him from invading England, or, if he does, soon find him so much work at home, as may oblige him rather to think of defending his own dominions than invading his NEIGHBOURS.

Certain it is, that there is no alliance so useful to us as that of the STATES-GENERAL, in order to secure the Protestant succession: whether we consider their situation, their strength, (which I am grieved to think is far inferior to what it was in queen Anne's war) their religion, or indeed, their interest; for the safety of each country depends upon that of the other: for as, on the one hand, should HOLLAND fall under the dominion of France, Britain would be entirely cut off from any communication with the continent (which, joined to the great accession of naval strength which France would acquire by this conquest, must bring immediate ruin upon Britain); so, on the other hand, Holland must inevitably lose both its religion and liberties, the moment that France, or any Popish prince under the influence and direction of France, gets possession of Britain. From whence it necessarily follows, that the mutual defence and preservation of each other ought to

be one of the chief maxims of government to BOTH NATIONS.

This is so plain, that the only handle which the emissaries of France have made use of to divide Us and the DUTCH, has been the point of TRADE, in which they have always endeavoured to represent them as dangerous rivals. Although we have occasionally spoken to this point, under the articles of FISHERIES in particular, yet it may be useful, at this juncture of affairs, to urge this matter farther.

Certain it is, that the wealth and strength of each nation doth depend entirely upon TRADE, and that therefore neither we nor they can be too careful and tender in that matter; but the world is wide enough for us both, and if the pains and expence that have been employed in the quarrels we have had with one another, upon the pretence of trade, had been applied to the keeping a watchful hand over our enemies, and preventing the encroachments they have made upon us both in this valuable article, and also the strides they have made, and are daily making, to universal dominion [see our article FRANCE], it is evident the commerce of both nations would have been much more extensive and flourishing than it is at this time; nor should we now have reason to dread the ill consequences that may attend the United Provinces, upon the breaking out of a fresh war in Flanders.

We are far from allowing, that the trade of the two states engages them in such a rivalry and competition with one another as has been generally pretended by those who are enemies to both: for all that have any insight into the affairs of HOLLAND must acknowledge, that their trade is chiefly founded upon their carrying goods cheaper than any nation of the world: the hard and penurious way of living they are inured to, enables them to perform the longest voyages with much less consumption and expence than other nations: by this means they are become the common carriers of the product of other countries, having none of their own, except what arises from their settlements in the Indies. Our trade, on the contrary, consists almost intirely in vending and dispersing the product and manufactures of our own country and the plantations, while our freight is dearer than that of any other nation. See the article FREIGHT, REMARKS thereon.

The main branch, therefore, of the Dutch commerce, no way affects or interferes with ours; neither, if they were to lay it down to-morrow, would any share of it devolve to GREAT-BRITAIN, but to the FRENCH, the DANES, the SWEDS, the HAMBURGERS, and the other Hanse-Towns [see the article FISHERIES particularly] who all both can, and actually do, sail much cheaper than we. And were the Dutch at this time to lose the plantations in the Indies, would not these fall into the hands of France? France, therefore, is our most formidable rival, and the proper object of jealousy to both nations, who, by fomenting animosities and quarrels between us, has had the address to weaken us at our own expence, and to make herself powerful under favour of our folly and connivance. The divisions between England and Holland first gave France the courage and opportunity to increase her naval strength, to extend her dominions in both the Indies, to drive the English out of the trade of HUDSON'S-BAY, and of great part of NEWFOUNDLAND; to lay such high duties on our respective commodities as amount to a prohibition, and thereby to encourage, and even force her own subjects to establish our manufactures in FRANCE, and by that means to run away with a great part of OURS, as well as the DUTCH trade to SPAIN, the LEVANT, and other countries. These are part of the fruits of our former quarrels with the DUTCH, which, one would hope, might have that effect, as to make us wiser for the future, by teaching us that the only way to retrieve our past follies, is by UNITING, in order to recover those valuable branches of our respective trades which FRANCE has taken from us; to preserve a balance of power in Europe, which now seems in great danger, that peace and trade may flourish; to provide jointly and zealously for the security of the seas, and safety of our commerce; and to destroy that growing naval force that otherwise may soon prove our destruction.

That such an happy and indissoluble union may instantly take place, I hope it will not be judged unseasonable to endeavour to remove those prejudices against the Dutch, which too many, by the wiles and artifices of the partizans of FRANCE, have causelessly imbibed.

A popular objection against the Dutch, in relation to those wars wherein we have been allies and confederates, is this, viz. That though we have come generously into the wars, to help them in their distresses, yet they have thrown all the burthen upon our shoulders, which they themselves would scarce touch with one of their fingers; that they have raked us of our money, but done little or nothing to promote the common cause. This is that prejudice which has made the deepest impression on the minds of the common people. Profit and loss are things by which they are most sensibly affected: do but confidently affirm, that they have been cheated of their money, by such or such great men, their rage is presently kindled, without waiting for a proof, or expecting evidence.

Thus, in the reign of king William, the impatience of the people under taxes, together with a groundless clamour against the prince, as if he had transported the treasures of the nation into Holland, constrained him, contrary to his own sense of things, to precipitate a peace with France; whereas the carrying on the war till the king of Spain's death, and expending eight or ten millions THEN, would have saved the nation FIFTY MILLIONS since.—This was the case, also, at the conclusion of queen Anne's war, as well as of the last great war.

But I would ask, Was not England as much concerned to enter into these wars as the Dutch? Are we not highly indebted to the Dutch, for their assistance to bring about the Revolution? Nay, could it have been possibly brought about without them? Or what figure could this kingdom have made in queen Anne's war, without the aid of this our old and natural ally? The most groundless, false, and inveterate clamours were raised against them by the French partizans, in this reign, as if they had not brought into the field their quotas of men, arms, and ammunition, according to the stipulations agreed upon: whereas it was demonstrated, to the confusion of their enemies, that they had greatly exceeded what was required of them; and yet were so infamously treated by the Utrecht treaty-makers, that it is to be admired they were so ready to assist us in the last war, which was chiefly OUR war, and not theirs; for the depredations the Spaniards committed on us, gave birth to the war; and yet they were shamefully aspersed and belied, in regard to their conduct upon that occasion, which I could shew at large, if the limits to which I am confined did not so restrain me as not to admit of it at present.

However, that people may not be misled by the artful and wicked insinuations of the enemies of the Dutch (whom I shall ever look upon as the enemies of Great-Britain), it may not be altogether unserviceable to observe, in the general, That, if we consult any book of geography, or any map of Europe, we shall find that the dominions of his Britannic Majesty are twenty times as large as those of the STATES-GENERAL; that SEVEN PROVINCES are commonly reckoned no bigger than our four western counties: it is true, these provinces are fuller of towns and villages than most counties in England, but then the city of London is three times as populous as that of AMSTERDAM, the greatest city belonging to the States. This is evident by the bills of mortality, which, in the former amounts, in the most healthy years, to about 20,000, whereas, in the latter, they seldom amount to more than between 6 and 7000: without doubt, the Dutch must unite many of their biggest cities, before they can equal his Majesty's metropolis in number of inhabitants, and many more to equal it in wealth. What reason, therefore, can we have to think hardly of the Dutch, as if, in any degree, they withdrew their shoulders from the burthen, when the truth of it is, they actually have maintained more soldiers against the common enemy than we, though the wars have been as necessary for our safety as for theirs, and though their territories bear no manner of proportion to those of his British Majesty?

This will appear yet more evident, if we consider that their taxes are incomparably heavier than ours. This was the case in Sir William Temple's time, king Charles the Second's ambassador at the Hague, a most accomplished statesman; and since his time their taxes have greatly increased, although their trade and their treasure have not in the like proportion. Sir William tells us, in general, 'That they are oppressed with the most cruel hardships and variety of taxes, that was ever known under any government: that the excise upon all commodities is so great and general, that he hath heard it observed at Amsterdam, That, when in a tavern a certain dish of fish is eaten, with the usual sauce, above 30 excises are paid for what is necessary to that small service.' In queen Anne's time, besides what we call the land-tax, which is heavier with them than with us in the general, they pay, says my author, excise for every thing they eat, drink, use, or enjoy.

§ Observations on the United Provinces.

The impost upon all corn ground in the mills of Holland, which every body pays without exception, amounts to 51. 5s. per quarter of wheat, to half as much for rye, to 35s. for barley and oats: in a word, it is generally computed there, that the duty on all bread-corn is equal to the prime cost. The excise on beer is as follows: first, the brewer pays 12d. a barrel, private families pay 20d. more, and victuallers, or retailers, pay another 20d. French wines pay 6d. a floop, other wines twice as much. Butter pays 6s. a barrel, tobacco 10d. a pound, fish 20d. a panner, and soap 11s. a barrel. Every horse above three years old pays 2d. a month; every horned beast above that age 3d. a month. Every coach pays 10s. a year, and every little bark 20d. All cattle, sheep, or hogs, that are killed, pay one penny in seven of the money they are sold for. All wood made use of for fuel, pays one penny in eight of what it costs. Every master pays 20d. a head yearly for each servant that he has in his family, male.

male or female. All ships, lands, and houses, that are sold by one man to another, pay to the government a fortieth penny of what they are sold for: hangings and household-stuff pay one penny in nine, and woollen cloths a fourth part of their value. In one word, the Dutch pay excise for salt, candles, lead, lime, coals, stone; there is not a turf or log of wood in their chimnies, not an herb or onion in their gardens, but what pays a duty, more or less, to the States. Our author assures us, that a cow of nine years old, if it be sold for 5*l.* will pay above 6*l.* to the States; and that there is never a dish comes to table but has paid excise above twenty times.

These are the impositions that our neighbours are subject to in times of peace, which, in war, are raised to a degree hardly to be believed: at such times, land and houses have paid 20 or 21*s.* in the pound of their intrinsic value.

To such a degree are these our friendly provinces taxed, that they are under the necessity to lay impositions even upon the dead: but these, indeed, may be termed voluntary benevolence; for from noon 'till two o'clock you may bury your dead, without paying any other costs than only the charges of the burial: but they who bury half an hour after two are obliged to pay a forfeiture of 100 fous, which doubles every half-hour: for example; at three o'clock the forfeiture is 10*l.*; at four, 20; at five, 40; at six, 80; at seven, 160; at eight, 320; and at nine, 640; which is the highest, for after that hour no body is permitted to bury.

The reader may be apt to ask, perchance, how it is possible for people to bear up under such heavy pressures, such loads, that even the English would certainly sink under? To this it is answered, That their extraordinary industry and parsimony enables them to support such prodigious taxes. A burgher of Amsterdam will dine contentedly on a red herring, when a citizen of London, of the same condition, will scorn to sit down to table without a furlow of beef or a couple of capons before him. Sir William Temple again tells us, that 'it is a common rule among them, for every man to spend less than what he has coming in, be that what it will; and that, if a man's expence equals his revenues, it discredits a man among them, as much as any vicious or prodigal extravagance does in other countries: so that frugality is become honourable amongst them.'

Another thing that reconciles them to these excessive impositions, is that confidence which they have, that their money is laid out for the good of the community. The salary of a burgomaster of Amsterdam is but 500 guilders a year, which amounts not to 50*l.* sterling: nor was it ever known that they who have the disposal of offices in that republic, took any money on that occasion. The prime ministers of state are obliged to no sort of expence more than ordinary modest citizens, in their habits, their attendants, their tables, or any part of their domestic affairs. Sir William never saw the two greatest officers belonging to their state, the vice-admiral DE RUYTER, and the pensioner DE WIT, with above one servant a piece in their train, but most usually on foot, and alone in the streets, like common burghers: and this was the general fashion among all the magistrates. This has made the people part cheerfully with their money, when it is not made use of to fill the coffers, or maintain the pompous equipages, of the servants of the public.

Upon the whole, when we reflect upon the small extent of this republic, their maintaining more men considerably than we have done, at an average, during the three great wars, in comparison to the extent of their territories, &c. with those heavy taxes which they submit to, we cannot doubt but they are the bravest people in the world; and it is certain that they have made the most prodigious efforts for the common liberties of Europe, that ever any state of the like dimensions did: and do they not deserve our utmost aid and assistance, when needful, as well as our praises and encomiums?

Another art practised by the French interest in this kingdom, to divide England and Holland, is the malevolent insinuation, That, in times of war in Flanders, the DUTCH in particular have drained us of our money. We cannot disallow but, on these occasions, a great deal of gold and silver have been exported to pay our armies in Flanders, though nothing comparable to the clamour that has been raised about it; but this could by no means be avoided in carrying on the wars, which have been always absolutely necessary in the defence of both states, since a tolerable understanding has happily subsisted between them. But in regard to this matter the case is plainly thus; we must, on these unhappy occasions, spare some of our money, or lose all our lands. However, it should be observed, by those who would know the truth of things, that the armies have, for the most part, been paid by bills drawn on merchants in Amsterdam, and other places: and the Dutch purchasing of us many hundred thousand pounds worth of British manufactures every year, brings back the money again

§ Holland takes from England, broad cloths, druggets, long-cells, stuffs of a great many sorts, leather, corn, coals, and something of almost every thing that this kingdom produces; besides all sorts of India and Turkey re-exported goods, sugars, tobacco, rice, ginger, pitch, and tar, and sundry

other commodities of the produce of our plantations. England imports from Holland, fine Holland linens, threads, tapes, and incles; whale fins, brass battery, madder, argol, toys, clapboard; waincoat, &c.

that has been exported on those occasions: that is to say, The balance of our trade by means of Holland, has far more than compensated for the occasional expences upon the continent, which our mutual safety seems to have rendered necessary. And, perhaps, upon due examination it will be found, that after those wars, and the expences among all the contending parties have run high in Flanders, the trade of England with Holland, Flanders, Germany, &c. has been temporarily augmented, in proportion to the money spent by England on those military achievements.

It would, without doubt, be better for both states, provided they could contend with the enemy wholly in a maritime way, upon the supposition that they could supply themselves with all-ships and naval stores for the purpose, because such expences would circulate and center within themselves. But while France is able to support such formidable armies, and their territories so adjacent to the United Provinces, it is to be feared that the exertion of the maritime strength of England and Holland alone will not all times absolutely prevent a war upon the continent; for it should seem, that while the affairs of France are so circumstanced to enable them to uphold so great a military force, England and Holland, in conjunction with the house of Austria, and such other allies as can be brought into their measures, must somehow have a land force capable of looking France in the face, and stopping the progress of her arms.

That it is not in the power of the Dutch alone to do this, has been apparent beyond all doubt*. Nothing can effectually do this but another GRAND ALLIANCE; and England must, for her own security, contribute to a part of the military expence; and this may be more eligible, perhaps, than to send our soldiery abroad on these occasions, as has hitherto been our practice. There is, indeed, some doubt to be made in relation to the repose of confidence in allies and confederates, when they do not fight, as well as act, in concert: however, experience has shewn what troops and what general officers are to be trusted, when the cause of Great-Britain is at stake, although some people are too backward in our giving assistance to the Hanoverians, notwithstanding they are our natural ally, and have behaved gallantly in the common cause of England and Holland, notwithstanding they should be drawn into quarrels upon our account. And if the exigency of public affairs should require Great-Britain to take into her pay any troops to serve in Flanders against France, conjunctively with other confederates, will it not prove advisable to put confidence in our tried, trusty, and natural friends and allies, the HANOVERIANS, who are subjects of the same sovereign? It has been said too, That if a war should break out, his Britannic Majesty, as Elector of Hanover, will augment his troops; if so, ought not this to prove a further inducement to us to take an additional body of these troops into British pay?

* If we consider France and Holland, as to the extent of their dominions, the Dutch can make no head. If we will consider the length and breadth of each province in the United Netherlands, and then multiply one by the other, we may know how many square miles there are in the whole, and see what proportion this bears to the kingdom of France.

	Square Miles.
Holland is computed 80 miles long, 40 broad, making	3200
Zealand, 30 long, 17 broad	510
Utrecht, 30 long, 25 broad	750
Gelderland and Zutphen, 50 long, 48 broad	2400
Overijssel, 60 long, 40 broad	2400
Groningen, 46 long, 24 broad	1104
West Friesland, 40 long, 25 broad	1000
Dutch Brabant, 55 long, 31 broad	1705
Dutch Flanders, 31 long, 13 broad	403

So that the whole comprehends, of square miles 13472

These are all the dominions the States-General have in Europe, except two or three scattering towns, which have no territories belonging to them worth regarding. Let us next see the dimensions of the kingdom of France. France is computed to be, in length and breadth, 200 leagues, or 600 miles. This number, multiplied by itself, produces 360,000 square miles. Now if you divide 360,000 by 13,472, the quotient is 27: so that the kingdom of France is 27 times bigger than all the territories possessed by the Dutch. If it be objected, That France is not in all places 600 miles broad, the same may be said of each of the United Provinces. Thus we have reckoned Holland 40 miles broad, when in many places it is not above 25; and you can consult no map, in which the disproportion between the two states will not appear greater than I have represented it. I confess, were France like the parched deserts of Arabia, or the frozen lakes of Lapland, a wild uncultivated wilderness, our argument would conclude very little; but France is a populous country, full of great towns and villages, and a rich and fruitful soil, containing above 36,441 parishes, above

above three times as many as there are in England and Scotland; nor has the greatest city in Holland half so many inhabitants as that of Paris: so that you may as well suppose that a goat should swallow a camel, as that the Dutch republic should devour the French monarchy, or alone make any head against that nation.

We will next consider the revenues of these two states, which are not improperly stiled, the nerves and sinews of war. Sir William Temple informs us, that, in his time, the revenue of the Seven Provinces amounted commonly to 21 millions of gilders, which is something less than two millions sterling. It is true, in time of war, they have raised five millions; but this is little, compared to what the grand monarch collects within his spacious territories; his revenues, in 1695, amounted to more than 15 millions and a half of our money; and they have increased very considerably since that time. Of the number of their forces we have taken notice before.

It has been urged by some, That the whole empire is concerned to keep the UNITED NETHERLANDS out of the hands of FRANCE; and why should we be at any expence for them? This is certainly the interest of his Imperial Majesty, nor is any question to be made, but he will do all that he is able, to prevent so great a mischief to his family: but then the emperor may be involved against the Turks, &c. and so not able to help them, at least not to any effectual purpose. The German princes may be quarrelling one with another; or some of them may be bribed to take part with FRANCE against their own country, which has too often been the case of these perfidious princes. This was actually the case of the DUTCH, in 1672, when their two neighbours, the bishops of COLOGNE and MUNSTER, joined with the FRENCH in invading their dominions, and that with such success, that their deliverance from utter ruin was next to a miracle. These things considered, I hope it will be allowed by all true friends to the PROTESTANT INTEREST, that we did not, in our late wars, fight barely for the DUTCH, but for our OWN security, as well as theirs.

Notwithstanding the unhappy differences which heretofore, by the machinations of the common enemy, subsisted between England and Holland, and by means whereof France first raised their naval power; yet I cannot but look upon these misunderstandings as fatal to both states, as even civil wars would be in the hearts of their nations; because I cannot but look upon them in the light of ONE and the SAME PEOPLE, and that every measure ought to be pursued by both, to render their reciprocal interests compatible in every respect; so that they may be jointly and harmoniously enabled to extend their COMMERCIAL interests, and their MARITIME strength, in perfect concert and unanimity, in order to curb the growing formidable power of those who will ever be perfidious enough to attempt the destruction of both.

Another prepossession which the common enemy studiously endeavours to raise among us against this state, is their form of government, which is republican, and therefore cannot so well accord with ours, that is monarchical. Have we any reason to be angry with them on this account? Friends to this constitution must determine in the negative, when it is considered that their casting themselves into such a model was the effect not of choice, but absolute necessity.

It is not consistent with our brevity to enter into a detail of the rise, progress, and conclusion of the Low-Country wars; let it suffice to observe for the present occasion, that the United Provinces were once subject to the king of Spain:—That the invasion of their civil liberties, and the inhuman cruelties which those of the reformed religion suffered, provoked the distressed inhabitants to take up arms in their own defence, and to withstand those instruments of cruelty that were made use of to oppress them.—After many tumults and confusions, there was a convention of the estates at Antwerp, in the year 1581, in which it was determined, That Philip king of Spain, by invading their privileges, and overthrowing their constitution, had forfeited his right to govern those provinces, &c. and the throne was become vacant.—But, instead of moulding themselves into a commonwealth, they, at the same time, elected the DUKE of ALENÇON, younger brother to the king of France, to be their sovereign §. This prince accepted their invitation; but being influenced more by humour and caprice than by the maxims of policy and wisdom, he quickly lost the affections of his new subjects.—When he perceived this, he retired into France, and quickly after died there. The provinces being once more without a supreme governor, they offer next to transfer their allegiance to our renowned QUEEN ELIZABETH †. She refused, indeed, to accept of this proposal, but afforded them a very generous assistance, and continued their friend and patroness to the day of her death. Whence we may discern, that when the DUTCH formed themselves at first into a commonwealth, it was because they could not obtain a KING or QUEEN of their own, who was able and willing to protect them; and their erecting a republic was a matter rather of necessity than

§ Vide Stradam de Bello Belgico. Bentivoglio's Hist. of Flanders.

† Camden's Hist. of Queen Elizabeth.

choice. This seems plainly to demonstrate, that men may be born and bred in a commonwealth, and under government as anti-monarchical as Holland may appear to be; and yet the wisest part of the state may be zealous friends to a limited monarchy, especially such an one as that of Great-Britain, because there is no other nation that has the same constitution that we have, nor so well adapted to the happiness of the people.

Nor ought the religion of the Dutch, which is Presbyterian, to give either of the nations a prejudice against each other: the Dutch never attempted to obtrude their model upon us; they do not look upon their particular discipline as absolutely necessary to salvation, nor do they condemn those that differ from them; they look upon the church of England as a sister church, and pay a due regard to her. An instance or two may be necessary to intimate, in order to what may be touched on in the sequel.

In the reign of king James I. when the peace of their provinces was very much disturbed, by the Arminian controversies, they sent to the king, desiring that some of our British divines might be permitted to come over, and consult with those of other reformed churches, in order to compose those unhappy differences. Accordingly, the then bishop of Landaff, with the doctors Davenant and Hall, afterwards bishops of Sarum and Exeter, were sent over by the said prince, with other eminent men §. These met with the divines of Holland and Germany, at the famous synod of Dort, where they gave their suffrages with the rest. So that the churches of England and Holland looked upon each other as members of the same body; nor have the latter, to this very day, receded from that charitable temper.

§ Vide Acta Synodi Dordrecht. pag. 10.

When the established church of England was really in danger, under the administration of king James II. when her bishops were imprisoned; when an illegal commission was set up, prepared to execute the vengeance of enraged Papists upon all the clergy in the kingdom; in that distress, did we not implore the assistance of the DUTCH? Were they not the instruments (under God) of rescuing our ecclesiastical and civil liberties, whilst the FRENCH offered their troops to enslave us? Before I leave this matter, it may not be improper to mention one or two instances more of the respect which is shewn in Holland to our Common Prayer. The Dutch consented to the erecting of a stately church in Rotterdam, in which the English Liturgy is read to such British merchants and traders as reside in that town. When the bishop of Bristol arrived at Utrecht, as her Majesty queen Anne's plenipotentiary at that peace, the state offered his lordship the use of one of their public churches in that city, for the celebration of divine service, according to the right and usage of the church of England: was not this paying a great deference to those forms of devotion used by his lordship?

We have not room to enter into the nature of the civil constitution and stadtholdership of this state, and to compare it with that of England: which if we were to do, it would be easily discernable that the constitution of Great-Britain is infinitely preferable, as being better calculated for the preservation of liberty and property, and the extension and enlargement of the commercial interests of a maritime nation. True it is, that the United Provinces have splendidly and gallantly figured it under their stadtholders; but if they had been governed, since their shaking off the Spanish yoke, by monarchs, limited as those of Great-Britain are in all respects; if, in a word, the constitution of the UNITED PROVINCES was modelled upon the plan of that of this kingdom; it would, in all human appearance, have increased the trading interests and glory of that state, to a degree far superior to what it ever was, and have established the same upon such a foundation, as would have contributed unspeakably more to the preservation of the Protestant and the commercial interests both of Great-Britain and the United Provinces, than a difference in constitution has done; provided that one and the same sovereign had governed both powers, and that a stadtholder was only a viceroy, deputed from the crown of England, as the Earl of Leicester was in our queen Elizabeth's time, or as a lord lieutenant of Ireland now is. And what hinders but this may one day be the case?

We have seen from a very brief comparison of the essential particulars relating to both states, that these provinces have no aversion to our monarchical government: on the contrary, they have frequently manifested a high regard to the British constitution in general; and they, as well as we, have experienced the ill consequences of the interest of both states not being bottomed and cemented upon the principles of an inseparable union, as well with regard to trade and navigation, as to every other material point.

That I may not be misunderstood upon this occasion, the candid reader is desired to observe, that all that is here meant and intended is, that if the DUTCH should ever think proper to agree to adopt the constitution of England, and make her sovereign their sovereign, they should possess and enjoy all the privileges of commerce and navigation as Englishmen, without

without any restriction whatsoever: for although we have compared a stadtholder, or viceroy, deputed from the crown of Great-Britain, to a lord lieutenant of Ireland; yet it is not thereby intended to insinuate that, in such case, the Dutch ought to lie under any restraints of trade whatsoever, as the Irish do, which is what also we disapprove, as well in regard to Ireland, as we should do in regard to Holland, if any such happy union could ever be brought about. And what would be the consequence hereof to both nations, we have briefly shewn under our article *TRADE*, to which we refer the reader.

But if England and Holland should never judge it advisable to become one nation, and governed by one and the same constitution, the next best thing to be done, for the mutual security and interest of both, seems to be, to cement the strictest union between them that can be upon all other occasions. Nor can any thing more apparently evince the necessity hereof, than the surprizes to which they are both liable, from the machinations of France, their common enemy. This we have repeatedly experienced, to the unspeakable loss of the blood and treasure of both; and this we are likely too soon to experience again: and, therefore, does it not become the duty of the wise and honest men, and those in authority in both nations, to think seriously and expeditiously upon the best measures to secure and preserve themselves from those imminent dangers to which they are both liable by their disunion? For however sanguine some may be, that our security may be sufficiently provided for by our fleet, (which, indeed, is in a condition that gives glory to the nation) yet do we not know, that when the fleet of Holland was almost as powerful as our own now is, and theirs and ours were united, they with difficulty withstood the common enemy? It is a very fond opinion to imagine that we, who, in conjunction with Holland, have heretofore been insulted on our own coast by the fleets of France, and another time had probably been ruined by them, had not the heavens been favourable to us, should be able, without the assistance of the like degree of ma-

ritime strength, to secure us from a power so exorbitant as that of France and Spain may be in conjunction. The security of England and Holland does undoubtedly chiefly depend upon a powerful fleet; but does it not become the wisdom of both to be certain of that degree of naval power that will overmatch and defeat that of our enemies which may be united against us? But without the Dutch will instantly exert their maritime strength, and act zealously in concert with Great-Britain, we do not seem to have that degree of maritime strength, ready to act for the effectual security of both states. We have been repeatedly informed that the Spaniards have actually made, or apparently intend, an attempt on the Dutch colonies of *ISEQUEBE* and *BERBICE*, which are greatly assitant to our sugar colonies of Barbadoes and St Christopher's, in supplying them with timber for their sugar-works, of which it seems they must be deprived, if those colonies fall into Spanish hands: and if the French also get possession of the *NEUTRAL ISLANDS*, those sugar colonies must be greatly hurt, if not absolutely ruined and undone, for want of those needful supplies. If it should prove matter of fact that the Spaniards have made, or soon intend to make, such an attempt on those Dutch colonies, under the pretext of preventing illicit commerce with the Spanish colonies, does not this look with an aspect that Spain intends the like insults and encroachments on the Dutch, as they have shewed to us in our logwood settlements, from whence, it seems, they have quite extirpated the British logwood-cutters? Does not such conduct in the Spaniards appear too significantly declarative, that they intend as little good towards England and Holland, as France does? Do not these things seem to forebode a conjunction between France and Spain, that we both ought instantly to guard against by proper alliances, and by the due exertion of our maritime, as well as military strength? And as this nation has at present a very able and vigilant minister in Holland, we have good reason to expect as happy success from his negotiations *ABROAD*, as we have from the wisdom and councils of his honourable family at *HOME*.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE, continued from the End of Letter T.

UNION OF ENGLAND AND SCOTLAND.—After the 1st of May, 1707, united into one kingdom, by the name of Great-Britain (art. 1.) 5 Ann. cap. 8. §. 1.—All the subjects to have full freedom and intercourse of trade and navigation, within all the dominions thereunto belonging (art. 4.) ditto act of parliament.—All ports of the united kingdom to be under the same *LAWs* and *RÉGULATIONS* of *TRADE*, liable to the same *CUSTOMS* and *DUTIES*, entitled to the same *ALLOWANCES* and *DRAWBACKS* as in England; except the exemption of private rights. 5 Ann. cap. 8. (art. 6, 7, 14, 18.) 6 Ann. cap. 26. §. 17. But after the Union, an equivalent was to be paid by England to Scotland for the improvement of the duties; to be ap-

plied towards satisfying private losses by the reduction of the coin, and to the payment of the capital stock and interest of the African and Indian company of Scotland; and the overplus towards the public debts of Scotland, and the encouragement of the fisheries, and other manufactures and improvements; which said equivalent was to be under the management of particular commissioners: but in lieu and full discharge of such equivalent, after the 24th of June, 1719; there was established one yearly fund of 10,000 l. and one other, of 2000 l. payable out of the revenue of custom, excise, &c. arising in Scotland, by the respective commissioners. 5 Ann. c. 8. §. 1. 6 Ann. c. 24. §. 1. 5 Geo. I. c. 20. §. 1, 14, 18.

W.

W A R

As this article stood in our former editions, begun in the year 1751, when France seemed again to be meditating a fresh war, soon after the treaty of peace concluded at Aix-la-Chapelle in the year 1748.

WA R. If Great-Britain should enter into a war in the present conjuncture of affairs, we have endeavoured to demonstrate, throughout this work, that she is compelled so to do for the defence of her rightful TRADE and POSSESSIONS, and not from any unjustifiable motives, or attempts made upon the commerce or possessions of any other nation. 'A man may be forced to kill another, in his own necessary self-defence, and then the sin is not in the slayer, but in him that is slain for in all cases of force, not he who is compelled to strike the stroke, but he who is the cause of the evil, bears the whole guilt. If a thief be found breaking, say our sacred oracles, and be smitten that he die, there shall no blood be shed for him. For the same reason, enemies may be slain in a just and necessary war: and it is no crime, but an honour to be successful in destroying them: but WARS of mere AMBITION are direct MURDERS.' See Dr Samuel Clarke's Works.

Some PRINCIPLES relating to the CONDUCT of WAR.

I. To deal with murderers of this kind then, it is not necessary only to be in a capacity to protect our trade and commerce, our possessions and our liberties, for the present, but we must endeavour to put it for ever out of the power of a perfidious nation to injure us again. See the article PLANTATIONS [REMARKS thereon], shewing the detestable perfidy of France for above a century past.

II. Nothing can effectuate this but the due exertion of our NAVAL POWER, as well MERCANTILE AS ROYAL, to destroy their trade and navigation, which is the great source of their treasure and strength. See our articles NAVAL AFFAIRS, SEA DOMINION, SEA BRITISH, SEAMEN.

III. If we suffer their trade and navigation, and, consequently, their maritime strength, to grow to a greater pitch, and do not put a stop to that career of splendor and power which they aim at, we shall be no longer a nation: vassalage and slavery must be the inevitable doom of Britons.

IV. To defend ourselves against any invasion, we must have a competent number of land forces; nor should we be destitute of a well-regulated and DISCIPLINED MILITIA, to contribute to the defence of our extended sea-coasts; for our fleets alone may not always be capable to prevent the landing of the enemy.

V. Left our own force should not be amply sufficient to put it out of the power of the enemy to disturb our peace, and distract Europe again, the most powerful alliances, both OFFENSIVE and DEFENSIVE, should be entered into that can be, with such powers whose interest it will be, as well as ours, to destroy the ENEMY'S TRADE AND NAVIGATION, and to TAKE AND DIVIDE THEIR MOST VALUABLE TRADING POSSESSIONS AMONGST US, ACCORDING TO THE DEGREE OF STRENGTH WHICH THE CONFEDERATES SHALL CONTRIBUTE TO THAT END, AND THE SUCCESS THAT SHALL ATTEND THEM. See UNITED PROVINCES, FLANDERS, HOLLAND.

VI. If the MARINE of HOLLAND could be raised equal to that of GREAT-BRITAIN, their united royal navies, together with their mercantile maritime strength, would certainly prove sufficient to answer this great end in the four parts of the world. See our article UNITED PROVINCES.

VII. If the UNITED PROVINCES cannot be brought, or are not able, perhaps, to raise their marine and their military force to the height desired, and to act vigorously, in concert with Great-Britain, as one nation, Great-Britain must do the next best thing that she is able: she must make such alliances as will afford her the greatest addition of MARITIME STRENGTH; and, if needful, she must not be backward in aiding, with her purse, such confederacies on the continent as may prevent the French from over-running the United Provinces; for as the interest of Great-Britain and those provinces are inseparable, as we have endeavoured to shew under the article UNITED PROVINCES, it will be impolitic

W A R

for us to trust their whole security and protection to any other power or powers, without contributing any thing thereto. Besides, there may be other powers besides France, that might be glad to possess themselves of this republic, and who might not prove less detrimental to the trade and navigation of Great-Britain, than France would be, if the United Provinces were annexed to that crown.

VIII. If the United Provinces are reduced to so low an ebb, that they are rendered incapable of exerting themselves against France, in concert with Great-Britain, as they have heretofore done, it will nevertheless be for the interest of England to enter into an alliance with them, both OFFENSIVE and DEFENSIVE; and England must, for her own safety, do all in her power to preserve Holland from destruction: for if England enters into such alliances with the United Provinces as will make their INTERESTS ONE, and if they both zealously exert their maritime power, and ruin a great part of the French trade and navigation, and POSSESS THEMSELVES OF THE SAME, this will make them both an ample compensation for the expence of SUCH A WAR: and SUCH A WAR AS WILL RUIN THE TRADE AND NAVIGATION OF FRANCE, AND ADVANTAGE THAT OF GREAT-BRITAIN AND THE UNITED PROVINCES MUTUALLY, is the ONLY WAR that those powers ought chiefly to prosecute.

IX. The Dutch can never be so poor, as a state, but they are able still to lend themselves many millions, and are still able so to exert their maritime strength, in conjunction with England, as to destroy a great part of the French commerce and navigation, and to draw the same into their own scale: wherefore it must be very desirable to the well-wishers of both states, that such offensive and defensive alliances are instantly entered into, that may for ever secure the possessions of both, and so enlarge and extend the trade and navigation of both, as to give and preserve to them the dominion of the seas: for, without this, England and Holland will be no more, and Britons and Dutchmen must tamely submit to the French yoke.

X. So happy an union between Great-Britain and the United Provinces, would soon raise the maritime power, and the trade and navigation of both states, to what pitch they pleased; for if they jointly exert themselves, upon the coast of Africa, the French might soon be extirpated from all commerce in that part of the world, because the Dutch and the English united there, are now stronger than all the other powers who have settlements in that part of the world; [see ENGLISH AFRICAN COMPANY, and DUTCH AFRICAN COMPANY;] and if the English and Dutch destroy the French AFRICAN TRADE, and possess themselves of their settlements for ever, will not this prevent that nation from supplying their sugar-islands with negro-slaves? and what then will become of their sugar-colonies? which, as they have proved the means of greatly extending the commerce of that nation, it is to be hoped that Great-Britain and Holland will have a watchful eye upon them; for if these were in ENGLISH AND DUTCH hands, and proper TREATIES OF COMMERCE were entered into between those two powers, in relation to their trading acquisitions, they would enjoy the SUGAR-TRADE OF THE WHOLE WORLD; and this, and their African commerce, would amply recompense them for the expence of a war of some years.

XI. Upon so happy a maritime and commercial union of interests between England and Holland, how long could the French figure it in Asia? Would not the united power of the Dutch and English in the East-Indies, soon lower the crest of France also in that part of the world?

XII. If once Great-Britain and Holland possessed themselves of the FRENCH AFRICAN SETTLEMENTS, and their SUGAR ISLANDS, this would give a great blow to the French commerce between Canada and those islands, and increase that between the British northern colonies and those islands.

XIII. In regard to the British affairs in North-America, we have urged that point largely, from the beginning to the conclusion of this work; but as every thing that throws a new light upon a matter of this high concernment to the nation, may have its use, I shall cite a late ingenious writer upon this occasion*.

* See the State of the British and French Colonies in North-America, &c. In two letters to a friend.

• If we would secure, says that gentleman, our American dominions against the French, we must **OUT-FORT** them, as well as **OUT-SETTLE** them. Our colonies are in a worse condition by far than is generally believed, or can well be conceived, unable to hurt their invaders, or defend themselves, while the French have **FORTS** every where, and we have **FORTS**, in a manner, no where.

The number of forts necessary to be built for securing the colonies, must be estimated by the number of forts already built by the French on our frontiers, and the places proper for fortifying, which they have left unoccupied, which are indeed very few, so industrious they have been to anticipate us in an article of such infinite concern to our plantations.

As the country of the **OHIO** is in so much danger of being wrested from us, and its being well secured of so much importance to all the colonies in general, north, south, and middle, as hath been already set forth; if ever it comes into our hands again, it ought to be well fortified, by building forts in convenient places, along the river, especially at each extremity; that is, one at the mouth of the **OHIO**, on the **MISSISSIPPI**, and another at **NIAGRA**, near the lake **ONTARIO**: this last will prevent the communication of **LOUISIANA** with **CANADA**, by that lake and the lake **ERIE**, and oblige the French to abandon their forts on the south-east side of this last lake, by rendering them useless, as well as save us the expence of erecting a fort at **TIERONDOGNAT**, on the lake of **ONTARIO**, about 60 miles to the east of the **NIAGRA** freight: a place which they have long had their eye upon for building a fort, and which we might be under a necessity of fortifying, in case the French remain at **NIAGRA**, in order to prevent their taking possession of it, as they did once already, in 1687, although it was but for a short time: and this, doubtless, was the reason which made governor Clarke of New York so earnest to have that place fortified.

In effect, a French fort there would prove no less dangerous to **NEW YORK**, than that at **CROWN POINT**, as it would give them admission into the country of the **SENNEKAS**, the most powerful of the **SIX NATIONS**, among whom they have already gotten some footing, by means of the **NIAGRA** fort, and their priests; and whose defection, considering their influence, might be a means of our losing the friendship of the other five.

The fort at the mouth of the **OHIO** ought to be strongly built and garrisoned, and a considerable settlement made about it: after, this settlement might be gradually carried on, between the **MISSISSIPPI**, and the **ALLIGANEY** mountains, backwards and forwards at the same time. Nor can too much encouragement be given to settle this country, especially on the side of the **MISSISSIPPI**, as quick as possible, by allowing people liberty to settle how and where they please, without making large grants to any company; an obstacle which has hindered settling more than any other thing, and, on many accounts, proved greatly detrimental to the colonies, by raising the price of land to an exorbitant degree; which, besides the dangerous evil of enriching a few, and impoverishing many, has been attended with one still more pernicious, that is, of weakening the colonies, by leaving near **HALF OF SOME OF THEM UNPEOPLED**.

This fort and settlement would effectually exclude the French from passing into the western parts of **Virginia**, by the **Ohio** and its branches: but as they have two forts on the **WABASH**, one at its mouth on the **OHIO**, and another about the middle of that river, it would be proper to have two others built, in opposition to them: the second, in the part where it draws near the river of the **LOUISIANA**, or **CHIKTAGHIS**. Should we go a little farther, and erect another on this last river, in the neighbourhood of the former, it would entirely cut off their communication this way, between **LOUISIANA** and **CANADA**, and oblige them to go so far about, as to discourage them, with all their sanguine views and perseverance, from ever hoping to compass their so-much-desired project of joining their two colonies on this side of the **Mississippi**.

The country to the south of the **OHIO** would be in good measure secured, by the fort built at the mouth of it, which will hinder their passage into the **HOGHEGE**, or river of the **CHEROKEES**, dividing the country of these Indians on the north from **VIRGINIA**. However, more effectually to secure it, and, at the same time, cover the country of the **CHEROKEES**, it would be proper to build one at the **FALLS**, a little below the place where the **PELESPI**, or **CLINCHES** river joins it, in the north-west borders of the **CHEROKEES**; and another especially in the heart of the country possessed by those people, who have long applied with great earnestness to the governor of **CAROLINA** for that purpose, representing the danger which otherwise there was of the French doing the same; and it is well if, through this unpardonable neglect, the French, in case they should be forced out of the back parts of **VIRGINIA**, [see **VIRGINIA**] do not, in their return to **NEW ORLEANS**, put that design in execution: as to be sure they will, in case they keep possession of what they have already usurped, in order to prevent any attempts on our side to secure that country to us. By a like pernicious remissness, or something else, were they suffered, since the

year 1715, to build the fort **TOULOUSE**, on the river **ALLIBAMOUS**, not far from the country of the **CREEK INDIANS**, and the borders of **GEORGIA**; which frontier, though not yet sufficiently fortified, has balked their views of carrying on their **CHAIN OF FORTS**, on that side, to the Atlantic Ocean, which, before that colony was founded, they thought themselves sure of effecting, whenever they pleased, and, therefore, made the less haste to accomplish it.

These **FORTS** might serve, at present, to fortify the southern provinces of our American dominions. With regard to our northern, the first thing that demands our attention is the security of **NEW YORK**, and its **PROVINCE**. This will be, in good measure, done by the **FORT** to be built at **NIAGRA**, and that already built at **OSWEGO**, in the country of the **SIX NATIONS**, at the south-east end of the lake **KADARAKAI**, or on **ONTARIO**, almost due south of the **FRENCH** fort of **FRONTENAC**, on the north-east corner of the same lake, about 70 miles distant. But this fort, which is the only one we have for defence of our back settlements for many hundred miles, 'till we come to **GEORGIA**, ought to be much enlarged, strongly fortified, and furnished with a pretty numerous garrison, and is of great consequence, by its situation, to both the security and trade of our northern colonies, it being our north-western frontier, and the only place, or opening left, by which the Indians can come to us with their furs. For this reason, 'till such time as our neighbours shall be obliged to allow them a free passage through the **LAKES**, it will be necessary to build a vessel or two, capable of mounting guns for the convenience of carrying them backwards and forwards, across the lake; which expedient will go a great way to frustrate the design of the French, and recover our trade.

And here it is worth observing, that this fort of **OSWEGO**, built by governor Burnet in 1727, by favour of the Indians, stood unmolested all the last war; and although the garrison usually consists of no more than an officer and 23 men, has been of more service and benefit than all the rest, although now it must be in imminent danger. This is a demonstrative proof of the great importance and advantage of such **FORTS**, on the number of which and small garrisons, properly placed, the interest and support of the French almost wholly depend.

However, more effectually to secure **NEW YORK**, a strong **FORT** ought to be built in view of the French **FORT** at **CROWN POINT**. By means of this post, they may be enabled to intercept, or at least disturb, the trade from **ALBANY** up to the **MOHOK's** river, a branch of **HUDSON's**, to the **SIX NATIONS**, by sending a force on that side; and could they destroy the commerce of these Indians with the province of **NEW YORK**, they would oblige them to depend wholly on **CANADA**, a thing which they threatened to have done in 1732.

During the late French war, from 1744 to 1748, **CROWN POINT** was the rendezvous of the **CANADA** French and their Indians, from whence they attacked **NEW YORK**, and the north-west corner of **MASSACHUSETTS BAY**. From this place, in 1745, they destroyed **SARATOGA** settlement, on **Hudson's** river, about 30 miles above **ALBANY**: in which parts, during that and the two following years, they killed and captivated above 300 of our people*, destroying most of the inhabitants and plantations on the north-east branch of that river. In former wars, the attack on **NEW ENGLAND** was from the north-eastward; in the war of 1746, it was from **Crown Point**. **NEW YORK** government, in former French wars, did not suffer, but in this last they suffered most †; that is, they were punished for suffering that fort to be built. Besides building this counter fort, **ALBANY** ought to be put in the best posture of defence imaginable, in order to secure it against any attempts on that side. This quarter requires the strongest barriers, because the French have declared it to be the chief object of their views; and it lies so near **QUEBEC**, the center of all their strength in **CANADA**, from which they have a most convenient passage all by water, excepting a small space of about 12 miles by land.

* Douglas's Summary of North America, vol. ii. p. 246.

† Ibid. vol. i. p. 316.

Monf. Callieres, who first proposed the project for the conquest of this city, to induce **Lewis XIV.**, to comply with his desire, says, in his Memoirs to the French ministers, 'That this conquest would make the king master of one of the finest ports in **AMERICA**, which they might enter at all times, and a most beautiful country, in a mild and fertile climate!' No wonder so inviting a description as this should set the French at **Canada** longing for **NEW YORK**: but ought not that longing of theirs to make us more earnest to preserve it?

By these fortifications, **NEW ENGLAND** will be pretty well secured on the west side, as it will on the east by those already built, and the two now building on the river **KENNEBECK**, one by the province, the other by the proprietors of the **KENNEBECK** purchase; whose generous example, it is hoped, will animate others to do the like, and not let them stop

stop, 'till they have erected a fortress on the very banks of ST LAURENCE RIVER, which is within their limits. Mean time, as the last of the two forts has been founded so high as the TAKONNEK FALLS, and the north part of New England lies wholly exposed to the ravages of an enemy, it is not doubted but that they will not delay to build a third, at the head of the KENNEBECK itself in the Carrying-Place, not above four miles over, where it locks with the river called by the French LA CHAUDIERE, which falls into the ST LAURENCE, four or five leagues to the south-west of QUEBEC. This fort should be strongly built, and furnished from Britain with a garrison of 500 stout men: unless this be done, the building those two forts will only serve to put the French in mind of doing it. And from their conduct it may be judged, that a small occasion would serve them for a pretence.

The building a fort here is the more necessary on three accounts; (1.) As it will bridle the AENAKKI INDIANS, in the interest of the French, and hinder them from ever attempting any thing against NEW ENGLAND, this having always been the place of rendezvous for both, on such occasions. It will also prevent their going on the OHIO expedition; and those restraints, by degrees, be a means of their coming over to our interest. (2.) As it lies near the heads of the rivers St Francis and St John, as well as of the Kennebeck and La Chaudiere, before mentioned; so that it will have the command of four very important rivers, two of which fall into the St Lawrence, the Chaudiere towards Quebec, and the St Francis towards Montreal. (3.) As it will help to cover not only the northern borders of New England, but also those of New York, from which it will not be far distant. I may venture to say, that the good effect of this fort will extend as far as ANNAPOLIS ROYAL, and the town of HALIFAX in NOVA SCOTIA, by cutting off all supplies of men and stores to the French in that country, by ST JOHN'S RIVER, which will oblige them to abandon their forts lately built at the mouth of it. The KENNEBECK company, in full expectation of this desirable event, have already given land to 100 men, and their families, to settle the country thereabout, under protection of the two forts newly built upon that river.

How different is the practice of some colonies, to this generous public-spirited conduct of the KENNEBECK proprietors! The assembly of NEW YORK, in their address to governor De Lancey, the 20th of August last, complains, 'That other colonies make themselves strong and defensible, by settling in townships, or some other close order, while our frontier lands are granted away in patents almost without bounds or number, regardless of settlements, or the public welfare.' And in a State of the British settlements, now in view, we are told, that 'even the lands beyond New York itself and Albany, on both sides of Hudson's river, by an abuse which ought to be remedied, viz. the old exorbitant grants, are but thinly inhabited, although lands for settlement in that colony are extremely wanted: and those tracks would soon be purchased, if they could be had at any tolerable rates.' This unpeopled state of the country is of so much the worse consequence, since, in case the French should attack ALBANY and NEW YORK at the same time, one by SEA, and the other by LAND, conformably to their plan, from whence could ALBANY be reinforced? The country has not men to supply it, nor could NEW YORK, in such a case, be able to spare any. On this occasion, the memorial of 1732 observes, 'That when the present state of New York, and the power of those neighbours (the French) is well understood, it will too evidently appear, that they will, on a rupture, be under unhappy circumstances; and with them the other colonies must be deeply involved.' Such ENFEEBLING GRANTS, therefore, are of pernicious tendency every where, but no where so much as in the province of NEW YORK; which being the key of all the other colonies, and most exposed to our northern neighbours, who, for these reasons, cover it, all means which can be thought of, conducive either to its improvement or security, ought to be applied, and every the least obstacle to either ought to be removed.

After the words cited from the assembly's address, they justly remark, 'We can erect FORTS and BLOCK-HOUSES; but to what end? Woods and uncultivated tracks are not the objects of security; industry is to be protected, and men persons to be defended, otherwise little good will accrue to the public, be the expence what it will.' It is true, there can be no prospect of settling a country, while such discouraging grants are in the way: but were those obstacles removed, under the protection of such forts as have been proposed, in a very short time we might hope to see this part well inhabited, and, consequently, the strongest barrier (as it ought to be) in the ENGLISH AMERICAN dominions against the FRENCH. With regard to NOVA SCOTIA, including the country to the east of KENNEBECK RIVER, it will require several FORTS and settlements to secure it, not only at the mouths of the three principal rivers, PENOBSCOT, LA CROIX, and ST JOHN'S, at which last there are two French forts, but also at certain posts along those rivers, particularly this last; which beginning not far from the head of the Kennebeck, and passing with a circular course, encompasseth the greater and most va-

luable part of all the country; so that those forts will keep both FRENCH and INDIANS in awe, as they will have an easy communication by water among themselves, and with the settlements on the other rivers, travelling only a little way by land. Above all, care must be taken to build a strong fort at SHEGNIKTO, on some elevated ground, to the north of the French fort, which may both command, and exceed it in force; for the present fort is so weak, and ill situated, that the garrison would be obliged to surrender almost at the first shot: so that, in case of a war, we should have no chance there. Nor will this be enough: it will be necessary for securing it, to have two forts more, one at BAY VERTE, to prevent our neighbours from invading the country at pleasure, that being their landing-place from CANADA, and one of the two ways by which they enter and correspond with Nova Scotia: ST JOHN'S RIVER, as before mentioned, is the other, by which (says La Hontan) the inhabitants of those two countries may hear from each other in 16 or 17 days, though not in a month by sea.

The second fort ought to be erected at the entrance into SHEGNIKTO basin, or harbour; for should the French build one there, they would exclude all access to it by sea.

But as the erecting so many forts at once in this province (of Nova Scotia) may be thought too expensive a work, it may be sufficient, for the present, only to build some along the river ST JOHN, and those at SHEGNIKTO.

By such a number of forts and settlements as I have mentioned, may the BRITISH territories be effectually secured, the FRENCH kept at a distance, and our trade in good measure recovered, by passages opened for the Indians to come and trade with the colonies; which will likewise be at liberty to extend their settlements on all sides, in spite of any opposition which the French can give them, or rather without danger of any from them: for, by means of these forts, a much stronger line of circumvallation will be formed against them, than they at present have against us.

You will say, perhaps, that I have cut out a fine expensive work for the colonies. It will be expensive, there is no doubt of that; but what can be done, supposing fewer forts will not be sufficient to secure them? If, therefore, the burthen fall heavy, they may thank their own mismanagements. Had FORTS been gradually built on their frontiers, and as they extended their out-settlements, after the example of the FRENCH, a thing which ought to have been done, the charge would not have been felt. As this has been neglected, that must be done at once which should have been done at different times: besides, the expence is greatly augmented, by their having suffered the French to build upon them every where. At first, a few forts erected in proper places, would have served the purpose, and their neighbours finding the possessions secured, might never have thought of disturbing them: but seeing the countries lie open, and the colonies careless through a vain security, or worse, covetousness, they were invited to enter, and punish their neglect in the manner they have done.

REMARKS before the last war, and peace of 1763, in our first edition began in the year 1751.

If America should again become the seat of war, as it was in the last, (and this it certainly will, if the Spaniards join the French) it will prove of unpeepable detriment to these kingdoms, as things are at present circumstanced, provided it should be conducted as the last war there was, and if there should be such unhappy misunderstandings between admirals and generals, as was between Mr Vernon and Mr Wentworth, &c.—I have now the misconduct of this whole affair before me; which would prove very disagreeable, and, indeed, very shocking, to represent in its true colours. But we will hope for better conduct in the next war, in that part of the world, or our all, I am confident, will be lost there.—It appears to me, that there are opportunities enough in America greatly to distress the Spaniards, if it should become necessary, as well as the French; and, after having provided effectually for our affairs in Europe, we cannot have too great a fleet to act in America, and elsewhere: but, unless we strike some CAPITAL AND EFFECTUAL STROKE, the war will only be prolonged for the benefit of the officers, from year to year, and turn to the dishonour and ruin of the nation, instead of its glory and prosperity.

We have not the least reason to be discouraged at the expence of a much greater FLEET than ever this nation beheld. If we had a fleet as powerful again as we have, we should scarce feel the expence of it: nay, I could almost presume to affirm, THAT THE GREATER OUR ROYAL NAVY IS, THE RICHER, INSTEAD OF THE POORER, WILL THE NATION BE; AND THEREFORE WE CAN SCARCE SPEND TOO MUCH UPON OUR MARITIME FORCE.

Exclusive of what we expend for naval stores with other nations, the residue of our naval expences is raised within ourselves, and centers and terminates within ourselves. 1. Our royal navy is victualled among ourselves, and this enriches the landed gentleman, as well as the farmer and grazier. 2. Our ships are built and masted with our own timber, and built by British artificers. 3. Though we take hemp from Russia,

yet our cordage and sail-cloth and iron are chiefly manufactured amongst ourselves, for the employment of our manufacturers and artificers. 4. Our ship-chandlery particulars, great in number, are produced amongst ourselves; and our ships are supplied with liquors by our own brewery, and our own distillery. 5. Though we used formerly to be obliged to take our pitch and tar from Sweden, yet at present we have the bulk of it from our own plantations; and so we may, in time, have all our hemp from thence: and whatever adds to the circulation of commerce between England and her colonies and plantations, tends to augment the opulence and power of both. 6. The appointments paid to our sea officers, and wages of our mariners, also revert again into our own hands. 7. The great estates frequently obtained in time of war by our admirals, and other chief officers; as well as by privateering, generally make the nation more than an ample recompence for the mercantile losses we sustain by sea in those calamitous times. 8. The prizes which we commonly make of the enemies ships of war and naval stores, can scarce fail to be equivalent to those we may happen to lose of our own.

Upon the whole, if we compare the national expence raised upon our ROYAL NAVY, when it shall be exerted to its fullest extent in times of war, with the national RETURNS, as the necessary consequence thereof, according as our affairs are now happily circumstanced; we need not be at all apprehensive, that a war carried on by SEA can ever impoverish or hurt the kingdom at all. For let it be supposed that 3,000,000l. a year, or even more, was raised annually above the ordinary expence, for the support of the royal navy, it will not be easy for any one to shew, that near the whole expence raised would not return into Great Britain again. From past experience in relation to the three last great wars, the expence of our naval affairs, considered in the several lights before intimated, did the nation no great injury, and would have done much less, if we could then have provided ourselves, as we now can, with so great a part of our naval stores.

Nor could it do us any detriment, if the expence was considerably greater, provided the money was constantly RAISED WITHIN THE YEAR; for the greater our naval power is, if exerted as it ought to be, the greater might, and very probably would, be our advantages by sea over the enemy, and therefore the RETURNS of treasure into the kingdom would be equivalent to the EXPENCE RAISED: and this would be almost all gain to the nation.

But supposing the necessity of our affairs should oblige us to run annually THREE MILLIONS, or more, into debt, on account of our NAVAL EXPENCES, let us consider how it would affect the wealth of the nation.

Who must be the public creditors to whom this money will be due? Does it not every shilling (except what I have before excepted) arise from the product of our land, and the labour of our workmen? And while the PRINCIPAL MONEY is due only AMONGST HIS MAJESTY'S SUBJECTS, as I have zealously pleaded for in this performance, and the INTEREST paid to them only, such debts will sit light upon the nation: but when any proportion of such debts becomes due to foreigners, by transfer or otherwise, and the interest money goes out of the nation, this is reckoned a disadvantage in the like degree, which is the reason that I have suggested how desirable it would be, if it should ever be found practicable, that all the PUBLIC DEBTS THE NATION SHALL BE OBLIGED TO INCUR, should be CONTRACTED AMONGST BRITONS ONLY; in which case, no interest-money would go out of the nation, and, consequently, the burthen of our national incumbrances would be the less sensibly felt. See our articles CREDIT, [PUBLIC CREDIT], DEBTS, [NATIONAL DEBTS], FUNDS, MONIED-INTEREST.

Although a part of the interest money paid on account of the principal debt contracted for our naval affairs, should be remitted to foreigners out of the kingdom, in virtue of their becoming our public creditors, yet it should not be forgot, that the PRINCIPAL VALUE arose from the produce of our LAND and our LABOUR, and that we have taken such foreigners PRINCIPAL MONEY, though they take away our INTEREST MONEY. This abates the evil in some degree; but when a great proportion of the principal money due to FOREIGNERS has been spent in FOREIGN COUNTRIES, and never returned in any shape to us again; when this is not only the case, but the interest money is spent out of the nation likewise; this magnifies the evil of such debts.

But when our native land and labour shall have PRIMARILY received the benefit and advantage of our NAVAL EXPENCE, it may be a quere, whether those benefits and advantages, considered upon the WHOLE, may not be equivalent to the disadvantages sustained by paying interest to foreigners for a PART only.

Certain it is, however, that let these our NAVAL EXPENCES be any way considered, it should seem, methinks, as if they had a tendency rather to enrich the nation, than any how to injure or impoverish it: for so much of the money expended this way, in time of war, is really something like extracting so much GOLD and SILVER out of our MINES; and what is the common produce of our LANDS and our LABOUR, are

VOL. III.

MINES of the greatest utility to the state. Neither should it be forgot, that our ROYAL NAVIES, built and equipped with such money, become really PERMANENT RICHES for many years, of which we enjoy the benefit; and the service and glory which the kingdom derives from these her NAVAL TREASURES, far more than compensate for the expence of the interest of the money they cost; be that considered in what light it may.

In a word, it should seem, however paradoxical at first glance it may appear, that our very NAVAL EXPENCES are creative, under the restrictions we have considered them, of NATIONAL WEALTH; and if our whole public incumbrances had been made up of such sort of expences, and raised within the year, and the whole interest money had centered within ourselves, as perhaps might have been the case, our debts would have proved very little burthen to us. There is another consideration, notwithstanding, that ought to alleviate, in some measure, the thoughts of the burthen of the INTEREST MONEY paid to foreigners who are our public creditors; which is, that the chief of our foreign public creditors being the subjects of the United Provinces, and the author of this work looking upon the interest of those provinces in a light absolutely inseparable from that of Great Britain, thinks that the interest money paid to them ought to be looked upon, in some degree, as really paid to ourselves: and what ought to be some additional motive with us to have a natural tie and affection towards that nation, is the cheerfulness they ever shew to aid and assist us with their money-subscriptions, upon all emergencies, and in all other shapes; I am willing to think, according to their power; unless when some wicked men at the helm have prevented it. And is not this the case of all nations at one time or other? But the contrary is the genuine sense of the wise and upright men in that state; and I hope that we shall soon happily experience a perfect union and good understanding between GREAT-BRITAIN and HOLLAND, notwithstanding all the wiles and machinations of our common enemies, to divide and distract us, in order to subvert the power of both.—To this end, I have zealously endeavoured to remove the prejudices which too many in this kingdom are at present taught to have against the Dutch, by the emissaries of France. See our articles UNITED PROVINCES, HOLLAND, TRADE, FLANDERS and NETHRELANDS.

These considerations, we humbly hope, will animate the nation to spare no EXPENCE upon their NAVAL POWER, if the necessity of affairs, as I fear will be the case, should make it requisite even to treble the FLEETS we at present have, more especially if we exert ourselves to raise the whole of our naval stores in our plantations.

REMARKS on our article WAR, since the last war, and the PEACE of 1763.

Under our article TAXES, there appears an account of all the money that has been raised since the year of the REVOLUTION in 1688, to the conclusion of the reign of this late Majesty George II. If we cast an eye upon the incredible expence of the last war, it would certainly have proved utterly impracticable to have raised such supplies WITHIN THE YEAR as were raised to carry on that war. Since the reign of queen Anne, our PUBLIC DEBTS are nearly trebled to what they then were, although a great parade has been made, since that period, to lessen them. And if the examples of carrying on WARS by this nation at the expence we have hitherto done, are to become permanent precedents, and esteemed worthy the sanguine imitation of posterity; it requires no extraordinary prescience to predict, that such expensive wars must at length prove the inevitable RUIN and DESTRUCTION of this commercial empire. For to such a degree must our TAXES in general be necessarily augmented, to pay the INTEREST of our ENCREASED PUBLIC DEBTS, that the NECESSARIES OF LIFE, THE PRICES OF LABOUR, AND THE PRICES OF ALL OUR COMMODITIES AND MANUFACTURES, WILL BE SO GREATLY RAISED AND INCREASED, THAT THE GENERAL DOMESTIC CONSUMPTION OF ALL OUR NATIVE COMMODITIES WILL DECREASE AMONG OURSELVES; OUR GOODS WILL BECOME SO DEAR, THAT FOREIGNERS NEITHER CAN NOR WILL PURCHASE THEM: AND WHAT WILL BE THE CONSEQUENCE HEREOF? AS THE HOME CONSUMPTION OF OUR NATIVE COMMODITIES DIMINISHES, WHAT WILL BECOME OF THE REVENUE OF EXCISES? WILL NOT THAT BE REDUCED PROPORTIONABLY? AND WHEN WE SHALL NOT BE IN A CONDITION TO EXPORT OUR OWN GOODS, BECAUSE NO FOREIGNER CAN OR WILL BUY THEM, WHILE HE CAN BUY THOSE OF OTHER NATIONS, OUR TRADING COMPETITORS, CONSIDERABLY CHEAPER, HOW LONG SHALL WE BE ABLE TO IMPORT THE FOREIGN GOODS OF OTHER STATES AND EMPIRES? NOT LONG, MOST CERTAINLY. AND WHEN THAT COMES TO BE OUR CASE, WHAT LIKEWISE WILL BECOME OF THE REVENUE OF CUSTOMS? WILL NOT THAT BE REDUCED AS OUR IMPORTS SHALL BE? WHERE THEN SHALL WE FIND THE FUNDS TO PAY THE INTEREST FOR OUR PUBLIC DEBTS? WILL NOT THE FUNDS:

FUNDS VANISH ALSO, FOR THE PAYMENT OF THE KING'S CIVIL LIST REVENUE; FOR THE SUPPORT OF HIS HOUSEHOLD, AND THE HONOUR AND DIGNITY OF HIS CROWN? WILL NOT THE VERY EXISTENCE OF THE SINKING FUND, NOW MORTGAGED AS A COLLATERAL SECURITY TO THE PUBLIC CREDITORS, BE ANNIHILATED; AND INSTEAD OF THE NATIONAL CREDITORS HAVING ANY SECURITY FOR THE DISCHARGE OF THEIR PRINCIPAL MONEY, HOW WILL THEY COME BY THEIR INTEREST? WHEN THIS SHALL COME TO BE THE STATE OF PUBLIC CREDIT, AND THE MONIED INTEREST SHALL BE UNDONE, WHAT WILL BECOME OF OUR TRADERS? WILL NOT OUR MERCHANTS FLY TO FOREIGN COUNTRIES, AND THERE EXERCISE THEIR SKILL AND INDUSTRY, TO IMPROVE THE COMMERCE AND NAVIGATION OF THOSE COUNTRIES, WHOSE GREATER CHEAPNESS OF THEIR COMMODITIES WILL INDUCE THEM TO TRADE THEREIN THROUGHOUT THE WHOLE WORLD? WHEN WE HAVE LOST OUR MERCHANTS AND OUR MONIED MEN, WHAT A FIGURE WILL OUR LANDED GENTLEMEN MAKE? WHEN OUR BRITISH LAND SHALL BE OF AS LITTLE WORTH AS THAT IN SIBERIA, WILL THE RAISING FOUR SHILLINGS IN THE POUND UPON SUCH LAND, RAISE AGAIN THE BRITISH SPLENDOR?

It would be easy to carry on this strain of observation to a much greater pitch; but the idea of a bankrupted and ruined nation is a melancholy subject to dwell upon; especially when men are too apt to judge it visionary. I heartily wish it may never prove otherwise; the author had rather have his memory eternally stigmatized, than such a catastrophe should ever come to pass. His motive is not to alarm with false fears; but to guard Britons against that danger that appears to him impending, unless some masterly strokes of policy are struck, to reduce the tax-incumbrances on our trade in general, in order to reduce the PRICES OF OUR COMMODITIES AND MANUFACTURES in general as low as those of any RIVAL NATION IN EUROPE. 'Till this is done, and most effectually too, we deceive ourselves in imagining, that we shall be able to preserve our trade and navigation. The wisest TREATIES OF COMMERCE with nations will not effect it; they will eternally be evaded; such states and empires with whom we should make them, and become even upon a better footing with them in trade than any other nation is, cannot be compelled to purchase our goods, when they can have others from 15 to 30 and 40 per cent. cheaper. Nor shall we ever be able to put a stop to the infamous practice of smuggling in Great-Britain and Ireland, and the British plantations, while they shall be able to buy French and other foreign commodities so much cheaper than they can English. I could heartily wish and rejoice that these things were considered by our RULERS as they ought to be, and this great work was set about in earnest; for if it is deferred, the malady will grow so malignant as to become absolutely incurable. It has proved a misfortune to both states, that Great-Britain and the States General, have not been happily cemented in their interests; we mean more particularly in their commercial interests; for nothing but a union founded on such a basis, can influence them to act in concert heartily for their reciprocal support and preservation, against France, or any confederacy the court of Versailles may form against them both.

But while the Dutch experience it more for their benefit and advantage, to traffic in French commodities and manufactures, in preference to those of English; while the Hollanders find it turn more to their account to engage large capitals in the French trade, and carry the wares of that kingdom for sale to every part of the world, by reason of their greater cheapness and readier vent than English, 'tis no wonder, that those states are more united than England and Holland; but it is more astonishing, that the great men in England and Holland have not yet fallen upon some measures to accomplish a desirable commercial union, as previously necessary to a total union of all their mutual interests. For till this is done, and effectually done, they will always be liable to be plunged into wars; which their hearty conjunction would often prevent.

However beneficial the Dutch may have found their neutrality when Great Britain has been engaged in wars with France, the States General may at length carry this maxim too far; for it is to be feared, that France will never lose sight of attempting to annex the United Provinces to their crown, however they may temporize with them. The Dutch may also have reason, and that, perhaps, not long first, to dread the machinations of another great and intriguing power, whose great aim seems to be to erect himself into a considerable maritime and commercial power; to which end he may have his eye no less upon the United Provinces than some other, and that acquisition would not a little contribute to his extensive views. Nothing might have a happier tendency to render abortive such schemes of power, either on the side of France, or others, to swallow up Holland, than a perfect harmony and good understanding, in all respects, between

Great-Britain and the States General; and this upon principles prefervative of the being of both states, and tending to the increase of their commerce and navigation. See UNITED PROVINCES, FLANDRES, HOLLAND.

WARWICKSHIRE is bounded with Worcestershire on the west; Gloucestershire and Oxfordshire on the south; Derbyshire and Staffordshire on the north; and Northamptonshire on the east: in circumference it is computed at 122 miles. Its air is excellent, the soil rich, and its principal commodities are corn, malt, wool, wood, iron, coal, and cheese. The most considerable of the many rivers and brooks it is plentifully watered with, are the Avon and the Tame.

COVENTRY is a large, populous, and rich city: the chief employment of the inhabitants, at present, is in the manufacture of tammies, and weaving the ordinary sorts of ribbons, especially black.

TAMWORTH is a fine pleasant town, noted for its good ale: the river Tame parts it in the middle, so that one half of this town is in this county, and the other in Staffordshire. Here is a considerable trade in narrow cloth, and some other manufactures.

BIRMINGHAM is a large populous town; multitudes of the meaner sort of people are employed here in the iron-works, in which they are such ingenious artificers, that their performances in the small wares of iron and steel are admired both at home and abroad.

STRATFORD has a stone bridge on the Avon, which is navigable to it by barges. It is a populous town, and its chief commodity is malt, which it makes in great abundance.

The navigation of the river Avon is observed to be of vast advantage to this county, and to the particular commerce of the city of Bristol; for by it they drive a great trade in groceries, iron, lead, and all heavy goods, which are usually carried by water almost as far as Warwick; and, in return, the corn, and especially cheese, are carried back from Gloucestershire and Warwickshire to Bristol.

ATHERSTON, on the Stour, is famous for its cheese fair, the greatest in England, on the 8th of September. Here the cheese factors buy vast quantities, which they carry to Stour-bridge fair.

NUNEATON is a pretty large well-built town, and has a manufacture of woollen cloth.

WEIGHTS.

The foreign Weights of several of the chief trading parts of EUROPE compared.

The weights for HEAVY GOODS may properly be divided into three sorts. 1. GREAT WEIGHTS, 2. POUNDS, and 3. Their FRACTIONS, or small weights.

The great weights are the SCHIPPENDT, which makes 300 or 400 pound, according to the different places; the LOAD, composed of two bales, making likewise 300 or 400 pound weight; the WAGE, about 165 pounds; the QUINTAL, making 100, 104, 105, 110, and sometimes 112 pounds, or more, according to the custom of each place.

The hundred, which is divided into QUARTERONS; the AROB, between 25 and 32 pounds.

The LISPENDT, 15 pound, more or less; the STONE, in some places of 8, in some of 15, and in some of 16 more; in others, more; the POUND consists in some places of 12, in some of 14, in others of 16, which is most common; and in some of 40 ounces. And those FRACTIONS are variously subdivided, according to the goods that are weighed, and the custom of the place.

The fractions of the POUND are the MARK, consisting of 8 ounces, or half a pound; the OUNCE, of 8 GROSS, or DRACHMS, or 24 DENIERS, or 20 ENGELS; the GROSS, or DRACHM, of 3 DENIERS; the DENIER, of 24 GRAINS; the ENGEL, of 32 ACES, or 30 GRAINS. In weighing of PRECIOUS STONES, &c. the OUNCE consists of 576 GRAINS, but they reckon it 600. Four GRAINS make a CARAT.

The SILVERSMITHS divide their MARK, which they call OUNCE, into OCTAVES, CARATS, and GRAINS. The MARK, or OUNCE, contains 8 OCTAVES; the OCTAVE, 20 CARATS; and the CARAT, 4 GRAINS.

In HOLLAND, and particularly at AMSTERDAM, they make use of two sorts of weights, to weigh all sorts of goods and commodities subject to be weighed by the town-weights, viz. The MARK, or Troy weights, and the ANTWERP weights. The MARK, or TROY WEIGHT, is that which is known all over Europe, and which is used by the goldsmiths in weighing gold and silver, consisting, as I have already said, of 8 ounces, or half a pound; so that, to make the hundred weight, there must be 200 MARKS, which hundred weight, or 200 marks, makes 105 $\frac{1}{2}$ pounds of Antwerp weight, or a little less; and the hundred weight of Antwerp makes but 94 $\frac{1}{2}$ pounds weight of Amsterdam.

As for Antwerp weights, they are only used there to weigh certain sorts of silk, cochineal, some drugs, and other things of that nature.

Nor is it of the Antwerp, but of the Amsterdam hundred of 200 marks, that the schippendit is composed; by which weight the Holland cheese, Riga hemp and flax, and many other such goods, are commonly sold. At Amsterdam the schippendit is reckoned but 300 weight, and not 400, as in divers other places.

The pound mark of Spain and Portugal is held to be about $\frac{1}{2}$ an ounce less than that of Amsterdam. However, they make use, in those countries, of several smaller weights.

In France they use three different sorts of weights in buying and selling of goods, viz. mark-weight, table-weight, and king's-weight, or custom-house weight.

It is not necessary to give further account of the mark-weight, of which I have said enough. What they call table-weight, is that they make use of in several provinces in the kingdom, and particularly in Provence and Languedoc; which weight is between 18 and 25 per cent. smaller than the mark-weight; though at the same time the pound table-weight is composed of 16 ounces, because those ounces are so much smaller than the other. And though that diversity of weight, in almost every town in Provence, and High and Low Languedoc, occasions a great inconvenience to trade, the inhabitants of those towns cannot be prevailed with to alter their ancient weights and measures.

Though some who have wrote upon that subject, have not taken notice of the difference between the weights of Toulouse and those of Marseilles, 'tis certain that the latter are $5\frac{1}{4}$ per cent. or thereabouts, smaller than the former; since 100 weight of Toulouse renders about 105 $\frac{1}{4}$ at Marseilles, and 100 weight of Marseilles renders only about 95 at Toulouse. Nor are they less mistaken, who reckon the weights of Marseilles equal to those of Rochelle; for, on the contrary, they differ almost 25 per cent. as shall be shewn.

In some places of France they reckon by the quintal, and in others by the hundred, and in some places, both by the one and the other. And in that case, strangers must take particular notice of making contracts, clearly to express which of the two they mean.

By the hundred is meant barely 100 weight, and no more. And by the quintal is commonly meant 104; and in some places much more, as we shall see hereafter. And even at Toulouse they add 1 pound to the 104, to make it good weight as they call it.

At Lyons they have two sorts of weights. By the town-weights all sorts of goods are weighed but silks; and they reckon 14 ounces mark to the pound.

By the others nothing is weighed but silks; and the pound consists of 15 ounces.

At Rouen they have likewise two sorts of weights; those of the Viconté, and the mark-weight.

The weight of the Viconté is taken to be about 6 per cent. better than that of Paris, or the mark-weight, in weighing of wool; but in other cases it is only 4 per cent. greater than the other. And so it is divided into fractions of 52, 26, and 13 pounds.

There being no Viconté weights less than 13 pound, all fine goods that are sold by smaller weights are weighed by the mark-weight.

Of the WEIGHTS of HOLLAND, and their conformity with those of other COUNTRIES.

We have already observed, that the weights ordinarily used in Holland, and particularly at Amsterdam, are those called mark-weights; and though some people make them equal to those of Paris, Straßburgh, Besançon, and Bourdeaux, it is certain, there is some difference between them.

Of the WEIGHTS of BRABANT and FLANDERS, compared with those of HOLLAND.

The difference between the weights of Amsterdam and those of Brabant, is about $5\frac{1}{2}$ per cent. exclusively: so that 100 pound of Amsterdam make 105 $\frac{1}{2}$ of Brabant, Antwerp, &c. and 100 pound of those places make 94 $\frac{2}{3}$ of Amsterdam. As for the reduction of the one into the other, nothing is more easy, since you need only make the plain operation of the rule of three, and say,

If 100 pound of Amsterdam make 105 $\frac{1}{2}$ of Antwerp, &c. how many will 90 $\frac{2}{3}$ make? And you will have just 100—And on the contrary,

If 100 pound of Antwerp, &c. make 94 $\frac{2}{3}$ of Amsterdam; how many will 105 $\frac{1}{2}$ of Antwerp make? And you will likewise have 100.

And so you may make the reduction of any quantity whatsoever, of the weights of one of these places, into those of the other.

You may comprehend, under the name of those of Antwerp, the weights of more of the other towns of the same province, and likewise of Flanders; though indeed there is some small difference between them, as it has been calculated, according to the following account, viz.

100 pound weight of Amsterdam makes at	Brussels	100
	Bruges	
	Louvain	
	Bois Le Duc	
	Malines and Aerschoot	
	Bergen-op-Zoom	98
	Namur	99
	Ghent	108

The schippendit of Antwerp is 300 pound

The load - - - 400

The wage - - - 165

The stone - - - 8

Of the WEIGHTS of PARIS, compared with those of AMSTERDAM.

Though there is but an inconsiderable difference between the weights of Amsterdam and those of France, we did not think fit to pass it by without notice. According to the truest calculation, we reckon the weights of Paris $1\frac{1}{4}$ per cent. heavier than those of Amsterdam. That is to say, 100 pound of Amsterdam make 92 $\frac{3}{4}$ pound of Paris; consequently 100 pound of Paris make 101 $\frac{1}{4}$ pound of Amsterdam. The reduction of the one into the other is made in the manner mentioned above for the weights of Flanders and Holland, which is very plain.

The WEIGHTS of ROUEN, compared with those of AMSTERDAM.

For making the reduction of the weights of those two places, you need only to take notice, that 100 pound of Amsterdam make 96 pound 2 $\frac{1}{2}$ ounces, Viconté weight of Rouen; and 100 pound Viconté weight of Rouen make 104 pound of Amsterdam.

The WEIGHTS of LYONS, compared with those of HOLLAND.

We have observed that at Lyons they use two sorts of weights, viz. the pound of 15 ounces mark for silks, and that of 14 ounces for other goods; and the latter being the town-weight, observe, that

100 pound town-weight of Lyons make 86 pound of Amsterdam, and 100 pound of Amsterdam make 116 pound town-weight of Lyons, or thereabouts. Observe also, that the weight for silk is $\frac{1}{15}$ greater than the town-weight: so they reckon, that 100 pound silk-weight make 108 pound town-weight, and 100 town-weight make but 98 $\frac{1}{2}$ pound silk weight, and a little more.

The WEIGHTS of BOURDEAUX, compared with those of AMSTERDAM.

Though a certain mistaken author has averred, that 100 pound of Amsterdam make 115 of Bourdeaux, the same having been exactly compared, the difference was found to be only $\frac{1}{2}$ a pound or thereabouts, that the weight of Amsterdam proved heavier than that of Bourdeaux; so that the difference being so very small, it will not be necessary to trouble the reader with further notice thereof.

The WEIGHTS of ROCHELLE and NANTES, compared with those of AMSTERDAM.

The difference between the weights of Rochelle and those of Amsterdam, is so inconsiderable, that some writers have asserted that they are equal; but upon a more exact enquiry, it appears, 100 pound of Amsterdam make 99 pound of Rochelle; and 100 pound of Rochelle make 101 pound of Amsterdam, or very near—The weights of Nantes are equal to those of Rochelle, or but a very trifling difference.

The WEIGHTS of TOULOUSE, compared with those of AMSTERDAM.

The weights of Alby, Carres, Lavour, and other towns of High Languedoc, are the same with those of Toulouse. 100 pound of Amsterdam make 118 pound of those places; and 100 of those places make 84 pound $\frac{2}{3}$ of Amsterdam.

The WEIGHTS of MARSEILLES, compared with those of AMSTERDAM.

Though it is commonly said that 100 pound of Amsterdam make only 120 pound of Marseilles; upon an exact enquiry into the matter, it appears that 100 pound of Amsterdam make 123 $\frac{1}{2}$ pound of Marseilles; and 100 of Marseilles are reckoned 300 pound of the weight of that town; and by that they commonly sell the Levant and Turkey goods.

The WEIGHTS of GENEVA, compared with those of AMSTERDAM.

Monf. Sebastian Peters, an author of Bremen in Germany, in a book he published, says, that 100 pound of Geneva make 113 $\frac{1}{2}$ of Amsterdam, and that 100 pound of Amsterdam

Amsterdam make 88 pound of Geneva; but Messieurs Marcet, brothers, and natives of Geneva, late merchants of Amsterdam, say that 100 pound of Geneva make $112\frac{3}{4}$ pounds of Amsterdam. And 100 pound of Amsterdam make 89 pound of Geneva.

The Weights of LONDON and DUBLIN, compared with those of AMSTERDAM.

They make use of three different sorts of weights at London, for weighing of goods and silver, viz. The great hundred, the hundred, and the weight of Venice.

For what they call the great hundred, they give 112 pound; and in some sorts of goods, only 104 pound, and that only to citizens of London; the strangers, and such Englishmen as are not citizens, having only 100.

But for spiceries, drugs for dyers, and some other such things, strangers and citizens promiscuously have 112 for 100.

When strangers sell their goods, they must deliver them by the king's weights; but when they buy, they must use the merchants weights, which are less than the king's weights.

They weigh silver by the weight called the weight of Venice; 12 ounces of which make the mark.

According to the best computation, 100 pound of London make $91\frac{1}{2}$ pound of Amsterdam; and 100 pound of Amsterdam make 109 $\frac{1}{2}$ pound of London.

The weights of Ireland are the same with those of England.

The Weights of SCOTLAND, compared with those of AMSTERDAM.

The weights of Scotland being about 4 per cent. greater than those of London, the reduction must be made accordingly.

The Weights of BREMEN, compared with those of AMSTERDAM.

The weights of Bremen being 3 per cent. less than those of Amsterdam, 100 pound of Amsterdam make 103 pound of Bremen, or a little more; and 100 pound of Bremen make 96 pound of Amsterdam.

The Weights of HAMBURGH, compared with those of AMSTERDAM.

At Hamburg they sell several sorts of goods by the schippend of 300 pound, or 30 stone of 10 pound each, to the schippend; which renders at Amsterdam 294 pound.

It is to be observed, that at Hamburg, retailers have the privilege to sell any goods, not exceeding 10 pound, by the weight of Cologne, which is 2 per cent. less than that of Hamburg; but wholesale merchants must sell by the weight of that place.

They have but one weight at Hamburg, by which all goods are to be weighed; and the weighers, at their admission, take an oath before the senate, and keep a record of all goods they weigh.

100 pound of Amsterdam make 102 pound of Hamburg; and 100 pound of Hamburg make 98 pound of Amsterdam, or thereabouts.

The Weights of LUBECK, compared with those of AMSTERDAM.

There is about 5 per cent. difference between the weights of Lubeck and those of Amsterdam. For

100 pound of Amsterdam make 105 pound of Lubeck; and 100 pound of Lubeck make $95\frac{1}{4}$ pound of Amsterdam.

The schippend of Lubeck is composed of 320 pound;

The stone, of 10 pound; and,

The lispent, of 16 pound.

The schippend renders at Amsterdam about 305 pound.

The Weights of COPENHAGEN, compared with those of AMSTERDAM.

The schippend of Amsterdam is composed of 20 lispents, or 32 pounds; and 100 pound of Amsterdam make $101\frac{1}{4}$ pound of Copenhagen; and 100 pound of Copenhagen make $98\frac{3}{4}$ pound of Amsterdam.

The Weights of BERGEN in NORWAY, compared with those of AMSTERDAM.

The weights of Bergen are by some reckoned equal to those of Copenhagen, but upon scrutiny it has been found that there is some difference. For

100 pound of Amsterdam make $95\frac{1}{2}$ pound of Bergen; and 100 pound of Bergen make 105 pound of Amsterdam.

Some reckon the schippend equal to 300 pound of Amsterdam, but it is commonly reckoned 315.

The Weights of STOCKHOLM, compared with those of AMSTERDAM.

The schippend of Stockholm, for copper and such goods, consists of 320 pound; but that used for other commodities is reckoned 400.

The first renders at Amsterdam $273\frac{1}{2}$ pound; the last, 342. 100 pound of Amsterdam make 117 pound of Stockholm; And 100 pound of Stockholm make $85\frac{1}{2}$ pound of Amsterdam.

The Weights of DANTZIC and REVEL, compared with those of AMSTERDAM.

They weigh fine goods in those places by the STONE of 24 pound.

Almonds, rice, wax, and such other goods, are weighed by the GREAT STONE of 34 pound.

Brass, tin, lead, and other such goods, are weighed by the great hundred, of 120 pound.

16 pound, mark-weight, make 1 lispent.

20 lispents make the schippend of 32 pound.

But the schippend of Revel is reckoned 400 pound.

100 pound of Amsterdam make $112\frac{1}{2}$ pound of Dantzic; and 100 pound of Dantzic make 89 pound of Amsterdam.

The Weights of STETIN, compared with those of AMSTERDAM.

See what has been said of the weights of Copenhagen; to which those of Stetin are reckoned equal, or within a very small matter.

The weights of Koningsberg consist of 400 pound, or 10 stone of 40 pound each; and it renders at Amsterdam 306 or 307 pound.

When burghers of Koningsberg buy of strangers, they allow $4\frac{1}{2}$ or 5 per cent. good weight.

100 pound of Amsterdam make 125 pound of Koningsberg; And 100 pound of Koningsberg make 80 pound of Amsterdam.

The Weights of RIGA, compared with those of AMSTERDAM.

The schippend of RIGA consists of 20 lispents, and renders at Amsterdam about 330 pound.

100 pound of Amsterdam make $121\frac{1}{2}$ pound at Riga; and 100 pound of Riga make $82\frac{1}{2}$ pound of Amsterdam.

The Weights of FRANKFORT and NUREMBURGH, compared with those of HOLLAND.

The ordinary custom of Frankfort and Nuremburgh, is to allow 120, and sometimes they allow the length of 132, to the hundred.

100 pound of Amsterdam make 98 pound of Frankfort and Nuremburgh; and

100 pound of Nuremburgh make 102 pound of Amsterdam.

The Weights of BERN in SWITZERLAND, compared with those of AMSTERDAM.

The weights of Amsterdam are about 11 per cent. greater than those of Bern; for

100 pound of Amsterdam make 111 pound of Bern; and 100 pound of Bern make 90 pound of Amsterdam.

The Weights of LEIPSI compared with those of AMSTERDAM.

The difference between the weights of these two places is not so considerable as some authors have made it, viz. 8 per cent.; for upon enquiry it appears, that 100 pound of Amsterdam make 105 pound of Leipzig; and 100 pound of Leipzig make $95\frac{1}{4}$ of Amsterdam.

The Weights of NAUMBURGH and HALL, compared with those of AMSTERDAM.

There being but a very inconsiderable difference, if any at all, between the weights of these two places, and those of Leipzig, I refer the reader to what is said thereof before.

The Weights of BRESLAW in SILESIA, compared with those of AMSTERDAM.

The difference between the weights of those two places is very considerable, being, according to the exactest computation, no less than 25 per cent. So that 100 pound of Amsterdam make 125 pound of Breslaw; and 100 pound of Breslaw make 80 pound of Amsterdam.

The Weights of COLOGNE, compared with those of AMSTERDAM.

The weights of Amsterdam are 4 per cent. greater than those of Cologne. So that

100 pound of Amsterdam make 104 pound of Cologne; and 100 pound of Cologne make 96 pound of Amsterdam.

The Weights of LIEGE, compared with those of AMSTERDAM.

The weights of Amsterdam have likewise the advantage of those of Liege, about 5 per cent. or little more; for

100 pound of Amsterdam make $105\frac{1}{4}$ pound of Liege; and 100 pound of Liege make 95 pound of Amsterdam.

The Weights of GENOA, compared with those of AMSTERDAM.

At Genoa they use five different sorts of weights in buying and selling goods.

The first they call the GREAT-WEIGHTS, which are used in the custom-house.

The

The second they call **CASH-WEIGHTS**, being what they weigh the pialtres, and other silver species, with.
The third they call **QUINTERO**, which is the common hundred, used for bulky goods.
The fourth they call the **GREAT BALANCE**, by which they weigh raw and unwrought silks. And
The fifth they call the **SMALL BALANCE**, for weighing fine goods.

They reckon that 90 $\frac{1}{4}$ rotoli, great-weight, or 66 $\frac{2}{3}$ rotoli, cash-weight, or 100 rotoli, common-weight, or 144 pound, great-balance, or 153 pound, small-balance, make 100 pound of Amsterdam.

The Weights of **LEGHORNE**, compared with those of **AMSTERDAM**.

The pound of Leghorne consists of 12 ounces, mark-weight. They commonly sell goods by the quintero, which in some cases is reckoned 150, in some 151, and in some cases 160 pound.

And sometimes they sell by the thousand.

Wool and fish are sold by the quintero, of 160 pound. 100 pound of Amsterdam make 145 pound of Leghorne; and 100 pound of Leghorne make 69 pound of Amsterdam. And you may likewise observe, that 100 pound of Leghorne make 85 pound of Marseilles; and 100 pound of Marseilles make 117 $\frac{3}{4}$ pound of Leghorne.

The Weights of **MILAN**, compared with those of **AMSTERDAM**.

The pound of Amsterdam makes 1 pound 11 ounces of Milan, or a little more.

The pound of Milan makes 9 $\frac{1}{2}$ ounces of Amsterdam, or a little more. So that

100 pound of Amsterdam make 168 pound of Milan; and 100 pound of Milan make 59 $\frac{1}{2}$ pound of Amsterdam.

Some authors have made the difference greater, but this account is conformable to the exactest computation.

The Weights of **VENICE**, compared with those of **AMSTERDAM**.

At Venice they use two sorts of weights, one for wholesale bargains, the other for retail; and the difference between these weights is very considerable.

For 100 pound, wholesale gros weights, make 158 pound, retail weights; and

100 pound small or retail weights, make but 63 $\frac{1}{2}$ pound, gros weights.

100 pound of Amsterdam make 166 pound, small weights of Venice; and

100 pound, small weights of Venice, make 60 pound of Amsterdam.

They also commonly reckon that 100 pound of Marseilles make 134 pound, small weights of Venice.

The mark of Venice, both at the mint and among the goldsmiths, is reckoned 8 ounces, and the ounce 144 carats.

They likewise divide the ounce into 4 quarters, and the quarter into 36 carats, 1152 of which compose the mark. Gold and silver thread is weighed by the ounce of 132 carats; whereas the small ounce consists only of 120; and the carat is composed of 4 grains: for though one of those weights be heavier than the other, they are both divided in the same manner.

Spiceries are sold by the load of 400 pound, small weights.

The weights of **NAPLES** and **BERGEN**, compared with those of **HOLLAND**.

As there is little or no difference at all between the weights of Naples and Bergen, I have comprehended them both in one article.

100 pound of Amsterdam make 169 pound of Naples, &c. And 100 pound of Naples, &c. make 59 pound of Amsterdam.

The Weights of **SPAIN**, compared with those of **AMSTERDAM**.

The robe of Seville and Cadiz consists of 25 pound, and 4 robes make the quintal, the pound being reckoned of 17 ounces.

But the quintal for iron is reckoned at Bilbao and St Sebastian's 155 pound, the pound consisting of 16 ounces.

100 pound of Seville and Cadiz, and 108 pound of Alicant; and

100 pound of Seville and Cadiz make 94 $\frac{1}{2}$ pound of Amsterdam, or a little more.

And 100 pound of Alicant make 92 $\frac{1}{2}$ pound of Amsterdam, or a little more.

The Weights of **PORTUGAL**, compared with those of **AMSTERDAM**.

The robe of Portugal consists of 32 pound, which render

VOL. II.

between 28 and 29 pound of Amsterdam; and 4 robes make the quintal.

100 pound of Amsterdam make 114 $\frac{1}{2}$ pound of Lisbon, or a little more; and

100 pound of Lisbon make 87 $\frac{1}{2}$ pound of Amsterdam, or a little more.

The Weights of **CONSTANTINOPLE**, **SMYRNA**, **LEYDA**, **ALEPPO**, and **SICILY**, compared with those of **AMSTERDAM**.

100 rota's of Constantinople and Smyrna make 114 pound of Amsterdam.

100 rota's or damasquins of Leyda, make 380 pound of Amsterdam.

100 rota's or acres of Leyda make 486 pound of Amsterdam.

100 rota's of Aleppo, for coarse goods, make 455 pound of Amsterdam.

100 rota's of Aleppo, for Persian silks, make 430 pound of Amsterdam.

100 rota's of Aleppo, for white silks, make 440 pound of Amsterdam.

100 rotolo's of Sicily make 162 pound of Amsterdam.

See our article **MEASURES**.

WEST MORELAND is an inland county, and has Lancashire on the south and south-west; Cumberland on the west and north-west; and Yorkshire and the bishopric of Durham on the east and north-east; and is about 120 miles in compass.

Its air is sweet, healthful, and pleasant, but somewhat sharp in the mountainous parts; the vallies are pretty fruitful, especially in the meadows near the rivers; and the northern parts afford plenty of arable land, which bears good store of corn.

Among the mountains, in the fourth part of the country, lies Winander Mere, said to be the greatest lake in England: it is about 10 miles in length, and said to be of a vast depth in some parts of it, and well stored with the chare, a sort of fish rarely found, except among the Alps, and is reckoned a sort of golden Alpine trout; it is baked in pots, and so sent to London, and other parts.

The Ulles-Water is another lake well stocked with fish, and has some chares too, but not in such plenty as the other.

APPLEBY is the county town, but is neither rich nor beautiful. It has the best corn market in all these northern parts.

KENDAL, upon the river Can, is much superior to Appleby in trade, buildings, and the number and wealth of the inhabitants, and is indeed the largest town in the county, being enriched by the industry of the townsmen, and the woollen manufacture, with which they have drove a trade throughout England for some ages. It is of note, also, for the manufactures of cottons, druggets, ferges, hats, worsted and yarn stockings, &c.

KIRKBY LONSDALE, the chief town of Lonsdale, i. e. a vale upon the Lons, is a pretty large town, with a woollen manufacture.

KIRBY STEPHEN, on the river Eden, is noted for weaving yarn stockings.

AMBLESIDE is another town noted for a manufacture of cloth. It stands on the upper corner of Winander Mere.

MILTHORP, at the mouth of the Can, is the only sea-port town in the county, commodities being brought hither in small vessels from Grange in Lancashire.

WESTPHALIA in Germany. This circle stretches along the west side of the Weser, from the German Ocean on the north, to Hefia on the south, and between Lower Saxony on the east, and the Netherlands on the west. The air, especially in the north part, is very cold, and great part of the soil marshy and barren; however, it has plenty of corn and pasture, but the fruit is very ordinary, and used chiefly to feed the hogs, which are numerous, and of an excellent kind; so that the bacon they send abroad is very much esteemed. It is divided into several dominions or provinces.

OSNABRUG, which is the capital of the bishopric of that name; is a neat well-built city: the inhabitants, who are very industrious, not only breed abundance of hogs and other cattle, but have a considerable trade in making linen, in brewing a palatable, though thick sort of beer, called buse, and in baking the best white bread in Westphalia.

OLDENBURG has a good trade by barges, which come up from the Weser to its bridge.

PYRMONT, famous for its mineral waters, lies on the borders of Hanover. It is the capital of a county. There is a great resort of German and other nobility hither to drink the waters, which are preferred even to those of the Spa, and exported far abroad from Bremen, to which they are carried by the Weser.

LUDE is of note also for its medicinal fountain, for which it is much frequented: this commonly goes by the name of Pyrmont water.

HOKTER, on the river Weser, is a fair considerable trading town.

SOEST is a populous city on the river Arse, but having no trade, is not very rich.

DORTMUND, though a small place, is rich and populous, having

ing a pretty good trade, and communication with the Rhine by its river Empfer.

CLEVE, the metropolis of the duchy of that name, is so called from its situation among cliffs, and on the declivity of a hill, between the Rhine and the Maefe, is one of the finest countries of Germany. It is now small, but well built and peopled. The river Hel, which runs by the foot of its castle, is navigable by small vessels to the Rhine.

EMMERICK is a large, rich, beautiful town, pleasantly situated on the east side of the Rhine, and has a pretty good trade.

CALCAR, on the river Men, which falls into the Rhine, soon after it was built grew populous and rich, by a trade in linen; but since one of its dukes built a vast granary here, for the boors to bring their corn to, it has been more considerable for making malt and beer.

ESSEL, called **NETHER WESEL**, to distinguish it from Upper Wesel, in the electorate of Treves, stands on the east side of the Rhine, near the mouth of the river Lippe. It is not only a large and well-built town, but populous, and well suited for trade. It grew rich by the concurrence of merchants, who fled thither from the persecution in the Spanish Netherlands.

DUISBURG is a small city on the Roer, which falls a little lower into the Rhine. Fairs were held in the town formerly, which brought a great trade to it, but are since removed to Frankfurt.

DUSSELDORF has its name from the little river Dussel, that here falls into the Rhine. The town is large and well built. Here are three weekly markets for corn, which is imported thither from the Low Countries, and exported in great quantities to Cologne, and other parts of Germany.

SOLINGEN, a small city on the river Wipper, is only noted for making good cutlers ware.

AKEN, by the French called **AIX LA CHAPELLE**, is of chief note, and greatly frequented on account of its baths.

The adjacent country abounds with corn, fruit, and pasturage. They have also rich coal-mines, besides others of iron, lead, vitriol, sulphur, and lapis calaminaris, and are well supplied with necessaries by the Rhine and Maefe.

WETTERAW in Germany. This is the general name of the county that lies between Hesse on the north, the river Mayne on the south, the Rhine on the west, and the county of Reineck on the east. The principal dominions of it are,

The county of **NASSAU**, which is bounded on the north by Westphalia; on the west by Berg, Triers, and the Rhine; on the east by Hesse and Solms; and the electorate of Mentz on the south. The soil and product of it is various. In several parts they have good mines of iron, lead, copper, and other metals.

DILEMBERG on the river Dilla, has a good trade in cattle and woollen goods.

SIGEN, near which there is a very good iron mine, stands on the river Siega.

EMBS is noted for its baths.

HERBORN, upon the river Dilla, is a city of a pretty good trade in cotton and woollen cloths.

WISBADEN is an ancient large town frequented by reason of famous hot baths in it, from whence it has the name.

HANAU, the capital of a county or division so called, stands pleasantly on the river Kintz, and is reckoned one of the neatest and most regularly built towns in Germany: it is much frequented by merchants of several nations, particularly the French and Dutch. The Walloons here have established several manufactures, viz. woollen stuffs, snuff, &c.

But the chief of the imperial and free cities in Wetteraw, of which it is the capital, is **FRANKFORT**. It is a large, populous, and rich city; it has a great trade by the Mayne and the Rhine, and several other rivers which fall into them, and is very well situated for bringing corn and wine in abundance from the Palatinate and Franconia. It has two annual fairs, frequented by merchants with all sorts of commodities, particularly books from most parts of Europe, of which they distribute printed catalogues; so that there is greater choice here than in any other town in Christendom, during their mart, which lasts three weeks.

On the north side of the city is a spacious horse-fair or market, where a vast number of good horses are sold to the French king, and the neighbouring princes, particularly the former, who buys some thousands in a year to remount his cavalry. The Jews are the chief jockies.

WILTSHIRE is bounded on the west with Somersetshire, on the east with Berks and Hampshire, on the north with Gloucestershire, and on the south with Dorsetshire and part of Hampshire, and is 140 miles in circumference.

The air is very sweet and healthy. The soil of its vales is very fruitful, and affords great quantity of as good cheese as any in England; and though that of the hills is in some places chalky, and barren enough, yet its cheapness makes it beneficial to the neighbouring farmers, some hundreds of acres having been rented at a great an acre. But the numerous flocks of sheep fed there, turn much more to the profit of the proprietors. And the abundance of wool thereby produced, invited the inhabitants to fall very much into

the clothing trade; and the best broad cloths, both white and dyed, in England, are made in the west and north parts of this county, and indeed in the south and east parts too, but not in such quantities.

SALISBURY is a large, well-built, pleasant city. Besides the manufacture of flannels, druggets, and the cloths in particular, called Salisbury whites, for the Turkey trade, here is a considerable trade in bone-lace; and partly by those commodities, and by its markets, fairs, &c. it may be looked upon as flourishing a city as any in the kingdom, that depends entirely upon a home trade.

HINDON is a small old borough towards the borders of Dorsetshire. Its market is chiefly for cattle, and its manufacture a sort of fine twist, which employs even the children of the poor.

WESTBURY is another small borough: Its chief manufacture is coarse broad cloth.

CALNE is a small, but populous well-built town. Its chief manufacture also is cloth.

DEVIZES is an old-built town. Its chief trade, besides mauling, is the woollen manufacture, especially druggets, and its market is much frequented for corn, wool, horses, and all sorts of cattle.

CHIPPENHAM, on the river Avon; is a large, populous, well-built town. The chief manufacture here is cloth; but its main supports are, its market, and its thoroughfare between London and Bristol.

MALMSBURY is a neat town; and carries on a considerable trade in the woollen manufacture.

MARLBOROUGH is an ancient borough; but the chief tradesmen are shopkeepers, there being few manufacturers.

TROWBRIDGE is also an ancient town, in the west part of the county. The chief manufacture is broad cloth, and, for most part, of the fine sort, made with Spanish wool; and some clothiers have formerly got great estates.

BRADFORD is also noted, as well as Trowbridge, Melksham and other adjacent towns, for the finest broad cloths, of which so many were made about 40 years ago, when the trade was in its most flourishing state, that it was no extraordinary thing for clothiers hereabouts to be worth from 10,000 to 40,000l. and many of the gentry of these parts have been originally raised from this truly noble manufacture.

COSHAM is a pleasant village. The woollen manufacture is the chief employment and support of this place, here being some considerable clothiers.

WARMINSTER has a flourishing market for corn, and the malt trade here is greater than in any other town in the west of England; Bristol, and many places in Somersetshire, being supplied with it from hence. Here is also a considerable trade in wool and cloth.

WINE is made of the expressed juice of the grape, which immediately after the pressure is called must, and being fermented, becomes wine*. The fermentation causes a separation of the gross tartar, and the viscous part of the must from the pure suphurous and oily ones, in which are the spirit and essential salt. The solid part of the tartar adheres to the sides of the vessel, and the viscous fall to the bottom.

* The difference of flavour, taste, colour, and body in wines, is, perhaps, as much owing to the different manner and time of pressing, gathering, fermenting, &c. the grape, as to any difference in the grape itself. In Hungary, whence tockay, and some of the richest and highest flavoured wines come, they are extremely curious in these respects: for their prime and most delicate wines, the grape is suffered to continue upon the vine, 'till it is half dried by the heat of the sun; and if the sun's heat should not prove sufficient, they are dried by the gentle heat of a furnace, and then picked one by one from the stalks. The juice of this grape, when pressed out, is of a fine flavour, and sweet as sugar: this, after due fermentation, is kept for a year, and then racked from the lees, when it proves a generous, oily, rich wine, and is sold at a very high rate.

The Hungarians prepare a second sort of wine, by collecting together the better kind of grapes, carefully picking the fruit from the stalks, and then pressing out the juice: this is extremely sweet, and is made richer by infusing in it, after it has fermented for some days, a sufficient quantity of half dried grapes. This wine is very sweet, oily, of a grateful taste, and retains these qualities for a long time. There is a third sort, made from the pure juice of the same kind of grape without any addition. This is a more brisk and lively wine, and far less sweet. They likewise prepare a fourth sort, from grapes of different goodness mixed together: this, though not so generous, is nevertheless an excellent wine. These Hungarian wines are remarkable for preserving their sweetness, and for the delicacy of their taste and smell: they likewise do not grow easily vapid, and may be kept in perfection for many years. The practice of the Hungarians, which we have extracted from Hoffman's observations, fairly points out a method of improving must, or the juice of the grape, so as to make it of any assignable degree of richness and strength; and the celebrated Dr Stahl has given us another method of improving poor, thin wines, so as to make them strong and full bodied, without any ways altering their natural flavour or taste.

This

This he effects by exposing a quantity of the liquor, in proper vessels, to the action of a cold, freezing air, which soon congeals the watery parts alone, suffers the richer to be poured from them. By this means, the product of our own country, cyder, may be made of such a degree of strength and richness, as to equal, if not to exceed, the strongest bodied wines, and to stand the alternatives of the winter's cold, and the summer's sun, without alteration; and if as much care was taken in the culture, choice, and management of the fruit, and particularly in the pressure, and slow way fermentation of the juice, there is good reason to expect, that the flavour and taste would not fall far short even of the more excellent wines. See Stahl's Zymotechnicon. Opusc. Physico-Med. Schediasma commendans concentrationem vini aliorumque, and Dr Shaw's Comment on this Tract, in his third Essay in artificial Philosophy. Miller's Gardener's Dictionary.

The sharp sprightly wines, Champagne, Burgundy, Nants, Bourdeaux, &c. being most impregnated with essential salt, yield more spirit than sweet Spanish and Muscate wines; because they are more loaded with a viscid substance*.

- * The principles of wines are, an inflammable spirit, a phlegm or watery liquor, an acid salt or tartar, and a sulphureous oily substance. Wines, therefore, greatly differ in their taste, smell, and virtue, according to the various proportions and manner in which these principles are combined. There is in some wines another principle, which is a soft, oily, mild, viscid, sweet substance; and is particularly observable in sack, Frontinac, and the more generous kinds of Hungarian wine. The sulphureous, oily principle, is more subtle and grateful in some wines, than in others: thus Rhenish and Hungarian wines yield a far more delicate and subtle spirit, than those of France and Misnia: the very smell of good old Rhenish wine, has a remarkable effect in refreshing the spirits. Nor is the acid principle, or tartar, less different in wines: some abound with it, while others have it more sparingly, but of a more subtle kind, as the Spanish wines: the tartar of some wines, particularly that of Moelle, has a bitterish, nitrous taste, whence they are held to be laxative and diuretic.

REMARKS.

The great expence to which this nation is put for foreign wines, should induce us, methinks, to make our utmost efforts to try whether we cannot amply supply ourselves with this commodity, of which we are so fond; especially since some of those countries from which we take great quantities of wine, have begun to take less and less of our British manufacture: wherefore, to retaliate upon them in their own way, may not be impolitic.

It is commonly objected against this attempt, that our climate will not admit hereof to any considerable degree. I am afraid, that has never been effectually tried; but if it has not, for want of proper management, succeeded upon the grape, I am inclined to believe, that we have many other productions in Great-Britain, that will afford exceeding good wines. It has, however, been reported for these twelve months past, that several gentlemen in different parts of England, are going on in the planting and improving of vineyards, some wines having been made in this kingdom of good strength, and of a more delicate flavour than the best growths of France. It is greatly to be wished they may meet with success, since the nation pays such sums for those liquors, as tend to impoverish us, and augment the strength of our rivals. Another, and a greater consideration is, the health of the drinkers; for most foreign wines are sophisticated; whereas it will not be the interest of the English planter to sophisticate his wine, as he would thereby lose his credit, and the sale of it. But if Great-Britain nor Ireland should be found to afford good wines sufficient for our own consumption, might not our own plantations answer the end effectually? Certainly they might; but we have not room to shew how that may be effectually done. Some other opportunities may possibly hereafter offer.

WISBUY LAWS of COMMERCE and NAVIGATION.

Before we represent the laws of Wisbuy, we shall give some account of Gothland, and that city, the capital of it, once famous for trade above all the cities in the north. The isle of Gothland is situated by the Gothic Sea, in the diocese of Lincopen. It formerly belonged to the king of Sweden, but was afterwards annexed to the crown of Denmark.

According to Johannes Magnus, a Gothic historian, book 23. chap. 2. it was so called for the goodness of the country; for *GOTH* signifies *GOOD*: and Olaus Magnus, book 2. says it deserves that name for many reasons. There are several very fine ports in it, whose entrances are safe and easy: it is rich in cattle, of which it feeds prodigious numbers; abounds in venison, fish, forests, woods, pitch, tar, and fine marble. In the north-east part of the island, was a very fair and noble sea-port town called Wisbuy, built by foreigners, who came to live in the country: upon which account the citizens of Wisbuy had frequent quarrels with the Gothlanders, or inhabitants of the country, of whom they made a terrible slaugh-

ter in the year 1288. After which the citizens, to defend themselves against their enemies, obtained a permission, from Magnus king of Sweden, to wall their city, and erect battlements, and other fortifications. They flourished more and more, and grew great by their trade and navigation, to which they entirely gave themselves up: inasmuch that this town was a long while the axis and most celebrated market of Europe, there being no city so full of merchants, and so famous for its commerce. Hither came Swedes, Russians, Danes, Prussians, Livonians, Germans, Finlanders, Vandals, Flemings, Saxons, English, Scots, and French, to trade. Each nation had their quarter, and particularly streets for their shops and warehouses. All strangers were safe and welcome there, and enjoyed the same privileges as the townsmen themselves. The magistrates of this city had the jurisdiction, or rather the arbitrament, of all causes or suits relating to sea affairs. Their ordinances were submitted to in all such cases, and passed for just on all the coasts of Europe, from Muscovy to the Mediterranean. Thus much we have taken from Olaus Magnus, lib. 10. cap. 16. and baron Herbellain in *Rerum Muscovitarum Commentario*, p. 118. In the course of time, this town was entirely destroyed, except the citadel, which stands to this day. The Gothic historians do not tell us when nor how its destruction came upon it, only that it was through civil dissensions which arose from trifles, but occasioned great factions; which set them so against one another, that it ended in the entire ruin of them all, city and citizens. The ruins of it are now to be seen, and under them are often found tables of marble, porphyry, and jasper, witnesses of the ancient splendor and magnificence of the citizens. The houses were covered with copper, the windows gilt with gold, and all that is said or that is discovered of it, shews the incalculable riches of the inhabitants in times past. The citizens who survived the ruin of the city, retired to the country of the Vandals and Eastern Saxons, who were enriched with the wealth of these refugees. Albert king of Sweden rebuilt it, and granted great privileges to all that should come and inhabit it: but it never could recover its trade and former magnificence.

It was in this city of Wisbuy that the sea laws and ordinances, which the Swedes brought into credit, were composed; they were received as righteous and just, and are kept in the Teutonic language till now. The Germans, Swedes, Danes, Flemings, and all the people of the north observe them: but none have been so curious, as to preserve the date and the remembrance of the time when they were composed and published.

ARTICLE I.

Whatever mariner, whether pilot, mate, or sailor, binds or hires himself to a master, if he afterwards leaves him, he shall refund what wages he has received; and besides that, pay half as much as the master had promised him for the whole voyage. And if a mariner has hired himself to two several masters, the first that hired him may claim him, and force him to serve him. Nevertheless, he shall not be obliged to pay him any wages at all for the whole voyage, unless he does it of his own good-will.

ARTICLE II.

Every pilot, mate, or mariner, that does not understand his business, shall be obliged to repay to the master whatever wages he had advanced him, and be besides bound to pay half as much more as he had promised him.

ARTICLE III.

A master may turn off a mariner, without any lawful cause given, before he sets sail, paying him half what he had promised him for the voyage. After he has set sail, and is gone out of his port, that master who turns off a mariner without lawful cause given, is obliged to pay him all his wages, as much as if he had performed the voyage.

ARTICLE IV.

No mariner shall lie or stay a night ashore without the master's leave, on pain of forfeiting two deniers, nor shall he unmoor the ship's boat in the night, under the same penalty: By deniers here are understood, those of which 24 make an ounce of silver. The double deniers are now called carolus's, or grand blancs, by the French and other nations.

ARTICLE V.

The mariners shall have three deniers a last for loading and three for unloading, which is to be reckoned only as their wages for guindage or hoisting*. These duties are never fixed on account of the dearth of provisions and the value of money, which changes and increases daily. The rate of guindage or reguindage, is commonly in France five sols a last, which is two sols six deniers Tournois a ton.

* i. e. Loading or unloading.

ARTICLE VI.

It is not lawful to arrest or imprison the master, pilot, or mariners of a ship, in an action of debt, when they are ready to sail; but the creditor may seize and sell any thing he finds in the ship, that belongs to his debtor. L. 1. de Naviculariis, lib. iv. cod.

ARTICLE VII.

A ship being freighted for all the summer, the season shall end on the feast of St Martin, or the 11th of November.

ARTICLE VIII.

Whoever shall make use of another man's lighter, without his leave, shall pay the owner four sols a day, unless it was in a case of necessity, as of fire, or the like.

ARTICLE IX.

If any one has occasion to have a debt witnessed, he need not carry strangers aboard, but may make use of the people in the ship. The same he may do in all acts where witnesses are necessary, lib. 10. cod.

ARTICLE X.

It is not lawful to sell or mortgage a vessel let out to freight, but it is lawful to freight it or underlett it to others for the same time, and the same voyage. The words of this article are, *de la froter ou sous louer a d'autres pour le mesme temps, & pour mesme voyage*: which we think we have rendered right, notwithstanding the difficulty there seems to be in the sense, or the equity of this law.

ARTICLE XI.

If a ship that was freighted for a voyage is sent upon another longer than that, or upon several voyages, if there's no protestation or dissent entered against it, the freighter shall pay but half the damage that may happen to the ship in such longer voyage or voyages.

ARTICLE XII.

If a mast, sail, or any other tackling is unfortunately lost when the ship is under sail, or otherwise, the loss shall not be brought into an average. But if the master is obliged to cut his mast by the board, or spoil any of his tackling for the preservation of the ship, the bottom and the cargo shall make good the damage by an average.

ARTICLE XIII.

The master shall not sell the ship, nor any part of her tackling, without the consent of the owners; but if he wants victuals, he may pawn his cables and cordage, always observing to have the advice of the mariners.

ARTICLE XIV.

The master being in port, ought not to depart and set sail without the advice and consent of the major part of the mariners: if he does, and there happens any loss, he is bound to make satisfaction.

ARTICLE XV.

The mariners are obliged, to the utmost of their power, to save and preserve the merchandize, and for doing it ought to be paid their wages, but not otherwise. It is not lawful for the master to sell the ship's cordage, without the consent of the owners or factors; but he is bound to preserve all, as much as in him lies, on pain of making satisfaction.

ARTICLE XVI.

The mariners are obliged to save as much as they can, and the merchants may take away their goods, paying the freight, or satisfying the master: otherwise the said master may fit out his ship, if he can do it in a little time, in order to accomplish his voyage: if he cannot do it, he may relade his merchandize upon other vessels bound for the port to which he was to carry them, paying freight.

There is some difficulty in this article also, and, perhaps, the error is in the French version; we not understanding the Teutonic, which is the original, and making use of the translation printed by authority at Roan.

ARTICLE XVII.

The mariners shall not go out of the ship without leave of the master, on pain of paying the damage that may happen in their absence, unless it is when the ship lies ashore, moored

with four cables: in such case, they may go out of her for a little time, taking care not to transgress in it.

ARTICLE XVIII.

A mariner being ashore in the master's or the ship's service, if he should happen to be wounded, he shall be maintained and cured at the charge of the ship: but if he goes ashore on his own head, to be merry and divert himself, or otherwise, and happens to be wounded, the master may turn him off, and the mariner shall be obliged to refund what he has received, and, besides, to pay what the master shall be forced to pay over and above to another whom he shall hire in his place.

ARTICLE XIX.

If a seaman falls ill of any disease, and it is convenient to put him ashore, he shall be fed as he was aboard, and have some body to look after him there, and, when he is recovered, be paid his wages; and, if he dies, his wages shall be paid to his widow or heirs.

ARTICLE XX.

If, by stress of weather, it is thought necessary to throw any goods overboard, to lighten the ship, and the supercargoes or merchants aboard will not consent to it, the merchandize shall nevertheless be thrown overboard, if the rest of the people aboard think it safest to do so: in such case, as soon as the ship puts into port, a third part of the mariners must go ashore, and purge themselves by oath, that they were forced to do it for the preservation of their own lives, the ship, and the rest of the cargo. The merchandize so thrown overboard shall be brought into a gross average, and be rated at the same price the other merchandize of the same sort that was saved was sold for.

ARTICLE XXI.

Before the master throws any goods overboard, he is bound, in the absence of the merchant, to ask the pilot and mariners advice; and the loss shall be made good by contribution, the ship and cargo being accountable towards it.

ARTICLE XXII.

The master and mariners are obliged to shew the merchant the cordage that is used for hoisting his goods in and out of the ship; if he does not do it, and there happens any accident, they shall stand to the loss; but if the merchant has seen and approved of it, the damage he sustains shall be borne by himself.

ARTICLE XXIII.

If a ship is ill trimmed, and it happens that the wine she has aboard is lost, through the master's ignorance or negligence in governing her, the said master is bound to pay for it: but if the mariners clear him upon oath, the leakage or loss shall be borne by the merchant.

ARTICLE XXIV.

No man shall fight, or give another the lie aboard; he who offends in this kind, shall pay four deniers; and if the mariner gives the master the lie, he shall pay eight deniers: but he who strikes him shall pay 100 sols, or lose his hand. If the master gives the lie, he shall pay eight deniers; if he strikes, he ought to receive blow for blow.

Loss of his hand: this was a common punishment among the Scythians, and the people of the north. Lucianus de Toxari. And also among those in the east. Harmonopolus de Poenis.

ARTICLE XXV.

The master may turn off a mariner for a lawful cause; but if the said mariner compensates for his fault, and the master nevertheless refuses to admit him again, the mariner may follow the ship to her destined port, and he shall be paid his wages as much as if he had made the voyage in the same ship: if the master hires a less able seaman in his place, and there happens any damage by it, the master is to make good the loss.

ARTICLE XVI.

If a ship riding at anchor in a harbour is struck by another ship which runs against her, driven by the wind or current, and the ship so struck receives damage, either in her hull or cargo, the two ships shall jointly stand to the loss. But if the ship that struck against the other might have avoided it, if it was done by the master on purpose, or by his fault, he alone shall make satisfaction. The reason is, that some masters who have old crazy ships, may willingly lie in other ships way, that they may be damaged or sunk, and so have more than they were worth for them: on which account this law provides, That the damage shall be divided, and paid equally by

by the two ships, to oblige both to take care, and keep clear of such accidents as much as they can.

ARTICLE XXVII.

A ship being at anchor in a harbour, where there is so little water that she touches, another ship comes and anchors near her; if the ship's company of the former vessel require those of the latter to take up their anchor, because it is too near them, and they do not do it, the former may take it up themselves; and if the latter hinders them, they shall make satisfaction for all the damage that may happen by that anchor.

ARTICLE XXVIII.

No master of a ship shall lie at anchor in a haven without fastening a buoy to his anchor, to give notice to others where it is: if he omits to do so, and any damage is sustained by it, he is obliged to make it good.

ARTICLE XXIX.

In any voyage, where wine is the trade, the master is obliged to find the seamen with it, and then he may give them but one meal a day: but where it is not to be had, and the mariners drink water, he shall give them two meals a day.

ARTICLE XXX.

When a ship is let out to freight, the master ought to assign and shew the seamen where they are to have the stowage that belongs to them; and they must declare whether they will load it themselves, or will let the master freight it with the rest of the ship, and be paid for their proportion.

ARTICLE XXXI.

A ship being arrived at her destined port, those seamen who would be paid their wages there, if they have no chest nor bedding, or other moveables aboard, equivalent to their wages, they must give the master security that they will serve out the rest of the voyage, and see it completed, or he may refuse to pay them before.

ARTICLE XXXII.

Those seamen who bargained for a certain proportion of the ship's freight, instead of wages in money, in case freight is not to be had for her when she arrives at the port for which she was bound, and she must go further in quest of it, they must go with her: but those seamen who agreed to be paid in money, shall have their wages there.

ARTICLE XXXIII.

When a ship is safe at anchor, the seamen may go ashore, one after another, or two together, and carry sufficient meat and bread with them for one meal, but no drink: nor must they stay any longer time ashore; for if, through their absence, any damage happens to the ship or goods, they are obliged to make satisfaction. And if any one of the crew is wounded, or comes by any other ill accident in doing the merchant's business, the merchant is bound to cure him, and indemnify the master, pilot, and mariners.

ARTICLE XXXIV.

A ship being let out to hire, to a merchant to freight her, and he agrees to load her in a certain time, if he fails, and exceeds that time fifteen days, or more, and by this means the master loses his opportunity to freight his ship, the said merchant shall make him satisfaction for his delays, and pay his damages and interest, a quarter of which belongs to the mariners, and three quarters to the master.

ARTICLE XXXV.

If the master, being upon his voyage, wants money, he must send home for it, but ought not to lose a fair opportunity of proceeding; if he does, he shall satisfy the merchant for all the damage he may sustain by his delay: but, in case of great necessity, he may sell part of the merchandizes, and, when he arrives at his destined port, he shall pay the merchant for them, at the same price the rest was sold at, and the merchant shall pay freight as well for the merchandizes the master sold, as for those he delivered him.

ARTICLE XXXVI.

When the master arrives in a port, he should be careful to place his ship well, to moor her well; for if, by his neglect in this, the merchandize aboard receives any damage, he is obliged to make it good.

ARTICLE XXXVII.

If a ship has been in a storm, and the merchant, master, or crew, think she ought to be refitted, to enable her to con-

tinue her voyage, they may do it, and then proceed: however, the master shall be paid his freight for the goods saved, which are for the merchant's profit only. If the merchant has no money, and the master will not give him credit, he may take his merchandize in payment, at the market-price.

ARTICLE XXXVIII.

The master shall not throw any goods overboard, without first consulting the merchant; and if the merchant will not consent to it, yet if two or three of the most experienced mariners think it necessary, they may be thrown overboard, but the mariners must swear they thought it was expedient so to do. If there is no merchant or factor aboard, the master and major part of the mariners may lawfully resolve upon what is fit to be done.

ARTICLE XXXIX.

The merchandize thrown overboard shall be valued in the average, at the price the rest was sold for, freight only deducted.

ARTICLE XL.

The master, in the average, shall pay his proportion for the goods thrown overboard, either by calculating what the ship is worth, or what the freight amounts to, at the choice of the merchant; and the merchant shall pay his, according to the value of the remaining merchandize: it shall be left to the merchant to leave or take the ship at the price the master rated her at.

ARTICLE XLI.

If any one has plate, or merchandize of great price, in his chest, he is bound to declare it beforehand, and so doing, he shall be paid for his merchandize according to its worth, and the plate after the rate of two deniers for one.

There is something a little dark in this article; but it is as we find it in the French version, as is also what is obscure in others; and we excuse the translator, considering the Teutonic is an untoward language to turn into French: we with our readers may have as much tenderness for us.

ARTICLE XLII.

If any one has money in his chest, let him take it out, and carry it about him, and he shall pay nothing.

ARTICLE XLIII.

If a chest is thrown overboard, and the proprietor does not declare what is in it, it shall not be reckoned in the average, but for the wood and the lock, if it be locked, according to their value.

ARTICLE XLIV.

If it be thought convenient in any river, or off any dangerous coast, to take aboard a pilot of the country, and the merchant oppose it, yet, if the master, the ship's pilot, and the major part of the seamen, are of another opinion, he may be hired, and the pilot shall be paid by the ship and cargo, as averages are calculated for goods thrown overboard.

ARTICLE XLV.

If a master wants money or victuals, and for that reason is forced to sell part of his merchandize aboard, or borrow money at bottomry, he ought to pay, within 15 days after his arrival, for the merchandize, at a reasonable price, neither the highest nor the lowest; and if he does not, and the ship be sold, and another master put in her, the merchant to whom the merchandize belonged, or the creditor that lent the money on bottomry, shall, at any time within a year and a day, have a good right to the ship, till satisfaction is made for the goods sold, or money borrowed.

ARTICLE XLVI.

A ship being laden, the master ought not to take in any more merchandize, without leave of the merchant: if he does, and there happens any occasion to throw goods overboard, he shall pay as much as he took in goods over and above the ship's loading: wherefore he ought, when he is loaded, to declare how much goods he has, and ought to have aboard.

ARTICLE XLVII.

The seamen are obliged to keep and match the merchandize, at the request of the merchants, master, and pilot.

ARTICLE XLVIII.

If, for the preservation of the commodity, the seamen turn up the corn aboard, they shall be allowed a denier a last for each time; and if they will not do it, they are liable for the damage that comes to it for want of it: they shall also be al-

lowed a denier a laft for unlading, and fo for other merchandize.

ARTICLE XLIX.

The mariners ought to represent to the master what condition their tackling for lading and unlading is in, that if the cordage is out of repair, or any other part of it, it may be mended; and if the master does not do it, he shall be accountable for whatever damage happens by that means; but if the mariners do not make their representation, the accidents that befall the merchandize shall be indemnified at their expence.

ARTICLE L.

If two ships strike against one another, and receive damage, the loss shall be borne equally between them, unless the men aboard one of them did it on purpose; in which case, that ship shall pay all the damage.

ARTICLE LI.

To prevent all inconveniencies, all masters of ships are required to fasten buoys to their anchors, on pain of making satisfaction for all the damage that may happen for want of

ARTICLE LII.

When a ship arrives at her port of discharge, she ought to be unladen with all possible dispatch, and the master to be paid in eight or fifteen days at farthest, according to the circumstances of the voyage.

ARTICLE LIII.

If a ship, freighted for one port, enters another, the master, together with two or three of his chief mariners, ought to clear themselves upon oath, that it was by constraint and necessity that they went out of their way: after which he may proceed in his intended voyage, or ship the cargo aboard other ships, paying freight for the goods, which the merchant shall also pay him, and what else is due on account of the merchandize.

ARTICLE LIV.

It is forbidden to any mariner to go out of the ship and leave it, after the voyage is done, and the ship discharged, unless her sails are all in, her furniture taken away, and she is sufficiently lightened of her ballast.

ARTICLE LV.

If a ship strikes, the master may take out part of his cargo, and relade it aboard other ships, and the charges of it shall come into a general average upon ship and goods: however, the master, and two or three of his seamen, shall purge themselves upon oath, that they were forced to do it to save the ship and cargo.

ARTICLE LVI.

When a ship arrives at the mouth of any river or harbour, and the master finds she is too heavy laden to sail up, he may put part of the cargo aboard hoys, lighters, or barges, and an average shall be made for it, of which the master shall pay two-thirds, and the merchant one-third; but if, after the ship is intirely discharged, the ship draws too much water, and cannot sail up, then the master shall pay all the charges.

ARTICLE LVII.

The merchandize being put aboard lighters, in order to be landed, if the master has any jealousy of the merchant's ability or honesty to pay him, he may stop it at his ship's side, and refuse to let it go, 'till the merchant has paid him in full for his freight and charges.

ARTICLE LVIII.

All lighters, open or close, shall be discharged in five days.

ARTICLE LIX.

When a ship is at anchor before an harbour, with which her pilot is not well acquainted, the master ought to hire one at the place, to carry his ship into it, who shall be paid by ship and cargo.

ARTICLE LX.

When a ship is in an harbour or river, and the master does not know the coast nor the river, he ought to take a pilot of that country to carry her up the river or harbour, which pilot shall be maintained by the master, and paid by the merchant.

ARTICLE LXI.

If a seaman deserts his ship, and carries away what he has received of the master, and the master apprehends him, the

fact being proved upon him, by the depositions of two other seamen, he shall be condemned to be hanged and executed.

ARTICLE LXII.

If a master discovers that a mariner is infected with any contagious distemper, he may put him ashore on the first land he makes, without being bound to pay him any wages, provided the case be proved by the attestation of two or three of the other mariners belonging to his ship.

ARTICLE LXIII.

If a pilot or mariner buys a ship, or is made master of one, he shall be discharged from his own master, paying him back what he received of him; and it shall be the same if he marries.

ARTICLE LXIV.

If the master, merchant, and owners have any difference, and the owners will not furnish their quota of the charge of the outfit, the master may nevertheless proceed in his voyage or voyages with the said ship, paying the seaman what he thinks reasonable.

ARTICLE LXV.

If the master lays out any money in repairing or refitting his ship, or buys any tackling, or any thing else for her use, he shall be reimbursed, and every owner pay his part.

ARTICLE LXVI.

If the merchant obliges the master to insure the ship, the merchant shall be obliged to insure the master's life against the hazards of the sea.

ARTICLE LXVII.

If two ships strike against one another, and one of them unfortunately perishes by the blow, the merchandize that is lost out of both of them shall be valued, and paid for pro rata by both owners, and the damage of the ships shall also be answered for by both, according to their value.

ARTICLE LXVIII.

In case of necessity, the merchant may sell part of the merchandize, to raise money for his ship's use, and the ship happening to be lost afterward, the master shall, however, be obliged to pay the merchant for the said merchandize so sold, without pretending to deduct any thing for the freight.

ARTICLE LXIX.

When the master is forced to sell any of the merchandize, he is obliged to pay the same price for them as the same goods were sold for at the market for which they were designed, and the master shall be paid his freight for what goods are sold.

ARTICLE LXX.

If a ship under sail does damage to another, the master and mariners of the ship doing the damage, must swear they did not do it designedly, and could not help it, and then the damage shall be borne by both ships, in equal proportion; and if they refuse to swear, the damage shall be paid by the ship that did it.

WOOL, and WOOLLEN MANUFACTORY.

Under the articles BISCAY, CASTILLE, CATALONIA, FACTORS, INDIA-HOUSE of SPAIN, and FRANCE and SPAIN, we have shewn the extraordinary progress that both FRANCE and SPAIN have made, and are daily making, in the woollen manufactures, and which must necessarily tend to the greater and greater injury of our branches of trade in the like way. We have too long experienced the unspeakable detriment that France alone has done to this nation in this article only; and if Spain is determined to supply her own dominions with what they took from us in this kind of manufactures, we must soon sensibly feel the effects of this policy; and more especially so, if the Portuguese also should betaking measures to encourage our competitors more and more in this capital article: and this I am assured, by my correspondence from Portugal, is the real case.—There are several other states too that are striving for some share in this the grand British staple of commerce. In a word, we are losing ground in most parts of the world, in this branch, where we had long got footing, as has been shewn throughout the course of this performance.—It is, therefore, certainly full time to think, without delay, of every measure that is in our power to save and preserve ourselves from the calamitous consequences that must result herefrom.

In the course of this undertaking, we have endeavoured also to point out the CAUSES of these things, and have occasionally suggested what we humbly apprehend to be the most rational and practicable ways and means to retrieve what we have lost in this essential particular.

As the running of wool from Ireland has, among many other things, been attributed to be one principal cause of the before-intimated misfortunes to our trading interest, whatever bids fair to remove an evil of this nature, cannot be too often inculcated, nor too seriously weighed and considered. Many very judicious and well-intentioned gentlemen have endeavoured, by variety of schemes, to prevent this practice of smuggling wool. The great difficulty that seems to attend this matter is the reason, perhaps, why many good proposals have been rejected, and why, indeed, none of our laws hitherto have been effectual to the purpose intended.

Among others who have attempted this great work, the judicious Mr Bradshaw has lately obliged the public with something that seems to merit great regard, and, therefore, a short abstract of what this gentleman has offered, may have its use, if any thing of this should ever be attempted in earnest.

Long experience has shewn us, that no laws hitherto made have prevented the running of raw wools from Ireland to France, and their manufactured goods to foreign countries, and that nothing can put a stop to this evil, but making it the interest of Ireland to discourage that practice.

The importation of Spanish wools into Ireland, and their clothiers making Spanish cloths therewith, instead of working up their own wool, is the reason why they have the more of their own wools to sell to France: wherefore let Spanish wool be prohibited in Ireland, and their manufacturers will work up their own wools, and then there will be the less for France to purchase.

Let such woollen goods made in Ireland be exported to Great-Britain only, not to be consumed in England, but exported from thence to foreign countries.

To prevent the Irish from injuring the English woollen manufactures, let a Duty be laid on all Irish woollen goods imported into England, and drawn back upon exportation to foreign countries, &c. This duty would prevent their wear in England, and also hinder the Irish from running their wools to France.

To induce Ireland to lay aside the manufacture of Spanish cloths, and take to the working upon their own wools, the ingenious gentleman shews the Irish the advantage of the one to be far superior to that of the other, thus:

The Spanish wools imported into Ireland, from the 25th of March, 1743, to the 25th of March, 1744, were 128,086 fustle pounds;—which I compute to be about 570 bags.

I shall suppose each bag of wool sufficient to make four pieces of Spanish cloth: then the cloths manufactured were 2280, which, upon an average, being worth 20l. each cloth; the produce of the year's importation of Spanish wools will amount to 45,600l.

It is computed that, in woollen manufactures, four-fifths of the value of the goods, when finished for sale, are given to the labour of the people; therefore I shall suppose, that, of this 45,600l.

There was paid to the labour of the people, - 1. 36,480
And to Spain for the wool, &c. - 9,120

To make one piece of Spanish cloth, completely finished for sale, will take up three months; it is seldom finished in less time: the manufacture is so tedious, that some of the people employed are often obliged to wait for work, while others are finishing their parts, as may be supposed by the following table, which I received from an eminent clothier, on whose veracity I can depend.

To make one piece of Spanish cloth will employ

	men.	wom.	boys.	days.
Dyeing	1	0	0	1.
Beating and picking	0	2	0	4
Scribbling	2	0	0	5
Spinning the chain	0	8	0	7
Spinning the wool	0	8	0	7
Winding the chain	0	3	0	1
Warping, winding quills, and weaving	2	0	1	24
Spinning the list	0	2	0	2
Burling	0	2	0	4
Milling	1	0	0	1
Dressing	4	0	0	5

By this table it appears, in how many days less than three months the poor employed in this manufacture finish their several parts; and several of them are often idle for want of work.

The same people employed in this table, in manufacturing one cloth made of Spanish wool, are requisite in manufacturing a cloth made of Irish; and they can finish such a cloth in two months, as completely as they can a cloth made of Spanish in three; therefore, if fully employed, can work up half as many more yards of cloth in one year, as an equal number can do who are wholly employed in manufacturing of Spanish. Besides, as coarse wools may be worked up into goods of various kinds, and the wool so disposed of as to give employment, at any time, to a greater number of hands than the like value of Spanish wools can employ; all manufactures of coarse wools can be finished with greater dispatch. Therefore, since the wealth of a nation is increased by the

number of the poor it employs, and the quantity of the product of the lands they consume, let it be considered what number of the poor of Ireland 9,120l. value in Spanish wools will employ, and what number of poor the wools of Ireland, valued at 12s. the great stone containing 16lb. will employ and subsist.

I have made the best enquiry I was capable of, and find that the wools Ireland yearly produces are computed at 480,000 stones, of 16lb. each; some think they are less, but no accounts that I have received from any part of that kingdom say more.

I shall therefore consider the wools of that kingdom under the highest estimation that I have received, and shew what that quantity of wool would produce, if worked up for their own consumption, or for exportation to England, and what loss that kingdom sustains yearly, by neglecting the manufacturing her own wools, encouraging the manufacture of Spanish, and smuggling her raw wools to France.

I shall likewise shew the gain that would arise to that kingdom, if their own wools were fully manufactured by their own people.

I shall suppose the medium price of the wools of Ireland to be 12s. the stone of 16lb. then	1.
480,000 stones, at 12s. the stone, are	288,000
If 10l. value in wools, when completely manufactured for sale, is worth 50l. the value of the yearly wools of Ireland, when worked up, must be	1,440,000
If $\frac{1}{5}$ of this sum be paid to the working people for labour, and the remaining $\frac{4}{5}$ be paid to the rents of the kingdom, for the produce of their sheep, the earned money of the poor of that country, in working up the yearly produce, will amount to	1,152,000
And they will work up as much of the product of the kingdom as amounts to	288,000
Consequently, Ireland will gain yearly, by the manufacturing of her own wools	1,152,000
And, by the manufacturing the whole year's importation of Spanish wools, she can only gain	36,486
To earn which sum, she must yearly pay to Spain	9,120

And have numbers of her poor idly supported by high wages, to make them amends for the many days the manufacturing of Spanish wool leaves them unemployed.

It is very difficult to compute the exact number of poor that the wools of a country, if worked up among themselves, would employ and subsist: but, as most working people earn no more than what is sufficient to maintain them comfortably, I am of opinion, that the finding out the quantity and value of any kind of goods manufactured in a country, and the value of the common annual subsistence of a manufacturer, is the best way of judging of the number of working people subsisted by that manufacture.

I shall therefore suppose, that the annual subsistence of working men, women, and children, in Ireland, may be purchased, at a medium, for 10l. per annum, and that 480,000 stones of wool, when fully manufactured, are worth 1,440,000l. Then the number of poor subsisted by the manufacturing the yearly produce of the wools, will be 144,000 people.

I shall consider next how many of the poor of Ireland are subsisted by the manufacturing Spanish wools, admitting that they are not, during the whole year, one day unemployed, and that they manufactured the whole importation of Spanish wools in the year 1743, which was much larger than any quantity they ever imported in one year into that kingdom. I computed that 570 bags of Spanish wool, when fully manufactured for sale, would amount to 45,600l.

By that computation, the poor employed can be no more than 4,560 persons.

It is therefore obvious, that Ireland loses immensely every year by encouraging the manufacture of Spanish cloths, discouraging the manufacturing her own wools, and selling her unmanufactured wools to France. To these causes we must ascribe the number of poor that are now in the places of manufacture in France, where, on account of religion, as well as skill, they have met with protection and encouragement.

If the industrious poor are compelled to quit their country for want of employment, the gentlemen of Ireland must lose their former markets for the product of their lands. The loss will be greater to the landed than the trading interest; gentlemen must abate of their rents: for it is the employment of the poor that must keep them up to their value. And while the Irish encourage the manufacturing Spanish cloths, which has obliged numberless poor to quit that country, or come to the lands for their maintenance, the price of their beef, butter, &c. will be low; but the value of their lands must rise, as the manufacture of Irish wools is encouraged; and as the greater numbers of their poor are employed. Therefore a trade with England for such woollen goods as Ireland may manufacture more than are requisite for her own consumption must be of the greatest advantage to that kingdom.

will

will encourage them to work up early their surplus wools, and employ the number of the poor already mentioned. Therefore, if encouragement to manufacture Irish wools will keep up the price of the product of the lands of Ireland (as consumption of all commodities necessarily causes the advance of prices); if it will bring home numberless manufacturers, who have found employment in other countries, and enable their poor to maintain themselves, who are now a public charge: it must be the interest of Ireland to manufacture her own wools, prohibit the importation of Spanish wools, and prevent the running their raw wools to France, which must ever be detrimental to the woollen manufactures of both England and Ireland.

If the union proposed between England and Ireland, with respect to a liberty of exporting to England such woollen goods as Ireland shall manufacture, should be agreeable to both kingdoms, I am convinced no gentleman in Ireland will consent to the running of raw wools to France. If he is able to procure but a nursery of spinners upon his estate, the produce of their labour (though of all labour on wools the most sparingly paid for) will keep up the price of the product of his lands, which will be much more advantageous to him than what he can gain by permitting the wools that grow on his lands to be sent to France.

If this union should not be agreeable to both kingdoms, and that the people of Ireland shall be obliged to wear (as they now are) what woollen goods they manufacture, I am of opinion it appears that it is not the interest of that kingdom to wear Spanish cloths, if manufactured in Ireland, which must bring such numbers of their poor to the parish for subsistence, or oblige them to quit the country for want of employment, who might be subsisted by their labour on Irish wools, without any charge to the landed interest.

For if such of their poor as could not be employed in manufacturing their wools fully, were encouraged to spin their surplus wools for exportation to England, their poor might be employed and subsisted, since it is evident, by the price we have paid them of late for their spinning, that the labour of the comb and spinner is equal to the first cost of the wool; and as England has taken upwards of 80,000 stones of their yarn, (as shall be shewn in its place) the poor of Ireland have earned 48,000*l.* for their spinning, and we have paid them the like sum of 48,000*l.* for their wool, which will appear from the following computation. A ball of wool consists of one pound and a half of combed wool, which, at 12*s.* per stone of 16*lb.* costs 13½*d.*: when spun into skains of yarn, is sold from 2*s.* 3*d.* to 3*s.* per ball, according to the number of skains into which it is spun.

I shall take the lowest price for my valuation: if, therefore, a ball of wool that costs but 13½*d.* when spun into yarn, is sold for 2*s.* 3*d.* it appears that the money earned by the comb and spinner is equal to the first cost of the wool: therefore, if the poor of Ireland were employed to manufacture their surplus wools, no farther than through the hands of the combers and spinners, numbers might be maintained, and Ireland would become a nursery for England (but never can be so, while her poor are engrossed by the high prices now given for the spinning of Spanish wools) and the landed interest of Ireland would be considerable gainers by their poor being so far employed, since it must benefit a nation to be saved from the charge of maintaining its poor.

The gentlemen of Ireland may imagine they receive their rents from their tenants; but it is the consumer that pays them both the price of their wools, and of the product of their lands.

If their artificers and manufacturers are obliged to quit the country for want of employment, the consumption of the product must be greatly lessened: therefore all prudent ways ought to be tried, to keep those at home that are willing to work, and to induce them to return who have been obliged to seek for their subsistence abroad.

Every one who lives in that country, and wears the manufacture of Irish wools, ought to be considered, for what he wears, eats, and drinks, as a tenant to the lands and a paymaster to the workmen.

How many such tenants the gentlemen of Ireland may keep in that country, and how many old ones they may prevail on to return, by preventing the running of their wools to France, encouraging the manufacturing their own, and prohibiting the importation of Spanish, I have endeavoured to shew; which I shall submit to the consideration of the gentlemen of that kingdom.

I shall next consider the advantages England will have, by consenting to the importation of such woollen goods as Ireland shall send us, under a duty at importation to be drawn back only on exportation to foreign countries.

The accounts that were published the year after the peace of Utrecht, of the great quantities of Irish wools that were run out of Ireland, and imported in one year into France, so alarmed our manufacturers and landed gentlemen of England, that we have ever since endeavoured to make the most effectual laws to prevent the exportation of the wools of that country, and are now at a great annual expence by the many ships stationed on the coasts of Ireland for that purpose; but notwithstanding

we have been unwilling to receive any proposals, that have been offered to the consideration of parliament to prevent this evil, if such proposals had the least tendency to a free liberty of exportation of the woollen manufactured goods of that kingdom.

However just our apprehensions were thirty years ago, there is not the least room for them now; since Ireland does not produce, at present, two-thirds of the wools that were supposed to be the growth of the country at that time.

The decrease of their sheep has been owing, not only to the very great danger and difficulty the people of Ireland found in sending their wools to France, under the severe laws we made to prevent it, but to several acts of parliament, which have been made in that kingdom since the year 1714.

By the act to encourage tillage, every farmer in Ireland is obliged to plow a certain number of acres, in every hundred, which he holds by lease. This obligation, together with the great difficulty and risk in sending their wools to France, obliged many people to plow up their pasture grounds, which lessened their sheep throughout the kingdom; for they found a certain market for their corn, instead of an uncertain one for their wool.

The several acts for encouraging the linen manufactures of that kingdom, have been another cause of lessening the growth of their wools; since it is well known that they have no more sheep in the north of Ireland, where that manufacture is established, than are sufficient for the necessary subsistence of the people.

These considerations should entirely remove our former apprehensions, and convince us, that the Irish cannot have the quantity of wools, which they had before these acts of parliament were made.

We ought to examine what the wools of that country are at present, and what we have to fear if the wools, which their own people cannot consume in apparel, were fully manufactured and exported to us, and from hence exported to such foreign countries as we trade to.

We are very certain that we may grow less considerable in foreign markets, but cannot be more so, while the French continue to procure the wools of Ireland; and since we have made so many laws to prevent it, and that it is evident they have been ineffectual, we should try other ways and means to stop the evil we have so long complained of. For since by long experience we find that the people of Ireland are not, by any laws, to be forced from this pernicious practice of selling their wools to France, and that neither punishments nor penalties can prevent it; I am clearly of opinion, our condition cannot be worse than it is at present, if we permit them to send us such woollen goods as they shall manufacture for exportation, which will effectually put a stop to their sending to France; because they will then find it more their own interest to prevent it, than it is now their interest to connive at and encourage it.

The many creeks and by-places on the coast of Ireland are so well known to the French, that their agents, notwithstanding the many difficulties that attend it, will be always able to procure a loading of wool; for the farmer, whose lands lie contiguous to the sea, will be as ready to sell as the French are to buy. But these temptations will cease, if the farmer finds that he can have a market near his own home for his wools, when spun only; because the French can give no price for the small quantity of wool that he has to sell, that can be equal to the advantage the farmer will have by its being so far manufactured.

Since the last declaration of war against Spain, the wools of Ireland have sold at a much higher price than they were ever known at before. When they exceed ten shillings per stone of sixteen pounds, our manufacturers cannot afford to purchase them. But as the prohibiting the importation of Spanish wools into Ireland, will occasion a greater plenty of their spinning, we may be certain of having more of their surplus wools so far manufactured, and thereby lessen the quantity, they would otherwise fully manufacture themselves. We do not buy their spinning for its fineness, (our own people spin much finer) but on account of its nature and quality. It is very useful to our weavers, in mixing with our own spinning, and making several sorts of goods for foreign markets; and on that account only we buy it. But if we cannot take from them in spinning, such wools as they have more than are requisite for the cloathing of their own people, we must give them leave to export, fully manufactured, what they cannot consume, or the French will certainly take from them their wools unmanufactured.

They are not (as we are) limited by price; for by the help of one pack of Irish wools, France manufactures two of her own, without which they are useless to her for foreign markets, notwithstanding the wool she procures from Germany, Portugal, Barbary, and Turkey.

The wools of France are short and coarse; they are not (to speak in a manufacturer's phrase) so fine in the thread, or so long in the staple, as those of Ireland: for which reason, France can ever give double the price that we can afford for the wools of that country, which I shall shew more fully hereafter.

hereafter. This proves how dangerous an enemy we have to encounter, and that nothing can prevent France from buying them, but making it the interest of Ireland to manufacture their wools; which engages me to think, that the best law that can be made, to prevent France from procuring the wools of Ireland, will be, to permit the people of that country to send their manufactured woollen goods to England, under a duty at importation, to be drawn back on exportation to foreign countries.

I have already shewn the quantity of wool, by estimation, that Ireland yearly produces, and what value these wools may be manufactured into by their own people, if the importation of Spanish wool is prohibited. I shall now consider what number of people there are in that kingdom, what their own consumption must be of the wools they may manufacture; what quantity of wool we have taken from them last year, how much in woollen yarn, and how much in worsted yarn, and to what value the surplus wools of Ireland, if fully manufactured, will amount. The exportation to England of this last article, is the whole we have to fear from the union proposed, which I shall shew cannot be manufactured into such a quantity of cloth, or other woollen goods, as will prejudice England to receive, for exportation. On the contrary, I am of opinion, the encouragement to manufacture and export it, will be the means of increasing and extending our commerce.

The people of Ireland are computed at 1,666,000: I shall suppose the one half of their people to be men and boys, and the other half women and girls; and that every man and every boy in Ireland wears, or is the occasion of consuming, the value of 20s. of woollen goods yearly; and that every woman and every girl wears, or is the occasion of consuming, 5 s. in woollen goods yearly.

Then 833,000 men and boys, at 20 s. per ann.	l.
consume in Irish woollen goods	833,000
And 833,000 women and girls, at 5 s. per ann.	208,250
Therefore, the amount of woollen goods, wore in apparel and consumed in furniture of such houses as they inhabit, will be	1,041,250
As the richer kind of people in Ireland are buried in woollens, according to act of parliament, I shall allow for burials in woollen	20,000
	<hr/> 1,061,250

Then, if all the wools Ireland yearly produces were fully manufactured, and that England took from them neither raw wools, worsted, or woollen yarns, the value of the surplus wools fully manufactured would be	378,750
	<hr/> 1,440,000

I find we have imported from Ireland from March 25, 1743, to March 25, 1744,

In raw wools, great stones	-	-	19,993
In worsted yarn	-	-	68,622
In woollen yarn	-	-	15,224
		Stones	<hr/> 103,839

If we take yearly the same quantity of unmanufactured wools, worsted, and woollen yarns, that we have done last year, which I shall compute only at 100,000 great stones, we shall prevent their fully manufacturing as much of the wools of Ireland as I have computed, when fully manufactured by themselves, would amount to 300,000 l.

Therefore, admitting there is no objection to the value in woollen goods, which I have computed to be the yearly consumption of the people of Ireland, not only in apparel, but in bedding, house-furniture, and burials, all the woollen goods Ireland can fully manufacture for exportation, will amount to no more than 78,750 l.

In order to remove the apprehensions that may arise in our clothiers and manufacturers, that this value in Irish woollen goods, if exported to England for re-exportation to foreign countries, may hurt the sale of our manufactures abroad, I shall consider, what value in woollen goods France will be prevented from vending at foreign markets, which she now supplies, by procuring the surplus wools of Ireland, that may be manufactured into that sum.

I shall suppose, that France has been able to procure yearly no more Irish wools than, when fully manufactured, I have computed would produce this 78,750 l. which I calculate at 1750 packs, of 240 pounds weight each.

I shall likewise suppose, that what France purchases are the best Irish wools, for which she pays 16 s. the great stone (at which price the fine wools of that country were sold last year), and that all risks, hazards, insurances, and freights, being accounted for, those wools, when landed in France, cost the manufacturer 20 s. per stone.

By the best information I could get in France, I have learned that their people manufacture two packs of their own wools

by the help of one pack of Irish. I shall therefore suppose their own wools worth 5 s. the great stone, and when mixed with Irish wools at 20 s. the stone; that the manufacturer in France has three packs of wools, at 10 s. the stone, a medium price.

I have computed that the surplus wools of Ireland, which France now procures, are 1750 packs, which make in great stones of 16 pounds to the stone	Stones.
To which I shall add double that quantity of French wools, which the manufacturers of France work up by the help of this quantity of Irish	26,250
	<hr/> 52,500
Total stones	<hr/> 78,750

Therefore the French manufacturers, by the help of 26,250 stones of Irish wools, have 78,750 stones of wools proper for such manufactures as we carry on; which wools, on an average, will cost them only 10 s. per stone. Then 78,750 stones, at 10 s. per stone, cost the manufacturer in France 39,375 l. And when fully manufactured for sale, allowing for labour, as I have done on the like value of wools manufactured in England, the amount will be 196,875 l.

If these calculations are just, it plainly appears, that we have nothing to fear from giving Ireland a liberty of exporting to England such manufactured woollen goods, as her own people cannot consume; since, by encouraging Ireland, we shall prevent France from procuring her wools, who thereby is enabled to supply the foreign markets with goods of her own manufacture, to the value of 196,875 l.

If France can send to foreign markets such considerable quantities of woollen goods, by procuring 1750 packs of Irish wools, of what consequence ought those wools to be to England! and since we know that such a quantity, and a much greater, may be sent yearly out of England, we should endeavour to prevent the running of it from England as well as Ireland, which I am far from thinking an impossible scheme. If the preventing the running of this quantity of Irish wools, will enable us to send to foreign markets as much woollen goods, as will, when manufactured, be worth 196,875 l. more than we now export, I am humbly of opinion, we ought to make a new experiment, and consent to the people of Ireland's sending their manufactured woollen goods to England; for we may be certain of manufacturing and vending more cloth, and other woollen goods, as the French are deprived of the means of supplying the foreign demands. And as all the goods that the surplus wools of Ireland can be manufactured into, will not amount to one-half of what France will be prevented from supplying, we must furnish the rest from our own manufactures. And if France has been able to procure a larger quantity of Irish wools yearly, than I have supposed, we shall be able to manufacture so much the greater quantity for foreign markets, as she is obliged to manufacture the less.

We have nothing to fear from any encouragement we give Ireland to manufacture, if we can prevent the French from procuring the wools of that country; for when the plague raged at Marseilles, the demands for woollen goods from foreign countries were so large, that the wools of both England and Ireland were insufficient to supply them; which plainly shewed how largely France had been concerned in the markets abroad, and what a quantity of her own coarse wools she must have worked up, by the help and assistance of the wools of that kingdom.

The camblets of Ireland are goods the Portuguese have been a long time accustomed to wear, and that they will have, and do procure these goods from Ireland, appears from the ships we have already taken, bound with such goods to Portugal; and the Irish will continue that trade, notwithstanding our guard-ships, and the encouragement our commanders of men of war have to search, unless we make it their own interest to discourage it.

All that our manufacturers have been able to do, has not been sufficient to prevail with Portugal to approve of the camblets we make. I am convinced, the consumption of that article would be greatly increased there, if the people of Ireland were permitted to export those camblets to us, under a duty at importation, to be drawn back on exportation from England; their profit would be more certain than it can be at present, and it would put a stop to all attempts to run such goods for the future, and be a great encouragement to their working up more of their surplus wools, and consequently of lessening the temptation of selling them to France. Our merchants would have a commission on receiving and forwarding, perhaps on sales; and our packers would have the benefit of re-packing, and our ships of carrying.

If it be objected, that the exportation of such other woollen goods, as Ireland may send us, will interfere with the exportation of our own, I am of opinion it cannot. For if France be prevented from procuring the wools of Ireland, there will be a demand in foreign markets, not only for the same quantity of woollen goods which we now supply, but for as much

more as France did formerly supply; and we shall sell, not only to the amount of what I have computed the surplus wools of Ireland may be manufactured into, but also near double that value, which France would have been able to sell of her own manufactured wools, by the help of the surplus wools of that kingdom.

If it be objected, that when the duties laid on the Irish woollen goods at importation, are drawn back on the exportation from England, the Irish woollen goods can be sold cheaper in foreign markets, than goods of the same kind manufactured in England, by reason of the cheapness of provisions and low price of labour in Ireland; I answer, that we shall have in our own hands a remedy, when it is convenient to use it, by permitting such goods to draw back only a PART of the DUTIES paid at importation, as we find can be sold cheaper in foreign markets. By which we shall bring the value of such Irish woollen goods upon a par with our own, on exportation from England, so that there will be no temptation to the buyers for exportation to take the one before the other.

If it be objected, that the people of Ireland will increase their sheep, when they have liberty to export what they manufacture, and that they may send us too great a quantity of their woollen goods for re-exportation; I answer, That it must be some years before they can effect it; and if they should so increase their sheep, as to be able to export double the quantity that I have computed their present surplus wools may be manufactured into for exportation, that quantity will not exceed what France now sells, by the help of the surplus wools of that country; therefore we must continue to sell the same quantity we now send abroad.

Again, if it be objected, that should the people of Ireland have liberty to export what they manufacture, they will sell us no more of their wools, or woollen and worsted yarn; and that instead of their having but 78,750 l. value to export, they will export the whole value that I have computed their surplus wools might be manufactured into; I am of opinion, we have little to fear from this objection; for there will be always in England and Ireland, as many people on the trade of buying the wools and yarns (for which we pay ready money) as there will be purchasers of their wools, fully manufactured; which, if sent here to be sold for exportation, must be on long credit; and if sent abroad on their own accounts, will be subject to uncertain sales, and as uncertain payments. Besides, if there should be occasion, their wools may be made cheaper to us, and their woollen goods loaded with a duty at exportation from Ireland to England.

We pay for licence (together with fees) to the lord lieutenant of Ireland, for every thousand great stones of wool exported to England, about 23 l. If the Irish wools are exported to us free of this charge, our manufacturers might purchase the wools of Ireland at all times, near 5 per cent. cheaper than they now can, or hitherto have done; and in lieu of this income which belongs to the lord lieutenant of Ireland, the parliament of that kingdom may fix a duty on all woollen goods, fully manufactured, on exportation to England.

This would, in some measure, prevent their sending us too much of their wools fully manufactured, and enable us to purchase more of their raw wools.

New experiments must be made; the people of Ireland must find a market for their surplus wools, manufactured or unmanufactured, or we cannot effectually distress France, enlarge our foreign woollen trade, or indeed be certain of supplying them ourselves with such goods as we now manufacture. I will admit, that from the cheapness of provisions, and low price of labour in Ireland, their poor are able to work cheaper than ours. They are not in Ireland bound by any parliamentary laws to provide for, and maintain for life, reduced and decayed housekeepers, and disabled and superannuated servants, as the people of England are, which obliges their poor to work for less prices than ours.

Notwithstanding, I am of opinion we have little to fear from their being able to undersell us abroad; for though most of the goods they manufacture are worked up cheaper than ours, yet the advantages we have of them in dyeing better colours, pressing, tilleting, and packing our goods, will balance, in most foreign markets, the advantage they may have of us, with respect to their low price for labour.

Besides, the freight of their woollen goods from Ireland to England, the insurance, the inland carriage to proper places for sale, the charge of warehouse room, reception and forwarding, the charges of unpacking and repacking, will affect such woollen goods as they can send us, 10 per cent. on the lowest computation I can make; which ought greatly to lessen the apprehensions of our manufacturers; and if the woollen goods they send us are to be dyed, pressed, and packed here, so as to be sent abroad, equally finished with the like goods of our own manufacture, they will be subject to a much greater expence.

What we suffer Ireland to gain by the export of her woollen manufactured goods from England, can be no loss to us; in many instances we shall be gainers. By encouraging them to manufacture their wools, they will find it their own interest

to sell none of them to France, by which we shall be tempted to manufacture the more of our own.

By prohibiting the importation of Spanish wools into Ireland, their manufacturers will be obliged to work up more of their own wools, and their people to wear more of their own manufactures, by which we shall have the less to fear from what they may be able to export.

By lessening the numbers of their fine spinners, we shall increase the spinning of such worsted and woollen yarn, as we want and take from them; which are so useful and necessary in our manufacturing several kinds of coarse goods, for our consumption as well as exportation.

By allowing them to export their woollen goods to Great-Britain, manufactures will be established in several counties in Ireland; their nobility and gentry will have such advantages by the settlements of workmen on their estates, that they will find it their own interest to discourage the running of wools, and to forbid their tenants to be aiding and assisting. By making Ireland a NURSERY of spinners for England, we shall have plenty of their spinning; and by making England a MAGAZINE for Irish woollen goods, fully manufactured, our merchants will have a commission on reception and forwarding; our dyers, a profit on such white goods as they shall send us; our pressers, the benefit of packing, and our shipping have better employment. By a good understanding between ENGLAND and IRELAND, our manufactures will be brought into greater esteem abroad; we then shall have nothing to fear from the low price of labour in France, with respect to coarse goods, which has obliged us for years past to manufacture such goods as would sell, although they brought discredit to our country.

By our woollen goods being demanded abroad, in proportion as France is unable to supply, our landed gentlemen will find their rents better paid, and their lands let at a higher value. The increase of our woollen manufactures will keep up the price of the product of the lands; as demands for goods not only employ our poor, but cause the advance of the price. The product of the lands of England is a considerable part of every manufacture; our rents are but the value paid for the product of the lands; therefore all the additional labour we encourage, which pays to the product of the lands, is so much added to the rents of the kingdom.

By preventing France from procuring the raw wools of Ireland, we shall not only undersell her, but speedily put it out of her power to answer the demands of those foreign countries, which she has for many years past been able to supply. By permitting Ireland to export such goods, as she may manufacture of her own wools, the gentlemen of that kingdom may be prevailed on to wear no Spanish cloths, but such as we manufacture. The advantage of which I shall shew.

I have already computed, that the Spanish wools Ireland imported last year, might be manufactured into 2280 pieces of cloth; which, supposing each cloth 26 yards, would be 59,000 yards. I find that from the 25th of March 1743, to the 25th of March 1744, the importations of Spanish cloths into Ireland were 20,981 yards and one quarter; therefore the yearly consumption of Spanish cloths in Ireland, seems to me to be 77,981 yards one quarter. We cannot prevent France from supplying foreign countries with their Spanish cloths; by their situation they always will have the Spanish wools cheaper than we can; and the low price of labour, and cheapness of provisions in those provinces of France where Spanish cloths are manufactured, will ever enable them to vie with, if not undersell, us in that manufacture. Their colours are as good as ours, and their wools as fine. But we have advantages peculiar to this nation, which they cannot take from us. Their cloths want the firmness in their texture and milling, that our cloths have, without which they never can dress them as we do; and if a small encouragement, by bounty on exportation, was given by parliament, on such Spanish cloths, as we export to the Levant only, I am humbly of opinion, we should wholly supply both the Turks and the Persians.

Therefore, since we have so powerful a rival as France in our Spanish wool manufacture, which of all our manufactures deserves our greatest attention; we should endeavour, by all prudent ways, to encourage and support it at home. Our silken manufactures greatly depend on it. A bale of Spanish cloths amounts to a large sum of money; consequently, it is a means of increasing our balances against those countries, from which we receive a balance by our commerce, and, on the other hand, of preventing a balance being too heavy against us with those countries, which, by our large imports, may have a balance against us.

By the modern dress of our nobility, gentry, and merchants, this manufacture appears daily decreasing among ourselves. I am convinced, that the new-fashion goods we wear, have lessened our consumption of Spanish cloths two fifths of what it was a few years ago. If we suffer this manufacture to decay, the FRENCH and DUTCH will soon procure the hands we employ; our poor must quit the country, or come to the lands for a maintenance; since it is well known, that a woman, who has spent the best of her days in spinning fine wools,

wools, cannot bring her fingers to make good work by spinning of coarse. I have already shewn, that if we consent to the people of Ireland's exporting their surplus wools, fully manufactured, the value of them cannot exceed 78,750*l*. And though we may think it our interest, that no Spanish cloths should be manufactured but in England, and to prohibit the importation of Spanish wools into Ireland, yet I am of opinion, the gentlemen of Ireland would wear but little of our Spanish cloths, if we prevented their manufacturing (though it is demonstrably their own interest) without giving them, in lieu thereof, a liberty of exporting such woollen goods as they could manufacture of their own wools.

The consumption of Spanish cloths, in that country last year, appears to be 77,981 yards; and we may expect they will yearly consume an equal quantity, which, at 16*s*. per yard, will amount to 62,385 *l*.

Therefore, if they wear no Spanish cloths but what we manufacture, and we agree to their exportation of such woollen goods as they may manufacture, more than are requisite for their own consumption, the balance we should yearly pay them would be but a trifle; if they took no woollen goods from us but Spanish cloths; whereas we do now, and always may, depend on supplying them yearly, with all new-fashion woollen goods that are worn here, since all dependent kingdoms take their fashions from the place where the court resides. We have had no reason to repent of the encouragement we have given to their linen manufactures; it has greatly enriched that country, which has been thereby more improved, within these 30 years past, than in 100 years before. We take from them in linens 500,000*l*. value per ann. besides what they send directly to our plantations, and other countries; whereas, according to Dr d'Avenant's report, in the year 1713, their whole exports of linen were computed at only 80,000*l*. value. We continue to give their linens the preference of most others, and since we contribute so largely to support and encourage that manufacture, they ought in gratitude to support (as far as in their power lies) a manufacture, that is of as great consequence to England, as the linens are to that kingdom.

Therefore I am humbly of opinion, that a union between England and Ireland, with respect to their woollen manufactures, must be advantageous to both kingdoms; and will be the means of effectually preventing FRANCE from procuring the wools of that country.

R E M A R K S.

As the Irish are not allowed to carry their woollen manufactures to foreign markets, nor to export them to England, whilst the English may export such goods to Ireland, it naturally follows, that the wool of that nation must be smuggled to the French and Dutch, or any nation that will bid highest for it. Some regulations might, perhaps, be framed, to prevent the running of English wool to France and Holland, and this nation might possibly be induced to try dangerous schemes, in order to retrieve so important a branch of trade as the woollen manufactory. But if this great end can be as effectually answered for the reciprocal benefit of both nations, without introducing any such schemes which may prove dangerous to the liberty of the subject, it will certainly prove far more eligible, and that is what the preceding proposal seems to bid very fair to do.

It is a maxim in equity and the law of nature, that every nation has a right to make the most of its own products. Where one nation is so far subject to another as to be debarred from that right, it must be for considerations respecting the interest of both; the chief of which may be, that the more powerful of the two may be maintained in a condition to afford protection and support to the other. Where that natural right is not superseded on this principle, the weaker nation will be apt to look upon it as an oppressive act, or, at best, as an absurdity equally pernicious to both parties.

So long as the Irish are not allowed a free vent for their woollen manufactures, it will be in vain to think of effectually preventing the running of their unwrought wool to France and other foreign parts; and even part of their manufactures will be run to England and elsewhere, in spite of all the laws the English can make to obstruct it. Commerce claims freedom: where it is cramped, it either decays, or is carried on clandestinely. To take all the wool of Ireland into the government's hands, in order to sell to the manufacturers just enough for the inhabitants of that kingdom, and export the rest to England at a lower price than foreigners offer for it, would, by the Irish, be considered as an act of injustice: at least, to make them view it in a favourable light, English woollen goods ought to be prohibited in Ireland. For though England's prosperity is of so much importance to Ireland, that if ever the former should be ruined, the latter would of course fall under a foreign yoke; yet the welfare of both ought, as far as is possible, to be promoted by equitable measures and fair regulations, such as no reasonable man in either kingdom would object to.

It has been apprehended by some, that if the Irish were allowed a free trade in the woollen branch, they would greatly

hurt England; but, perhaps, it would produce the contrary effect, by what has been urged in the foregoing representation. It might occasion, for some time, the removal of many manufacturers from England to Ireland; but is not this much better than their removing to foreign parts, going to seek bread among our enemies, and helping them to ruin the trade of the three kingdoms? If Ireland increases in commerce and wealth, one may safely conclude, from the genius and character of that nation, that its riches will chiefly center here at last. That country produces fewer misers than England: the Irish covet money, perhaps, as much as any people in the world; but not so much with a view to hoard it, as to make a figure and spend freely: and experience proves, that in all states and monarchies, the riches of distant provinces and colonies insensibly flow to the mother country, or to the metropolis.

It may be objected, that Ireland's taxes bear no manner of proportion with those of England; and therefore, to grant them a free trade, would be putting them in a condition to leave the English far behind them, as they could carry every thing to foreign markets so much cheaper than this nation can do. In answer to this it has been asked, Whether it is not safer to let the Irish thrive, than to suffer our enemies, the FRENCH, to take advantage of their miserable condition, and thereby ruin BRITAIN as well as IRELAND? The Irish, in their present circumstances, cannot be taxed like England: yet to grant IRELAND the same privileges as ENGLAND enjoys, and to tax it in PROPORTION to its wealth, would be fair and equitable, satisfactory and beneficial to both nations. Let us therefore think in earnest of a solid and permanent union, before it be too late: let us lay aside unreasonable, partial, and selfish principles; give them encouragement to become industrious, put them upon a fair and equitable footing, make all trifling distinctions cease; and let us not suffer our most dangerous competitors to run away with that trade, that England and Ireland may obtain, upon a wife and solid union made between the two nations.

An act for permitting the exportation of wool and woollen, or bay yarn, from any port in Ireland, to any port in Great-Britain.

Whereas the permitting of wool, and woollen or bay yarn, to be exported only from certain ports in Ireland, to certain ports in England, is not of so great and extensive advantage to the trade of this kingdom, as it would be if all the ports in Great-Britain and Ireland were opened for that purpose; be it therefore enacted by the king's most excellent Majesty, by and with the advice and consent of the lords spiritual and temporal, and commons in this present parliament assembled, and by the authority of the same, That from and after the fifth day of June, in the year of our Lord 1753, it shall and may be lawful for any person or persons, to export from any port in Ireland, any wool, or woollen, or bay yarn, wool fells, shortlings, mortlings, wool flocks, and worsted yarn, to any port in Great-Britain, any act or acts of parliament to the contrary notwithstanding.

Provided always, and be it enacted by the authority aforesaid, That all such exportations and importations of wool, and woollen or bay yarn, wool fells, shortlings, mortlings, wool flocks, and worsted yarn, from any port in Ireland, into any port in Great-Britain, shall be made under the same restrictions and regulations, and in the same manner in all respects, as wool or woollen yarn is now by law permitted to be exported from Dublin, Waterford, Youghall, Kinsale, Cork, Drogheda, New Ross, Newry, Wexford, Wicklow, Sligo, Limerick, Galway, and Dundalk, and imported into the several ports of Bideford, Barnstaple, Minehead, Bridgewater, Bristol, Milford-Haven, Chester, Liverpool, Lancaster, and Great Yarmouth, or any of them. See IRELAND.

WORCESTERSHIRE, has Herefordshire and Shropshire on the west, Gloucestershire on the south, Staffordshire on the north, and Warwickshire on the east, and is 130 miles in circumference. The air and soil of this shire are inferior to no other, either for health or pleasure; the former being sweet all over the county, the latter rich both in tillage and pasturage, the hills being covered with flocks of sheep, and the vallies abounding in corn and rich meadows. It is in all parts watered with very fine rivers, as the Severn, Stour, Avon, Teme, &c. which also furnish it with plenty of the most delicious fish. Its commodities, besides corn, cattle, cheese, wool, cloth, stuffs, cyder, lampreys, &c. are perry and falt, which last is in a peculiar manner. Hops are lately very much cultivated in this shire, which commodity and their falt are sent down the Severn in a sort of vessels called troughs, of which at least 20 are constantly employed to Bristol, Bridgewater, and other places, Somerset and Dorsetshire being chiefly supplied with the latter by this traffic.

WORCESTER, which is the capital of the county, is a large flourishing city. The chief manufactures of it are broad cloth and gloves, especially the former, in which it is incredible what a number of people are employed here and hereabouts.

DROITWICH is of special note for its salt springs, by which it is much enriched; the quantity of salt made being so great, that the taxes annually paid to the crown amount to about 50,000*l.* a year, at the rate of 3*s.* 6*d.* a bushel.

EVESHAM is a neat town, with a gentle ascent from the river Avon. Its chief manufacture is woollen stockings.

BEWDLEY, or **BEAULIEU**, is so called, from its pleasant situation on the declivity of a hill on the west bank of the river Severn. It is a place of considerable trade; for by means of the Severn, great quantities of salt, iron ware, glass, Manchester goods, &c. are put aboard barges here, and at Gloucester aboard troughs, for Bristol, Bridgewater, and other ports, which renders this a populous thriving town and corporation: but its chief manufacture is caps, which the Dutch seamen buy, called Monmouth caps. The town is well supplied with corn, malt, and leather, and every Saturday has a market for hops.

KIDDERMINSTER on the Stour, not far from the Severn, is a compact town, where the inhabitants, who are at least 2000, drive a pretty good trade in cloth, and weaving linsey woollseys, &c.

STOURBRIDGE is a well-built town, the name of which shews its relation to the river, over which it has a stone bridge. It has been much enriched by iron and glass works. There's about half a score glass-houses near it, where glasses, bottles, and window-glass are made, together with fine stone-pots for glass-makers to melt the metal in, also crucibles, &c. the clay of which they are made, being peculiar to the place. Here is also a manufacture of fine freeze cloth.

BROMSGROVE, near the rise of the river Salwarp, drives a considerable trade in clothing.

PERSHORE is a pretty large old town. Its manufacture is stockings.

WRECK is where a ship is broke to pieces, or lost on the sea, and signifies in our law such goods as, after a shipwreck, are cast upon the land by the sea, and left there within some county, for they are not wrecks so long as they remain at sea, in the jurisdiction of the admiralty.

In matters of wreck it is observed, that there is, as it were, a contract between the persons that have lost their goods by such misfortune, and those upon whose lands the goods and merchandize are driven, that the same be restored to them, or those that claim under them: and therefore, by the civil law, no man shall meddle with such goods as are wrecked, nor shall they be seized by the king, or any other by virtue of his grant or royal privilege; for that such goods, being cast on land and recovered out of the sea, remain still his who was the first owner thereof, and shall go to him or his successor; and if it be proved that any thing be stolen out of the wreck, the takers shall be deemed robbers.

Here we find what is worthy to be followed and imitated in all trading countries; and the reason why the laws were so strictly declared by the Romans was, because by the Rhodian laws [see **RHODIAN LAWS**], if any ship had become wreck, though all the persons were saved and alive, yet the ship and goods became seizable by the lords: but the same being barbarous and inhuman, it was afterwards repealed and abrogated, as well by those emperors in their territories, as here in England; and first by the naval law of Oleron [see **OLERON'S LAWS**], which provided in such misfortune, that if the merchant or mariners, or any of them came safe to land, it was not to be accounted wreck.

And the emperor Constantine the Great says, If any ship at any time by shipwreck be driven unto the shore, or touch at any land, let the owner have it, and let not my exchequer meddle with it; for what right have I in another man's calamity, that I should hunt after gain in such a woeful case?

R E M A R K S.

The laws of Oleron well deserve attention, on account of the great and just spirit of them; and this barbarity is now rarely used in any nation in Europe, unless it be against the enemies of the state, infidels, or pirates. See **OLERON LAWS**.

There are several other excellent provisions in the laws of Oleron, to secure shipwrecked goods to the distressed owners; and by other sea laws and ordinances, if any man shall prevent assistance to shipwrecked persons, he shall be punished as a murderer: and the like punishment hath been ordained for those who shall, by treachery, put forth any light, with intention to subject them to danger or shipwreck; and hence it is that fishermen are forbidden to fish with lights in the night. By the laws of France, such as during the night light false fires upon the shore, in dangerous places, to decoy thither, and occasion the loss of ships, shall be put to death, and their bodies hung up upon a mast, which shall be set upon the place where the fires are made.

If a ship and goods perish in the sea, and the owners abandon her, so that she becomes a mere derelict, in such case, the first person that takes possession of her, and recovers any part of the lading, gains a property therein, by the laws of nations. And where any such wreck happens by any fault or negligence in the master or mariner, the master must make good

the loss; but if the same was occasioned by the act of God, or done to avoid an enemy or pirate, then he shall be excused. The master, &c. shall sustain the damage, where he, or any of his mariners, lie ashore, and the ship, during their absence, perisheth, whether by night or by day, &c. See **RHODIAN LAWS**.

By the French laws, all ships and persons belonging to them that shall be cast ashore by tempest, or otherwise, upon the coasts of that kingdom, and every thing that has escaped shipwreck, is declared to be taken into the protection of the king: and all subjects are enjoined not only to do their utmost endeavours to succour all persons in danger of shipwreck, but also, till the arrival of the officers of the admiralty, to save the shipwrecked goods, and prevent their being rifled, under pain of being answerable for all losses and damages, of which they shall not be excused, without producing those that are guilty: and such as make an attempt upon the lives or goods of shipwrecked persons, shall be punished with death, without any possibility of a pardon.

In ancient times, all wrecks in England belonged to the crown; and where a ship perished at sea, and no man doth escape out of it, the wrecked goods being brought to land by the waves, by the common law belong to the king, by his prerogative, or to the lord of the manor: and the statute de Prerogativa Regis, 17 Edward II, ordains, That the king shall have wreck of the sea, whales and great furgeons, taken in the sea and elsewhere, throughout the realm, except in places privileged. But it was formerly usual to seize wrecks as forfeited to the king, only when no owner could be found; for, in such case, it must of consequence belong to him, as lord of the Narrow Seas [see **SEA DOMINIONS** and **SEA BRITISH**], which he is obliged to scour of pirates, &c. and the product of wrecks was ordained to contribute to the charge. *Braët. lib. ii. cap. 5.*

And by stat. 3 Edw. I. cap. 4. called the statute of Westminster the first, it is enacted, That where a man, dog, or cat, escapes alive out of the ship, neither the ship, nor any thing therein, shall be adjudged a wreck; but the goods shall be saved, and kept by the sheriff, coroners, or king's bailiffs, and delivered to the inhabitants of the town where they are found; so that if any person, within a year and a day, sue or apply for those goods, and prove that they were his property at the time of the shipwreck, they shall be restored to him without delay: but if not, then they shall be seized by the said sheriffs, coroners, or bailiffs for the king's use, and shall be delivered to the inhabitants of the town or place, who shall answer before the justices for the wreck belonging to the king. Also where the wreck belongs to another, he shall have the same in like manner; and if any one be convicted to have done otherwise, he shall suffer imprisonment, make fine to the king, and likewise yield damages: and bailiffs to lords acting contrary, shall answer for it, if they have wherewith to do it; and if they have not, the lord shall deliver his bailiff's body to the king to be answerable.

The owners claiming a wreck, must make sufficient proof of their title within the year and day; and they are to do it by their marks or cockets, by the custom-house books, or the testimony of reputable men; and if the wreck be taken by the king, or seized by persons having no authority, the owner may have a commission to inquire, and hear and determine it, by the oaths of 12 men; or he may bring an action at law, and make his proof by verdict. The year and day shall be accounted from the seizure; and if the owner of the goods dies within the year, his executors or administrators may make proof: and when such goods wrecked are perishable, the sheriff may sell them within the year, and the sale shall be good; but he must dispose of them to the best advantage, and account with the owners. *Fitz. Nat. Br. 12. 2 Inst. 167.* If a ship is ready to sink at sea, and all the men therein, for preservation of their lives, quit the ship, and afterwards she perishes, if any of the men are saved, the goods shall not be lost. A ship on the sea was chased by an enemy; the men in it, for the security of their lives, quitted the ship, which was taken by the enemy, and spoiled of her goods and tackle, and then turned to sea: after this, by stress of weather, she was cast on land, where it happened her men safely arrived: it was resolved that the ship was no wreck by our law. *5 Co. Rep. 2.*

Where goods are wrecked on shore, and the lord having power takes them, he shall not pay custom, neither by the common law nor the statute law; for at the common law, shipwrecked goods could not be charged with customs, by reason the wreck was wholly the king's, and he could not have a custom of what was all his own: and wines, or other goods, coming or brought into the kingdom by wreck, are not imported by any body, but by the wind and sea; nor can such wrecked goods, so cast ashore, be said to be brought into the kingdom as merchandize for sale. *Hill. 23 and 24 Car. II.*

If a man have a grant of wreck, and goods are wrecked upon his lands, and another taketh them away before seizure, he shall have an action of trespass, &c. to recover them; and before they are seized, there is no property gained, to make it felony. *1 Hawk. 94.*

In case a person loses his goods at sea, by piracy or tempest, and not by wreck, if they afterwards come to land, and he can make proof that they are his goods, they are to be restored by the king's officers, or the lords there. Stat. 27 Edw. III. cap. 13.

The statute of 12 Ann. cap. 18. hath ordained, That the sheriffs and justices of the peace of every county, or of a city or town, and all mayors, bailiffs, and other head officers of corporations and port towns near adjoining to the sea, and all constables, tithing-men, and officers of the customs, in all such places, upon application to them made on behalf of any commander of a ship in danger of being stranded, or run on shore, shall command the constables near the sea-coast where such ship shall be in danger, to call together as many men as shall be necessary, to the assistance, and for the preservation of such ship; and if there shall be any ships of war, or other ships, lying at anchor near the place, the officers of the customs, and constables, &c. are to require the assistance of the superior officers, by their boats, and what hands they can spare: and if such officers shall refuse or neglect to assist, they shall be liable to the penalty of 100l. to be recovered by the chief officer of the ship in distress.

No persons shall enter into such ships in distress, without leave from the commander, or a constable, &c. and the masters and constables may, by force, repel persons who shall press on board the said ships without leave. And if any goods are carried off from any such ship, and found on any person, if they are not delivered to the owner on demand, such person shall pay treble the value of the goods, recoverable by the owner in an action at law. Also, if any officer of the customs, or his deputy, abuse the trust reposed in him by this act, and shall be convicted thereof, he shall forfeit treble damages to the party grieved, and be incapable of any employment in the customs.

If any person makes holes in the bottom, side, or in any part of a ship, or steals any pump, or does any thing tending to the loss of the ship, he shall be guilty of felony. And by this statute, ships and goods are to be preserved for the benefit of the owners, paying the salvage, &c. [see SALVAGE.] But this act shall not extend to deprive the crown, or any grantee of any right or claim to any wreck or goods that shall be jet-sam, flotsam, or lagan. See FLOTSAM.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE, continued from the End of Letter U.

The chief LAWS relating to WINES.

WINE, oil, and honey, the ton must contain 252 gallons, the pipe or butt 126 gallons, the hoghead 63 gallons, the barrel 31½ gallons, the rundlet 18½ gallons. — imported, are discharged from the imposition of excise. 12 Car. II. c. 4. §. 15.

— of vinegar, landed before payment and security of the impost duty, are forfeited, or their value, and the importers are to pay the said duty notwithstanding. 1 Jac. II. c. 3. §. 5.

— first landed in the out-ports, and carried afterward to London by certificate, are to pay so much more as they paid short of the duties due in London.

— No wine exceeding the quantity of 10 gallons, imported into any of the out-ports, to be brought from thence to London, or within 20 miles of the Royal Exchange, without paying the out-port and London duty. And if any quantity of wine, exceeding in bottles three dozen, or in casks 10 gallons, is brought in the same carriage to London, or within 20 miles of the said Exchange, without a certificate of the said respective duties being paid, &c. it is to be forfeited, &c. 26 Geo. II. c. 12. §. 1, 2.

— Every hoghead run out, and not full seven inches, or above, and every pipe or butt not above nine inches left therein, are to be accounted for out, and no duty is to be paid for the same.

— of the growth of Hungary, may be imported from Hamburg, paying duty as Rhenish wines. 1 Ann. c. 12. §. 112.

— imported, 12 per cent. to be allowed for leakage.

— damaged and corrupt, the allowance repealed. 6 Geo. I. c. 12. §. 1.

— damaged, corrupt, or unmerchantable, upon the importer's refusing to pay or secure the duties, may, at the landing, be delivered up into the custody of the officers of the customs, in order to be publicly sold to be distilled into brandy, or made into vinegar: and that they shall not be used for any other purpose, security must be taken; which may be discharged upon a certificate (within three months after delivery) that they have been so used. 6 Geo. I. c. 12. §. 3. 12 Geo. I. c. 28. §. 20.

— The produce of such sale is to be paid to the importer, by certificate, as a compensation for the freight, &c. but such allowance must not exceed 4l. for every ton of wine of the growth of France and Germany, and 8l. for every ton of all other wines so delivered up: and if there be any overplus beyond the said allowance, it must be placed to the duties out of which the charges have been paid. 6 Geo. I. c. 12. §. 4. 12 Geo. I. c. 28. §. 20.

— But no allowance may be made for such wines, unless they be imported in casks on board a merchant-ship directly from the place of their growth, or the usual place of their first shipping. 8 Geo. I. c. 18. §. 19. 11 Geo. I. c. 29. §. 4.

— Except saved from ships stranded, which are to enjoy the same allowances, as if imported in the ship wherein they

VOL. II.

were first laden. 8 Geo. I. c. 18. §. 20. 11 Geo. I. c. 29. §. 4.

— Except of the growth of the dominions of the great duke of Tuscany, in open flasks, or of Turkey, or any other parts of the Levant Seas, may not be imported in flasks or bottles, or in vessels, or casks, which shall contain less than 25 gallons, upon forfeiture thereof, or the value: to be sued for in any of the courts of record in Westminster, or in the court of Exchequer in Scotland, or by the laws of excise. 1 Geo. II. c. 17. §. 7, 8.

— exceeding in quantity 10 gallons, which have been imported from foreign parts into any of the out-ports, may not be brought from any place, either by land or water, into the port of London, or members thereof, or within 20 miles of the Royal Exchange, before the proprietor has paid to the collector, or proper officer of the customs, nearest to the place from whence the wine is intended to be removed, the duties payable in any of the out-ports, and also the difference between the duties payable there, and in the port of London on importation. 26 Geo. II. c. 12. §. 1.

— in bottles, exceeding three dozen, and in casks 10 gallons, at the same time, and in the same carriage, so removed, without a certificate from such collector or proper officer, expressing the quantity and quality, and that the duties have been paid as above, or that the same was wine sold for salvage, or has been compounded for or condemned, is forfeited, together with the casks or vessels containing it, and may be seized by any officer of the customs, and prosecuted in the same manner as any uncustomed wines.

— If after removal, and payment of the duties as above, it is staved, lost or perished before its arrival as aforesaid, the commissioners of the customs, or any three of them, upon proof thereof upon oath to their satisfaction, are to cause repayment to be made to the proprietor of the difference between the duties payable in the out-ports, and in London, out of the duties payable on wines.

Besides the duties before mentioned, an act of parliament took place in the year 1762, intitled, An act for granting several additional DUTIES upon WINES imported into this kingdom, and certain DUTIES upon all CYDER and PERRY, &c.

WINES.—The additional duties on wines to take place after the 31st of March, 1763, without any DISCOUNT or DEDUCTION inwards, or drawback on re-exportation afterwards, viz.

— On French wine and vinegar, 8l. per ton; and on all other wines and vinegar imported, 4l. per ton.

— Damaged and unmerchantable wines exempted from these additional duties.

— The said duties to be under the management of the commissioners of the customs.

— No allowance to be made for LEAKAGE, but upon wines imported directly from the country or place of their growth, &c.

— MADEIRA wines imported from the British plantations in America excepted.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

CHIEF LAWS RELATING TO WOOL.

WOOL.—The owners of wool, shorn or lodged within 10 miles of the sea-side, in the counties of Kent or Sussex, must, within three days after sheering, give an exact account, in writing, of the number of fleeces, and where lodged, to the officers of the next port.

— The like notice must be given before removal, expressing the number of fleeces, and weight, the name and abode of the buyer, and the place to which it is intended to be carried, and a certificate taken from the officer, who first entered it, upon forfeiture, and 3s. per pound weight.

— Such certificates must specify the names of the owners and buyers, and be limited to such times and places to be removed; for which certificate the officer is to receive 6d. 9 & 10 W. III. c. 40. §. 3.

— Persons residing within 15 miles of the sea, in the counties of Kent and Sussex, may not buy wool before they have entered into a bond, with sureties, that all the wool they buy, shall not be sold by them to any persons within 15 miles of the sea.

— found carrying towards the sea-side, in the aforesaid counties, unless entered, and security be given, is forfeited, and 3s. per pound weight. Ditto act, §. 4.

— removed from the place where first lodged after sheering, within 10 miles of the sea, may not be lodged, after the first removal, within 15 miles of the sea, in the aforesaid counties, upon forfeiture thereof, if found, or 3s. per pound weight by the owners, if carried away. Ditto act, §. 5.

— laid or hid within 15 miles of the sea, and not entered, is forfeited.

— The claimer of such wool, so seized as forfeited, must give sufficient security in the court of Exchequer, to pay treble costs, if cast, over and above the penalties and forfeitures. Ditto act, §. 6.

— One third part of the aforesaid forfeitures and penalties is to be to the use of his Majesty, and the other two-thirds to the use of the seifer or fuer. Ditto act, §. 8.

— coastwise, designed to be carried to any place on the sea-coasts, with an intention to be conveyed to any other port or place on the sea-coast, from whence it may be exported, must, before loaded, or carried within five miles of the place, be entered at the port from whence it is to be conveyed, mentioning the exact weight, mark and numbers, upon forfeiture thereof, with the horses, &c. and persons concerned in carrying, driving, &c. are liable to the forfeitures inflicted on the exportation.

— But to hinder the conveyance of wool from the place of sheering to the proprietor's dwelling-house, though within five miles, or less, of the sea; provided that within 10 days after the sheering, and before the removal and disposal, he certifies under his hand, to the officers of the next port, the number of fleeces, and where lodged, and does not remove or dispose thereof, without certifying his intention, at least three days before removal; such certificates are to be kept, and registered by the officers. 1 W. and M. c. 32. §. 2, 3. 9 and 10 W. III. c. 40. §. 1.

— A register of all wool sent coastwise, with the particular weights and numbers, the ship-master's name, and to whom consigned, must be kept at the custom-house, London. 1 W. and M. c. 32. §. 11. and 9 and 10 W. III. c. 40. §. 1.

— Wool-fells, mortlings, shortlings, yarn made of wool, wool-flocks, fuller's earth, fulling-clay, and tobacco-pipe-clay; the cockets for the carriage thereof coastwise must be written upon paper, and not parchment, expressing the exact weights, marks, and numbers, and be signed by at least three of the chief officers in whose presence they are to be weighed. 1 W. and M. c. 32. §. 4. 7 and 8 W. III. c. 28. §. 7. 9 and 10 W. III. c. 40. §. 1. 5 Geo. I. c. 11. §. 14.

— The return or certificate of landing the wool must be written on paper, not parchment, the quantity not obliterated or interlined, and must express the exact weights, marks, and numbers, and be signed by at least three of the chief officers, in whose presence it must be weighed. Ditto acts.

— Officers not performing their duties, are to be deemed aiders and abettors of the transportation, and shall suffer the penalties contained in 12 Car. II. c. 32. and 14 Car. II. c. 18. 1 W. and M. c. 32. §. 5. and 9 and 10 W. III. c. 40. §. 1.

— Wool, sheep, &c. as above, may not be exported, nor packed, or loaded upon any horse, &c. nor laden on board any ship, with intent to be exported, unless as hereafter excepted, upon forfeiture, and 20s. for every sheep, and 3s. for every pound weight of the rest. 12 Car. II. c. 32. §. 1, 2, 3. and 14 Car. II. c. 18. §. 2, 3, 8. and 7 and 8 W. III. c. 28. §. 2, 3, 4. and 9 and 10 W. III. c. 40. §. 1, 2.

— Owners of the ships, knowing thereof, are to forfeit their interest therein. 12 Car. II. c. 32. §. 3.

— And if the owners be aliens, or natural-born subjects not inhabiting within this kingdom, such ships are forfeited wholly to his Majesty. 12 Car. II. c. 32. §. 9.

— Masters and mariners, knowing thereof, and assisting therein, are to forfeit all their goods and chattels, and to suffer three months imprisonment. 12 Car. II. c. 32. §. 3.

— The exporter, besides other penalties, is disabled to require any debt, &c. 12 Car. II. c. 32. §. 4.

— Owners, masters, or mariners, discovering upon oath, within three months after knowledge of the offence, or after their return into Great-Britain, the number, quantity, and quality of the goods exported, &c. are to be discharged of all penalties, and to have the benefit of an informer's part. 14 Car. II. c. 18. §. 11. and 1 W. & M. c. 32. §. 8. and 9 and 10 W. III. c. 40. §. 1.

— Sheep, wool-fells, mortlings, shortlings, yarn made of wool, wool-flocks, fuller's earth, fulling-clay, or tobacco-pipe-clay, the exportation declared a common and public nuisance. 14 Car. II. c. 18. §. 11.

— Offences may be tried and determined at the general quarter-sessions, in the county where committed, or where the offenders shall be apprehended, or the goods or ships taken. 12 Car. II. c. 32. §. 5. 14 Car. II. c. 18. §. 4, 12. and 10 and 11 W. III. c. 10. §. 12.

— Offences must be prosecuted within three years. Ditto acts.

Such goods shipped or found on the shore; at or near the sea, or any navigable river, or packed or loaded on any horse, &c. with intent to be exported, may be seized by any persons; but such persons may not be evidence against the offender. 12 Car. II. c. 32. §. 7, 8. and 1 W. and M. c. 32. §. 8, 9. and 9 and 10 W. III. c. 40. §. 1.

— BUT THE AFORESAID PROHIBITION IS NOT TO EXTEND to—lamb-skins ready dressed and prepared for furs or linings—nor to wool-fells, or pelts, or beds stuffed with flocks, or whether sheep alive, or the wool growing thereon, taken on board for the use and food of the ship and passengers. 12 Car. II. c. 32. §. 10, 11. and 14 Car. II. c. 18. §. 10.—Nor to the exportation of uncombed wool, out of the port of Southampton, into the following island, and not exceeding the following respective quantities yearly, viz.

To Jersey	4000	Tods, not exceeding 32 pounds each.
To Guernsey	2000	
To Alderney	400	
To Sark	200	

— Provided the exporter, before shipping, delivers to the customer, comptroller, surveyor, or searcher, a writing under the seals of the respective governors, signifying that the person therein named is authorized to export the number of tods therein mentioned; and that he has given sufficient security for the due landing. 12 Car. II. c. 32. §. 2, 12, 13.

— Governors may not grant licences for any greater quantity, upon forfeiture of 20l. per tod to his Majesty. 1 W. & M. c. 32. §. 14. and 9 and 10 W. III. c. 40. §. 1.

— Such wool may not be again transported out of the said islands, upon forfeiture of 20l. per tod; $\frac{1}{2}$ to his Majesty, $\frac{1}{4}$ to the informer, $\frac{1}{4}$ to the poor; and the offenders to be rendered incapable of any grant or warrant for wool for the future. 1 W. and M. c. 32. §. 14. and 9 and 10 W. III. c. 40. §. 1.

— Customer of Southampton must keep a true account of the quantity of the wool shipped, and may not permit any greater quantities than those before limited, upon forfeiture of office, and 100l. Ditto acts.

WOOL, WOOL-FELLS, MORTLINGS, SHORTLINGS, YARN MADE OF WOOL, WOOL-FLOCKS, FULLER'S-EARTH, FULLING-CLAY, OR TOBACCO-PIPE-CLAY.

— Packs, sacks, bags, or casks of such goods, may not be loaded on any horse, &c. nor carried by land within this kingdom, but in the day-time, and at seasonable hours; that is to say, from the 1st day of March to the 29th of September, between 4 in the morning, and 8 in the evening; and after the 29th of September to the first of March, between 7 in the morning and 5 in the evening, upon forfeiture thereof, or the value. 14 Car. II. c. 18. §. 9.

— Such goods may not be loaded upon any horse, &c. or carried by land, within five miles of the sea-coast, but between sun-rising and sun-setting, upon forfeiture thereof, and the horses, &c.

— Exported into parts beyond the seas, the penalty is forfeiture of ship and goods, and treble the value, with treble costs of suit.

— Persons assisting in the exportation, are to suffer three years imprisonment, without bail or main-prize.

— The first three persons (not being the owners) assisting in the exportation, discovering their crime to any justice of the peace, are discharged of all penalties and punishments. 7 and 8 W. III. c. 28. §. 8, 10, 11.

— The inhabitants of the place out of which, or through which, such goods are carried or exported, are to forfeit 20l. if they be under the value of 10l. but if above, treble the value, and also treble costs of suit. 7 and 8 W. III. c. 28. §. 8.

— But

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

— But the hundred of Winchelsea, in the cinque-ports, being divided by a navigable arm of the sea, is to be deemed as two distinct hundreds; and the offences committed in one part, are not to be chargeable on the inhabitants of the other. 9 and 10 W. III. c. 40. §. 1.

— Execution for the informer may be had against two or more of the inhabitants; and the justices, at their general quarter-sessions, may tax every town, &c. in the hundred, &c. as in the case of robbery. 7 and 8 W. III. c. 28. §. 9.

— The owner of the goods, and each of his assistants, are to answer treble the value of the penalties to the inhabitants, and treble costs of suit, to be recovered by action, in the name of the clerk of the peace. 7 and 8 W. III. c. 28. §. 10.

— Persons entitled to penalties and forfeitures, compounding with any hundred, port or place, for less than is due by law, any other person may sue for the whole, as if no such composition had been made; and the compounder is to suffer five years imprisonment, without bail or main-prize. 7 and 8 W. III. c. 28. §. 13.

— The admiralty are to appoint one ship of the 5th rate, and two of the 6th rate, and four armed sloops, to cruise constantly from off the North-Foreland to the Isle of Wight, with orders for seizing all vessels exporting wool, or carrying or bringing prohibited goods, or any suspected persons. 7 and 8 W. III. c. 28. §. 14.

— The admiralty are to appoint three ships of the 6th rate, and 8 or more armed sloops, to cruise on the coast of Great-Britain or Ireland, in such stations as shall be assigned them by the admiralty, with orders to seize all vessels, in which any wool, worsted, bay or woollen yarn, cloth, serges, bays, kerseys, says, frizes, druggets, cloth-serges, shalloons, or any drapery, stuffs, or woollen manufactures whatsoever, shall be exported, or laden to be exported, from Ireland to foreign parts. A list of the ships and sloops, the names of the commanders, and copies of their instructions, are to be sent to the commissioners of the customs of Great-Britain, and commissioners of the revenue in Ireland, within 10 days after given. 10 and 11 W. III. c. 10. §. 16. and 5 Geo. II. c. 21. §. 1.

— The commanders of such ships may search any vessels within the limits of their stations; and if any of the above-mentioned goods are found on board, without cocket or warrant, licensing the exportation thereof, may carry them, with crew and cargo, into any port in Great-Britain or Ireland. 5 Geo. II. cap. 21. §. 2.

— After seizure, the goods are to be secured in the king's warehouse; and when condemned must, together with the vessel, her guns, tackle and furniture, be sold by inch of candle to the best bidder, after 21 days public notice; $\frac{1}{2}$ of the produce of such to the commander, $\frac{1}{4}$ to the officers of the ship or sloop, $\frac{1}{4}$ to the mariners, and $\frac{1}{4}$ to the king, out of which the charges of prosecution are to be paid, except the seizure be made upon information; in which case, the informer is to be indemnified from all penalties, &c. and to be paid $\frac{1}{2}$ of such sale, and the residue to be divided into four parts, and distributed as above. 10 and 11 W. III. c. 10. §. 17. and 5 Geo. II. c. 21. §. 3.

— Commanders neglecting their duties, compounding for, or conniving at the exportation of wool, are to forfeit all their pay due, to suffer six months imprisonment, and be rendered incapable of any service in the navy. 10 and 11 W. III. c. 10. §. 18.

— Offenders against any of the laws made for the preventing of the exportation of wool, may be prosecuted by action, &c. in any of his Majesty's courts of record at Westminster; and thereupon copies may issue in the first process, specifying the sum of the penalty sued for; and such offenders be obliged to give bail to answer the suit, and also, at appearance, to pay the penalties incurred, or to yield their bodies to prison. 10 and 11 W. III. c. 10. §. 20.

— Offenders in prison, for want of sufficient bail, for the unlawful exportation of wool or wool-fells, not pleading to a declaration or information, delivered by the space of one term, judgment may be entered against them by default. 4 Geo. I. c. 11. §. 6.

— If judgment be obtained against such offenders, and they do not pay the sum recovered within three months, the court may order transportation for seven years, as for felony. 12 Geo. II. c. 21. §. 27.

WOOL, YARN MADE OF WOOL, AND WOOL-FLOCKS, may not be pressed together with any screws, presses, or other engines, into any pack, bag, cask, &c. nor carried, nor laid, at or near the shore or coasts of the sea, or any navigable river, or into any place adjoining, with intent to be exported, upon forfeiture thereof, or the value. 14 Car. II. c. 18. §. 7.

— Wool, Spanish or foreign, may be exported only in British shipping, upon pain of confiscation. See Rule 5, at the end of Letter A.

WOOL, WOOL-FELLS, MORTLINGS, SHORTLINGS, WOOL-FLOCKS, WORSTED, BAY, or WOOLLEN YARN, may be exported from any port in Ireland, with intent to be imported into any port in Great-Britain, and not otherwise; but CLOTH, SERGES, BAYS, KERSEYS, SAYS, FRIZES, DRUGGETS,

SHALLOONS, STUFFS, CLOTH-SERGES, or any other DRAPERY, made of or mixed with WOOL, or WOOL-FLOCKS, and manufactured in Ireland, may not be exported out of Ireland, unless they be shipped in the ports of Cork, Drogheda, Dublin, Dundalk, Galway, Kinsale, Limerick, New-Ross, Newry, Sligo, Waterford, Wexford, Wicklow, and Youghall in Ireland, and with intent to be imported into the ports of Barnstaple, Bideford, Bridgewater, Bristol, Chester, Liverpool, Milford-haven, and Minehead in England and Wales: but notice must be first given to the commissioners of the customs, or to the customer or collector of the port into which they are intended to be brought, of the quantity, quality and package, with the marks and numbers, the name of the ship and master, and the port of importation; and bond be entered into, with one or more sufficient sureties, in treble the value of the goods, that they shall be landed accordingly; and a licence be also granted, under the hands of the commissioners, or any three of them, or by the customer, or the collector of the port where bond is given, upon forfeiture of ship, goods, and 500 l. by every offender. 1 W. and M. c. 32. §. 6. 7 and 8 W. III. c. 28. §. 5. 10 and 11 W. III. c. 10. §. 1, 2, 3, 10, 14. 11 and 12 W. III. c. 13. §. 9. 4 Ann. c. 7. §. 1. 3 Geo. I. c. 21. §. 4, 5. 5 Geo. I. c. 11. §. 21. 5 Geo. II. c. 21. §. 6. 26 Geo. II. c. 11. §. 1, 2.

— Masters, mariners, or others, knowing of such offence, and assisting therein, are to forfeit 40 l.

— Actions and informations may be tried in any of his majesty's four courts at Dublin.

— The first three persons assisting, (not being owners) discovering their offence, are discharged of all penalties.

— Acquittals in Ireland, not to bar or delay prosecutions in England. Ditto acts.

— WOOL, WOOL-FELLS, MORTLINGS, SHORTLINGS, WOOL-FLOCKS, WORSTED, BAY or WOOLLEN YARN, CLOTH, SERGES, BAYS, KERSEYS, SAYS, FRIZES, DRUGGETS, SHALLOONS, STUFFS, CLOTH SERGES, or any other DRAPERY made of, or mixed with WOOL, or WOOL-FLOCKS. For every ship sailing from Ireland to Great-Britain, with any of the afore-said goods, bond must be given, before shipping, to the chief officers of the port, by two sufficient persons, in double the value of the goods, that they shall be brought to Great-Britain, and there landed, and the duties paid, upon forfeiture of the ship. 10 and 11 W. III. c. 10. §. 5, 15.

— The penalties and forfeitures of such bonds may not be granted or assigned over to any person. Ditto acts.

— The cockets, or warrants, for carrying of such goods from Ireland to Great-Britain, must be written upon paper, and not parchment, and signed by at least three of the chief officers, with the exact quantities, qualities, marks and numbers indorsed thereon.

— The like endorsement must be upon the warrant for the landing the same in England; and the goods must be viewed and examined by the surveyor or land-waiter. 7 and 8 W. III. c. 28. §. 7. 10 and 11 W. III. c. 10. §. 7, 9.

— The certificates of landing, granted for discharging the bond taken in Ireland, must be written on paper, and not parchment, signed by at least three of the chief officers, with the exact quantities, qualities, marks and numbers indorsed thereon, and not obliterated or interlined. Ditto acts.

— A register of all such goods, with the particular quantities, qualities, weights, and numbers, the ship, master's name, owner's name, and to whom consigned, must be kept at the custom-house, London. 1 W. and M. c. 32. §. 11. and 10 and 11 W. III. c. 10. §. 6.

— The commissioners of the customs in Ireland must, every six months, or within 30 days after, transmit to the commissioners of the customs in England, duplicates of the bonds taken for the lading, and a true account of all such goods exported, expressing the quantity, quality, and weight, by whom, and in what ship exported, where consigned, the names of the officers, certifying the landing in England, the dates of their certificates, where landed, and the quantity, quality, weight, marks and numbers contained in such certificates. 7 and 8 W. III. c. 28. §. 6. and 10 and 11 W. III. c. 10. §. 8.

— The commissioners appointed to execute the several acts against the exportation thereof. 1 W. and M. c. 32. §. 7. and 9 and 10 W. III. c. 40. §. 1.

WOOL, WOOL-FELLS, MORTLINGS, SHORTLINGS, WOOL-FLOCKS, WORSTED, BAY or WOOLLEN YARN, CLOTH, SERGES, BAYS, KERSEYS, SAYS, FRIZES, DRUGGETS, SHALLOONS, STUFFS, CLOTH-SERGES, or any other DRAPERY, made of, or mixed with WOOL, or WOOL-FLOCKS, may not be put on board any vessel or boat in Ireland, or imported from thence, into this kingdom, but such are of the built of Great-Britain or Ireland, and wholly owned and manned by the subjects of this kingdom or Ireland, and registered as under, on forfeiture of the goods or value thereof, as also of the vessel or boat, with her guns, tackle, apparel, and furniture. 12 Geo. II. c. 21. §. 6.

OF the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

Oath must be made by one of the owners, before the collector and comptroller of the customs, at the port to which she belongs, as follows :

Jurat. A. B. That the ship of whereof is at present master, being built of tons, was built at in the year and that of and of are at present owners thereof; and that no foreigner, directly or indirectly, hath any share, part, or interest therein. 12 Geo. II. c. 21. §. 7.

A certificate of which oath, attested by the collector and comptroller, under their hands and seals, is (after having been registered by them) to be delivered to the master of the ship, for the security of her navigation; and a duplicate of the register to be immediately transmitted to the commissioners of the customs in London, in order to be entered in a general register to be there kept for this purpose. Ditto act.

— No ship's name, after registering, may be changed, or the property transferred to any port, without registering her again, and delivered up to the former register to be cancelled, under the same penalties as before directed. And in case of any alteration of property in the same port, by sale of any share, such sale must be acknowledged by indorsement on the certificate of the register before two witnesses. 12 Geo. II. c. 21. §. 8.

WOOL, WOOL-FELLS, MORTLINGS, SHORTLINGS, WOOL-FLOCKS, WORSTED, BAY, or WOOLLEN YARN, may not be packed up in Great Britain or Ireland, in any other package but packs or trusses of leather, and pack-cloth, and marked on the outside with the respective words **WOOL or YARN,** in large letters, not less than three inches in length, on forfeiture of the goods and package, and 3s. for every pound weight, to be paid by the owner or packer of it. 12 Geo. II. c. 21. §. 10.

— Wool, coverlids, waddings, or other manufactures of wool slightly worked or put together, so as they may be reduced to, or made use of as wool again, or mattresses, or beds stuffed with combed wool, or wool fit for combing, may not be exported from Great-Britain or Ireland, under the like penalties and forfeitures, as for being concerned in the exportation of wool. 12 Geo. II. c. 21. §. 9.

WOOL, WOOL-FELLS, MORTLINGS, SHORTLINGS, COMBED WOOL, WOOLLEN or BAY-YARN, WORSTED, YARN-CRUEL, or WOOL SLIGHTLY MANUFACTURED, may not be laden on any vessel bound to parts beyond the seas; nor laden, in order to be carried coastwise, from one port of Great-Britain or Ireland to another; unless notice be first given to the commissioner of the customs, or to the customer or collector and comptroller of the port from which they are intended to be sent or exported, of the quantity, quality, and package, with the marks and numbers, the ship and master's name, the name and place of abode of the owner of the goods, and the port into which they are intended to be imported, and to whom consigned; and bond be entered into, in treble the value of the goods, that they shall be landed accordingly (notice whereof to be transmitted from the customer or collector of the port from whence the same is intended to be exported, to the customer or collector and comptroller of the port into which the same is intended to be imported) and unless a licence be taken out under the hands of three of the commissioners of the customs, or from the customer, or collector and comptroller, where such bond is given for landing and carrying thereof as aforesaid, on forfeiture of the goods, together with the vessel, or boat, and furniture, on which they are laden. The licence to be granted without any charge to the person demanding it. 12 Car. II. c. 21. §. 11.

— The said bond not to be discharged, but by a certificate under the hand and seal of the customer or collector and comptroller of the port where they are landed, of the quality, quantity and package, the marks and numbers, with the name of the ship and master. And bonds not so discharged after six months, are to be transmitted to the commissioners of the customs in Great-Britain, or to the commissioners of the revenue in Ireland, who are to put them in suit immediately. Ditto act.

— No other security, now required by law, for goods carried coastwise, to be hereby lessened; or law in force for preventing the exportation of wool, or other goods aforesaid, to be repealed or made void hereby. 12 Geo. II. c. 21. §. 12.

— None of the goods before mentioned, imported from Ireland, or carried coastwise within this kingdom or Ireland, may be shipped or landed, but in the presence of the proper officers, and at the lawful keys, without leave from the commissioners and officers of the customs, on forfeiture of the goods, or value thereof, and 3s. for every pound weight; to be paid by the proprietor of the goods, or any person concerned in the shipping or landing thereof. 12 Geo. II. c. 21. §. 13.

WOOL, WOOL-FELLS, WOOL-FLOCKS, MORTLINGS, SHORTLINGS, WORSTED, BAY, or WOOLLEN-YARN, FULLER'S-EARTH, FULLING-CLAY, TOBACCO-PIPE-

CLAY, or any scouring-clay or earth, transported out of Great-Britain, or any of the said goods, or **CLOTHS, SERGES, BAYS, KERSIES, SAYS, FRIZES, DRUGGETS, CLOTH-SERGES, SHALLOONS, or other DRAPERY-STUFFS, or WOOLLEN MANUFACTURES,** made up or mixed with **WOOL, or WOOL-FLOCKS,** illegally transported out of Ireland.

— Information of seizure of any of the said goods, as forfeited by this or any other act, are to be entered by none but officers of the customs, excise, or salt-duties; and informations against any persons, for recovery of the penalties and forfeitures, on account of the illegal transportation of the said goods, to be filed, and prosecuted only in the name of the attorney-general, or in the name of some officer of the customs, excise, or salt-duties.

— But this act is not to take away the power given by any law to the commander and officer of ships of war, or the armed sloop, appointed by the admiralty to guard against the transportation of wool out of Great-Britain or Ireland. 12 Geo. II. c. 21. §. 14.

— Any officer making a collusive seizure or information of the said goods, or any fraudulent agreement, whereby the persons concerned may avoid the penalties and forfeitures incurred, forfeits 200l. and is incapable of serving in any office of the revenue; and the exporters, importers, and owners of the goods, forfeit treble the value, to the use of the person who informs or sues for the same in any court of record at Westminster or Dublin, or the court of Exchequer in Scotland. 12 Geo. II. c. 12. §. 16.

— Any person concerned therein, first making a discovery, so as one of his accomplices be convicted, is to be cleared and discharged thereof; and, not being an officer of the revenue, or owner of the goods, to have the whole money recovered on conviction of the offender, the charge of prosecution being first deducted. 12 Geo. II. c. 12. §. 17.

WOOL, WOOL-FELLS, WOOL-FLOCKS, MORTLINGS, SHORTLINGS, WORSTED, BAY or WOOLLEN YARN, CRUELS, or WOOL SLIGHTLY MANUFACTURED, or MATTRESSES, or BEDS STUFFED WITH COMBED WOOL, or WOOL FIT FOR COMBED, FULLER'S-EARTH, FULLING-CLAY, TOBACCO-PIPE-CLAY, or ANY OTHER SCOURING-EARTH or CLAY, exported from Great-Britain, or any of the said goods, or **CLOTH, SERGES, BAYS, KERSIES, FRIZES, DRUGGETS, SHALLOONS, STUFFS, CLOTH-SERGES,** or any other **DRAPERY** made or mixed with **WOOL** manufactured in Ireland, and illegally exported from thence. Actions, suits or informations upon this, or any other act, may be prosecuted (except where by this act is otherwise directed) in any court of record at Westminster, or in the court of Exchequer in Scotland, or at the quarter-sessions of the peace, or before two justices of the peace, in a summary way, at the election of the seizer or informer, or by any law relating to the revenue of Ireland in that kingdom; and if the property be claimed, the **ONUS PROBANDI** to lie upon the owner or claimer. 12 Geo. II. c. 21. §. 18.

— All penalties and forfeitures before mentioned in this act (except where otherwise directed) to be for the use of the person who shall seize, inform, or sue for the same. 12 Geo. II. c. 21. §. 19.

On condemnation of the aforesaid goods, the respective commissioners may cause them to be sold publicly to the best bidder; and the charges of condemnation and sale being first paid, the remainder is to be paid to the person who shall seize, inform, or sue for the same. 12 Geo. II. c. 21. §. 20.

— But if an officer makes a seizure, or carries on a prosecution to effect, by the information of any other person, such person is to have half of what is recovered by the officer. 12 Geo. II. c. 21. §. 21.

— If any person who may become liable to the payment of the 3s. per pound weight by this or by any former acts, is not able to pay it, the respective commissioners may cause 1s. per pound weight of the goods, for which the offender is convicted, to be paid to the informer or prosecutor by their receiver-general, out of any public money in his hands. 12 Geo. II. c. 21. §. 22.

— Any master, mate, or mariners, belonging to any ship concerned in the illegal exportation or importation of the goods aforesaid, from Great-Britain or Ireland, giving an account, within six months after the shipping, the same, to the commissioners of the customs in England or Scotland, or the commissioners of the revenue in Ireland, of the name of the ship, the species and quantities of the goods, the name of the owner, exporter, or persons who act in their aid and assistance, so as they may be convicted, is to be indemnified, discharged of all penalties and forfeitures, and receive $\frac{1}{4}$ of what is recovered, clear of all charges, the other $\frac{3}{4}$ to be applied to the use of his majesty, after deducting the charges of prosecution and condemnation. 12 Geo. II. c. 21. §. 23.

— Every person appointed by deputation, commission, or other instrument, under the hands and seals of the commissioners of the customs, excise, or salt, to act as an officer or

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

of servant under them, in putting this or any act, against the transportation of wool, in execution, is to be esteemed an officer of the customs, excise, or salt respectively. 12 Geo. II. c. 21. §. 24.

— Offering or promising to bribe an officer to connive at the said illegal practices, the penalty is 300 l. 12 Geo. II. c. 21. §. 25.

— Persons obstructing an officer, or his assistants, in making seizures, by virtue of this act, or who being armed or disguised, attempt to rescue any of the aforesaid goods after seizure, are to be transported for seven years. 12 Geo. II. c. 21. §. 26.

WOOL, WOOL-FELLS, WOOL-FLOCKS, MORTLINGS, SHORTLINGS, CRUELS, WORSTED, WOOLLEN AND BAY-YARN, MATRASSES, AND BEDS STUFFED WITH COMBED WOOL, OR WOOL fit to be combed, exported from Great-Britain or Ireland, and WOOLLEN MANUFAC-

TURES exported from Ireland, insured to parts beyond the seas; the person insuring, his aiders, abettors, and assistants, forfeit 500 l. over and above all other forfeitures and penalties they are liable to; and the person insured forfeits 500 l. to the use of the informer, or person who sues for the same. 12 Geo. II. c. 21. §. 29, 30.

— The insurer first making discovery within six months after such transaction, so as the persons concerned with him be convicted thereof, is to be acquitted of the offence, receive the whole forfeiture recovered, deducting charges of prosecution, and likewise retain the money given him for insurance. Or the person insured first making discovery as aforesaid, is to receive back what was paid for the insurance, and also to have the whole forfeiture imposed on the insurer, deducting the charges of prosecution, and to be discharged of the forfeitures incurred. 12 Geo. II. c. 21. §. 31.

X.

X Y L

X YLO BALIANUM. This is the wood of the shrub that yields the balsam of Mecca, and passes for a powerful cordial, cephalic, and alexipharmic. It

X Y L

has been ordered in many compositions; but as it is very hard to be procured, apothecaries generally substitute for it either yellow Saunders or aloes-wood.

Y.

Y O R

Y EAST.

A METHOD of CURING YEAST, the FLOWER of WINE, and WINE-LEES, for the service of distilling, wine-making, vinegar-making, &c.

Take a quantity of common ale-yeast, and put it into a close canvas-bag, and gently squeeze out the moisture in a screw-press, 'till the remaining matter is left as hard as clay; in which state, being close packed in a tight cask, and well secured from the air, it will keep fresh and sound for several months, as has been often experienced.

R E M A R K S.

This is an experiment of considerable use to brewers and distillers, who in England, though they employ very large quantities of yeast, seem to have no good method of preserving it, or raising nurseries thereof, whereby they sustain a considerable loss: whereas the brewers in Flanders make a great profit, by supplying the malt-distillers of Holland with yeast, which is rendered lasting and fit for carriage, after the manner of the present experiment.

The same method is practicable to much greater advantage, in the yeast of wine and wine-lees, if they could be imported into England: for by this means we might easily imitate the wines and brandies of foreign growth; the lees and yeast of wine readily affording an essential oil, by distillation, a small proportion whereof will flavour a large one of wine or brandy. But a shorter and more perfect way, is to let any tasteless, or other proper wine, fret, or stand for some time, upon such lees, or wine-yeast, whereby it will, to great advantage, acquire the natural taste and flavour of the wine whereto the lee or yeast belonged. See the article BREWING.

YORKSHIRE. As this is by far the largest county in England, so it is variously situated, and consequently, has great variety of ground, that is, high and low, rich and poor, marshy and heathy. On the west it is bounded by Lancashire, and a part of Cheshire; on the south by Derbyshire, Nottinghamshire, and Lincolnshire; on the north by Durham and Westmoreland; and on the east by the German Ocean; and contains 360 miles in compass.

The commodities are, in a particular manner, allum, jet, lime, liquorice, horses; its manufactures, knives, bits, spurs, stockings, &c. but the greatest of all is cloth, with which it in a good measure supplies Germany and the North. The corn and cattle, with which it abounds, are not mentioned, because these are what they have in common with other counties. Iron and lead mines have been in more plenty than of late years, though no less than 40,000 persons are employed in the iron manufactures, under about 600 master cutlers, who are incorporated by the title of the cutlers of Hallamshire.

It is divided into three parts, or ridings, each as large, if not larger, than any ordinary county, which are distinguished by west, east, and north, from their situation with respect to the city of York.

The **WEST RIDING**, which is the most considerable of the three, for its fertility and number of inhabitants, is separated by the Ouse from the East Riding; it has the North Riding on the north; part of Lancashire, and Cheshire on the west and south-west; and Lincolnshire, Nottinghamshire, and Derbyshire, on the south-east and south. Its chief rivers are the Ure or Ouse, Don, Calder, Aire, Ribble, and Wharfe. Its air, though sharp, is generally reckoned more healthy than that of the other two; and the soil is various. They have a stone here, which being calcined, is made into allum, by various percolations and boilings: it is noted also for jet and liquorice, for fine horses and goats, for making and curing legs of pork into hams, like the Westphalian, and for the manufactures of cloth and iron.

YORK, the capital of the county, and heretofore the second city in the kingdom, is pleasantly situate, in a large plain, or valley, on the river Ouse, which, though 60 miles from the sea, brings ships to the city that are of 70 tons burthen. A

Y O R

cotton manufacture was lately established here, which is brought to very great perfection.

KNARESBOROUGH is only of note for its medicinal springs, but not so much frequented since Scarborough spa came in vogue.

RIPPON is a large, pleasant, well-built, and populous town, between the Ure and little river Skell: it formerly flourished by the woollen manufacture, which it has since lost, though it is still a staple for wool, which is bought up here every week, by the clothiers from Leeds, Wakefield, Halifax, &c. It has two annual horse-fairs, viz. one the Monday before the 10th of March, the other on the Monday after Lammas-Day, and is noted for making the best spurs. Tanned leather is sold in great quantities, as also cattle of all kinds, at its fairs.

BOROUGHBRIDGE is a borough and post-town on the Ure; it is reckoned that 7 or 8000 l. is laid out yearly here in hardware, which is the chief support of the town.

SHEFFIELD, on the borders of Derbyshire, is an ancient, large, thriving, and populous town, on the river Don, having been noted several hundred years for cutlers and smiths wares, particularly for files and knives, or whittles: the first mills in England for turning grindstones were set up here. The smiths manufactures were encouraged and advanced here, by the neighbourhood of the iron mines.

DONCASTER, on the river Don, is a noble, spacious, and populous town; the manufactures of which are knit waistcoats and petticoats, gloves and stockings.

BAUTRE, situate near the Idle, which parts this riding from Nottinghamshire: it is of chief note for its trade in mill-stones.

BARNESLEY is a well-built town, noted for its trade in wire and hardware.

WAKEFIELD is a large well-built town, in a thriving state, and very populous. Its Friday market is for woollen cloth, like that at Leeds, but not quite so considerable, though abundance of it is made in and near this town: it stands on the Calder, which has been made navigable by acts of parliament, first to this town, and continued from hence to Ealand and Halifax.

HUTHERSFIELD is the first town of note that the Calder comes to from Halifax, and is one of the five towns in this county that have the greatest share in the cloathing trade.

SNATH is a small town, but has a pretty good trade, the river being navigable to it by boats.

HALIFAX stands on the Calder, extending from west to east, on the gentle descent of a hill: it is a parish, the most populous, if not the most extensive, in England. The trade of this town has greatly increased of late years, especially as they have entered into the manufacture of shalloons, of which few, if any, were ever made in these parts before; so that it has been calculated that 100,000 pieces are made in a year in this parish only, at the same time that almost as many kerseys are made here as ever; and it has been affirmed, that one dealer here has traded by commission for 60,000 l. a year, to Holland and Hamburgh, in the single article of kerseys.

It is remarked, that this and the neighbouring towns are all so employed in the woollen manufactures, that they scarce sow more corn than will keep their poultry, and that they feed very few oxen or sheep: so that the provisions they consume come chiefly from the East Riding, and neighbouring counties. Their markets are thronged by such prodigious numbers of people, to sell their manufactures, and buy provisions, that none are more crowded in the north of England, except those of Leeds and Wakefield.

LEEDS, which stands on the river Aire, has been a long time famous for the woollen manufacture, and is one of the largest and most flourishing towns in the county.

Its cloth market was formerly on the bridge; but, on the great increase of that trade, it has been sold in that called the High-Street, or Bridgate-Street, where every market-day in the morning numbers of tressels are ranged, and covered with boards, and, upon ringing of the market bell, at six in the summer, and seven in the winter, the clothiers in the inns bring out their cloth. When the bell ceases, the chapmen come into

into the market, where they match their patterns, and treat for the cloth in few words, and with a whisper, because the clothiers stand so near each other; and perhaps 20,000l. worth of cloth is sold in an hour's time. The bell rings again at half an hour after eight, upon which the scene is changed; the clothiers and their chapmen, with their treffels, disappear, and make room for the linen-draper, hardwaremen, shoe-makers, fruiterers, &c. at the same time the shambles are well stored with all sorts of fish and flesh; and of apples 500 loads have been counted here on a day. There is a magnificent hall in the town, where they also sell great quantities of white cloth: it has a cupola and bell at top, like Blackwell-Hall in London, to give notice when the sale begins. The river Aire being navigable here by boats, opens a communication from the town with Wakefield, York, and Hull, to which places it exports other goods besides woollen, and furnishes the city of York with coals.

BRADFORTH is another town eminent for the woollen manufacture.

ABERFORTH is of note only for its manufacture of pins.

SELBY is a populous, though small town, with a good trade on the river Ouse, which brings up large vessels to it, so that it is inhabited by several merchants.

WETHERBY is a notable trading town on the river Wharfe.

BURSTALL is a little town, noted for the manufacture of broad cloth, so called to distinguish it from kerseys, druggets, &c. though the cloths of this county are all called narrow at London, when compared with the broad cloths made in the west of England. At this town is also made a sort of cloth in imitation of the Gloucester whites, which is of as good a colour as those, if not as fine.

The **EAST RIDING**, which is the smallest of the three, is bounded on the north and west by the Derwent and the Ouse; on the south by the Humber; and on the east by the German Ocean. The air and soil are various, according to the different parts of it. Its rivers are the Ouse, Derwent, Fowlwy, Shelfleet, and Hull.

BEVERLEY, on the river Hull, has a trade in malt, oatmeal, and tanned leather, which are its principal manufactures; but the poor people support themselves mostly by weaving of bone-lace, which of late has met with particular encouragement. Here was formerly a cloathing trade, but long since decayed. Its most remarkable fair is that which begins about nine days before Ascension, and is kept in a street leading to the Minster-Garth, called Londoner-Street, because then the Londoners bring down their wares and furnish the country tradesmen with them by wholesale. The trade of this town is very much increased since the creek, or cut, called Beverley-Beck, from the town to the river Hull, has by act of parliament, in 1727, been cleansed, deepened, and widened, and thereby rendered navigable for vessels of large burthen.

KINGSTON UPON HULL, as it is denominated in all authentic writings, but commonly called **HULL**, is a large, close-built, and exceeding populous town, and not only the most considerable in this part of England, for its inland traffic, but has a foreign trade equal to that of most out-ports in the kingdom; and has as many merchant-ships belong to it, as to any port in England, except London, Bristol, Liverpool, and Yarmouth. Indeed more particular circumstances concur to render it rich in trade, than most towns on our coasts can boast of. One thing has contributed especially to its increase in trade, and to its being the center of the navigation, and that is, the great number of large rivers which fall into the sea near it, by which it carries on a commerce and

navigation with a very great part of England, particularly the inland counties, that have no foreign trade by any other canal; all the heavy goods of which counties, such as lead from Derby and Nottinghamshires, iron ware from Sheffield, cheese from Warwickshire, Staffordshire, and even Cheshire, are brought down to this port, and here exported to Holland, Hamburgh, and the Baltic, as also to France and Spain, from whence they make large returns in iron, copper, hemp, flax, canvas, Russia linen and yarn, besides wine, oil, fruit, linen, &c. from Holland, France, and Spain. But what is more than all is, the vast quantity of corn brought down cut of those counties to Hull, as makes it, without exception, the greatest port in England for exportation of corn, sometimes exceeding even London itself. The trade, on the other hand, betwixt this port and London, especially for corn, lead, and butter, and the trade between this port and Holland and France, not only for all those commodities, but for the cloth, kerseys, and other manufactures of Leeds, Halifax, and other great and populous towns of the West-Riding, is such, that they not only employ ships, but fleets, which are generally from 50 to 60 sail together, and in war time often 100 sail, or more. They who have seen the greatest ports abroad, say there is more business done at this, in proportion to its bigness, than in any other port in Europe.

BRIDLINGTON, which stands near the bay so called, is of late years become a place of good trade, and has a great corn market. The key, which is near two miles from the town, is chiefly inhabited by seafaring people.

The **NORTH RIDING** extends along the coast, from Robin Hood's Bay, as far as Whitley, being bounded on the north with the river Tees; it runs from the sea, in a narrow track of near 60 miles, as far as Westmoreland, and is bounded on the south and west with the Derwent and Ure, which part it from the East and West Ridings. The soil in many parts is very indifferent, it being rocky and mountainous, but the bottoms and vallies are not unfruitful. The hills afford great store of lead, pit-coal, and lapis calaminaris; and in some places it produces marble, alum, jet, and copperas. The chief allum-works here were carried on by the late duke and duchess of Buckingham, at Whitby, where was the greatest plenty of its mine. The jet is found in several places by the sea side, in the chinks and clefts of the rocks.

SCARBOROUGH is an ancient borough, situate on a steep rock, has a good trade, and a commodious key, with a good number of vessels, which are chiefly employed in the coal trade between Newcastle and London. From the middle of August to November, herrings are taken here in great numbers, with which they supply the city of York, as also with several other kinds in their season. But the wealthy condition of this town is chiefly owing to the number of persons of all ranks that flock hither every year, in the season, to drink the waters of its chalybeat spring.

MALTON is a populous borough, and its Saturdays market is the best in the county for horses, black cattle, and other commodities, especially tools for husbandry.

NORTHALLERTON has a good market also for horses, and other cattle, corn, &c. and its beast fairs the most thronged in England.

RICHMOND has a good trade in stockings and sailors woollen caps.

YARUM is a corporate, though a small town, and carries on a pretty trade with London by water, for lead, corn, and butter.

MIDLAM is noted for a manufacture of woollen cloth.

MASHAM has also a cloth manufacture.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE, continued from the End of Letter U.

CHIEF LAWS RELATING TO YARN.

YARN, linen. See the end of letter I. and the end of letter W. for WOOL.
—Brown or raw linen-yarn made of FLAX may be imported in British ships legally navigated, free of duty, from the 24th of June 1756, for 15 years, and to the end of

the then next session of parliament, if duly entered and landed in the presence of the proper officers.

—If any doubt arises whether such yarn is made of FLAX or not, the *ONUS PROBANDI* to lie on the importer or claimer. — 29 Geo. II. c. 15. §. 13, 24.

—MOHAIR. See end of letter G. — Yarn worsted. See end of WOOL.

Z.

Z I N

ZAFFRE, or SAFREE, is a mineral of a blueish, or partridge-eye colour, which the English, Dutch, and Hamburgers bring from the East-Indies, and especially from Surat.

Most of the zaffre we have is in a grey powder, like ashes, from which it so little differs in appearance, that we are forced to consult the workmen who use it, to know, by trials, whether it is what it ought to be.

There are, however, two sorts of zaffre, the fine and the common: the former is in a bluish, or cineritious stone; the latter in powder, and very often so bad, that it is hardly good for any thing, and being so very weighty, must needs be mixed with some stony substance, the other being much lighter.

This matter is much used by Delft-ware and glass-makers, to give a blue colour to both sorts of ware: it is also with zaffre that they colour calcined pewter, in order to make a sort of false stone; and with zaffre it is that the azure colour of glass is produced, as is before observed, and of which is made the counterfeit sapphire, according to Pomet.

Monfieur Lemery says saphre, safre, zafre, or sapphire, is a mineral whereof there are two kinds, one called fine sapphire, and the other common: the fine sapphire is a pretty soft stone, of a blueish colour; the common sapphire is a greyish heavy powder: both sorts come from India. The fine sapphire is used to give a blue colour to enamel, to earthen ware, and glass; they likewise colour counterfeit sapphires with it, whence it takes its name.

ZINCK, called **ZINCHUM**, **ZINCTHUM**, and **MARCASITA PALLIDA**, by some, is a metallic, sulphureous, heavy substance, resembling lead in colour, fusible

and ductile to a certain degree, very hard to break, inflammable, and volatile. It seems to have been quite unknown to the ancients; and even the moderns knew very little of its nature and origin, 'till Mr Stahl explained it, in his Metallurgia. It is extracted from a kind of the lapis calaminaris, and from the lead ore of the mines of Gosselar, which ore is very hard to melt, though it appears rich and shining. Three substances are separated from it, lead, zinck, and a kind of cadima for-nacea, which, melted with copper, makes a Bath metal, or prince's metal, so called from prince Rupert, who is said to have invented it: but the finest metal of this kind is made of zinck and copper melted together. In the melting this Gosselar ore, the lead remains at the bottom of the furnace, and the zinck and cadima stick to the sides. The cadima is to be long exposed to the air before it is fit for use, and the zinck is purified by careful meltings, and cast into moulds.

The zinck at this time is much in use, for the pewterers have found it more proper to cleanse their pewter than pin-duft and rosin. It is wrong to believe that zinck is mixed with pewter to increase its weight, for unto a fount of five or six hundred pounds of it they put but one pound of zinck, and, which is wonderful, the zinck has the quality of purifying and whitening the pewter, and acting upon it as lead does upon gold, silver, or copper. This zinck is used to give copper the colour of gold, especially when mixed with turmeric, and works upon copper as arsenic does, that turns it of a silver colour; or the lapis calaminaris, that makes it yellowish; or, lastly, as Hungarian vitriol, that turns iron into copper colour, as hath been observed in the Philosophical Transactions of the Royal Society at London.

A CONCISE EXPLANATION of the **CONTENTS** of **MR. SAXBY'S PORTABLE BOOK OF RATES**; referred to in this **WORK**, in relation to the **BUSINESS** of the **CUSTOMS**, and the **CHIEF ACTS** of **PARLIAMENT** contained therein. See the **Conclusion** of **Letter A**, and that of every other **Letter**. See also our article **SUBSIDY**.

UNDER any peculiar articles, where it is necessary, we have given such an idea of the practical business of the customs, both as the same respects the out-ports, as well as the port of London, that the reader will easily judge from thence, what further knowledge may be occasionally requisite for him to obtain, relative to that particular branch of trade he may be interested in; and he will be able to obtain the same from his own enquiry, when he has been duly introduced into the system of our customs.

At the end of the letter **A**, we have also communicated, in an intelligible manner, it is apprehended, the principles and rudiments upon which the computation of the custom-house **DUTIES** are grounded, as the same have relation to British subjects and strangers; and also to the customary drawbacks, bounties, and premiums, as they are computed in Mr Saxby's book of rates.

In order to render the same the more easily comprehensible to our readers, which it really requires, we have shewn, that the **REFERENCE FIGURES**, affixed to the **RIGHT-HAND SIDE** of the columns of that ready-calculated book of rates, are the keys whereby such computations are to be understood. To this end, we have represented the peculiar **TABLE** and **LIST**, made use of therein, invented first by Mr. Edgar, in the year 1714, since followed by the late Mr. Crouch, and now by Mr. Saxby. For the said **TABLE** and **LIST**, contained in pages 73, 74, and 75 of Saxby, indicate,

with all possible brevity, the several branches of duties, to which the respective goods, contained in the book of rates, are liable, by the various acts of parliament that are now in force. At the end of our letter **A**, we have also given the **RULES**, **ORDERS**, **DIRECTIONS**, and **ALLOWANCES**, for the advancement of trade, and **ENCOURAGEMENT** of the **MERCHANT**, as also for the regulating as well of the merchant in making of due entries and just payments of their customs, as of the **OFFICERS** in all the ports of this kingdom, in the faithful discharge of their duty; referred to in the act of tonnage and poundage, passed anno 12 Car. II. Which **RULES**, &c. are signed by Sir Harbottle Grimstone, speaker of the house of commons.

We have also noticed the **RULES**, **ORDERS**, and **REGULATIONS**, annexed to the additional book of rates, referred to in an act passed anno 11 Geo. I. c. 7.

Upon the before-intimated rules and regulations, we have made some remarks that we judged necessary, in relation to the **DISCOUNTS** allowed to merchants, upon the payment of the divers subsidies at importation; to which we refer the reader; we judging what we have there urged may require consideration.

If the reader likewise consults our article **SUBSIDY**, he will find a succinct account of those duties to which various species of goods are subject, pursuant to act of parliament; with some observations thereon, which may not be altogether useless to those

those who would well weigh the conditions whereon such subsidies are paid.

Besides the several subsidies noticed under our article SUBSIDY, Mr. Saxby's book of rates contains, in the first part of it, the various imposts, and other kind of duties, payable on goods and merchandizes imported into, brought coastwise, or exported out of Great-Britain; all which are enumerated in the above-mentioned LIST of DUTIES, conjoined with the TABLE before observed, except those that have arose since.

This part of Saxby contains an abstract of the several acts referred to, and the particular conditions upon which the said impositions are paid; all which are necessary to be consulted by those who would comprehend the TABLE and LIST.

The second part of Saxby contains the RATES OF MERCHANTIZE: that is to say,

• The subsidy of tonnage; the subsidy of poundage; and
• the subsidy of woollen cloth, or old drapery; as they are rated and agreed on by the commons house of parliament, set down and expressed in that book, to be paid according to the tenor of the act of tonnage and poundage from the 24th day of June, inclusively, in the 12th year of the reign of his Majesty (Charles the Second) and subscribed with the hand of Sir Harbottle Grimstone, Bart. speaker of the house of commons.' Likewise,

• An additional book of rates (referred to by 11 Geo. I.) of goods and merchandizes usually imported, and not particularly rated in the book of rates referred to in the act of tonnage and poundage, made in the 12th year of the reign of king Charles the Second; with rules, orders, and regulations, signed by the right honourable Spencer Compton, Esq; speaker of the honourable house of commons.' Together with

The several additions and alterations which have been respectively made by any subsequent act of parliament; every of which is distinctly pointed out and explained. To which are added,

The TOTAL AMOUNTS of the net duties to be paid on each species of goods imported, exported, or brought coastwise, and of the net DRAWBACKS to be repaid on any of them when duly exported; with proper REFERENCES, shewing the several respective BRANCHES which compose the said TOTAL AMOUNTS, &c. and commencing from page 79 to page 266 of Saxby, on goods INWARDS, or imported.

Then follows the SUBSIDY OF TONNAGE, upon all WINES to be brought into the port of London, and all other ports of Great-Britain, and dominions thereof, by BRITISH; and also the DRAWBACK thereof to be repaid upon due exportation, which begins at page 267, and continues to page 275.

REMARKS.

With respect to the WINES mentioned in Saxby, page 267, it must be observed, that all merchant-strangers, bringing in any sorts of the wines there enumerated, are to pay thirty shillings in the ton, over and above the rates there signified, which the natives pay; including twenty shillings the ton formerly paid to his Majesty, by the name of Southampton duties for muscadels, malmies, and all other wines of the growth of the Levant.

For which sort of wines, the stranger is also to pay to the use of the town of Southampton, for every butt or pipe, the sum of ten shillings.

Moreover, the stranger is to pay the ancient duty of butlerage, which is two shillings upon every ton.

Note, that such wines as shall be landed in any of the out-ports, and custom paid, and afterwards brought to the port of London by certificate, shall pay so much more custom, as they paid short of the duty due in the port of London. For the explanation of which see pages 7 and 274, and 275, of Saxby.—And for the other duties on wines, see the respective branches contained therein.

N. B. All wines imported into the port of London, are to pay for the use of the orphans of the said city, for every ton, as by 5 and 6 Will. and Mary, cap. 10. §. 7. 4 shillings. And

Also, if imported by strangers, the ancient duty of butlerage, which is for every ton 2 shillings.

WINE-LEES imported into any port, are to pay the same duties as wine; but are exempted from drawback upon exportation. 1 Geo. II. cap. 17.

N. B. No wines, except of the dominions of the Great Duke of Tuscany, in open flasks, or of Turkey, or any other parts of the Levant seas, may be imported in flasks or bottles.

Though part of the duties on wines may be secured by bond; yet, as that does not frequently happen, all the duties, as computed in Saxby, are as if paid down in ready money; therefore, when bond is to be given, you must consult the ADDITIONAL DUTY, IMPOST ON WINES, and IMPOST 1692, Saxby.

Wines may not be brought in any other than British or Irish ships, or ships of the built of the country of which

VOL. II.

they are the growth, or of the port where they can only; or are most usually first shipped; nor from the Netherlands or Germany, except RHENISH or HUNGARY WINES from Hamburg. 12 Car. II. c. 18. §. 8.

For other regulations respecting wines, see our article WINE, and the end of letter W, where the last duties on wines are observed, since the publication of Saxby. And if the duties are understood, as they are calculated in Saxby's present book, it will be easy to make any after-addition thereto; that may happen.

The tonnage duty comprehends the duties payable on wines imported (and the old subsidy on perry, rape of grape, fyder, fyder-eager, and vinegar, the imposts on vinegar, and the coinage duties) being regulated by the sum certain on the ton measure.

All the duties on wines are explained in Saxby, under each respective branch in chap. I. wherein are shewn the GROSS DUTIES, the DISCOUNTS thereon, and the net duties to be paid or secured (for one ton, or one gallon) according to the several circumstances of entry and importation; therefore, when the branches, to which any sort of wines are liable, are desired to be known, that sort (observing the particular circumstances of entry and importation) must be sought for in Saxby between the pages before said, of 267 and the page 275; and opposite thereto will be the REFERENCE LETTER, as contained in the preceding TABLE, representing the particular branches, as is explained in the following example.

One ton of Spanish wine, unfilled, for sale, imported into the port of London, by British, in British ships qualified, all duties paid down.

Upon recourse had to page 269, Saxby, in the REFERENCE COLUMN, directing to the said TABLE and LIST, at the end of our letter A, or Saxby 74, 75, opposite to the sort of wine above described, will be found the REFERRING LETTERS Z b, which letters (being found also in the TABLE) refer to the BRANCHES contained in the LIST N^o. 1. III, 2, 3, 4, 7, 16, 34; each of which branches must be consulted, that the respective sums due thereon may be exactly charged; which from the above example will be found to stand thus. viz.

		1.	s.	d.	20ths.
N ^o . 1.	Old Subsidy	-	-	3	10 2 8
N ^o . III.	Additional duty	-	-	2	17 1 8
N ^o . 2.	New Subsidy	-	-	3	10 2 8
N ^o . 3.	One-third subsidy	-	-	1	3 4 16
N ^o . 4.	Two-thirds subsidy	-	-	2	6 9 12
N ^o . 7.	Impost on wine	-	-	8	0 7 1
N ^o . 16.	Coinage duty on wine	-	-	0	10 0 —
N ^o . 34.	Duty on wine 1745	-	-	4	0 0 —

Total duty to be paid — — — 25 18 3 13

As the same stands at present in Saxby, page 316, before the last further duty on wines took place in the year 1762, viz. on French wine and vinegar, of 8 l. per ton; and on all other wines and vinegars imported, 4 l. per ton. See the end of letter W, for the BUSINESS OF THE CUSTOMS. So that there must be added to the said sum in Saxby, of 25 l. 18 s. 3 d. $\frac{13}{16}$, the further additional duty of 4 l. per ton, which makes the duty 29 l. 18 s. 3 d. $\frac{13}{16}$ per ton, on the wine above.

But as the duties on wines bear so many branches of duties; for the greater ease and dispatch in computing them, it is the practice of the customsto work by tables, wherein each branch is computed net, according to all the respective circumstances of importation, discount, &c. from a gallon to a ton.

However, with relation to wines, the computations in Saxby, from page 269 to page 275, may be consulted; and then the last additional duties mentioned before must be added thereto.

The next part contained in Saxby concerns the rates of merchantize OUTWARDS, referred to by the act of TONNAGE and POUNDAGE, Anno 12 Car. II. c. 4. §. 2, 7; with the net duties payable on each species of goods and merchantize (subject thereto) by that or any subsequent act of parliament; together with the subsidy of poundage, of six-pence in the pound, to be paid on the exportation of foreign goods used in dyeing, &c. This extends from page 279 to 306, including directions for the payment of the subsidy upon woollen-cloths, or old drapery; the former of these being mighty easy; the REFERENCE LETTERS directing to the TABLE, being I b, which point to page 48 in Saxby, with directions for the computation.

The following part of Saxby contains the total net duties payable upon goods brought COASTWISE from port to port of Great-Britain; and also to be repaid on due exportation, which consists only of the single page 307, and is understood by the REFERENCE LETTERS to the TABLE of H A, V b. the former directs to pages 52 and 53, in Saxby, and the latter to page 54, where the duties are plain enough.

After this follow certain RULES, ORDERS, DIRECTIONS, and ALLOWANCES, for the encouragement of the merchant, as also for the regulating as well of the merchant in making of DUE ENTRIES and JUST PAYMENTS of their customs, as of the officers in all the ports of this kingdom, referred to in the act of tonnage and poundage passed anno

anno 12 Car. II. — Also, the RULES, ORDERS, and REGULATIONS, annexed to the ADDITIONAL BOOK of RATES referred to in an act passed anno 11 Georgii Primi, c. 7. — All which ought to be deliberately consulted by merchants for their own interest. See what we have said thereon at the conclusion of our letter A, respecting the BUSINESS of the CUSTOMS, and also under our article SUBSIDY.

Chapter the 3d of Saxby begins at page 315, and ends at 388, and contains to the time that gentleman wrote. I. Instructions for the computation of the several branches composing the total duties to be paid on goods and merchandizes imported, exported, and brought coastwise; illustrated by examples adapted to the respective circumstances of importation, &c. II. The several allowances and bounties payable out of the duties of customs, the bounties and drawbacks on British exciseable goods exported, and the premium on naval stores imported.

In regard to the former of these, the reader is desired to consult the end of our letter A, upon the computation of the duties, &c. together with what we have here said, and also under our article SUBSIDY: and for the variety of examples given in Saxby we refer him to the before-mentioned pages; recommending to him the consideration of the subsequent acts of parliament, that have been made since Mr Saxby wrote; especially that which concerns the subsidy of 1759, and that of the further additional duties on wines, cyder and perry, made in 1762.

With relation to the several ALLOWANCES, and BOUNTIES payable out of the duties of the customs, the bounties and drawbacks on British exciseable goods exported, and the premium on naval stores imported; together with instructions in regard to the performance of the respective regulations required by law; these concerning the interest of merchants so materially, we shall give them at large at the end of these short observations on the book of rates in general.

The fourth chapter of Saxby begins at page 389, and ends at page 433, and contains, 1. List of the ports of Great-Britain, with their members and creeks. 2. The names of the lawful keys, wharfs, &c. for shipping and landing goods in the port of London. 3. Fees and allowances due and payable to the officers of his Majesty's customs in the port of London. 4. The grant to the city of London of the duties of scavage, package, &c. 5. The scavage table of rates inwards. 6. The package table of rates outwards. 7. The balliage duties outwards. 8. The packers water-side porters table of duties and rates for landing and shipping out strangers goods.

The contents of this chapter are known as soon as perused, and require only to be duly noticed, that traders may be informed when they have justice done them according to the laws of the land still in force.

The fifth and last chapter is an index, containing an abstract of the laws now in force for collecting, and otherwise regulating the customs, digested and disposed in alphabetical order; with references to the respective acts, and to the material circumstance throughout the book.

This index serves to give some idea of the multiplicity of our laws relative to the revenue of customs only, yet a very faint one of their full bulk and extent; for, was every trader obliged to consult them all at large; and we had given them in their full length from the statutes, in this work, we might have easily filled up our volumes even with those laws, and more especially so, if we had had added thereto those appertaining to the excise, and other branches of trade also. 'Tis no little misfortune to this kingdom, that the present constitution of the public revenues, particularly, should occasion such a body of numerous laws, which concern our commerce and navigation only; for it requires more application to become masters of those laws than traders have to spare, or even our professed lawyers either to reconcile: yet what adds to our misfortune is, that we have no hopes of these voluminous laws being lessened to any considerable degree, till the whole state of our revenues is changed; and when that will be, since we are in the way of encreasing our laws concerning it every session, we do not presume to say, notwithstanding there is nothing of so much importance to these kingdoms. But who will attempt what he will never be recompensed for in this nation?

At the end of every letter of our work, we have given an abstract of many materials of the laws relating to the customs, and have occasionally interperfed others throughout this performance. Yet we the rather refer our readers to consult the Statutes at Large, upon any peculiar branch of trade wherein they may be concerned, than to depend wholly upon our abstracts, or those of any other. Even those published by the officers of the customs themselves, who are daily concerned in the practice of the custom laws, we have found to be very imperfect, of which Mr Saxby has complained largely in the introduction to his book of rates; and perhaps it may not be long before the imperfections of his book may be shewn by others: and it is, perhaps, more owing

to the laws themselves than to those who may endeavour to explain them, as might be shewn in many instances, if necessary. At present I shall only observe, in the words of Mr Saxby, that 'the allowances, bounties and drawbacks payable on British goods exported, and premiums on other goods imported, &c. being a part of business not so immediately obvious to the officers of the customs, (and I will add, not to the traders themselves, though for other reasons than he has assigned perhaps, some of them being within the province of the excise and salt duties) have not been heretofore so well collected and digested as they might have been; for though part of them have been extremely well done, others have been but slightly touched, and some quite omitted: but as they are now become very numerous, and in regard to bounties and premiums a very extensive and formidable branch of the business of the customs, it became necessary that the merchants, as well as officers, should be well instructed therein; therefore great care and diligence have been used to construct them in such manner, as that every regulation for the obtaining the several bounties and premiums is properly inserted under the respective heads; and in regard to the payment of all other allowances, &c. the instructions for the performance of the respective regulations required by law, are so particularly and extensively described, that the officers will scarcely be at a loss in any circumstance.'

As we esteem this one of the most material improvements in Mr Saxby, for the benefit of the trader, we shall give the same as it is therein contained.

SECTION II.

The several allowances and bounties payable out of the duties of the customs, the bounties and drawbacks on British exciseable goods exported, and the premium on naval stores imported; together with instructions in regard to the performance of the respective regulations required by law.

1. Bounty on corn exported.
2. Bounty on British refined sugar exported.
3. Bounty on British-made sailcloth exported.
4. Bounty on spirits drawn from barley, malt, or other corn exported.
5. Bounty on British manufactures of silk exported.
6. Bounty on British-made gunpowder exported.
7. Bounty on British ships employed in the whale-fishery.
8. Bounty for encouragement of the British white-herring fishery.
9. Bounty on ships built for, and employed in the British white-herring fishery.
10. Bounty on British and Irish linens exported.
11. Bounty or premium on British plantation indico imported.
12. Allowance on damaged tobacco imported.
13. Allowance or drawback of the duties of coals used in copper or tin mines.
14. Allowance on damaged or corrupt wines imported.
15. Allowance of portage.
16. Drawback of the excise duty on British-made candles exported.
17. Drawback of the excise duty on hides or calve-skins rough or tanned; hides or calve-skins, dressed or curried; sheep skins and lamb-skins, tanned, tawed, or dressed, exported.
18. Drawback of the excise duty on British-made soap exported.
19. Drawback of the excise duty on British-made paper exported.
20. Drawback of the excise duty on silks, silk handkerchiefs, calicoes, and all linens and stuffs printed, stained, painted or dyed in Great-Britain, exported.
21. Drawback of the excise duty on British-made starch exported.
22. Bounty or allowance on gold and silver thread, lace or fringe, made in Great-Britain, exported.
23. Drawback on boots, shoes, and other manufactures of British-tanned leather, exported.
24. Drawback of the excise duty on British-wrought plate exported.
25. Drawback of the excise duty on glass made in Great-Britain exported.
26. Drawback of the excise or inland duty on British-made salt exported.
27. Bounty on fish and flesh exported.
28. Premium on naval stores imported.
29. Drawback of the excise duty on strong beer, strong ale, mum, cyder, and perry, made in Great-Britain, exported. 1 Will. and Mar. cap. 22, &c.
30. Drawback of the excise duty on spirits drawn from corn in Great-Britain, without any mixture of other materials, exported. 6 Geo. II. cap. 17.
31. Drawback of the excise on spirits exported. 19 Geo. II. cap. 8.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

I. The bounty on CORN exported.

		Price per quarter Winchester measure.			Bounty per quarter Winchester meal.		
		l.	s.	d.	l.	s.	d.
By 1 Will. and Mar. cap. 12. §. 2. —	WHEAT — — —	2	8	0	0	5	0
	RYE — — —	1	12	0	0	3	6
	BARLEY — — —	1	4	0	0	2	6
	MALT — — —	1	4	0	0	2	6
		But the excise of 6d. per bushel must not be reckoned into the price of the malt. 13 and 14 of Will. III. c. 5. §. 31. 12 Ann. c. 2. §. 3.					
By 5 Ann. c. 8. article 6. 5 Ann. c. 29. §. 10, 15.	BEER, alias BIGG	1.	4	0	0	2	6
	Malt made of wheat	2.	8	0	0	5	0
	Oatmeal when oats do not exceed	0	15	0	0	2	6

* When the above sorts of corn, either ground or unground, do not, at the port of exportation, exceed the respective prices in the first column, and shall be shipped on board any British ship, whereof the master, and at least two-thirds of the mariners, are British subjects, in order to be exported to parts beyond the seas, the exporter is to be allowed the respective bounties in the second column; provided a certificate in writing, under the hand of the exporter, containing the quantity and quality of the corn, be first brought to the collector of the port, and the truth thereof confirmed by the oath of one or more credible person or persons; and bond be given by the exporter, in the penalty of 10l. for every ton of oatmeal, or forty bushels of beer, alias bigg, and 200l. at least for every 100 tons of all the other sorts (i. e. eight shillings per quarter) that the same shall be exported into parts beyond the seas, and not be reloaded in Great-Britain, or the islands of Guernsey or Jersey.

* 1 Will. and Mar. cap. 12. §. 2. 5 Ann. cap. 29. §. 10. 3 Geo. II. cap. 7. §. 15.

† In order to adjust the quantity for which the bounty is to be paid, the corn is to be admeasured by the proper officers of the customs, who, for the greater expedition, may make use of a tub or measure containing four Winchester bushels; or if the said corn be intended to be exported in sacks, they are to choose two out of any number not exceeding twenty sacks, and so in proportion, and thereby compute the whole quantity; but if exported from London, may be measured by the sworn meters, from whose certificate the searchers may certify the quantity shipped for exportation.

† 2 Geo. II. cap. 18. §. 4, 5.

‡ But with respect to malt, the bounty is to be allowed after the rate of thirty quarters, and no more, for every twenty quarters of barley, or other corn or grain entered and made into malt, for exportation; as shall appear by a certificate from the proper officer, with whom the corn or grain, intended to be made into malt for exportation, was entered.

‡ 3 Geo. II. cap. 7. §. 14, 15.

§ And with respect to wheat meal or other ground corn or grain, the same bounty, and no more, is to be allowed for 224 pounds weight thereof, as is allowed for 4 bushels of the same kind of corn or grain, unground, and so in proportion. And if it is brought to be shipped off in sacks, the proper officer may choose and weigh two sacks out of any number not exceeding twenty sacks, and so in proportion for any greater quantity, and thereby compute the weight of the whole. And the bounty money is to be paid to the exporter accordingly, upon producing a certificate from the proper officer of the customs, attesting the quantity, quality, and weight thereof.

§ 24 Geo. II. cap. 56. §. 1.

|| The aforesaid bounty to be paid by the collector of the port, upon demand made by the exporter, unless he has not sufficient money in his hands; and then (except for bigg and oatmeal) he is to certify the same to the commissioners of the customs, who are to cause the money to be paid by the receiver-general within three months.

|| 1 Will. and Mar. cap. 12. §. 2. 12 and 13 Will. III. cap. 10. §. 91. 5 Ann. cap. 29. §. 10. 3 Geo. II. cap. 7. §. 15.

¶ When the certificate above mentioned, annexed to the debenture for corn exported, is produced to the commissioners of the customs at London, they are immediately to cause

¶ 26 Geo. II. cap. 15. §. 6.

an indorsement to be made on the back of the debenture, of the day when it was produced, and as soon as conveniently may be, sign their order to the receiver-general for payment.

* If any such debenture remains unsatisfied more than six months after the day it has been produced to the commissioners of the customs at London, interest, at the rate of three per cent. per annum, is to be allowed thereon, from the end of the said six months to the time of payment, or to the time of proper notice given thereof.

* 26 Geo. II. cap. 15. §. 1.

† The receiver-general, when he has sufficient money in his hands, is to give notice in writing, to be affixed on three or more doors of some public place in the custom-house, London, and to be advertised in the London Gazette, that on a certain day therein limited, and on the four days following (so as six days intervene between the date of the notice and the day so limited, and so as Sundays and holidays be not included in such four days) he shall be ready to pay the principal and interest of such debentures, which have remained unsatisfied above six months from the time of their being produced as above, or principal of such debentures, which have not exceeded the said six months; after the expiration of which five days, all interest is to cease, though the money due should not then be demanded.

† 26 Geo. II. cap. 15. §. 2, 4.

‡ These debentures are to be paid by the receiver-general, without fee or reward, in course, respect being had to the times when they were produced to the commissioners of the customs, without any preference, and are assignable by indorsement thereon.

‡ 26 Geo. II. cap. 15. §. 5, 7, 8.

§ The same allowances are granted, and rules to be observed with respect to debentures for corn exported from Scotland; with this difference, that the certificate is to be made to the commissioners of Edinburgh, and notice of payment to be published in the Edinburgh Courant, and affixed in the custom-house, Edinburgh.

§ 26 Geo. II. cap. 15. §. 9, 10, 11, 12.

|| The aforesaid bond, given for the exportation, may be delivered up to be cancelled, upon producing a certificate under the common seal of the chief magistrate in any place beyond the seas, or under the hands and seal of two known British merchants, testifying that the corn was there landed, or upon proof by credible persons, that it was taken by enemies, or perished in the seas.

|| 1 Will. and Mar. cap. 12. §. 2. 5 Ann. cap. 29. §. 10.

¶ Malt reloaded in Great Britain is forfeited, with treble the value, besides the penalty of the bond.

¶ 3 Geo. II. cap. 7. §. 15. and since continued yearly with the malt act.

II. The allowance on British REFINED SUGAR exported.

20 — — 45. — 1.	Further continued to 1 June 1754		
27 — — 18. — 6.	Further continued to 29 September 1760		
	Upon British-made SAILCLOTH or CANVAS, fit for or made into sails, for every ell exported —		0 0 1
By 4 Geo. II. c. 27. §. 4.	Was granted from 24 June 1741, without limitation, a further allowance for every ell of British-made SAILCLOTH —		0 0 1
	Total bounty —		0 0 2

† This bounty is to be paid out of such parts of the old subsidy as are applicable to incidents, upon the exporter making oath, that such sailcloth was made in Great-Britain, is actually exported, or shipped to be exported, without any intention to be reloaded in Great-Britain, and that no former reward upon these acts was made for the same.

† 12 Ann. cap. 16. §. 2. 23 Geo. II. cap. 21. §. 26. 26 Geo. II. cap. 32. §. 9.

† Such sailcloth, upon which the bounty has been given, reloaded in Great-Britain, shall be forfeited; and every person concerned in bringing back, or reloading the same, shall forfeit two shillings for every ell so brought back or reloaded.

† 12 Ann. cap. 16. §. 3.

IV. The bounty on SPIRITS drawn from barley, malt, or other corn, exported.

By 6 Geo. II. cap. 17. §. 10. was granted without limitation, viz. SPIRITS drawn from barley, malt, or other corn, } Bounty. for every ton thereof — 1 10 0

§ To be paid to the exporter by the commissioners of the customs, or other proper officer belonging to them, when barley is at 24s. per quarter, or under, upon such proof of the exportation, as is directed by 1 Will. and Mar. cap. 12. and out of such duties as are liable to the payment or the bounties on corn exported, in the same manner as if the respective quantity of barley, malt, or other corn, had been exported, allowing that twelve quarters of barley or malt are made use of in making one ton of spirits.

§ 6 Geo. II. cap. 17. §. 10.

V. The bounty on British MANUFACTURES of SILK, &c. exported.

By 8 G. I. c. 15. §. 1. granted from 25 March 1722, to 25 March 1725.
11 — 29. — 2. thence continu'd to 25 March 1728.
2 G. II. c. 28. — 4. thence — to 29 Sept. 1734.
8 — 18. — 2. thence — to 25 March 1742.
15 and 16 — 35. — 2. thence — to 1 June 1747.
20 — 45. — 2. thence — to 1 June 1754.
26 — 32. — 4. thence — to 24 March 1758.

And from thence to the end of the then next session of parliament.

Upon due exportation of the British manufactures of silk hereafter mentioned, there are to be allowed the following respective bounties, viz.

RIBBONS and STUFFS of SILK ONLY, the pound	0 3 0
avoirdupoise weight —	
SILKS and RIBBONS of SILK mixed with GOLD or SILVER, the pound avoirdupoise weight	0 4 0
SILK STOCKINGS, SILK GLOVES, SILK FRINGES, SILK LACES, STITCHING or SEWING SILK, the pound avoirdupoise weight	0 1 3
STUFFS of SILK and PROGRAM YARN, the pound avoirdupoise weight	0 0 8
STUFFS of SILK mixed with INCLE or COTTON, the pound avoirdupoise weight	0 1 0
STUFFS of SILK and WORSTED, the pound avoirdupoise weight	0 0 6

* To be paid out of the customs, or other duties upon goods imported, by the collector of the port, with the privy of the comptroller, upon a debenture made out from the entry, the shipping verified by the searcher, and the oath of the exporter, that they are of British manufacture, and exported without intention of reloading in Great-Britain; he having first given security with one or more persons, in the value of the goods, to the same purpose; and to produce a certificate from the officers of the customs in discharge thereof, within six months, for such goods as shall be exported to Ireland, Guernsey, Jersey, Alderney, Sark, or Man, and within eighteen months for those to the British plantations; and for what shall be exported to any other foreign parts, a certificate under the common seal of the chief magistrate, or under the hands and seals of two known British merchants there residing.

* 8 Geo. I. cap. 15. §. 1, 5.

† But after 1 May 1729, if such goods were sold on the coast of Africa, or other foreign parts, where certificates of the landing cannot be obtained, or were transhipped at any of the British plantations in America, without being there landed, into ships bound to Africa, or other foreign parts, the bonds given on exportation may be discharged, and vacated, upon proof made, within eighteen months from the date of such bonds, upon oath of the master, mate, purser, &c. and also upon oath of the merchant exporter, if living, that to the best of their knowledge and belief, the said goods have been disposed of at the places therein to be mentioned, and that they have not been reloaded, or brought on shore again, in any port or part of Great-Britain.

† 1 Geo. II. cap. 17. §. 9.

† The aforesaid manufactures may, after entry, be opened and examined by the officers, and if wrong entered, are forfeited, with their value; but if right entered, must be repacked at the officer's charge, which may be allowed him by the commissioners of the customs.

† 8 Geo. I. cap. 15. §. 2, 3. 11 Geo. I. cap. 29. §. 2.

§ And in all cases of disputes, touching the manufacture or quality, the onus probandi is to lie on the proprietor.

§ 8 Geo. I. cap. 15. §. 2, 3. 11 Geo. I. cap. 29. §. 2.

|| No allowance to be made for such manufactures as are mixed with gold, silver, or silk, only at the ends and edges of the piece.

|| 8 Geo. I. cap. 15. §. 3.

¶ Silk stuffs mixed with program-yarn, incle, cotton, or worsted, not to have allowance, except at least two-third parts of the ends, or threads of the warp (in the length of the piece) be all silk, or mixed, or twisted with silk in the warp, and the silk mixed in the warp be obvious and apparent to the view of the proper officers of the customs; and the silk therein used be double the value of the bounty.

¶ 9 Geo. I. cap. 8. §. 9. 1 Geo. II. cap. 17. §. 10.

And

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

† And if entered or shipped, not being mixed with the quantity of silk required, they are forfeited, with double the value.

† 9 Geo. I. cap. 8. §. 10. 11 Geo. I. cap. 29. §. 3.

‖ If relanded, forfeited, with the penalty of the bond, and treble the value.

‖ 8 Geo. I. cap. 15. §. 4. 11 Geo. I. cap. 29. §. 2.

VI. The bounty on British-made GUNPOWDER exported.

By 4 Geo. II. cap. 29. §. 1. was granted from 24 June, 1731, for five years,

By 10 Geo. II. cap. 27. §. 3. further continued to 24 June, 1738,

By 16 Geo. II. cap. 26. §. 1. further continued to 24 June, 1750,

By 24 Geo. II. cap. 52. §. 4. further continued to 24 June, 1757,

And from thence to the end of the then next session of parliament,

GUNPOWDER of the MANUFACTURE of GREAT-BRITAIN, exported by way of merchandize, for every barrel containing one hundred pounds net weight, and so in proportion for greater or less quantities } 0 4 6

† To be paid to the exporter on a debenture to be made forth by the collector of the customs (with the privy of the comptroller) at the port of exportation, and the shipping thereof testified by the searcher; the exporter making oath that it is of British manufacture, and to be exported by way of merchandize, and not relanded, or intended to be relanded in Great-Britain; that it is not for the use of the ship in her voyage; and also giving security, in the penalty of 5*l.* per barrel, that no part thereof shall be relanded in Great-Britain.

† 4 Geo. II. cap. 29. §. 1.

§ To be paid out of customs, or other duties on goods imported.

§ 4 Geo. II. cap. 29. §. 4.

* But may not be exported, when it exceeds the price of 5*l.* per barrel.

* 12 Geo. II. cap. 4. §. 12.

† Fraudulently relanded (over and above the penalty of the bond) forfeited, and treble the value.

† 4 Geo. I. cap. 29 §. 3.

VII. Bounty on SHIPS employed in the WHALE-FISHERY.

By 6 Geo. II. cap. 33. §. 1. was granted, during the continuance of the act 5 Geo. II. cap. 28. for every British ship of 200 tons and upwards, manned and navigated according to law, which shall proceed from Great-Britain on the whale-fishery to the Greenland seas, Davis's Streights, or the adjacent seas, a bounty, according to the admeasure-ment of the ship, for every ton thereof } 1 s. d.
I 0 0

By 13 Geo. II. cap. 28. §. 3. continued to 25 December, 1750.

By 22 Geo. II. cap. 45. §. 2. continued to 25 December, 1757.

And by this last-recited act a further bounty for every ton } 1 0 0

And the whole extended to ships built in any of his Majesty's dominions in America.

By 28 Geo. II. cap. 20. the whole continued to 25 December, 1764; and from thence to the end of the then next session of parliament, and extended to ships under 200 tons.

Total bounty 2 0 0

† To be paid to the master or owners, or their assigns, on the return of the ship to Great-Britain, by the receiver-general of the customs of that part of Great Britain from whence she departed, out of the old subsidy; but if he has not sufficient money on that branch, then out of any money arising from any duties under the management of the commissioners of the customs respectively, if the following regulations are complied with,

† 6 Geo. II. cap. 33. §. 3. 28 Geo. II. cap. 20 §. 4.

§ Every ship, of the burthen of 200 tons, or under, must have on board 40 fishing lines, 120 fathoms each, 40 har-

poon-irons, four boats, with seven men to each boat (including a harpooner, a steersman, and a line-manager to each boat) making in the whole 28 men, besides the master and surgeon, with six months provision at least; and every ship of larger burthen, an increase of six men, one boat, 10 such lines, and 10 harpoon-irons for every 50 tons.

§ 6 Geo. II. cap. 33. §. 2. 28 Geo. II. cap. 20. §. 8.

* After 25 December, 1757, every ship employed in this fishery is to have on board an apprentice, indentured for three years at least, for every fifty tons burthen, otherwise the owners are to lose the bounty; but such apprentice is to be accounted as one of the number of men, which by law ought to be on board such ship.

* 28 Geo. II. cap. 20. §. 5.

† After 25 December, 1757, no ship above the burthen of 400 tons shall be intitled to a larger bounty than a ship of 400 tons; nor the owners obliged to fit out, equip, or man any such ship, otherwise than is required for a ship of 400 tons.

† 28 Geo. II. cap. 20. §. 6, 7.

‡ The ship, before she proceeds on her voyage, must be visited by the proper officer of the customs at the port from whence she proceeds, who is to examine the above qualifications, and take an account of her tonnage, &c. and certify the same to the commissioners of the customs. And if it appears, by the oath of one of the owners and the master of the ship, made before the collector and comptroller of the port, at the foot of the certificate, that it is really and truly their firm purpose, and determined resolution, that such ship shall forthwith proceed, so manned, furnished, and accoutred, in a voyage to the Greenland seas, or Davis's Streights, or the seas adjacent, and there to use their utmost endeavours to take whales, and other creatures living in the sea, and on no other design, and to import the whale-fins, oil and blubber, into Great-Britain (naming the port to which it is their intention to return). And if the master also becomes bound with two sufficient securities, in treble the value of the bounty (which bond is to be taken by the collector, with approbation of the comptroller, and is to be in force for the term of three years against them, for the faithful dealing of the master and ship's company, in regard to the ship and voyage) then any three of the commissioners of the customs for England or Scotland, respectively, upon receiving such certificate and oath, with a certificate that sufficient security has been given, are to grant to the master and owners full licence to proceed on such voyage.

† 6 Geo. II. cap. 33. §. 1.

‖ On return of such ship to the port mentioned in the oath of the master, the proper officers of the customs are to go on board and view her condition and lading, and take a schedule of the names of the master, mate, and other persons on board, distinguishing the harpooners, and persons more immediately employed in the fishery, and certify the same, with their observations thereon, and also the real tonnage of the ship; and the master and mate must make oath before the collector and comptroller, on the back of, or annexed to the licence (which is then to be delivered up) that they did in pursuance thereof (mentioning the day of their departure) proceed in a voyage directly to the places aforesaid, and have not since been on any other voyage, or pursued any other design or view of profit; and that they had there (mentioning the time of their stay) used their utmost endeavours to take whales, and other creatures living in those seas; and that all the whale-fins, oil and blubber, imported (if any) in such ship, was truly, and bona fide, taken in the said seas by the crew of such ship only. This schedule, certificate, licence, and oath, are to be transmitted to the respective commissioners for that part of Great-Britain from whence the ship departed with her licence, who being fully satisfied of their faithful dealings are, on demand, to cause payment to be made of the bounty, as above.

‖ 6 Geo. II. cap. 33. §. 3.

§ Ships fitted out from any of his Majesty's dominions in America, to be under the same regulations as those fitted out from Great-Britain, except that they are not to be more than two years old from the first building, which is to be inserted in the oath; and that the certificate is to be returned to the governor or naval officer, who are to administer the oath, take the bond, and grant the licence.

§ 22 Geo. II. cap. 45. §. 5.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

* On the arrival of such a ship in Great-Britain, the proper officers of the customs are to proceed as directed for British ships; and the respective commissioners of the customs, for that part of Great-Britain where she shall arrive, being satisfied of the faithful dealings of the master and others, with respect to the voyage, shall cause payment to be made of the bounty.

* 22 Geo. II. cap. 45. §. 6.

† Also every ship fitted out in America must sail from the port where surveyed, directly on the whale-fishery, on or before the first of May, and not leave Davis's Streights, or Greenland, and seas adjacent, before the 20th of August, unless they have such success as to fill as many casks with blubber as will amount to no less than 200 hogheads for a ship of 300 tons, and so in proportion, or meet with any unavoidable accident, so as to endanger the lives of the crew; which accident must be declared on the oaths of the master, mate, carpenter, harpooners, line-managers, boat-steerers, and fergeon, or such of them as are living; otherwise she shall lose the benefit of this bounty.

† 22 Geo. II. cap. 45. §. 7.

‡ The commissioners of the customs for England and Scotland respectively must, at the beginning of every session of parliament, lay before both houses an account of what number of ships have been employed in this fishery, with their names and burthens, from whence fitted out, and at what port in Great-Britain discharged, and what quantity of oil or whale-fins each ship imported.

‡ 23 Geo. II. cap. 20. §. 10.

VIII. Bounty for encouragement of the British WHITE-HERRING FISHERY.

By 23 Geo. II. c. 24. §. 6. was granted to the Society of the Free British Fishery, for fourteen years, from the 11th of October, 1750, the date of their charter, And by 28 Geo. II. c. 14. §. 4. was further continued for three years,

And is,
For every hundred pounds actually employed in the said fishery } 3l. per annum.

|| To be paid to the proprietors of the stock out of the customs, by the receiver-general of the customs, by equal half-yearly payments, provided the society shall employ 100,000 l. at least in the said fishery, within eighteen months after the date of their subscription.

|| 23 Geo. II. cap. 24. §. 6, 7.

§ In order to ascertain the sums from time to time actually expended and employed by the society in the said fishery, the account thereof must be delivered to the commissioners of the customs, signed by three at least of the council of the society, as an attestation that they have examined it, and believe it to be just, and attested by the oath of the accountant of the society at the foot of the account; upon which the commissioners are to order payment accordingly.

§ 23 Geo. II. cap. 24. §. 6.

|| The society are also to lay their accounts annually before parliament, and if loss should arise by one year's adventure, and there should be gain by succeeding years, the gain must be applied to make good the original stock of 100,000 l. before any dividend is made.

|| 23 Geo. II. cap. 24. §. 7.

By 28 Geo. II. c. 14. §. 1, 2. this bounty is allowed to the society on the sum of 104,509 l. for two years, to October 22, 1752, and all future interest on that sum is to be computed from that day; and all future computations of interest on any additional sum paid in by the society, in order to be employed in the said fishery, are to be made from the day on which each sum respectively is paid into the Bank of England.

* Any number of persons subscribing 10,000 l. or upwards, into the stock of the said society, and carrying on the said fishery, under their own management, and on their own account, from the port named by them; conformably, nevertheless, to this act and the charter (except as to being obliged to use the marks of the said society) and subscribing under the name of the Fishing Chamber of such city, port, or town, are entitled to the same bounty. But their account of expences, attested by three of their committee, signed by their accountant, and verified by his oath, and also the vouchers, if required, are to be transmitted to the society in London, whose accountant is to enter it in their ac-

* 23 Geo. II. cap. 24. §. 18, 20.

count, delivered to the commissioners of the customs, as a sum expended in the said fishery by the said society. The bounty is to be paid to the society in London, and by them paid over to the Fishing Chamber, after deducting the necessary charges of receiving it.

IX. Bounty on SHIPS built for, and employed in the British WHITE-HERRING FISHERY.

By 23 Geo. II. c. 24. §. 11, 12, 16. was granted for fourteen years, from the commencement of this act, By 28 Geo. II. c. 14. §. 4. further continued for three years,

And is, for
Every decked bus or vessel, from 20 to 80 tons } Bounty.
burthen, built in Great-Britain after the com-
mencement of this act, for the use of the said
fishery, and proceeding thereon from some port
in Great-Britain, and fitted out and employed
therein by the society of the Free British Fish-
ery, or any other person, manned and navi-
gated according to law, for every ton burthen } 10 0

To be paid annually to the owners thereof out of the produce of the customs, subject to the following regulations.

† Every such vessel must have on board twelve Winchester bushels of salt for every last of fish she is capable of holding, barreled up in new barrels, and as many more new barrels as she can carry, and two fleets of tanned nets, viz. for a vessel of 70 tons, one fleet of 50 nets on board, each 30 yards upon the rope, and 7 fathoms deep; and another fleet of 50 nets in a tender, or proper place on shore, each 30 yards upon the rope, and not under five fathoms deep, and so in proportion; and must have on board, at the rendezvous, six men for a vessel of 20 tons, and one man more for every five tons above 20; and must return into port with the same number, unless reduced by death, sickness, or desertion, without fraud or collusion.

† 23 Geo. II. cap. 24. §. 13, 14. 26 Geo. II. cap. 9. §. 3, 4.

‡ Before the proceeds on such voyage, she must be visited by the proper officer of the customs, who is to examine if she is qualified as above, and take account of her tonnage by admeasurement, and certify the same to the commissioners of the customs, and whether she is a proper vessel to be employed in the fishery. And further, upon one of the owners, or their agents, or a proper officer or agents of the society, and the master of the vessel making oath at the foot of the certificate, before the collector and comptroller of the port, that it is their firm purpose, and determined resolution, that the vessel shall proceed, so manned, furnished, and accounted, either to Brasse's Sound in Shetland, and be at the rendezvous on or before the 22d. of June, and not shoot or wet their nets before the 24th of June, and shall continue fishing among the shoals of herrings as they move southward, unless prevented by loss of masts, or other unavoidable accidents, to the 12th of October; or shall proceed to Campbell town in Argyleshire, or Kirkwall in the Orkney islands, and be at the rendezvous on or before the 12th of September, and continue fishing among the shoals of herrings as they move to the 11th day of January, unless they shall sooner have completed their loading [1], and fish in an orderly manner, without obstructing others; and shall keep a journal of their proceedings, and an account of the quantities of fish dispatched to foreign markets before they come into port, and the quantity they shall bring into port with them; and upon the same persons giving security, in treble the value of the bounty, for the faithful dealings of the master and ship's company, the collector and comptroller of the port are to give them a licence to proceed on the voyage.

† 23 Geo. II. cap. 24. §. 12. 26 Geo. II. cap. 9. §. 2, 7.

[1] By 28 Geo. II. cap. 14. sect. 5, 6. the society may follow the white-herring fishery in any part of the British seas; and are not to forfeit this bounty, though the busses should not arrive at one of these places of their rendezvous on the respective days appointed, provided she took her departure from one of those places at least five days before the day appointed for their being there.

|| But in the interval, between the Shetland and Yarmouth fisheries, the vessels may put into any port of Great Britain or Ireland to change their nets, or otherwise prepare for the Yarmouth fishery; and are not obliged to carry more than one fleet of nets to the latter fishing.

|| 26 Geo. II. c. 9. §. 3, 8.

§ Upon the return of the vessel to her port of discharge, the chief officer of the customs, or one appointed by him, must

§ 23 Geo. II. cap. 24. §. 15.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

go on board and examine her condition and lading, and certify the same, with their observations thereon, and also the tonnage and names of the master, and other persons on board [2]; and the master must make oath, before the collector and comptroller of the port, on the back of the licence, or to be annexed to it, that the vessel was at one of the places before mentioned at the time appointed, and has not since been on any other voyage, or pursued any other design, or view of profit; and that they did remain fishing, according to the directions of this act, and had, at the time of their rendezvous, the quantity of nets and other stores, and number of men as above directed [3]. The licence is to be delivered up, with an account of what was done in pursuance of it; and the certificate, schedule, licence, and oath, together with the account of the fish taken, are to be transmitted, by the collector and comptroller of the port, to the commissioners of the customs for that part of Great-Britain from whence the departed with her licence; who, being satisfied of their faithful dealings, are (upon the owners producing a proper certificate, from the receiver of the duty of 6d. per month from all fishermen for the use of Greenwich hospital, that all money due on that account for every fisherman on board such vessel has been paid) to cause payment of the bounty to be made by the receiver-general of the customs.

[2] A true copy of this certificate must be transmitted by the commissioners of the customs, with all convenient speed, to the receiver of the duty of 6d. per month from all fishermen for the use of Greenwich hospital, in London 28 Geo. II. cap. 14. §. 10.

[3] If by virtue of the liberty granted (note [1]) any busf quits her station, appointed by 26 Geo. II. c. 9. in order for fishing at other stations, or does not arrive at one of the stations there mentioned on the day appointed, this oath is to be varied, and made conformable to the circumstances attending such respective busf. 28 Geo. II. cap. 24. §. 7.

* The society may let out to hire any of their busfes to be used and employed in the said fishery only, and subject to the same regulations and restrictions, as if employed by the society.

* 28 Geo. II. cap. 14. §. 5.

X. Bounty on BRITISH and IRISH LINENS exported.

By 29 Geo. II. c. 15. §. 1. was granted from 24 June, 1756, for fifteen years, and from thence to the end of the then next session of parliament,

† For every yard of BRITISH and IRISH LINEN made of hemp or flax, of the breadth of 25 inches, or more, and under the value of 5d. per yard } Bounty.
Of the value of 5d. and under the value of 6d. per yard } 0 0 0½
Of the value of 6d. and not exceeding the value of 1s. 6d. per yard } 0 0 1
which shall be exported out of Great-Britain to Africa, America, Spain, Portugal, Gibraltar, the island of Minorca, or the East-Indies.

† To be paid to the exporter, or seller for exportation, by the collector of the port from whence the same shall be exported, out of any monies in his hands arising from any duties, revenues, and customs, received at such port.

† 29 Geo. II. cap. 15. §. 1.

† But not to extend to any linens that are striped or chequered, or printed or painted, or made into buckrams or tilletings; nor to any Irish linen, unless of the property of persons residing in Great-Britain, or in his Majesty's plantations in America; nor to such Irish linen, whereof the piece or bolt contains 38 yards in length, and 24 inches in breadth, and cloths of different lengths and breadths in proportion, from N^o 1. to N^o 10. inclusive, weighing from 15 to 44 pounds, as described in the act of 9 Geo. II. cap. 37.

† 29 Geo. II. cap. 15. §. 7, 8, 9.

§ Collectors in the out-ports of South-Britain, and in any port of North-Britain, not having money sufficient in their hands to pay such bounties, are to certify the same to the commissioners of the customs at London and Edinburgh respectively, who shall cause payment thereof to be made by the respective receiver-general; and if the receiver-general of Edinburgh hath not money sufficient in his hands, the commissioners at Edinburgh, or any three of them, shall certify the same to the commissioners in London, who are to cause payment thereof to be made by the receiver-general there.

§ 29 Geo. II. cap. 15. §. 1.

‖ The exporter, or seller for exportation, shall express in his entry, and indorse on the cocket, the quantity and value of such linen, and produce a certificate from the searcher, verifying the shipping thereof, and likewise give security in double the value of the goods; and 100l. not to reland them in Great Britain, Ireland, or Isle of Man; and shall also make oath of the value of such linens, and that the same were made in Great-Britain or Ireland, and (if in Ireland) that at the time of exportation they were the property of a person or persons residing in Great-Britain, or in some of his majesty's plantations in America:

‖ 29 Geo. II. cap. 15. §. 2, 8.

* After entry of any linens, as being intitled to this bounty, the searcher, or other proper officer, may open and examine any package, to see if the goods are rightly entered and indorsed; and if they are so, he must repack them at his own charge, which shall be allowed to the officer by the commissioners of the customs, if they think it reasonable.

* 29 Geo. II. cap. 15. §. 3.

† If any linen, so to be exported for the bounty, shall be of greater value than 18 d. per yard, the exporter, or seller thereof for exportation (on demand in writing made by the customer or collector and comptroller of the port of exportation) shall cause it to be delivered into the king's warehouse; and the collector shall pay to the exporter, &c. (out of any money in his hands) the value of 1s. 7d. per yard, taking his receipt for the same; and such linen to be publicly sold, and out of the produce thereof the money to be replaced to such funds from which it was borrowed, and one moiety of the overplus, if any, to be paid into the exchequer to the sinking fund, the other to the officer who searched and examined the linen.

† 29 Geo. II. cap. 15. §. 4:

‡ If the exporter of such linen, so demanded, refuses to cause the same to be delivered up; and if any such linen, entered for exportation, of the value of 6d. per yard, and not exceeding 18d. per yard, shall be found to be under the value of 6d. per yard; or entered for exportation at the value of 5d. per yard, and not amounting to the value of 6d. per yard, be found to be under the value of 5d. per yard; or of such linen as shall be less in quantity than is indorsed on the cocket, or shall be found to be under the breadth of 25 inches, or entered and indorsed under a wrong denomination, whereby the bounty may be fraudulently received; all such linen, and also all the goods in every package, indorsed on such cocket, shall be forfeited, and the exporter to lose the benefit of the bounty.

‡ 29 Geo. II. cap. 15. §. 5.

§ Any such linen, for which the bounty has been given or claimed, relanded in Great-Britain, Ireland, or the Isle of Man, is forfeited, and every person concerned in bringing back, or re-landing it, forfeits one shilling per yard.

§ 29 Geo. II. c. 15. §. 6.

‖ Bonds taken, or debentures made, pursuant to this act, are not chargeable with the stamp duties.

‖ 29 Geo. II. cap. 15. §. 10.

* Any person, legally convicted of falsely making any oath required by this act, is to forfeit 200l. and be imprisoned for twelve months.

* 29 Geo. II. cap. 15. §. 11.

† In case of any question, whether the linens are of the manufacture of Great-Britain or Ireland, the ONUS PROBANDI is to lie upon the exporter or seller for exportation.

† 29 Geo. II. cap. 15. §. 12.

XI. Premium or Bounty on British Plantation-made INDICO imported.

By 21 Geo. II. cap. 30. §. 1, 6, 8. was granted for seven years, from March 25, 1749;

By 28 Geo. II. cap. 25. §. 1. further continued to March 25, 1763; and from thence to the end of the then next session of parliament,

For every pound weight of good and merchantable INDICO, free from any false mixture, and fit for dyers use, imported directly from any of the British colonies or plantations in America, in a ship which may lawfully trade thither, manned as by law required, and being of the growth or product of the plantation from whence imported, and being worth 3s. per pound weight, when the best French, or other indico equal with the best French, is 4s. per pound weight, and so in proportion } Bounty.
0 0 6

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

To be paid upon demand to the importer by the collector of the port of importation, out of the customs; but if he has not money sufficient in his hands, he must certify the same to the commissioners of the customs, who are to cause it to be paid by the receiver-general of the customs in England or Scotland respectively, according to the place of importation.

* But to entitle the importer to this premium, the person who ships the indico in America must, before the ship is cleared out, produce to the governor, lieutenant-governor, collector and comptroller of the customs, and naval officer of the colony, or any two of them, a certificate signed and sworn before a justice of the peace by the planter, or his known agent, and attested by the justice, "that a quantity of indico, expressing the weight thereof, had been sent from his indico-work to be shipped off, or was sold to the person therein named, and was of the growth of his plantation, situate in the district, division, or parish of _____, within the island or colony of _____;" and also sign a certificate himself before the said officers, "that the indico shipped by him is the same mentioned in the planter's certificate;" upon which they are to deliver to him a certificate, under their hands and seal of office, of having received such certificate, and that at the same time the planter's certificate was produced and left with them." This last certificate must be produced to the chief officer of the customs at the port of importation, together with a certificate from the commander of the vessel importing the indico, "that the same was shipped on board his vessel, within such British colony in America, as mentioned in the said certificate;" and also a certificate signed by the surveyor, land-waiters, or searchers of the customs of the port where landed, or any two of them, specifying "the weight, and that it is good and merchantable, free from false mixture, and of such quality as to be intitled to the premium;" which certificate they must grant within ten days after landing, unless they can assign sufficient cause for refusal. Upon producing the several certificates to the proper officer, the premium is to be paid.

* 21 Geo. II. cap. 30. §. 2, 3, 4.

† The officers of the customs, before making out the certificates, are to examine the indico, by opening the package, and shifting it so as to see the whole contents, and if it is good and merchantable, and free from false mixture, and of the value required.

† 21 Geo. II. cap. 30. §. 7, 8.

|| In case of any dispute about the quality of the indico, if in the port of London, the commissioners of the customs may call two or more dyers, dry-salters, or brokers, or others well skilled in it, who are to declare upon oath, if required, their opinion as to the quality, and whether it is intitled to the premium: if in the out-ports, samples are to be sent up to the commissioners of the customs in London or Edinburgh respectively, to be inspected and adjudged there.

|| 21 Geo. II. cap. 30. §. 9.

‡ No fee, gratuity, or reward, to be taken by any officer of the customs, for examining, viewing, or delivering such indico, or for signing any certificate, or paying the premium, on forfeiture of 100l. loss of office, and being incapable of serving his Majesty.

‡ 21 Geo. II. cap. 30. §. 10.

§ Certificates and debentures, made out in pursuance of this act, are not chargeable with the stamp duties.

§ 21 Geo. II. cap. 30. §. 11.

* No person may enter, or cause to be entered, any foreign-made indico, under the name of British plantation-made indico, on forfeiture thereof; or mix, or cause to be mixed, any foreign indico, or other false mixture, with that made in the British plantations, in order to obtain the premium, on forfeiture of the whole, and double the value thereof.

* 21 Geo. II. cap. 30. §. 5.

† Any governor, lieutenant-governor, collector, or comptroller of the customs, naval officer, merchant, trader, or factor, or master, or commander of a ship, or any other person, falsely making a certificate of the produce or manufacture of any indico, or counterfeiting any certificate by this act required, in order to obtain the premium, is to forfeit 200l. and, if an officer of the customs, also to lose his office, and be incapable of serving his Majesty.

† 21 Geo. II. cap. 30. §. 15.

‡ If any indico, made in the British plantations in America, shall be exported after the 25th of March, 1749, the

‡ 21 Geo. II. cap. 30. §. 12, 13, 14.

5

exporter, before entry thereof, is to pay the collector of the customs, at the port of exportation, 6d. for every pound weight, allowed as a premium by this act, over and above any other duty it is subject to pay on exportation, on forfeiture thereof, and double the value; and in case of a dispute, whether it is of the growth, product, and manufacture of the British plantations in America, the onus probandi is to lie upon the owner or claimer.

‡ Penalties and forfeitures, by this act, may be prosecuted in any of his Majesty's courts of record at Westminster, the court of exchequer in Scotland, or any of the courts of admiralty, in his Majesty's plantations in America respectively; and are to be divided, if in Great-Britain, one moiety to his Majesty, and the other to the person who shall sue for the same; if in his Majesty's plantations in America, one-third to his Majesty, one-third to the governor of the plantation, and one-third to the person who shall sue for the same.

‡ 21 Geo. II. cap. 30. §. 16, 17.

XII. Allowance on damaged TOBACCO imported.

§ If any British plantation TOBACCO hath received damage on board any ship at sea, or by the ship's being forced on shore in any part of Great-Britain; or after arrival, by the ship's bulging on an anchor, or by the lighter into which the tobacco is put in order to be landed; the merchant refusing to pay, or secure the duty for the same, hath liberty to separate such damaged tobacco, by cutting it off from the hoghead or other package.

§ 9 Geo. I. cap. 21. §. 4, 13.

|| For every pound of damaged TOBACCO so cut off, the merchant is to be allowed $\frac{1}{2}$ 0 0 $\frac{1}{2}$ To be paid by the commissioners or collectors, or other chief officers of his Majesty's customs. But such allowance not to exceed thirty shillings on any one hoghead.

|| 9 Geo. I. cap. 21. §. 13.

* Such damaged tobacco cut off, to be burnt and destroyed.

* 9 Geo. I. cap. 21. §. 4.

XIII. Allowance or drawback of the duties on COALS used in melting copper or tin ores within the counties of Cornwall and Devon, or in fire-engines for draining tin or copper mines in Cornwall.

† All COALS used in either of the above works, and for which the duties have been first answered, upon proof, by oath made before the customer or collector of the said duties, that they have been so used, shall have a drawback of all the duties; to be repaid by the collector of the duties to the person making such proof.

† 9 Ann. cap. 6. §. 54. 14 Geo. II. cap. 41. §. 3.

XIV. Allowance on damaged, corrupt, or unmerchantable WINES imported.

† If any merchant, finding his wine on importation to be damaged, corrupt, or unmerchantable, shall refuse to pay or secure the duties for the same; the commissioners of the customs may cause such wines to be received into the custody of the proper officers, and to be publicly sold, in order to be distilled into brandy, or made into vinegar, taking sufficient security that they be not made use of for any other purpose whatsoever; and shall cause the produce of such sale to be paid to the merchant, as a compensation for the freight and other charges, not exceeding the allowances following.

For every	of the growth of Germany, or which	4	0	0
ton of	pays duty as such	-	-	-
	of the growth of France	4	0	0
WINE	of the growth of Spain, Portugal or	8	0	0
	elsewhere	-	-	-

‡ 6 Geo. I. cap. 12. §. 3, 4. 12 Geo. I. cap. 28. §. 20.

The security to be discharged, on a proper certificate that the wines have been so made use of within three months after delivery out of the warehouse.

The overplus, if any, to be replaced to the duties, out of which the warehouse rent, and other charges attending the sale, have been advanced.

§ But no allowance to be made for any wines, unless imported in casks, on board a merchant ship, directly from the place of the growth, or the usual place of first shipping.

§ 8 Geo. I. cap. 18. §. 19.

* Except as to ships stranded; in which case, the wines salvaged may be put on board any other ship or vessel, and carried to any lawful port of this kingdom, and be intitled to the aforementioned allowance.

* 8 Geo. I. cap. 18. §. 20.

XV. Al-

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

XV. Allowance of PORTAGE.

PORTAGE is a Bounty given by the commissioners of the customs, by virtue of their patent, to masters of ships inwards for making true reports of their ships and cargoes, and otherwise demeaning themselves according to law and custom, and is granted on the net amount of the undermentioned branches paid or secured for the goods imported in their respective ships, certified by the proper officer of the port (damages and over-entries first to be deducted) and is as follows.

WINE	-	0	6	8	per cent. on the net amount of the branches of customs and imposts.
CURRENTS	-	0	6	8	per cent. on the net amount
NORWAY GOODS	2	0	0	0	of the branch of customs.
OTHER GOODS	0	10	0	0	

Note, that no portage is to be granted, when it doth not amount to ten shillings, except for Norway goods.

XVI. Drawback or repayment of the duty of excise on British-made CANDLES.

	Drawb.
CANDLES MADE OF WAX.	$\left\{ \begin{array}{l} \text{the pound weight aver-} \\ \text{dupoise} \end{array} \right\} 0 \ 0 \ 4$ $\left\{ \begin{array}{l} \text{the pound weight aver-} \\ \text{dupoise} \end{array} \right\} 0 \ 0 \ 4$
CANDLES MADE OF TALLOW, and other Candles.	$\left\{ \begin{array}{l} \text{the pound weight aver-} \\ \text{dupoise} \end{array} \right\} 0 \ 0 \ 0 \frac{1}{2}$ $\left\{ \begin{array}{l} \text{the pound weight aver-} \\ \text{dupoise} \end{array} \right\} 0 \ 0 \ 0 \frac{1}{2}$

† 8 Ann. cap. 9. 9 Ann. cap. 21.
† 9 Ann. cap. 6. 3 Geo. I. cap. 7.

* To be repaid to the exporter by the collector of the excise, on proof made before him, upon oath, of the payment of the duties; and the collector giving a certificate thereof to the exporter, expressing kinds and quantities, and payment of duties; which certificate being produced to the collector of the customs at the port of exportation, and the exporter giving sufficient security, before shipping, that the candles shall not be re-landed in Great-Britain, and likewise making oath, that they are the same mentioned in the certificate, the collector of the customs is to give to the exporter a debenture, expressing the true kinds and quantities exported.

* 8 Ann. cap. 9. §. 24, 26.

† If re-landed (over and above the penalty of the bond) the candles are forfeited, or their value.

† 8 Ann. cap. 9. §. 25.

XVII. Drawback or repayment of the duty of excise on HIDES or CALVE-SKINS, rough or tanned; HIDES or CALVE-SKINS, dressed or curried; SHEEP-SKINS and LAMB-SKINS, tanned, tawed, or dressed, in Great-Britain, exported.

By 9 Ann. cap. 11. §. 39. and 10 Ann. cap. 26. §. 4. any hides or calve-skins, tanned, tawed, or dressed, were to draw back two-thirds of the duties laid on by those acts respectively.

But by 10 Ann. cap. 26. §. 6. it is there explained, that those acts, as to the drawback, comprehended only tanned or rough hides, and calve-skins, &c.

Therefore the drawback is as follows.

	Drawback.
TANNED or ROUGH HIDES, and CALVE-SKINS, the pound weight averdupoise	$\left\{ \begin{array}{l} \text{by 9 Ann. cap. 11.} \\ \text{11. - } 0 \ 0 \ 0 \frac{2}{3} \end{array} \right\}$ $\left\{ \begin{array}{l} \text{by 10 Ann. cap. 26.} \\ \text{26. - } 0 \ 0 \ 0 \frac{2}{3} \end{array} \right\} 0 \ 0 \ 1$

† 9 Ann. cap. 11. §. 39. 3 Geo. I. cap. 7. 10 Ann. cap. 26. §. 4. 3 Geo. I. cap. 7. 10 Ann. cap. 26. §. 6.

† HIDES or CALVE-SKINS, dressed or curried, the pound weight, as they shall weigh at the custom-house

† 10 Ann. cap. 26. §. 6.

SHEEP-SKINS, tanned for gloves and bazils	the pound weight	0 0 0 1
* and LAMB-SKINS, dressed in allum and salt, or meal, or otherwise tawed	weight averdupoise	0 0 0 1
LAMB-SKINS, dressed in oil, the pound weight	weight	0 0 0 1
	avordupoise	0 0 0 1

* 12 Ann. cap. 9. §. 67. 9 Ann. cap. 11. §. 2.

VOL. II.

† To be repaid to the exporter, by the collector of excise on a debenture made forth by the collector of the customs, at the port of exportation, expressing the kinds, quantities and weights to be exported, sufficient security being first given by the exporter to the collector of the customs, that the said goods shall not be re-landed in Great-Britain.

† 9 Ann. cap. 11. §. 39, 40.

† The hides and calve-skins, so exported, to be marked with a stamp, denoting having paid the duties; but the drawback may be allowed, although the said marks have not been seen by the officers of the customs, provided that oath be made before the collector of the customs, that the hides or skins, contained in the respective bales or packs, were marked with the stamps, denoting payment of the duties, and specifying how much the duties amounted to, together with the weight thereof exported.

† 9 Ann. cap. 11. §. 39.

* 10 Ann. cap. 26. §. 5.

† If re-landed, forfeited, with treble the value.

† 9 Ann. cap. 11. §. 42.

XVIII. Drawback or repayment of the duty of excise on British-made SOAP exported.

	Drawback.
SOAP, for every pound weight avoirdupoise	0 0 1
SOAP, for every pound weight avoirdupoise	0 0 1 1/2

† 10 Ann. cap. 19. §. 24. 1 Geo. I. cap. 7.

† 12 Ann. sess. 2. cap. 9. §. 13. 6 Geo. I. cap. 4.

* To be repaid to the exporter by the collector of excise for such soap as is exported to foreign parts by way of merchandise, on a debenture to be made forth by the collector of the customs, at the port of exportation, and testified by the searcher; the exporter having first made proof of the payment of the duties before the collector, who received the same, and also having given sufficient security, that the soap shall not be re-landed in Great-Britain.

* 10 Ann. cap. 19. §. 22, 24. 12 Ann. cap. 9. §. 13.

† If re-landed (over and above the penalty of the bond) the soap, or the value, forfeited.

† 10 Ann. cap. 19. §. 23.

it

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

it shall not be relanded in any part of Great-Britain, the collector is to grant a debenture, expressing the true weight; which debenture being produced to the collector of the said duties at the place of exportation, he is forthwith to pay the above allowance; but if he has not money sufficient in his hands, the respective commissioners of excise in Great-Britain are to pay it out of the duties upon glass arising by this act.

* Relanded, is forfeited, or the value, besides the penalty of the bond.

19 Geo. II. cap. 12. §. 20.

XXVI. DRAWBACK of the EXCISE or INLAND DUTIES on BRITISH SALT exported.

Of England, Wales, or Berwick upon Tweed.

By 5 and 6 of W. and M. cap. 7. were granted, from the 25th of March, 1694, to the 17th of May, 1697, the following duties.

ROCK-SALT, taken out of any pits in England, Wales, or Berwick, the bushel †, containing 65 pounds weight	Duty.	
SALT made at any salt-works in England, Wales, or Berwick, or refined from rock-salt, the bushel †, containing 56 pounds weight	0 1 0	
And by 9 and 10 Will. III. cap. 44. was granted from 24 December 1699,		
A further duty on every such respective bushel of SALT above mentioned	0 2 4	
Total duty	0 3 4	

† 1 Ann. cap. 21. §. 9.

† 9 and 10 Will. III. cap. 44. §. 34.

§ Which duties have been since revived and continued for ever.

§ 7 and 8 Will. and Mar. cap. 31. § Geo. II. cap. 6. 7 Geo. II. cap. 6. 8 Geo. II. cap. 12. 14 Geo. II. cap. 22. 18 Geo. II. cap. 5. 26 Geo. II. cap. 3.

|| The above duties to be paid by the maker thereof, for rock-salt, within twelve months, and for all other salt, within nine months, after true entries made of the respective times of making such salt, or taking it out of the pits, on sufficient security given; but if he chuses to pay ready money, he shall have a discount thereon, after the rate of 10 per cent per annum *; and if paid within 28 days after security given, to be allowed a discount, after the rate of ten per cent. per annum, for the remaining time.

|| 5 and 6 Will. and Mar. cap. 7. §. 6. 9 and 10 Will. III. cap. 44. §. 8. 5 Ann. cap. 29. §. 5.

* 1 Ann. cap. 24. §. 39.

† On exportation, the officer of the place, where such salt was made or taken out of the pits, shall deliver to the exporter a certificate, under his hand and seal, that the duties have been paid or secured; on producing this certificate to the officer of the customs where the said salt is to be shipped off, he is to grant a debenture, the exporter making oath of the shipping of the salt, and of its not being relanded in England or Wales; which debenture being produced to the officer of the place where the duties have been paid or secured; Then these duties are to be wholly repaid, or the security vacated.

† 5 and 6 Will. and Mar. cap. 7. §. 11. 9 and 10 Will. III. cap. 44. §. 22.

† Shipped for Ireland, no debenture to be granted, till there is produced a certificate of the quantity landed, under the hand of the collector of the customs of such port in Ireland where the said salt is landed.

For further regulations thereon, see the index.

† 1 Ann. cap. 21. §. 11.

SALT of SCOTLAND.

By the act of union, 5 Ann. cap. 8. art. 8. salt made in Scotland is exempted from payment of the inland duty of 2s. 4d. per bushel, imposed by 9 and 10 Will. III. cap. 44.

Therefore the inland duty payable in Scotland, for the like sorts of SALTS, is, the respective bushel 0 1 0

§ To be managed with the same allowance, encouragement, and drawback proportionable, and under the same restrictions and regulations, as for England.

§ 5 Ann. cap. 8. art. 6. §. 18.

XXVII. Bounty on FISH and FLESH exported.

|| FLESH exported, cured with (any salt in England, but in Scotland only with foreign) salt which has paid duty, is to be allowed, viz.

BEEF or PORK, the barrel — — — 0 5 0

|| 5 Ann. cap. 8. art. 8. § Ann. cap. 29. §. 8.

* To be paid by the collector of the duties upon salt, in the port of exportation, within 30 days after demand, on a debenture to be prepared by the collector of the customs at that port, verified by the searcher, as to the quantity actually shipped, and that the same is good and merchantable; and the oath of the exporter, or agent, being first taken before the principal officers of the port, before the debenture is allowed (if exported from England, Wales, or the town of Berwick upon Tweed) 'that the beef or pork, mentioned in the debenture, was salted with salt, for which the duties have been paid, and not drawn back, and that the same is really exported to parts beyond the seas for sale, and that any part thereof was not spent, or intended to be spent, for the ship's use, nor relanded, or intended to be relanded,' if exported from Scotland, 'that the flesh, mentioned in the debenture, is really exported to parts beyond the seas for sale, and not intended to be relanded in Great-Britain, and was duly cured only with foreign salt, without any mixture of British or Irish salt, and that the duties for such imported salt have been duly paid or secured.'

* 5 Ann. cap. 29. §. 8. 7 Ann. cap. 11. §. 10.

† Relanded, is forfeited, and 40s. for every barrel, to be recovered of the importer or proprietor.

† 5 Ann. cap. 29. §. 9.

FISH, exported from any part of Great-Britain to foreign parts, are intitled to the following allowances, viz.

PILCHARDS, or SCADS, the cask, containing 50 gallons — — — 0 7 0

If 14 inches or upwards in length, from the bone in the fin to the third joint — — — 0 5 0

CODFISH, LING, or HAKE — — — 0 2 0

Wet, the barrel, containing 32 gallons — — — 0 3 0

Dried, called HABERDINES, the hundred weight — — — 0 4 6

SALMON, the barrel, containing 42 gallons — — — 0 2 8

WHITE HERRINGS, the barrel, containing 32 gallons — — — 0 1 9

FULL RED HERRINGS, the barrel, containing 32 gallons — — — 0 1 0

CLEAN SHOTTEN RED HERRINGS, the barrel, containing 32 gallons — — — 0 1 0

DRIED RED SPRATS, the last — — — 0 1 0

By 29 Geo. II. cap. 23. §. 5. these bounties were extended to fish cured in Scotland with British or foreign salt, which by the act of union were limited to fish cured (in Scotland) with foreign salt only.

† To be paid by the collector of the duties upon salt, in the port of exportation, within thirty days after demand, on a debenture to be prepared by the collector of the customs in the port of exportation, and verified by the searcher, as to the quantity actually shipped; and the oath of the exporter, or agent, being first taken before the principal officers of the port, before the debenture is allowed, 'that the fish mentioned in the debenture were British, taken and really exported to, or for parts beyond the seas, and not relanded, or intended to be relanded in Great-Britain.'

† 5 Geo. I. cap. 18. §. 6. 29 Geo. II. cap. 23. §. 5.

§ If the said collector (in England) has not sufficient money in his hands to pay the said debentures on flesh or fish exported, he is to give without delay a certificate thereof to the commissioners for the excise upon salt in England, who shall be chargeable with the payment, to be paid in course out of the first money arising out of the duties upon salt; and if in Scotland, to the commissioners of the customs or excise in Scotland, at the option of the merchant, who are to cause it to be paid in course out of the duties upon salt in Scotland, or out of the revenues of customs or excise there.

§ 5 Ann. cap. 29. §. 8. 7 Ann. cap. 11. §. 10. 5 Geo. I. cap. 18. §. 6.

|| The herring barrel is to contain 32 gallons, and the salmon barrel 42 gallons; and herrings or salmon exported in barrels of any other size (except half barrels) are not entitled to the bounty.

|| 5 Geo. I. cap. 18. §. 15. 26. 29 Geo. II. cap. 23. §. 5.

* No allowance to be paid on flesh or fish not well cured, or unmerchantable.

* 5 Ann. cap. 29. §. 8. 5 Geo. I. cap. 18. §. 6. 29 Geo. II. cap. 23. §. 5.

† Such fish fraudulently reloaded in Great-Britain, or re-imported, is forfeited, and double the value, to be recovered of the importer or proprietor.

† 5 Geo. I. cap. 18. §. 6. 29 Geo. II. cap. 23. §. 5.

‡ No fee to be taken for a debenture, or certificate, or for payment of the money.

‡ 5 Ann. cap. 29. §. 8. 7 Ann. cap. 11. §. 10. 5 Geo. I. cap. 18. §. 6.

§ Any officer refusing or neglecting to pay the money, or give a certificate, as above, forfeits double the sum to the party aggrieved.

§ 7 Ann. cap. 29. §. 8. 5 Geo. I. cap. 18. §. 6.

* Herring, salmon, cod, ling, tusk, or other white fish, brought coastwise from Scotland into England for re-exportation after the 25th of June, 1756, are upon exportation intitled to the bounties above mentioned, subject to the same regulations, in order to prevent the reloading, or reimporting thereof, and the owners are subject to the same penalties for reloading, or other fraudulent proceedings; in order to obtain the bounty, as in case of fish cured in, and exported from England.—This allowance is not to be paid in England, but the chief officer of the customs, or his deputy, at the port of exportation, upon request of the exporter, and oath made before the principal officers of the port, “of the shipping of the fish, and its not being reloaded, or intended to be reloaded in Great-Britain,” is to give a debenture under his hand, without fee, for payment of the allowance, which being produced to the commissioners of the customs or excise in Scotland (at the option of the exporter or his assigns) they are to pay the bounties out of any money in their hands, arising by any branch of the customs or excise, regard being had to the priority of the dates of the debentures.

* 29 Geo. II. cap. 23. §. 10, 11.

XXVIII. Premium on NAVAL STORES imported.

I. From the British plantations in America.

By 2 Geo. II. cap. 35. §. 3. 18. was granted from 29 September, 1729, to 29 September, 1742.

By 13 Geo. II. cap. 28. §. 1. continued to 25 December, 1750.

By 24 Geo. II. cap. 52. §. 1. continued to 25 December, 1751.

By 25 Geo. II. cap. 35. §. 2. continued to 25 March, 1758. And to the end of the then next session of parliament.

<p>† Imported directly from any of the British plantations in America, in ships legally navigated, and that by law may trade thither</p>	MASTS, YARDS, and BOWSPRIGHTS, the ton, allowing 40 feet to each ton, girt measure, according to the customary way of measuring round bodies. —	1 0 0
	Clean, good, merchantable, well-conditioned, clear of dross or water, and fit in every respect for making of cordage, the ton, containing eight barrels, and each barrel to gauge 31½ gallons, to be well hooped and filled up	2 4 0
	TAR { Clean, good, merchantable, well-conditioned, clear of dross or water, and fit in every respect for making of cordage, made from trees prepared according to the directions hereafter mentioned, the ton, containing eight barrels, and each barrel to gauge 31½ gallons, to be well hooped and filled up on the importation thereof —	4 0 0
	But no premium is to be paid on any tar, unless each barrel contains 31½ gallons, and the officers not to survey the tar till the water is all drawn off, and every barrel filled up with tar.	
	PITCH, clean, good, merchantable, and well-conditioned, not mixed with dirt or dross, the ton, containing 20 gross hundreds, neat pitch, to be brought in eight barrels of equal size	1 0 0
	TURPENTINE, clean, good, and merchantable, clear of dross and water, the ton, containing 20 gross hundreds, neat turpentine, to be brought in eight barrels of equal size	1 10 0

† 2 Geo. II. cap. 35. §. 3.

|| 24 Geo. II. cap. 52. §. 2. 25 Geo. II. cap. 35. §. 3.

* Which premiums are to be paid by the commissioners of the navy, by bills to be made out for the same, and delivered to the importers within twenty days after the discharge or unlading of the ship, in order to be paid in course, upon certificate of the respective chief officers of the customs where imported; to whom a certificate has been produced, under the hands and seals of the governor, lieutenant-governor, or collector of his Majesty's customs, and naval officer, or any two of them, residing within any of his Majesty's said plantations, testifying, that before the departure of the ship, the person lading the same had made oath before them, that the said stores were truly, and bonâ fide, of the growth and produce of his Majesty's said plantations: and with respect to the high bounty on tar, expressing, that it has appeared to them, the persons so certifying, by the oath of the owner or maker of the tar for which such certificate was granted, that the tar herein mentioned was made from green trees, prepared for that purpose after the following manner; that is to say, that when such trees were fit to bark, the bark thereof was stripped eight feet or thereabouts, up from the root of each tree, a slip of the bark, of about four inches in breadth, having been left on one side of each tree; and that each tree, after having been so barked, and stood during one year at the least, and was not before cut down for the making of tar; and that the said tar was made without mixture of any other tar therewith; as likewise upon oath to be made by the master of the ship, at any port in Great-Britain, that the same were shipped within some of his Majesty's plantations in America; and that he knows, or believes, that the said stores were the produce of the said plantations.

* 2 Geo. II. cap. 35. §. 4, 12.

† But the aforesaid certificates of the chief officers of the customs are not to be made out for the premium on pitch, until the same be freed from dirt or dross, nor for any tar that is not fitting to be used for making of cordage, and shall not be freed from dross and water, and unless such pitch and tar be clean, good, merchantable, and well-conditioned.

† 5 Geo. I. cap. 11. §. 16. 2 Geo. II. cap. 35. §. 11.

§ And the said officers of the customs, before they make out such certificates, are to examine the pitch, by opening the heads of the barrels, fawing of the staves in the middle, and breaking the barrels, or by such other means as they shall think proper, to discover whether the said pitch is good and merchantable, not mixt with dirt or dross; and also to examine and search the said tar, to discover whether the same is clean, good, merchantable, well conditioned, and clear of dross or water, and fit for making of cordage.

§ 5 Geo. I. cap. 11. §. 17. 2 Geo. II. cap. 35. §. 11.

II. From North-Britain, commonly called Scotland.

By 2 Geo. II. cap. 35. §. 13. was granted from 29 September, 1729, to 29 September, 1742.

By 13 Geo. II. cap. 28. §. 1. continued to 25 December, 1750.

By 24 Geo. II. cap. 52. §. 1. continued to 25 December, 1751.

By 25 Geo. II. cap. 35. §. 2. continued to 25 March, 1758. And from thence to the end of the then next session of parliament.

Imported from North-Britain to any part of South-Britain.	TREES of twelve inches diameter and upwards, fit for MASTS, YARDS, or BOWSPRIGHTS, regularly converted and hewed at least into eight squares, sound, fresh, and in good and merchantable condition, the ton, allowing forty feet to each ton, girt measure, according to the customary way of measuring round bodies	1 0 0
---	--	-------

* Which premiums are to be paid by the commissioners of the navy, by bills to be made out for the same, and delivered to the importers within twenty days after the discharge or unlading of the ship, in order to be paid in course; upon certificates of the respective chief officers of the customs where imported, to whom a certificate has been produced, under the hands and seals of the comptroller and collector of the customs, and the naval officer, or any two of them, residing at the port or ports of exportation in North-Britain, testifying, that before the departure of the ship, the persons concerned, or employed, (or any two of them) in cutting down the aforesaid trees, had made affidavit in writing, before such comptroller and collector, and naval-officer, or any two of them, that such trees were truly and bonâ fide of the growth and produce of North-Britain; and specifying in the said affidavit, the particular number, quantity, and qualities of the trees, together with the time when they were cut down,

* 2 Geo. II. cap. 35. §. 13.

Of the PRACTICAL BUSINESS of the CUSTOM-HOUSE.

the names of the proprietors, and the places where the same did grow; as likewise upon oath to be made by the master of the ship, at the port of importation in South Britain, that the same were truly laden within North-Britain, and that he knows, or believes, that the said trees were of the growth of North-Britain.

* Persons counterfeiting, or making false affidavits, or certificates, of the growth of the trees, in order to obtain the premium, are to suffer as for wilful and corrupt perjury, and to forfeit 100*l*.

* Collector, comptroller, or naval officer, making false certificates, shall incur such penalties as are directed for like offences, by the act (13 and 14 Car. II. cap. 11.) for preventing frauds, and regulating abuses in his majesty's customs.

* 2 Geo. II. cap. 35. §. 14.

† Masters or owners of ships knowingly importing foreign trees, fit for masts, &c. as of the product of North-Britain, in order to obtain the bounty, are to forfeit 100*l*. together with the ship and furniture.

† 2 Geo. II. cap. 35. §. 15.

From the British plantations and Scotland.

† Upon the landing of the aforesaid stores and trees, the pre-emption or refusal must be offered and tendered to the commissioners of the navy, and if, within twenty days after such tender, they shall not contract for the same, the importers may otherwise dispose of them.

† 2 Geo. II. cap. 35. §. 6, 13.

‡ No fee, gratuity, or reward, may be demanded or taken by the officers of the customs, for the examining, viewing,

5 Geo. I. cap. 11. §. 18. 2 Geo. II. cap. 35. §. 11.

or delivering any of the aforesaid naval stores, or for making or signing certificates, in order to receive the premium, upon the forfeiture of office and 100*l*. and to be rendered incapable of serving his Majesty.

* And if any of the aforesaid naval stores, or trees, shall be again exported, the exporter must, before entry thereof, produce to the collector, &c. of the customs, at the port of exportation, a receipt from the treasurer of the navy, or his cashier, subscribed by his comptroller, or his chief clerk, signifying that the full amount of the aforesaid premium had been repaid to him; on failure whereof, such stores may not be exported; and if such stores are fraudulently exported without repayment of the premium, they are forfeited, and double the value.

* 2 Geo. II. cap. 35. §. 7, 9, 16.

† And if, upon the exportation of the aforesaid stores, doubts shall arise concerning the growth, product, or manufacture, the onus probandi shall lie on the owner or claimer thereof.

† 2 Geo. II. cap. 35. §. 10, 16.

XXIX. Drawback of excise on STRONG BEER, STRONG ALE, MUM, CYDER, and PERRY, made in Great-Britain, exported. 1 Will. and Mar. cap. 22, &c.

XXX. Drawback of excise on SPIRITS DRAWN FROM CORN in Great-Britain, without mixture of any other materials exported. 6 Geo. II. cap. 17.

XXXI. Drawback of the excise on SPIRITS exported. 16 Geo. II. cap. 8.

‡ Not only the payment of these three drawbacks, but the forms and regulations of shipping, being by law required to be performed by the officers of excise, it is unnecessary to describe them particularly here.

OF THE

MATERIAL ARTICLES,

Contained in the SECOND VOLUME of the UNIVERSAL
DICTIONARY of TRADE and COMMERCE.

LETTER L.

- L**ABOUR, remarks political thereon, in relation to the natural price thereof. How taxes on commodities tend to raise the price of labour. The price of labour will fall, when such taxes are annihilated. Invention of compendious arts of workmanship. Of the natural causes of the rise and decay of nations in wealth and power, with regard to the price of labour. The increase of paper circulation in a state naturally tends to raise the price of labour and commodities; and likewise the declension of the state in wealth and power. Annihilation of paper debts, the way to preserve states, by preserving the channels of trade and exportation. The more commercial labour in a state, the richer is that state esteemed. Laws of England in regard to labourers; with remarks since the last war and peace of 1763.
- LACE-MANUFACTURE, its manufacture. Political Reflections thereon. The principal laws of France, in respect to the lace-manufacture. Of the principal laws of England in regard thereto. The allowance on gold and silver lace, thread, and fringe, on exportation. Of the custom-house business on this occasion. Political remarks thereon. The encouragement given to this manufacture in Ireland. Philosophical considerations on the manufacture of gold and silver lace.
- LADING, see BILLS OF LADING.
- LAGAN, or LAGON, what.
- LANCASHIRE, its situation, produce and trade; with remarks relating to Liverpool.
- LANDED-INTEREST. Reason why the decline of foreign trade sinks the value of land. Increase of paper-treasure, argues the decline of trade, and decay of the landed-interest. The effect of land-taxes compared with those upon commodities. Further political remarks. Of the country gentleman's advancement by improving it, and of preserving himself and family, independently on court-preferment; which is ever a precarious dependence, except to but very few, and those few liable to be turned out of their posts and places, on ministerial distractions.
- LAND-CARRIAGE, outward; with regard to duties and taxes of goods for exportation.
- LAND-CARRIAGE, inward; with regard to duties and taxes of goods for importation.
- LAND-WAITER, an officer of the customs. His business; and some laws relating thereto.
- LANRKSHERE, its situation, produce, and trade.
- LANGUEDOC, its situation, produce, and trade.
- LAPIDARY, an artificer. Laws in France relating thereto.
- LAPLAND, its situation, produce, and trade. See NORWAY, SWEDEN, and RUSSIA.
- LAQUE, an artificial preparation for the business of laquered wares. Its preparation of a vegetable colour called laques.
- LAQUERED-WARES, laquers of divers sorts, how prepared.
- LATITUDE, in geography and navigation.
- LAW, as the same regards traders; with suitable remarks thereon.
- LEAD, a metal. Its manufacture from natural ores. Its divers preparations for several uses. Methods of smelting lead at the great works with pit-coal. Ditto with wood-fuel. Of black lead.
- LEAKAGE of liquors, allowance at the customs on the importation thereof.
- LEASE in LAW, what. The calculations of the values of leases; with tables suitable thereto; with remarks thereon.
- LEATHER, of its manufacture from skins of beasts of various kinds; with remarks before and since the last war, and Definitive Treaty of 1763.
- LEATHER-BREECHES-MAKER, his trade.
- LEATHER-CUTTER and CURRIER, ditto.
- LEATHER-DRESSER, ——— ditto.
- LEATHER-DYER, ——— ditto.
- LEATHER-PARER and GROUNDER, ditto.
- LEATHER-SELLER, ——— ditto. The chief laws of England relating to leather. Some laws and regulations in England concerning leather tanned. Remarks on LEATHER-DRESSING in general.
- LEDGER, in regard to the art of accountants. A curious real mercantile transaction, carried on by partnership at several foreign ports; the same stated in the ledger mode, and ballanced by the several parties residing at the several different foreign ports, and all in conformity to each other; with illustrative remarks thereon.
- LEEWARD ISLANDS, their short state, with considerations suitable to the late peace of 1763; shewing the probability of those NEUTRAL ISLANDS, that are thereby annexed to the crown of Great-Britain, turning to our commercial emolument hereafter.
- LEICESTERSHIRE, its situation, produce, and trade.
- LEINSTER, ——— ditto.
- LETTER OF CREDIT, what.
- LETTER-FOUNDER, his employment.
- LETTER OF LICENSE, what, and its form.
- LETTER OF MARQUE, ——— ditto. ——— Laws of England relating thereto.
- LETTERS PATENT, what. The laws relating thereto.

LEVANT-TRADE, its trade in general. The first establishment of the Christian powers therein. The regulations and polity of France with respect to the Levant-trade. An arret of the king's council of state, ordaining that the French ships trading to the ports of the Levant, shall not be liable to those averages which may be necessary to be laid on the payment of the debts and other charges of the nation, but in proportion to the value of the merchandizes wherewith they are loaded, and not according to the tonnage and strength of the shipping. A royal ordonnance, permitting the sheriffs, and deputies of the chamber of commerce at Marseilles, to deliver certificates of residence of the children and relations of the merchants of the province, who chuse to settle in the Levant, provided they were 18 years of age; and also to such women and girls whose husbands or fathers are established in the said ports, to live there with them, 1716. An arret of the royal council in times of war ordains, that upon the merchandize of the Levant, arising by the prizes made during the present war, (1705) and carried into the port of Toulon, there shall be levied 10 per cent. on the value of the said merchandizes over and above the ordinary duties paid on importation. A royal ordonnance, excluding from all public trust and administration, and from the assemblies of the body of the French nation in the ports of the Levant, such French merchants, who shall there marry maids or widows born in the dominions of the Grand Senior; and excludes, likewise, all those who are under 30 years of age, from all public trusts of administration, who shall marry, without the consent of the parents, even any French young women. A royal ordonnance, forbidding all the subjects of France, and others trading in Turkey under their protection, to purchase any thing taken from the Turks by the Maltese corsairs, or by any other, 1718. A royal ordonnance, forbidding all captains of French ships and vessels to embark in the Levant any Frenchman or foreigner, without permission first had and obtained, in writing, from the king's ambassador at Constantinople, or the consuls of the ports, 1719. An arret of the royal council of state, in relation to the establishment of a duty in favour of the chamber of commerce at Marseilles laid upon merchandizes coming from the Levant, charged with the payment of the appointments of the consuls, 1721. An arret of the royal council of state, laying a penalty upon the captains and owners of ships, coming from the Levant to Marseilles, who should misrepresent the weight and quality of the merchandizes wherewith they are loaded, or should not represent them at all, 1722. A royal ordonnance, regulating the appointments that the first deputies of the French Nation are intitled to in the ports of the Levant and Barbary; if, in case of the death or absence of the consuls, they perform the offices of the consular power, 1723. A royal ordonnance, revoking those of the year 1689, 1713, and 1719, and the prohibitions therein contained; in consequence whereof, it permits all Frenchmen residing in the ports of the Levant, Barbary, and Italy, to load merchandizes for their account upon foreign bottoms, 1727. A royal ordonnance, regulating what should be regarded in the ports of the Levant and Barbary, on the part of the Jews, and other foreigners, who shall enjoy there the protection of France, 1727. A royal ordonnance, excluding from the liberty of trading in France, and from the privilege of the body of the nation, such French who shall marry in the ports of the Levant, and the sons of Frenchmen born in the said ports, whose mothers are foreigners, 1728. A royal ordonnance, concerning the patent of health that the captains and masters of ships should take, who traffic in the ports of the Levant and Barbary, 1730. The French king's declaration, signifying that no cabin-boy shall be left in the ports of the Levant and Barbary, 1730. A royal ordonnance concerning the deposits in the chanceries of the consuls of the Levant and Barbary, 1731. Regulations for the imports of consuls and vice-consuls of the ports of Negropont, Covelles, Rhodes, Meteleme, Scio, Milo, Ime, Miconia, 1732. General regulations of the French trade of all the said ports. An arret of the council of state, relating to the merchandizes in pacotilles, as the French term them, which the captains, supercargoes, and passengers carry into the Levant, as well for their own account as for that of the freighters, 1733. A royal ordonnance, forbidding the French merchants to consign directly, or indirectly, merchandizes, fruits, or provisions, to foreigners established in the ports of the Levant, 1735. An arret of the council of state, concerning the imposition of a duty of average of 1 per cent. for 3 years, upon the merchandizes which shall be carried to the ports of the Levant, 1736. A royal ordonnance, permitting French ships to be consigned to merchant strangers established in the ports of the Levant, in case they are entirely freighted by foreigners, 1737. An arret of the council of state, establishing, to commence the 1st of April, 1739, that the duty of averages at importation, the raising of which was ordained by the arret of the 25th of February, 1736, shall be suppressed in all the ports of the Levant of Dec. 1738. On the 18th of January, 1749, an arret was issued for the regulation of policies of insurance passed before the signing

the preliminaries of peace, with regard to ships employed in the commerce of the ports of the Levant, and regulating the premiums to be allowed to the insurers, in these cases mentioned in the arret of the 12th of July, 1748. A royal ordonnance, forbidding all subjects who reside in the ports of the Levant and Barbary to possess themselves of any real estates, 1749; with remarks, shewing that the above are the principal royal arrets, edicts, ordonnances, and declarations issued in France, from the year 1665, by authority, for the occasional regulation of the Levant trade, and the consequences thereof.

LEVANT TRADE, of the regulation of the Dutch, in regard to their commerce of the Levant trade. Of the general nature and circumstances of the Turkey trade in the Levant; with remarks.

LIEGE, its situation, produce and trade.

LIGHT-HOUSES, or **SEA-MARKS**, their nature and use in navigation.

LIMBURG, its situation, produce and trade.

LINCOLNSHIRE, ———ditto.

LINEN, a manufacture. Its great utility throughout the world. In whose hands the linen trade of Europe chiefly lies, to the disadvantage of England; with a series of national political reflections. Of the raising of flax, for the more effectual establishment of the linen manufacture in Great Britain. A summary of the chief laws of England, relating to the linen manufacture. Of the conduct of Ireland, in regard to the linen manufacture, with respect to the linen-board there granting premiums for the encouragement of that manufactory. An account of the quantity and duty of the statuteable and unstatuteable linen yarn, exported out of Ireland to Great-Britain for twenty years. An account of the net quantities of cotton wool imported into Great-Britain for seven years, after deduction of the quantities exported; drawn from the accounts before the committee, in a report to his late Majesty George II. with political remarks on the linen manufacture in general.

LINLITHGOWSHIRE, its situation, produce, and trade.

LINT, with respect to the linen manufacture, in order to render the linen manufacture belonging to these kingdoms complete as the same is in foreign countries, &c. with remarks.

LITHUANIA, its situation, produce, and trade.

LIVES, (annuities on lives). Of the principles whereon such computations are made, with various curious tables thereon, made by several ingenious gentlemen.

LIVONIA, its situation, produce, and trade.

LOADMANAGE, a term in commerce.

LOADSMAN, ———ditto. ——— Laws relative thereto.

LOGWOOD, a wood much used in the art of dying. A representation from the board of trade to his late majesty Geo. I. asserting the right of the subjects of Great-Britain, to cut logwood in the bay of Campeachy, 1717. Political remarks on this article in various lights, before and since the last war and treaty of peace of 1763.

LONGITUDE, its nature and use in the art of navigation, and the difficulties hitherto attending its discovery. Of a new problem for its discovery at sea. Acts of parliament relative thereto. See also **COMMANDERS OF SHIPS** for the same at large.

LORRAIN AND BAR, their situation, produce and trade. See **ALSACE**.

LOTTERY, a public game at hazard, to raise money for the service of the state. Laws of England relating thereto. Lotteries in France. That in England for the purchase of Sir Hans Sloane's curiosities; with remarks on lotteries in general, upon mathematical principles. Of the abuse of lotteries.

LOUISIANA, its situation, produce, and trade; with political remarks thereon, before and since the last war and peace of 1763. Of the Indians in North America; and how to manage them since the large acquisition of territory ceded in North America to the crown of Great-Britain; of present important consideration.

LUBECKERS, of the imperial city of Lubeck. Of their union with other states.

LUXEMBERG, its situation, produce and trade.

LYONNOIS, its ———ditto.

Of the business of the custom-house.

LETTER M.

MACE, its nature and commerce.

MACEDONIA, its situation, produce and trade.

MACHINE, with political remarks thereon, to lessen the price of commodities.

MALT, observations on the manner of MALTING; with philosophical remarks thereon. An abstract of acts of parliament thereon; together with the nature of the excise business respecting this article; and also the business of the customs, relating to the exportation of malt.

MAN,

- MAN, (ISLE OF MAN)** its situation, produce, and trade; with political remarks with respect to the smuggling trade carried on at the Isle of Man before its being annexed to the crown of Great-Britain. Reason before its being annexed to the crown of Great-Britain, given in this work above 10 years before it was so annexed, furnished to the author by that worthy patriot, the present chamberlain of London, Stephen Theodore Janssen, Esq;
- MANUFACTURERS.** English laws relating to them; with political remarks for their encouragement in Great-Britain. The system of Spain to advance their manufactures of every kind, as published in this work before the last war, and Definitive Treaty of 1763; with other political remarks in divers useful lights. An abstract of an act of parliament for the effectual punishing of persons convicted of seducing artificers in the manufactures of Great-Britain or Ireland, out of the dominions of the crown of Great-Britain or Ireland, into foreign parts; and for the more easy and speedy determination of appeals, allowed by another act, &c.
- MANURE,** for land; with philosophical remarks thereon. Of political remarks thereon, tending to the better cultivating of the lands of Great-Britain and Ireland, in order to render labour and commodities cheaper than they are; with considerations incorporated regarding the landed interest. Also other political remarks on the whole of our article MANURE, and cultivating additional quantities of land, so as to render the necessities of life cheaper, in order to cheapen labour, and the price of English commodities in general, for the benefit of foreign commerce.
- MAP,** its use in geography; with political remarks on this article before the last war and peace of 1763, relative to the perfidious designs of France to strip us many years ago of our rights of possession in North America in particular; of which the author of this work apprized the nation before the late war; also political remarks since the last war and Definitive Treaty of 1763.
- MARBLE,** its nature and quality, and use in buildings.
- MARCASITE,** a mineral; its nature, quality, and use; with proper remarks thereon, in order to make them turn to the best advantage on landed estates.
- MARINERS,** how governed in a maritime country by the antient sea law, as those of Rhodes, Oleron, and Wisby; see those articles, as well as according to the English laws; with variety of cases litigated and determined in our courts of justice. Of the admiralty laws relating to these people. See ADMIRALTY.
- MARITIME AND MARINE AFFAIRS, AND MARINE TREATIES.** See MARQUE, (LETTERS OF MARQUE) MASTERS OF SHIPS, NAVAL AFFAIRS, PILOTS, PORTS, AND HAVEN; PIRACY, PRIZES, QUARENTINE, SALVAGE, WRECKS; with other articles therefrom referred to. A marine treaty between the States-General and the city of Lubeck, 1613. A marine treaty between the United Provinces and the Hanse Towns, 1615; with political remarks thereon of divers kinds. Also variety of maritime forms, and articles of several natures; with occasional illustrative explanations. Treaty between the states of Holland with the towns of Bremen and Hamburgh, in the year 1645. Another between the king of Denmark and the States-General. Another maritime treaty between the crowns of Sweden and Denmark. A form of a general maritime passport for a Swedish ship laden with Swedish goods, &c. A form of a certificate to be given to the Swedish ships, laden partly with Swedish, and partly with foreign goods, &c. with explanatory and political remarks, 1645. Another treaty between the States-General and Denmark, 1647; with a model for measuring the ships according to the measure of Amsterdam. A manifesto published by the Parliament of England against the States-General of the United Provinces in the year 1652, severe against the Dutch. An abridgement of the manifesto of the States-General against the nation and government, &c. of England, given at the Hague, 1652; which ended in a declaration of war, and was followed by a treaty between the States-General and the king of Denmark; which promoting a good understanding between the Dutch and the Danes, there was another treaty concluded between those two powers at Copenhagen in the year 1653. An abstract of a treaty of peace and union between Oliver Cromwell, as protector of England, and the United Provinces of the Low-Countries. A marine treaty between king Charles II. after his restoration to his dominions, and the States-General of Holland; in which all former differences are composed, &c. in 1667. The same time was concluded another treaty concerning marine affairs; which was the forerunner of that of February, 1667-8. Article touching navigation and commerce, between king Charles II. and the States-General, concluded at the Hague in February, 1667-8. Form of the certificate that ought to be given by those that have the ordinary power of the admiralty of England, to the ships and vessels that go out thence, according to the said treaty; with other requisite forms on both sides relative to carrying the same into execution. After this treaty for affairs in Europe, another was set on foot, and agreed to, for regulating their naval affairs all over the world, &c. the substance of which we have given; with various necessary forms concerning the same. A marine treaty between king Charles II. and Lewis XIV. king of France in 1676-7; with the form requisite on this occasion, and proper remarks.
- MARLE,** for the manuring of land; with philosophical remarks.
- MARQUE, (LETTER OF MARQUE)** what, their nature and authority. Laws of England concerning the same; with some curious cases determined in our courts of judicature, on laws relative to litigations on this point.
- MASTERS OF SHIPS,** mercatorial laws and usages relating thereto. With divers useful cases of dispute settled by our courts of law concerning them.
- MATHEMATICS,** how far they may be useful to those who would understand the practice and theory of trade; and of general use and advantage, in the several lights represented; with pertinent remarks of several kinds.
- MEASURES AND WEIGHTS,** as well relative to foreign countries as our own; with proper tables and computations.
- MECHANICAL ARTS,** the great commercial utility of mechanic arts to the states; with suitable remarks thereon in divers lights.
- MECKLENBURGH, OR MECKLENBOURGH,** its situation, produce and trade.
- MEDALS,** of the traffic therein in divers parts; with political remarks made of them in France to commemorate the great epochas of their commercial advancement in the reign of Lewis the XIVth and the present French king; with remarks also since the late war and treaty of peace of 1763.
- MEDITERRANEAN,** its situation and extent; with remarks relative to the important advantages derived to Great-Britain from the possession of Gibraltar, and shewing why that territory and fortrefs ought never to be given up to any power whatsoever, if we would preserve the Mediterranean trade; also other political remarks on this article. Likewise of the business of the custom house relating to the MEDITERRANEAN COMMERCE.
- MEDITERRANEAN PASSES,** our laws relating thereto.
- MELLI,** its situation, produce, and trade.
- MENSURATION,** its usefulness in several branches of trade. With practical cases of computation concerning the same, in artificers works of divers kinds; as carpenters work, bricklayers work, plaisterers work, masons work, glaziers work, painters work; also the use of the carpenter's rule, and the sliding-rule in mensuration.
- MENTZ,** its situation, produce, and trade.
- MERCANTILE ACCOUNTANT-SHIP,** the whole art succinctly delineated.
- BRITISH MERCANTILE COLLEGE,** shewing the necessity of establishing a mercantile college in Great-Britain for the education of young British merchants better than they usually are; with a plan for that purpose. Another plan laid down for the due execution of the former. Of the dignity of the British merchant, and the consequences of this intended new college to the public.
- MERCHANT-COURT, OR COURT-MERCHANT,** of the nature of such an institution for the summary decision of mercantile personal controversies. Of the merchant's court in the city of Rouen in France.
- MERCURY,** a mineral, its nature and quality; with philosophical observations thereon.
- MERIONETHSHIRE,** its situation, produce, and trade.
- METALLURGY,** the art of, described; with remarks philosophical.
- METALS,** their nature and quality philosophically described. Of fictitious metals; with proper remarks.
- MEXICO, (OLD MEXICO)** its situation, produce, and trade; with remarks particularly respecting the right of British subjects to the cutting of logwood in the bay of Honduras; also political remarks made before and since the last war and treaty of 1763.
- MIDDLESEX,** its situation, produce, and trade; with suitable remarks before and since the last war and Definitive Treaty of 1763.
- MILAN,** its situation, produce, and trade.
- MINERAL,** described philosophically; with remarks.
- MINERAL WATERS,** their nature, use, and their trade.
- MINEROLOGY,** concerns the discovery of mines; with philosophical explanations, and suitable remarks. Of the deceits and impositions of miners, and others, often in league with them. Of the generation of mines; with interesting remarks to those concerned therein.
- MINORCA,** its situation, produce, and trade; with political remarks.
- MISSISSIPPI,** its situation, produce, and trade; with remarks before the last war and the Definitive Treaty of peace in the year 1763; also political remarks since the last war and peace of 1763.
- MODENA,** its situation, produce, and trade.
- MOGUL EMPIRE,** see INDOSTAN.
- MONEMUGI,** its situation, produce, and trade.
- MONEY,** the origin of money; with political remarks thereon.
- MONIED INTEREST,** or the stockholders of this kingdom; with suitable remarks thereon, both before the last war and peace of 1763, and since the said peace.

MONMOUTHSHIRE, its situation, produce, and trade.
 MONOMOTOPA, its situation, produce, and trade; with remarks.
 MONOPOLIES, their nature. Our laws relating thereto, and origin of those trading ones in this kingdom; with political remarks thereon.
 MONTFERRAT, its situation, produce, and trade.
 MONTGOMERYSHIRE, ———ditto.
 MONTSERAT, see BRITISH AMERICA.
 MORAVIA, its situation, produce, and trade.
 MOROCCO, its situation, produce, and trade; with remarks thereon. Of the union of the Christian powers to extirpate the piratical states.
 MORTALITY, (BILLS OF MORTALITY) with respect to annuities on lives and leases, &c. with various useful tables relating thereto; with cases exemplifying the same.
 MOSKITO COUNTRY, its situation, produce, and trade.
 MUNSTER, ———ditto.
 MUSÆUM, BRITISH, with political remarks thereon.
 The practical business of the custom-house continued at the end of Letter M.

L E T T E R N.

NAPLES, its situation, produce, and trade; with political remarks. Of Sicily in particular; with remarks also.
 NATIONAL ACCOUNTANTSHIP, an idea thereof, for people of distinction.
 NAVAL AFFAIRS, their importance to the British empire, and their short History; with remarks, shewing how the French regard their naval affairs. Further remarks thereon before the last war and peace of 1763. And likewise remarks interesting since the last peace of 1763.
 NAVAL STORES, with political remarks thereon, before and since the Definitive Treaty of 1763.
 NAVIGATION, the practical arts thereof; with the Rev. Mr Richard Locke's universal problem for the discovery of the longitude at sea. See COMMANDERS OF SHIPS, and LONGITUDE. The principal Laws of England enacted for the promotion of trading navigation. A memoir that may be necessary to be referred to occasionally, containing an account of all the foreign shipping which entered in at the several ports of England, set forth in columns, under the title of the nation or state to which they belong, for two several years, ending at Christmas 1743, and 1747, and one year ending at Lady-day 1749; which is one year before the last French war but one, one year in the war, and one year after that war, or the peace of Aix-la-Chapelle, made in 1741.
 NEGROLAND; see AFRICA, ENGLISH AFRICAN COMPANY, ANTILLES ISLANDS.
 NETHERLANDS, (or THE UNITED PROVINCES OF THE NETHERLANDS) of their commerce; with interesting political remarks before the last war and peace of 1763; and likewise remarks since the said peace of 1763.
 NEUFCHATEL, its situation, produce, and trade.
 NEVIS; see BRITISH-AMERICA.
 NEUTRAL ISLANDS; see LEEWARD ISLANDS.
 NEW-CASTLE; see CASTLE.
 NEW-ENGLAND; see ditto.

 NOTARY-PUBLIC, an idea of his profession, with remarks.
 NOTTINGHAMSHIRE, its situation, produce, and trade.
 NOVGOROD, ———ditto.
 NOYONNOIS, ———ditto.
 VOL. II.

NUBIA, its situation, produce, and trade.
 NUTMEG, its nature and commerce; see LEEWARD-ISLANDS.
 The business of the custom-house continued.

L E T T E R O.

OAK, its nature and growth; with remarks.
 OATHS; of custom-house oaths obliged to be taken by traders, with remarks; see also our article AFFIDAVIT, with remarks.
 OFFICERS OF THE CUSTOMS, the several kinds thereof, and the nature of their respective employments, in conducting the system of the customs.
 OIL, of various sorts, their nature and quality.
 OIL (OLIVE-OIL) how produced.
 OIL OF SWEET-ALMONDS, how produced.
 OIL, (TRAIN-OIL) ———ditto.
 GALLIPOLI-OIL, for the woollen manufacture.
 OLDENBURGH, its situation, produce, and trade.
 OLERON, and OLERON LAWS OF NAVIGATION and COMMERCE, in effect throughout Europe; their use in mercantile affairs; with illustrative observations thereon.
 ORCADES, their situation, produce, and trade.
 ORDNANCE; see ARTILLERY.
 ORES, their nature, quality, use, and management. See MINERAL, MINEROLOGY, METALLURGY, ASSAY, COPPER MINES, LEAD, TIN, IRON, MERCURY, SILVER, GOLD, FLAX, METALS, MINES, MINING, SMELTING.
 ORIENTAL-TRADE; see LEVANT-TRADE also; with reflections on the expediency of laying the Turkey-trade open; with remarks.
 ORLEANS, its situation, produce, and trade.
 OSTEND; see AUSTRIAN NETHERLANDS.
 OSTEND EAST-INDIA COMPANY, its rise and fall; with political remarks.
 OVERSIL, its situation, produce, and trade.
 OYSTERS; of the generation and ordering of green oysters, or Colchester-oysters; the laws of England in regard to oysters.
 The laws and business of the customs with respect to this Letter O, in its alphabetical order.

L E T T E R P.

PACKERS, the nature of their employment.
 PAINTERS, ———ditto.
 PAINTING, considered as an art; the qualifications requisite to form a good one; with suitable remarks.
 PALATINATE OF BAVARIA, its situation, produce, and trade.
 Ditto ———of the RHINE, ———ditto.
 PALESTINE, ———ditto.
 PAPER, a manufacture; of what and how made, of various kinds; with philosophical remarks: of the PAPER-TREE, with political remarks: of the French regulation of the paper-trade.
 PAPER-CREDIT, what meant by it; with political remarks before the last war and peace of 1763, and since the said peace.
 PAR, what, in matters of commerce.
 PARAGUAY, its situation, produce, and trade; with political remarks before and since the last war, and peace of 1763.
 PARAYBA, its situation, produce, and trade.
 PARCHMENT, a manufacture, how made.
 PARLIAMENT, the nature and constitution of the British parliament; and an idea of the method of proceeding therein on public affairs. The names of counties, cities, corporations, borough-towns, and stewarts in Great-Britain; with the knights, commissioners of shires, citizens and burgesses, chosen in each to serve in parliament. A scheme of the proportions the several counties in England paid to the land-tax in 1693, and to the subsidies in 1697, compared with the number of members they send to parliament.
 MEMBER OF PARLIAMENT; of his importance, and his accomplishments necessary to enable him to become properly useful in his senatorial capacity. An act of parliament made in the third year of the reign of his present majesty Geo. III. relating to bankrupts being intitled to the privilege of parliament, and becoming insolvent.
 PARTNERSHIPS, in trade; some cases determined in our courts of judicature respecting the same.
 PARMA, its situation, produce, and trade.
 PASSPORT, SAFE-CONDUCT, and PROTECTIONS; the nature and laws relative thereto; with the forms of English and foreign passports to shipping.

I N D E X.

PATENTS, what; with the laws of England concerning them; with cases in law determined thereon; with political remarks on this article patents.

PEARLS, a species of precious stones; where found; of artificial pearls; to imitate fine oriental pearls; to blanch and cleanse pearls.

PEDLAR, who; with remarks thereon.

PEGU, its situation, produce, and trade; with remarks thereon relating to the East-India trade.

PEMBROKE-SHIRE, its situation, produce, and trade.

PENNSYLVANIA, its situation, produce, and trade; with remarks in various lights before and since the last war and Definitive Treaty of 1763.

PEOPLE, considered in political lights.

PERSIA, its situation, produce, and trade. A summary of the commerce thereof; with their monies, weights, measures, &c.

PERU, its situation, produce, and trade; with political remarks.

PERUVIAN-BARK, a valuable drug in medicine; with philosophical observations.

PETTY-CUSTOMS, or **ALIEN'S DUTY**, paid at the custom-house, what, and how.

PEWTER, a factitious metal, how made, and its qualities.

PHARMACY, an art; its nature, and kinds; with a succinct account of the whole art, illustrated by suitable experiments.

PHILIPPINE-ISLANDS, their situation, produce, and trade.

PHOENICE, its situation, produce, and trade.

PHILOSOPHY EXPERIMENTAL, with remarks on its general utility in arts, manufactures, and commerce.

PHILOSOPHICAL CHEMISTRY, its particular utility in arts and trades.

PICARDY, its situation, produce, and trade.

PIEDMONT, its——ditto;——with remarks.

PILCHARD, a fish wherein there is a large trade; their nature and cure.

PILOT of a ship; regulations and laws relating thereto. Of pilots in Spain.

PITCH AND TAR, their production and use; see **NAVAL STORES**.

PLANTATIONS; of those belonging to Great-Britain; our laws relating thereto: a proclamation for ascertaining the currency of the foreign coins in the plantations. Remarks on this article before the last war and peace of 1763, and since the said peace; with additional remarks on the constant perfidy of France, which we ought never to forget.

PODOLIA, its situation, produce, and trade.

POITOU,——ditto.

POLAND,——ditto;——with remarks before and since the last war and Definitive Treaty of 1763, while the choice of a king of Poland was depending.

POLITICAL ARITHMETIC, its usefulness in regard to matters of trade and commerce, and the general promotion of the national interests.

POMERANIA, its situation, produce, and trade.

POOR; a scheme for setting the poor to work; of the wise regulation of the poor in the United Provinces; with illustrative observations: also general remarks on the article poor.

PORCELAIN, a manufacture, philosophically treated. The method of giving a lustre to the gold laid on porcelain; the different kind of varnishes and colours given to the porcelain; the method of preparing these varnishes and colours: new designs of porcelain works; manner of embossing porcelain. Of the Saxon porcelain, with remarks.

PORTO-RICO; see **ANTILLES ISLANDS**.

PORTS, places appointed for the lawful exportation, or importation of merchandizes; those belonging to England.

PORTUGAL, its situation, produce, and trade. Of the monies, weights, and measures: the exchanges of Portugal with other the chief parts of Europe, exemplified with variety of computations; with interesting observations. Of the unjustifiable treatment our British merchants have experienced in Portugal for several years past, in divers respects. Of the dependency of Portugal on Great-Britain; notwithstanding which, they have insulted Great-Britain again by the late institution of the general company for the culture of the vineyards of Alto-Duro, in the kingdom of Portugal; with political remarks since the late war and treaty of peace of 1763.

PORTUGUESE AFRICAN-TRADE, with remarks.

PORTUGUESE AMERICA, its situation, produce, and trade; with suitable remarks.

PORTUGUESE EAST-INDIA COMPANY, its situation, produce, and trade.

POSTAGE OF LETTERS; short history of that establishment, with the laws relating thereto.

POT ASH, their manufacture, use, and commerce; with remarks since the last war and Definitive Treaty of peace, 1763.

POTTERY, an art; with philosophical remarks and experiments thereon.

PRINTING OF BOOKS, its origin and progress.

PRINTING OF CALLICOES; see **CALLICOE PRINTING**.

PRINTING FROM COPPER-PLATES, the method: instructions for limning and colouring prints, maps, &c. with

water-colours, &c. Of fine collections of prints; with remarks.

PRISAGE AND BUTLERAGE, a duty of customs; the laws concerning it; some law cases thereon determined in our courts of judicature.

PRIVATEERS AND PRIZES, their nature, regulations, and laws relating thereto; with some cases concerning them adjudged in our courts of law. An order of council to release ships, and exempt them from molestation by men of war and privateers. Laws of France relating to prizes. Of their regulations in Spain.

PROJECTORS, their use and abuse; with a short history of various remarkable ones; with pertinent remarks on the whole.

PROVENCE, its situation, produce, and trade.

PRUSSIA, its situation, produce, and trade; with remarks thereon before and since the last war and the Definitive Treaty of peace of 1763.

The business of the custom-house continued from letter O.

L E T T E R Q.

QUACK, in medicine; a short antidote against general quacks, who are ignorant of the rational practice of physic; with remarks.

QUARANTINE, what, and how regulated by the laws of England, &c.

QUARRY of stone, &c. philosophically represented; with suitable remarks.

Of the business of the custom-house continued.

L E T T E R R.

RADNORSHIRE, its situation, produce, and trade.

RAISINS, a fruit; their use and trade, in divers articles, experimentally given, and illustrated.

RASBERRY, a curious wine made thereby.

RATTEEN, or **RATTEN**, a manufacture.

REFINING; the art of refining, as applied to metallurgy. Of refining gold and silver, and other metals.

REGISTER-SHIPS OF SPAIN, what are called so, trading to the Spanish West-Indies; how regulated.

REMITTANCES of monies to distant parts; how this business is carried on and regulated, according to the best arts of mercantile accountanthip curiously represented; with further explanatory remarks.

REPRIZALS, what, and how regulated by law.

REVENUE; of raising the revenue of England from the conquest to the revolution in 1688, in every reign; with remarks upon each coin in each reign; with general remarks on the article revenue, with respect as well to the state of the civil and religious liberty of the nation, as to its trade and commerce; with political remarks on the value of money heretofore, and now, at the end of this article.

RHODIAN LAWS, of commerce and navigation, in esteem throughout Europe. Of the naval law and statutes of the Rhodians; with illustrations. Political remarks thereon.

RHUBARB, its nature, quality, and use, in various preparations and respects.

RICE, its growth, product, and use; with political remarks thereon. An act of parliament to carry rice from Carolina directly to any part of Europe southward of Cape Finesterre, in ships built in, and belonging to, Great-Britain, and navigated according to law, to the year 1767.

RIVERS; of encreasing our navigable, inland rivers, in order to lessen the rate of carriage; with political remarks thereon.

ROADS; of their improvement, for the benefit of carriage of merchandize over the nation; containing political remarks thereon.

ROMAGNA, or **ROMANIA**, its situation, produce, and trade.

ROMANIA, **RUMELIA**, or **RUMELI**,—ditto.

ROYAL EXCHANGE, an idea thereof in general; with remarks concerning the conduct of traders in general: also political remarks in other lights, respecting what has been done for the advancement of trade and commerce since the present royal family came to the throne of these kingdoms.

ROYAL SOCIETY OF LONDON; of its first institution; with political remarks on its important utility to the trade and navigation of the British empire; an idea of all societies, peculiarly adapted to the general improvements of all the commercial arts. Further remarks on the greater utility of the Royal Society to arts, manufacture, and trade, than it ever has been. Of the progress of the society for the encouragement of arts, manufactures and commerce; with political observations.

RUM,

RUM, a spirituous liquor, its quality and use; see **SUGAR COLONIES**.

RUSSIA, its situation, produce, and commerce. Of their monies, weights, and measures.

RUSSIA-COMPANY, its short history. Of the British Caspian trade, as it was attempted to be carried on through Russia to Persia. A view of the British trade and factory at St. Petersburg in Russia. Observation on the Russian Coin. Russia considered with relation to the other principal states and empires; with political remarks since the last war and treaty of peace of 1763.

RUTLANDSHIRE, its situation, produce, and trade. The business of the custom-house continued.

L E T T E R S.

SAIL-MAKER; of his trade.

SAILOR; see **SEAMEN**.

SALT, its natural history; of preparing the same, of divers kinds, for use and trade.

SALTERS, their trade.

SALT-PETRE, its natural production; its purification; of gathering it in quantities.

SALVAGE, a mercantile term; laws relating thereto.

SAMOGITIA, its situation, produce, and trade.

SARDINIA, its situation, ditto; with political remarks.

SAVOY, its situation, produce, and trade.

SAXON-GREEN COLOUR; method of dying white cloth of that colour.

SAXONY, its situation, produce, and trade.

SAY; see **ASSAY**, in refining.

SAY, or **SAYE**, a manufacture.

SCILLY, its situation, produce, and trade.

SCLOVONIA, ditto.

SCOTLAND, ditto. Memoir of the Bank established in Scotland. Substance of the warrant of the charter erecting the Royal Bank of Scotland. Account of linen-cloth or sale, stamped in Scotland for several years; and of the whole commerce of Scotland; with remarks of various kinds; of their weights and measures.

SEA-DOMINION in general; with interesting political considerations; with suitable remarks.

SEA, BRITISH; the right to the sovereignty of the British seas asserted and proved; with political observations relative to the commercial union of Great-Britain and the United Provinces; with other considerations relating to the author and his endeavours to serve the British empire, and the ill treatment he has met with; with interesting political remarks.

SEAMEN, their importance; of the great national inconvenience we labour under for seamen in times of war; with methods to prevent them; a proposal of another kind for that purpose; with suggestions for a register of seamen; with further suitable remarks. Laws relating to seamen.

SHIP-BUILDING; see **ARCHITECTURE-MARINE**.

SHIPPING; dimensions, tonnage, and number of guns of some men of war built in Spain, the Indies, France, England, and Genoa; and the rules of the Spaniards, French, English and Dutch, in regard to their mariners. Of the royal marine of France in general; with interesting notes thereon; with remarks regarding the lasting security and glory of the British empire.

SHROPSHIRE, its situation, produce, and trade.

SIAM, ditto; with political remarks.

SIBERIA, its situation, produce, and trade; with political remarks: a short account of the many attempts made for the discovery of a north-west passage; of the north-east passage.

SCILLY; see **NAPLES**.

SILESIA, its situation, produce, and trade; with remarks.

The duke of Newcastle's letter, by his late majesty's order, to Mons. Mitchell, the king of Prussia's secretary of the embassy, in answer to the memorial, and other papers delivered by Mons. Mitchell to the duke of Newcastle, on the 23d of November and 13th of December, 1753; with the report of Dr. Lee, Dr. Paul, D. Ryder, and W. Murray, concerning a dispute between his Prussian majesty and his Britannic majesty, concerning interruption given to the navigation of Prussian subjects; well worthy of future attention.

SILK-WORMS; memoir upon breeding silk-worms in France, and all other climates where mulberry-trees can be cultivated. Some methods used in France to render silk abundant, and of good quality. Remarks upon the different soils and qualities of the trees. Of the lodging of silk-worms; with remarks thereon, before the last war and treaty of 1763, and since that war and the said treaty.

SILK MANUFACTURE OF CHINA: an act of parliament for repealing the duties payable on China raw silk, and for granting other duties in lieu thereof, made in the year 1750. An act of parliament for encouraging the culture of raw silk in his Majesty's colonies in America; with remarks. An act for encouraging the silk manufactures of this kingdom, and for securing the duties payable upon the importation of velvets, wrought silks, and silks mixed with other materials, not manufactured in Great-Britain; with remarks. An act for explaining, amending, and rendering more effectual an act in the 19th year of the reign of king Henry the VIIth, intitled **SILK-WORKS**, which took place after the 24th of June, 1763.

SILVER; see **METALLURGY, METALS**; with proper remarks. Tables of gold and silver, composed by Mr Lowndes, who inspected the original indentures, and from bishop Fleetwood.

SKIE, its situation, produce, and trade.

SKINS, their various sorts, and trade; with remarks since the last peace of 1763.

SLAVE TRADE; see **AFRICAN-TRADE, &c. &c.**

SLESWIC, or SOUTH-JUTLAND, its situation, produce, and trade.

SLIGO, its situation, produce, and trade.

SMELTING, what, and how performed amongst metallurgists; with illustrative observations on the operations.

SMOLENSKO, its situation, produce, and trade.

SMUGGLER; an abstract of the chief laws against smugglers.

SMUGGLING; anecdotes on smuggling in the Isle of Man. Other observations on the present state of the Isle of Man. Remarks concerning the annexing the Isle of Man to the crown. A memorial of the merchants and owners of ships in the port of Whitehaven, addressed to the lords of the treasury. Annual revenue of the Isle of Man to the proprietor. Further remarks on smuggling before the last war and peace of 1763. Also remarks since the last peace of 1763, extracted from the judicious tract lately published by the present chamberlain of London, Stephen Theodore Janssen, Esq;

SOAP, its manufacture, with political remarks.

SOISON NOIS, its situation, produce, and trade.

SOMMERSETSHIRE, ditto.

SOUTH-SEA COMPANY, its short history. Of the South sea year 1720, with the schedule of the directors' respective estates, with their respective allowances for their subsistence, and the sum taken from them; with remarks. Treaty concluded at Madrid, 1750, with regard to the assiento and annual ship. See **ASSIENTO CONTRACT**.

SPAIN, its situation, produce, and trade in Europe. Articles of peace, commerce, and alliance between the crowns of Great-Britain and Spain in the year 1667; with remarks thereon. Of the foreign exchanges of Spain with the principal parts of Europe, exemplified with various computations, familiarly explained.

SPANISH-AMERICA: of the conquest of Spanish-America at first. The manner of the sailing of the galleons and flota from Old Spain. A treaty between England and Spain in 1760; with general remarks on this article Spain before, and since the last war and Definitive Treaty of 1763.

STAFFORDSHIRE, its situation, produce, and trade.

STOCK-JOBBER; laws relating thereto. Reasons why stock-jobbing is detrimental to the trade of the nation. The injurious effects of stock-jobbing, with regard to the public credit.

SUBSIDY, a tax; those at the custom-house described. Of the subsidies of 1747 and 1759.

SUFFOLK, its situation, produce, and trade.

SUGAR, its production and manufacture. Of various sorts of sugar: **SUGAR COLONIES**. Remarks before the last war and peace of 1763, and since that peace; with the act of parliament for granting liberty to carry sugars from the British colonies, of the product of the said colonies, from thence directly to foreign parts. Of the duties on rum, &c.

SURRY, its situation, produce, and trade.

SUSSEX, ditto.

SWABIA, ditto.

SWEDEN, ditto; the exchanges thereof. Of the Swedish East-India company.

SWITZERLAND, its situation, produce, and trade. Of its exchanges.

Of the business of the custom-house continued from letter R.

L E T T E R T.

TAPESTRY, a manufacture: of curious improvements made therein. Of the upright way of working tapestry, with relation to Turkey-carpets, with remarks political.

T A X E S.

TAXES; summary of the total yearly supplies, granted by parliament, during the reign of king William and Mary, and William III. Queen Anne, king George the 1st, and king George the 2d. Summary of the total ways and means yearly of the said reigns; with remarks on the several forementioned reigns from the revolution in 1688, to the demise of Geo. II. Remarks on the state of trade and liberty since the revolution in 1688; with the coinage in each reign.

TEA; see the article **BOHEA**, describing the various sorts thereof, and their quality; with political remarks on lowering the duty thereon, designed by the present chamberlain of London, to his great honour, and to the benefit of the revenue above six millions of money; also to the advantage of the East-India company, by increasing their sale of teas, and preventing smuggling of foreign teas into the kingdom.

TIN, a metal; with remarks.

TOBACCO, its manner of planting and production; with pertinent remarks thereon.

TRADE; this article contains variety of maxims, which should seem to be confirmed in the course of this work, deserving notice. Remarks on this article trade, since the last war, and the Definitive Treaty of peace of 1763.

TREATIES OF COMMERCE: treaty of navigation and commerce between the late queen Anne and Lewis XIV. of France, concluded at Utrecht, 1713. Treaty of navigation and commerce between Great-Britain and Spain in 1713. Measures taken by king George I. to remedy some of the defects of the said treaty of Utrecht. Treaty of commerce between Great-Britain and Spain in the year 1715. Treaty of commerce between Queen Anne and the king of Portugal in the year 1703. A declaration and engagement concerning the rights and privileges of the British merchants in the kingdom of Sicily made at Utrecht in 1712-13. Treaty of amity, commerce, and navigation, between Great-Britain and Russia, concluded at St. Petersburg in the year 1734. Treaty between Geo. II. and the emperor of Morocco, in 1728: ditto in the year 1751: other treaties between the same: ditto between Great-Britain and the Algerines: ditto between Great-Britain and the Tunisians: ditto between Great-Britain and Tripoly. The privileges of an Englishman in the kingdom of Portugal, contained in the treaty of peace concluded by Oliver Cromwell; and various laws, decrees, &c. at sundry times, and divers occasions, made by the kings of Portugal, in favour of the English nation: to which is added, the king of Portugal's new law, concerning diamonds found in the Brazils.

TURKEY-COMPANY AND TRADE, with remarks thereon. A memorial of the deputies of the trading towns in the west of France, concerning the commerce with the Levant, and goods used in that trade; and why Marseilles alone has the privilege of trading thither. Reply of the deputies of the western ports of France to the preceding. A memorial of the deputy of Marseilles, in answer to the foregoing, setting forth the reason of the privilege which Marseilles enjoys of trading to the Levant. A rejoinder to the foregoing; with remarks on the whole.

The business of the customs continued from the end of letter S.

LETTER V.

VENICE, its situation, produce, and trade. Of the foreign exchanges of Venice, with respect to the chief parts of Europe, arithmetically exemplified and illustrated. Of the weights and measures. Of the Bank of Venice.

VIRGINIA, with remarks thereon before the last war and peace of 1763; and remarks since the said peace of 1763.

UNITED PROVINCES OF THE STATES-GENERAL. Political considerations thereon, very interesting.

The business of the custom-house continued from letter T.

LETTER W.

WAR. This article, as the same stood from the commencement of the first edition of this work; just after the peace of Aix-la-Chapelle, in 1748; containing some principles relating to the conduct of war in this trading nation, as the same is circumstanced; with the measure necessary to be taken for the security of our colonies in North-America; with political remarks hereon before the last war and treaty of peace of 1763; and also remarks since the last war and treaty of peace of 1763, very interesting.

WARWICKSHIRE, its situation, produce, and trade.

WEIGHTS; foreign weights compared.

WESTMORELAND, its situation, produce, and trade.

WESTPHALIA, ——— ditto.

WETTERAW, ——— ditto.

WILTSHIRE, ——— ditto.

WINE, a liquor; with political remarks.

WISBY LAWS; ancient laws of commerce and navigation in esteem throughout Europe.

WOOL, and **WOOLLEN MANUFACTORY**. Observations to prevent the smuggling of British and Irish wool to France and elsewhere; with political remarks. An act for permitting the exportation of wool, and woollen yarn, from any port of Ireland to any port in Great-Britain.

WORCESTERSHIRE, its situation, produce, and trade.

WRECK; mercantile laws relating thereto; with suitable remarks.

Of the practical business of the custom-house continued.

LETTER X.

XYLO-BALSANUM, a curious medicinal drug.

LETTER Y.

YEAST; a method of curing it; the flowers of wine, and wine-lees, for the service of distilling, wine-making, vinegar-making, &c. with remarks.

YORKSHIRE, its situation, produce, and trade.

LETTER Z.

The practical business of the custom-house continued.

A Concise explanation of the contents of Mr. Saxby's portable book of rates referred to in this work, in relation to the business of the customs, and the chief acts of parliament contained therein.
